EXHIBIT "B-1"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pacific Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate a section of said highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Highway Commission is authorized to take fee title to said real property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way purposes for use in connection with the proper relocation, construction, and maintenance of the Canyonville-Johns Section of the Pacific Highway the following-described real property, to-wit:

Parcel No. 1:

A parcel of land lying in the Jackson Reynolds D.L.C. No. 58, also being in the North half ($N\frac{1}{2}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 34, Township 30 South, Range 5 West, W.M., Douglas County, Oregon, and being a portion of that property conveyed by that deed to Delbert D. Norlund, et al., recorded in Book 109, Page 259, of Douglas County Records of Deeds; the said parcel being that portion of said property included in a strip of land of variable width lying on the easterly side of the center line of the Pacific Highway as said highway has been relocated, which center line is described as follows:

Beginning at Engineer's center line Station 80+30.69, said Station being 2267.5 feet north and 2117.9 feet west of the southeast corner of said Section 34, Township 30 South, Range 5 West, W.M.; thence on a spiral curve left (the long chord of which bears South 49° 45' 45" East) 500 feet; thence South 53° 05' 45" East 9.18 feet; thence on a spiral curve right (the long chord of which bears South 50° 05' 45" East) 400 feet; thence on a 1273.24 foot radius curve right (the long chord of which bears South 41° 50' 45" East) 100 feet; thence on a spiral curve right (the long chord of which bears South 33° 35' 45" East) 400 feet to Engineer's Station 94+39.87. The easterly line of said strip of land intersects the westerly line of said property approximately opposite Station 81+65 and again approximately opposite Station 89+57.

(cont.)

EXHIBIT "B-1" (cont.)

The widths in feet of the strip of land above-referred to are as follows:

Station to Station		Width on easterly Side of Center Line
80+30.69	85+30.69	200
85+30.69	94+39.87	250

The parcel of land to which this description applies contains 2.64 acres.

Parcel No. 2:

A parcel of land lying in the Jackson Reynolds D.L.C. No. 58, also in the North half ($N\frac{1}{2}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 34, Township 30 South, Range 5 West, W.M., Douglas County, Oregon, and being a portion of that property conveyed by that deed to Delbert D. Norlund, et al., recorded in Book 109, Page 259, of Douglas County Records of Deeds; the said parcel being that portion of said D.L.C. No. 58 lying west of a line and between said line and the existing Pacific Highway, which line is described as follows:

Beginning on the south line of said D.L.C. No. 58 at a point 438 feet west of the southeast corner of said D.L.C. No. 58; thence northerly on a 260.44 foot radius curve left (the long chord of which bears North 26° 12' West) 420 feet to the northeasterly right of way line of said highway.

The parcel of land to which this description applies contains 0.40 acre.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-eighth day of September, 1950.

EXHIBIT "B-2"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Hillsboro-Silverton Highway is under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of securing rock and gravel and for the stockpiling of material for use in connection with the widening of shoulders and maintenance of the Scholls-Newberg Section of said Hillsboro-Silverton Highway the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for quarry site and stock pile site and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for quarry site and stock pile site for use in connection with widening of shoulders and maintenance of the Scholls-Newberg Section of the Hillsboro-Silverton Highway a parcel of real property located in Yamhill County and described as follows, to-wit:

A parcel of land lying in Section 6, Township 3 South, Range 2 West, W. M., Yamhill County, Oregon; the said parcel being described as follows:

Beginning on the east and west center line of said Section 6 at Engineer's Station 380+88.66 of the Scholls-Newberg Section of the Hillsboro-Silverton Highway; said point being 879.80 feet west from the east quarter corner of Section 6; thence South 88° 38' 03" East along said center line of Section 6 430 feet; thence South 1° 21' 57" West 385.46 feet to the center line of said highway; thence along the center line of said highway as follows: South 77° 25' West 40.39 feet; on a 477.46 foot radius curve to the right (the long chord of which bears South 87° 14' 30" West) 163.75 feet; North 82° 56' West 97.65 feet; on a 168.52 foot radius curve to the right (the long chord of which bears North 35° 02' West) 281.76 feet; North 12° 52' East 102.90 feet; and on a 204.63 foot radius curve to the left (the long chord of which bears North 0° 34' 46" West) 96.04 feet to the point of beginning.

EXHIBIT "B-2" (cont.)

The parcel of land to which this description applies contains 3.92 acres, of which 0.54 acre lies within the existing right of way, title to which hereby is acknowledged to be in the public, and 3.38 acres lie outside of the existing right of way.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed and operated in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-eighth day of September, 1950.

EXHIBIT "B-3"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the North Santiam Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate and construct the Mehama-Mill City Section of the said highway, and for such purpose, and in connection therewith, the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authroized to take or extinguish any and all rights or interests, if any there be, by which a right or easement of access, ingress, egress, or regress may accrue to property abutting upon a highway; and

WHEREAS, the North Santiam Highway is a major highway of the State, and as such carries large volumes of traffic, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation, construction, and maintenance of the Mehama-Mill City Section of the North Santiam Highway the parcel of real property located in Marion County, Oregon, and described as follows, to-wit:

> A parcel of land lying in the North half ($N\frac{1}{2}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 22, Township 9 South, Range 2 East, W. M., Marion County, Oregon; the said parcel being that portion of said North half ($N\frac{1}{2}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 22 included in a strip of land 200 feet in width, 100 feet on each side of the center line of the North Santiam Highway as said highway has been relocated, which center line is described as follows:

Beginning at Engineer's center line Station 611+39.02, said Station being 533.24 feet north and 382.23 feet west of the northwest corner of Lot 2 of said Section 22; thence on a 1432.4 foot radius curve left (the long chord of which bears South 59° 10' 15" East) 470.21 feet; thence on a spiral curve left (the long chord of which bears South 73° 54' 30" East) 400 feet; thence South 76° 34' 30' East 1596.62 feet to Engineer's center line Station 636+05.85; said center line crossing the west and south lines of said North half ($N\frac{1}{2}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 22 approximately at Stations 615+90 and 628+11, respectively; ALSO, all that part of the Southwest quarter ($SW\frac{1}{4}$) of the Southeast quarter ($SE\frac{1}{4}$) of said Section 22 lying south of the foregoing described strip of land.

The parcel of land to which this description applies contains 7.15 acres.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to the acquisition of fee simple title to the aforesaid-described property, it is necessary that there be acquired or extinguished such interest, if any there be, by which an easement of access, or right of ingress, egress, and regress, or any right in the nature of an easement of access or right of ingress, egress, or regress, may accrue from and to the remaining land of the larger tract of which the above-described property is a part, and the above-described property, and any highway hereafter constructed thereon, by virtue of the adjacency of the relocated North Santiam Highway, when constructed, upon the real property above described.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-eighth day of September, 1950.

EXHIBIT "C"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws, 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the first six-month period of 1950 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Barlow	- $ 160.43	Draperville	- $ 638.65
Bay City	- 1,659.88	Monroe	- 959.52
Clatskanie	- 2,816.87	Riddle	- 1,919.05
Delake	- 1,968.41	Umatilla	- 2,292.37

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 28th day of September, 1950.

September 28, 1950

EXHIBIT "D"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3172 with Umpqua River Navigation Company for grading and oil mat surfacing on the Luder Creek-Murphys Camp Section of the Umpqua Highway in Douglas County, completed July 27, 1950.

Contract No. 3192 with Geo. H. Clausen for constructing guard rail on the N. Unit, Washington State Line-Flora Junction Section of the Enterprise-Lewiston Highway in Wallowa County, completed July 19, 1950.

Contract No. 3232 with Byers Bros. General Contractors for grading and bituminous macadam surfacing on the Warrenton (19th Street-Hayes Street) Section of the Warrenton Secondary Highway in Clatsop County, completed August 7, 1950.

Contract No. 3252 with Vernie Jarl for grading, oil mat surfacing and furnishing crushed materials in stockpiles on the Wamic-Tygh Valley and Dufur-Maupin Sections of the Wamic County Road and The Dalles-California Highway in Wasco County, completed August 30, 1950.

Contract No. 3254 with Jed Wilson for furnishing crushed materials in stockpiles on the Klaskanine Summit-Columbia County Line Section of the Nehalem Secondary Highway in Clatsop County, completed July 14, 1950. Final clean-up was completed August 25, 1950.

Contract No. 3258 with C. E. Leseberg for grading and oil mat surfacing on the Lawen-Crane Section of the Burns-Crane Highway in Harney County, completed September 15, 1950.

Contract No. 3259 with Fred Lemery for furnishing crushed materials in stockpiles on the Trail and Eagle Point Section of the Crater Lake, Tiller-Trail and Little Butte Highways in Jackson County, completed August 25, 1950.

Contract No. 3268 with F. O. Laws for furnishing crushed materials in stockpiles on the Lincoln County Line-Alsea Mountain Section of the Alsea Highway in Benton and Lincoln Counties, completed August 12, 1950.

(cont.)

EXHIBIT "D" (cont.)

Contract No. 3283 with Morrison & Fisher for grading and oil mat surfacing on the Hardman-Chapen Creek Section of the Heppner-Spray Secondary Highway in Morrow County, completed August 29, 1950.

Contract No. 3297 with A. H. Saxton & Sons for oiling and furnishing crushed materials in stockpiles on the Jones Ranch-Mitchell Section of the Ochoco Highway in Wheeler County, completed September 9, 1950.

Contract No. 3320 with E. H. Itschner Co. for grading and oil mat surfacing on the Imbler-Dry Creek Section of the Imbler-Dry Creek County Road in Union County, completed September 6, 1950.

Contract No. 3323 with F. L. Somers for grading and oil mat surfacing on the Crook County Line-Bend Airport Section of the Powell Butte Secondary Highway in Deschutes County, completed September 2, 1950.

Contract No. 3329 with Harr & Horton for reoiling in Division No. 2, Jackson, Josephine and Douglas Counties on seven state highways, completed August 31, 1950.

Contract No. 3336 with Cascade Construction Co. for paving on the Sherwood (Main St.) Section of the Sherwood City Streets in Washington County, completed August 30, 1950.

Contract No. 3341 with The Central Heating Co. for reoiling in Division No. 2-C in Lincoln and Benton Counties on five state highways, completed August 13, 1950.

Contract No. 3342 with Roseburg Paving Company for grading and paving on the Myrtle Creek (Oak Street) Section of Myrtle Creek City Street in Douglas County, completed September 12, 1950.

Contract No. 3345 with Osborn Construction Company for grading and bituminous macadam surfacing on Phoenix ("C" St.) Section of the Phoenix City Streets in Jackson County, completed August 31, 1950.

Contract No. 3368 with Harrisburg Sand & Gravel Co. for grading and oil mat surfacing on the Harrisburg (7th St.) Section of Harrisburg City Streets in Linn County, completed September 5, 1950.

Contract No. 3378 with O. C. Yocom Co. for grading and paving on the Amity (Woodson and Oak Streets) Section of the Amity City Streets in Yamhill County, completed August 24, 1950.

Contract No. 3381 with Porter W. Yett for grading and paving on the Brownsville (Kirk Ave.) Section of the Brownsville City Streets in Linn County, completed September 8, 1950.

EXHIBIT "D" (cont.)

Contract No. 3400 with Warren Northwest Inc. for grading and paving on the Aumsville (Main St.) Section of the North Santiam Highway in Marion County, completed September 14, 1950.

Contract No. 3107 with Lindstrom Bros. for constructing Shields Creek, Upper & Lower Lookingglass Creek Bridges in Douglas County, completed August 25, 1950.

Contract No. 3262 with L. H. Morris Electric Co. for installing traffic signals in the City of Eugene in Lane County, completed July 27, 1950.

Contract No. 3273 with R & M Construction Company for redecking Sandy River Bridge in Multnomah County, completed September 7, 1950.

Contract No. 3291 with Bemis & Co. for constructing Parkdale Maintenance Building in Hood River County, completed August 31, 1950.

Contract No. 3233 with Frank Watt Construction Company for constructing Moffett Creek Bridge in Multnomah County, completed August 25, 1950.

Contract No. 3034 with Roy L. Houck, Jr., for grading and bituminous macadam surfacing on the Lost Creek-Lowell Section of the Willamette Highway in Lane County, completed August 16, 1950.

Contract No. 3270 with Inter City Sand & Gravel Co. for furnishing crushed materials in stockpiles on the Forest Boundary-Silver Lake Section of the Fremont Highway in Lake and Klamath Counties, completed May 16, 1950. Removal of Contractor's equipment was completed August 14, 1950.

Contract No. 3337 with Harr & Horton for recoiling on the Division No. 1-A Recoiling Project on the Sunset and Nehalem Highways in Washington County, completed July 6, 1950.

Contract No. 3366 with Valley Concrete Co. for paving on the Eagle Point (West Main St.) Section of Eagle Point City Streets in Jackson County, completed September 23, 1950.

Contract No. 3373 with Warren Northwest, Inc., for grading and paving on the Garibaldi Section of the Oregon Coast Highway in Tillamook County, completed September 25, 1950.

Contract No. 3374 with Stevenson Construction Co. for grading and bituminous macadam surfacing on the West Nehalem Section of the Manzanita-Wheeler County Road, completed September 12, 1950.

Contract No. 3376 with Russell Olson Construction Co. for grading on the Enterprise (Highway and City St.) Section of the Wallowa Lake Highway and Enterprise City Streets in Wallowa County, Completed September 22, 1950.

(cont.)

EXHIBIT "D" (cont.)

Contract No. 3255 with Glenn Snook for constructing the Oak Hill Overcrossing in Lane County, completed September 20, 1950.

Contract No. 3359 with Robert C. Wilson for constructing the Neptune State Park Latrine in Lane County, completed September 6, 1950.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "E"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Mt. Hood Highway (Powell Boulevard)

Highway number: 26 Route number: Oregon 50

Location of Termini			Established Speed
M.P. 5.31 (S.E. 82nd Ave.) (Portland east city limits)	to M.P.	7.47 (125th Ave.) (east of Portland)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "G"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, the Oregon Coast Highway, extending from Astoria, southerly along the Oregon Coast to the California state line, is a state highway, and as such is under the jurisdiction of the State Highway Commission, and said highway is identified in the Commission records as Highway No. 9; and

WHEREAS, the promiscuous parking of cars along and on the said highway in the community of Langlois, Curry County, creates a traffic hazard which, in the opinion of the Highway Commission, should be restrained and regulated; and

WHEREAS, the Commission, based upon the report of its Traffic Engineer, is of the opinion that for safety and convenience of traffic, parallel parking only should be permitted upon both sides of said highway in the community of Langlois between Engineer's Stations 860+00 and 869+25, a distance of 925 feet;

NOW, THEREFORE, all members of the Commission being present and voting affirmatively, the Commission does hereby order:

1. That based upon the facts and recommendations placed before this Commission, the Commission does hereby find and declare that the promiscuous parking of motor vehicles on both sides of the said highway between State Highway Engineer's Stations 860+00 and 869+25 creates a hazard to traffic on said highway, which hazard in the opinion of the Commission should be removed and must be prohibited.

2. That for the purpose of protecting the general public, and especially the motoring public using said highway in said vicinity, it is hereby ordered that only parallel parking of motor vehicles shall be permitted on said highway between State Highway Engineer's Stations 860+00 and 869+25.

3. That the State Highway Engineer hereby is directed to erect and thereafter maintain on and along said highway at places where they may be easily seen by motorists suitable and adequate signs to provide the motoring public with reasonable information and instructions.

4. That a copy of this resolution be delivered to the Superintendent of State Police.

5. That this resolution be entered in the minutes and records of the Highway Commission as of the 28th day of September, 1950.

EXHIBIT "I"

Minutes of September 28 and 29, 1950

ORDER REDUCING MAXIMUM LOAD LIMIT ON CERTAIN STATE HIGHWAY BRIDGES

WHEREAS, the roads or highways hereinafter named have been designated and declared to be and are State Highways and have been improved and are being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon as state highways:

Santiam Highway (State Primary Highway No. 16)
Little Nestucca Highway (State Secondary Highway No. 130)

AND WHEREAS, on each of the said state highways there are located certain bridge structures which, in the judgment of the State Highway Commission, are incapable of safely carrying the traffic to which they are being subjected, and in order to protect said bridge structures against damage and injury and in order to safeguard traffic over said bridge structures it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said bridge structures and each of them and of the traffic which uses the said bridge structures that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation determined and found and it is the judgment of the Commission that the maximum gross loads which shall be permitted upon any single span of any of the said structures at any time shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission having as a result of due investigation found that the bridge structures above referred to and hereinafter designated are incapable of safely sustaining or supporting a total gross load in excess of that specified in the table given hereinbelow;

IT IS HEREBY ORDERED that the total gross weight of combined load and vehicle, or the maximum gross weight of any combination of vehicles and load which at any one time shall be permitted upon any single or individual span of the bridge structures hereinafter described shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to wit:

SANTIAM HIGHWAY (State Primary Highway No. 16)		
16-41.56	Bridge No. 1356 crossing Santiam River on entrance road to Cascadia State Park	5 tons (10,000 lbs.)

Effective date - September 11, 1950

September 28, 1950

EXHIBIT "I" (Cont.)

LITTLE NESTUCCA HIGHWAY (State Secondary Highway No. 130)

130-6.20	Bridge No. 1858 over Little Nestucca River (Muscott Bridge)	5 tons (10,000 lbs.)
130-7.70	Bridge No. 1857 over Little Nestucca River (Weed Bridge)	5 tons (10,000 lbs.)

Effective date - September 25, 1950.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394, O.C.L.A., shall be in full force and effect until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that R. H. Baldock, as Chief Highway Engineer, be and he hereby is instructed to post a notice in a conspicuous place and manner at each end of the above-named bridge structures, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the County Court of each county in which any of said highways are located, and that a certified copy of said order be furnished the Superintendent of the Department of State Police for his information.

Dated this 28th day of September, 1950.

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Pacific Highway

Highway number: 1 Route number: US99

Location of Termini	Established Speed
M.P. 190.6 (near Sutherlin Creek and north edge of Wilbur) to M.P. 191.3 (south edge of Wilbur)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

September 28, 1950

EXHIBIT "L"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Oregon Coast Highway known as the Delmar-Coaledo and Coaledo-Chrome Plant sections in Coos County, the northerly terminus of which is at Highway Engineer's Station 424/00 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 694/00 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Coos County and the Commission have entered into agreements under date of June 29th, 1948, and August 10th, 1948, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Oregon Coast Highway was completed on December 5th, 1949, and highway traffic is now routed over said relocated section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That as the section of the Oregon Coast Highway, State Highway No. 9 which begins at State Highway Engineer's Station 424/00 on the new route and ends at State Highway Engineer's Station 694/00 of the new route is now completed, the sections of the old route herein defined and described as Units "A", "B", "C", "D" and "E" shall no longer be part of the route of the Oregon Coast Highway, State Highway No. 9 and said units hereby are eliminated from and are abandoned as parts of the rights of way of said state highway.

2. That the portions of the old right of way which by reason of the relocation of said highway are no longer within the boundaries of the new right of way, which portions for the purpose of this resolution are identified as Units "A", "B", "C", and "E" and are shown colored in red on map attached hereto and marked "Exhibit A", and are more particularly described as follows: **

Unit "A"

Beginning at State Highway Engineer's Station 535/45 of the relocated Oregon Coast Highway in the Northwest quarter of the Southeast

(Cont.)

Unit "A" (Cont.)

quarter of Section 10, Township 27 South, Range 13 West, W.M.; thence southerly via the former route of the Oregon Coast Highway to State Highway Engineer's Station 545+15 of the relocated Oregon Coast Highway in the Southwest quarter of the Southeast quarter of Section 10, Township 27 South, Range 13 West, W. M.

Unit "B"

Beginning at State Highway Engineer's Station 548+38 of the relocated Oregon Coast Highway in the Southeast quarter of the Southwest quarter of Section 10, Township 27 South, Range 13 West, W.M.; thence southwesterly via the former route of the Oregon Coast Highway to State Highway Engineer's Station 554+45 of the relocated Oregon Coast Highway on the line between Sections 10 and 15, Township 27 South, Range 13 West, W.M.

Unit "C"

Beginning at State Highway Engineer's Station 559+02 of the relocated Oregon Coast Highway in the Northeast quarter of the Northwest quarter of Section 15, Township 27 South, Range 13 West, W.M.; thence southerly via the former route of the Oregon Coast Highway to State Highway Engineer's Station 574+53 of the relocated Oregon Coast Highway in the Southeast quarter of the Northwest quarter of Section 15, Township 27 South, Range 13 West, W.M.

Unit "E"

Beginning at State Highway Engineer's Station 645+00 of the relocated Oregon Coast Highway in the Southwest quarter of the Northeast quarter of Section 21, Township 27 South, Range 13 West, W.M.; thence southerly via the former route of the Oregon Coast Highway to State Highway Engineer's Station 660+13.82 of the relocated Oregon Coast Highway in the Northwest quarter of the Southeast quarter of Section 21, Township 27 South, Range 13 West, W.M.

shall hereafter be maintained by the County pursuant to written agreement heretofore executed by the State Highway Commission and the County Court of said county as county roads for the benefit and service of persons living thereon and communities served thereby. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said roads may be assumed and exercised by the County Court of Coos County, and said roads shall hereafter be maintained by the County for public use.

3. The section of the old route of the Oregon Coast Highway, State Highway No. 9, which for the purpose of this agreement is identified as Unit "D" and shown colored in brown on map attached hereto and marked "Exhibit A", and is more particularly described as follows: **

EXHIBIT "L" (Cont.)

Unit "D"

Beginning opposite State Highway Engineer's Station 631+00 of the relocated Oregon Coast Highway in the Northwest quarter of the Northeast quarter of Section 21, Township 27 South, Range 13 West, W.M.; thence southeasterly to opposite State Highway Engineer's Station 639+00 of the relocated Oregon Coast Highway in the Northwest quarter of the Northeast quarter of Section 21, Township 27 South, Range 13 West, W.M.

is hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover and said right of way hereby is vacated and reverts to the owners of the abutting property.

4. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. **

5. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

6. This resolution shall be entered in the minutes of the Commission as of the 28th day of September, 1950.

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being filed under File No. 188 and File No. 191, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "W"

Minutes of September 28 and 29, 1950

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Nyssa-Adrian Secondary Highway No. 450 known as the Garrison Corner Section in Malheur County, the northerly terminus of which is at highway engineer's station 110/00 of the reconstructed line and the southerly terminus of which is at highway engineer's station 172/13.83 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway a portion or unit of the right of way of the highway, as formerly located, has been eliminated from the boundaries of the new location, which eliminated section or area is no longer needed for highway purposes; and

WHEREAS, Malheur County and the Highway Commission have heretofore entered into an agreement under date of December 21st, 1949, relating to the use and jurisdiction of the abandoned section; and

WHEREAS, the contract for the construction of said relocated section of the Nyssa-Adrian Secondary Highway No. 450 was completed on September 15, 1950, and highway traffic is now routed over said relocated section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the area and section of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way, which by reason of the relocation of said highway is no longer within the boundaries of the new right of way, which former route for the purpose of this resolution is identified as Unit "A" and is shown colored in red on map attached hereto and marked "Exhibit A", and is more particularly described as follows: **

Unit "A"

Beginning opposite State Highway Engineer's Station 154/00 of the relocated Nyssa-Adrian Highway in the Northwest quarter of the Southeast quarter of Section 6, Township 20 South, Range 47 East, W. M.; thence southerly via the former route of the Nyssa-Adrian Secondary Highway to State Highway Engineer's Station 196/60 in the Northeast quarter of the Northwest quarter of Section 7, Township 20 South, Range 47 East, W.M.

shall hereafter be maintained by the County as a county road for the benefit and service of persons living thereon and communities served thereby. The

(Cont.)

Commission hereby surrenders all jursidiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Malheur County, and said road shall thereafter be maintained by the County as a county road for public use. **

2. That the area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does here declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of the abutting owners. **

3. That the boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. That this resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Malheur County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown in red on the map attached hereto and marked "Exhibit A". **

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 213, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copies in full herein.

September 28, 1950

EXHIBIT "N"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, the Congress of the United States by the enactment of Public Law 521, 78th Congress, Second Session, has made available for highway construction and improvement under the provisions and pursuant to the conditions therein specified definite sums of money, a portion of which has been allocated to the State of Oregon; and

WHEREAS, said act contemplates and provides for the creation of a "system of principal secondary and feeder roads, including farm-to-market roads, rural free delivery mail, and public school bus routes, either outside of municipalities or inside of municipalities of less than five thousand population"; and

WHEREAS, it is provided in said act that said "funds shall be expended on a system of such roads selected by the state highway departments in cooperation with the county supervisors, county commissioners or other appropriate local road officials and the Commissioner of Public Roads"; and

WHEREAS, a system was submitted to the Federal Bureau of Public Roads and was on January 29, 1946, approved thereby; and

WHEREAS, since January 29, 1946, economic conditions in Jefferson County, Oregon, have greatly changed; and

WHEREAS, the County Court of Jefferson County has passed and forwarded a resolution to the Commission recommending the deletion of Federal Aid Secondary Highway 314, a road having one terminus with an intersection with The Dalles-California Highway and the other terminus with an intersection with a county road in the village of Ashwood, from the Federal Aid System; and

WHEREAS, said resolution also recommends the inclusion of the Culver Secondary Highway, a state secondary highway, within the Federal Aid Secondary System, and also the inclusion of the several county roads shown colored in red on the attached map; and **

WHEREAS, the Commission has considered the resolution submitted by the County Court of Jefferson County, and is also of the opinion that the said Federal Aid Secondary Highway 314 should no longer be included in the Federal Sid Secondary System, and that the above described state secondary highway and the county roads shown colored in red on the attached map should be included within the Federal Secondary System.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

(Cont.)

EXHIBIT "N" (Cont.)

1. That request be made to the Commissioner of Public Roads that the following described county road be eliminated from the Federal Aid Secondary System:

F.A.S. Hwy. No.	Description	Miles
314	From FA Route 4 approximately 1 mile northeast of Willowdale, southeasterly to a county road junction in Ashwood.	12.00

2. That request be made to the Commissioner of Public Roads that the following described state secondary highway be incorporated into the Federal Aid Secondary System:

F.A.S. Hwy. No.	Description	Miles
549	From FA Route 4 at Madras to FA Route 4 approximately 2.5 miles southeast of Culver.	11.64

3. That request be made to the Commissioner of Public Roads that the following described county roads be incorporated into the Federal Aid Secondary System:

F.A.S. Hwy. No.	Description	Miles
546	From FA Route 44 approximately 3 miles northwest of Madras to FA Route 4 approximately 10 miles northeast of Madras.	13.90
547	From F.A.S. 549 at Culver to FA Route 4 approx. 5 miles north of Jefferson-Deschutes County line.	8.60
548	From F.A.S. 549 near Metolius to F.A.S. 547 approximately 1 mile west of Culver.	6.00

4. That there is attached hereto and by this reference made a part hereof a map on which is shown the roads and highways herein referred to.

5. That this resolution be entered in the minutes and records of the Commission as of the 28th day of September, 1950.

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 5 under the heading, "Federal Highway Designations (Secondary)" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "O"

Minutes of September 28 and 29, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission is authorized and empowered by the provisions of Section 100-121 O. C. L. A. and other laws of the State of Oregon to "enter into all contracts and agreements with the United States government relating to the survey, construction, improvement and maintenance of roads and highways, including county roads and city streets * * *" and,

WHEREAS, by the provisions of Sub-section 36 of Section 100-115 O. C. L. A. the Commission is authorized and empowered to select, locate, establish, designate, improve and maintain out of State Highway funds a system of secondary state highways, and

WHEREAS, a certain highway known and designated as the Timberline Lodge Highway is a National Forest Highway, which said highway has been improved and for some time has been maintained and is now being maintained by the United States National Forest Service, and

WHEREAS, the United States acting by and through the Bureau of Public Roads has requested the State to assume jurisdiction and control over said highway and in that connection designate the same as a part of the system of state secondary highways, and

WHEREAS, it is the judgment of the Highway Commission and the Commission now finds and declares that the selection and designation of said Timberline Lodge Highway as a part of the system of secondary state highways of the State of Oregon will be in public interest,

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

That the Timberline Lodge Highway, otherwise known and identified as a National Forest Highway, be, and said highway hereby is selected and designated as a part of the system of state secondary highways, and said highway shall be known and identified in the records of the Highway Commission as Timberline Secondary State Highway No. 173.

That the route and location of said highway shall be and the same hereby is a route "Beginning at milepost 55.3 on the Mount Hood State Primary Highway No. 26 in Clackamas County, Oregon; thence easterly and northerly to Timberline Lodge, a distance of approximately 5.61 miles."

(cont.)

That by this selection and designation said highway is now qualified for improvement and maintenance and shall henceforth be improved, maintained and constructed or reconstructed in the same manner and for a like purpose as are other state secondary highways.

That this resolution be entered in the minutes and records of the Highway Commission and a duly certified copy thereof delivered to Mr. W. H. Lynch as Division Engineer of Division No. 8, Bureau of Public Roads, and a like certified copy thereof delivered to Mr. H. J. Andrews as Regional Forester of Region No. 6, United States National Forest System.

September 28, 1950

Portland, Oregon
October 26, 1950

The State Highway Commission met in special session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
C. H. Armstrong, State Parks Engineer
Forrest Cooper, Right of Way Engineer
M. H. Hawke, Auditor
H. B. Glaisyer, Secretary

This meeting was called for the principal purpose of considering a working budget for the State Highway Department for the calendar year 1951. The Engineer submitted a tabulation showing the actual receipt and expenditures of state highway funds for the year 1949, and those estimated for the years 1950, 1951, 1952 and 1953, including funds from all sources, all of which was supported by exhibits giving details.

He pointed out that the estimated total amount available for state highway purposes during the calendar year 1951 is $41,804,000, and he suggested approximate expenditures of the funds available, as follows:

Capital Outlays	$24,960,000
Maintenance	11,139,000
Operation	3,180,000
Debt Service	338,000
Total Estimated Expenditures	39,617,000
Unexpended balance at end of year, estimated.	2,187,000
Total Available	$41,804,000

As a result of discussion, the Commission unanimously approved, in principle, the budget as suggested by the Engineer, subject to the following changes in items listed under the heading 'Capital Outlays', and ordered that expenditures for the individual items therein shall not be made until specific approval therefore has been given by the Commission. (For details of the budget, as approved, see copy of budget filed in office of the Secretary, under Highway Department Budgets, File No. 4.)

(1) The expenditure suggested for "Property Acquisition, General Expenses" ($114,000) was increased by the Commission to $135,000 to cover employment of extra right of way agents as may be necessary to expedite the construction program. The Commission ordered

(cont.)

that no construction project shall be advertised for bids until all right of way for such project has been obtained and the project cleared from that standpoint.

(2) The expenditure of $465,000 suggested for Construction of Buildings and Improvements in Parks (General) was reduced to $272,000. This reduction provides for the elimination of proposed major park improvements as follows:

Overnight camping developments at Emigrant Springs Park	$ 40,000
Overnight camping development at Honeyman State Park	40,000
Proposed development at Rooster Rock State Park	113,000

(3) The item of $70,000 set up for Construction of Buildings and Improvements in Parks (Roadways) was reduced to $65,000. This reduction eliminates roadway construction at Short Sand Beach State Park, which was estimated to cost $5,000. The Commission ordered this work performed by the Engineering Department.

(4) The suggested expenditure of $1,050,000 for "Purchase and Betterment of Equipment other than Ferryboats", was increased to $1,055,000 to cover purchase of two additional stripe-painting machines, which are estimated to cost $2,500 each.

Action, as follows, was taken by the Commission on certain items appearing in the budget, as adopted:

1. With respect to the construction of standard maintenance stations at locations where rented quarters are inadequate or unavailable, the Commission not only tentatively authorized construction of the proposed buildings but also authorized the right of way department to negotiate acquisition of sites for such buildings.

2. In the discussion of capital outlay for Improvements of Miscellaneous Properties, particularly buildings needed at the shop headquarters in Salem, the Commission considered it advisable to isolate the paint shop from other buildings as a matter of safety and instructed the Engineer to look into that feature.

3. The Commission decided to retain in the tentative budget the amount of $175,000 to provide a new ferry terminal at Astoria. This item was approved in principle but instructions were given not to negotiate the purchase until authorized by the Commission. The question arose of whether it would be advisable to continue the use of the present terminal for the time being and spend the money for improvement of the Lower Columbia River Highway, which has been strongly urged by people of that district. The Engineer was instructed to review the entire situation and submit a complete report.

(cont.)

4. The Commission ordered that the oases at Castle Rock and at Boardman on the Columbia River Highway, which are now fenced, be opened up for general public use.

The Parks Superintendent presented detailed information in writing with respect to proposed expenditures for state park purposes during 1951, provision for which is included in the General Budget adopted in principle by the Commission at this meeting. The Commission unanimously approved in principle the projects listed therein subject to the following exceptions which were decided in the discussion of the general department budget:

1. Expenditures to provide overnight camping facilities in Emigrant Springs Park ($40,000) and in Honeyman Park ($40,000) were deleted to allow time to study the results of similar facilities that are to be provided in three other state parks.

2. Expenditure of $113,000 for developments, including construction of a parking area for cars, in Rooster Rock Park was eliminated pending submission by the Parks Superintendent of detailed plans of the proposed development.

3. An expenditure of $5,000 for construction of a roadway at Short Sand Beach Park was deleted as being a questionable expense.

(For details of the Park budget, see copy of budget filed in the office of the Secretary under Highway Department Budgets, File No. 4)

County Judge James H. Sturgis, Umatilla County, was present regarding an agreement among Umatilla County, Oregon; Benton County, Washington; Washington State Toll Bridge Authority, and the Oregon State Highway Commission, providing for the financing of surveys as are necessary, in connection with a proposed bridge across the Columbia River below McNary Dam. He was informed by the Commission that the agreement as submitted is in conformity with previous understanding. Four copies of the agreement were thereupon signed by the Commission and the Secretary was instructed to affix the Commission's seal upon his return to Salem, and forward the agreement to Judge Sturgis.

The Commission had under discussion a condemnation case that has been set for trial in the Circuit Court of Multnomah County pertaining to the acquisition of right of way that is needed for the new Columbia River Highway just east of the Sandy River Bridge near Troutdale. It was explained that the acquisition of this small parcel is necessitated by a change in the location of the Sandy River Bridge; that the right of way on the original location was acquired from Mrs. Alice Jordan, who subsequently sold the balance of her holdings which now are owned by Mr. Paul Martin, from whom the state is now endeavoring to acquire the small parcel of land at the east end of the bridge. It appears that Mr. Martin is unwilling to dispose of the tract on reasonable terms, hence the necessity to proceed under condemnation. The Chief Counsel advised that in the purchase of the original right of way from Mrs. Jordan the state allowed her one farm crossing, and private access to

the highway at two additional points; that Mr. Martin is insisting on retention of the farm crossing and one of the private accesses, the other being of no practical value to him, and approval of a new access for commercial purposes easterly from the others, and he is willing to deed to the state the property that it needs if the state will grant him access to the highway as he desires, will deed him 19 acres of land that the state owns nearby but which is of no particular value for highway purposes, and will pay him cash in the amount of $10,000. The Chief Counsel stated that in acquiring right of way on this section of highway the state did not provide for controlled access, and in view thereof he recommended settlement with Mr. Martin on the basis of his proposal because, in his estimation, it would be unfair to restrict access to Mr. Martin while others are bound by no such restriction. The Engineer expressed himself as opposed to the granting of uncontrolled access, particularly commercial access, because of the traffic hazard that would result on this important, heavily travelled highway, and he suggested that steps should be taken to limit access at this point and the other points if investigation reveals that access is not controlled at the present time. Otherwise, he said, the waysides will soon be cluttered up with hotdog stands and the like, to the detriment of this highway. He also suggested that it might be satisfactory to grant Mr. Martin a farm crossing only, in view of the fact that he operates a stock farm. The matter was discussed at considerable length and as a result thereof the Chief Counsel was instructed to discuss the matter further with Mr. Martin from the standpoint suggested by the Engineer and report back later in the session. (See ahead for report and final decision.)

The Parks Superintendent presented a request from the Coastal Lumber Company to purchase down timber on the north side of Van Duzer Corridor on the Salmon River Highway in Tillamook County. He said that the Company has offered to pay $5.00 per M-FBM for this timber and he recommended acceptance of the offer. The Commission approved the sale of the timber as a result of competitive bidding therefor on the condition that the price bid equals or exceeds the value set on the timber by the State Forester.

The Parks Superintendent also presented the application of Mr. T. M. Cross for permission to construct and operate a logging road across Humbug Mountain State Park in Curry County. He said that this operation will in no way adversely affect the Park, and he recommended approval of the application. The Commission approved the recommendation unanimously and ordered that the matter be covered by appropriate agreement which shall provide that mud and other debris must be removed from the hauling equipment before it enters the highway.

Consideration was given by the Commission to a proposed agreement with F. C. Hathaway for logging dead timber along the Sunset Highway. The parks Superintendent advised that the timber lies on both sides of the Highway in Section 31, Township 4 North, Range 5 West, W. M., in Clatsop County, and that the area contains approximately 120 M-FBM of timber. He recommended sale of the timber. The Commission approved sale of the timber by competitive bidding, provided the bid compares favorably with the State Forester's appraisal of the value of the timber. In the event a satisfactory bid is received the sale is to be covered by appropriate written agreement, which shall provide that mud must be removed from the hauling equipment before it enters the highway.

The Commission discussed and approved an agreement with F. C. Hathaway, Seaside, Oregon, covering purchase at the rate of $6.00 per M-FBM of merchantable dead timber, either standing or down, on state-owned property adjacent to the Sunset Highway in Clatsop County, being an extension of an existing arrangement with Mr. Hathaway.

The Parks Superintendent presented a request from Dan J. Melton for permission to construct and operate a logging road over and across Maria C. Jackson State Park in Coos County. The Parks Superintendent recommended approval of this request, which he said is in conformity with the understanding had with the "Save the Myrtlewoods Association" when the Park was acquired. In this connection, the Parks Superintendent stated that the Highway Commission acquired along with the park a strip of land which was intended as a roadway corridor extending from the end of the existing county road into the park. However, the location is such that it cannot be used for the purpose intended. He requested authority to negotiate with the adjacent property owner for an exchange of properties to enable construction by the logging contractor of a suitable road into the park area. The Commission unanimously approved the agreement with Mr. Melton and also approved the Parks Superintendent's recommendation with respect to the exchange of properties for a roadway.

A letter was presented from the Albany Lions Club requesting certain improvements and developments in Waverly Lake Wayside adjacent to the Pacific Highway East, in Albany. The Club offers its services in the development of the area, by furnishing manpower and some materials. The Commission denied the request as a matter of policy.

The Right of Way Engineer presented for the Commission's consideration options that he has secured covering acquisition of real property that is needed for various highway improvements throughout the state. As a result of careful consideration the Commission unanimously approved the closing of the options at the prices mentioned therein. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Right of Way Engineer asked the Commission to confirm the following sales of miscellaneous properties which he has effected pursuant to authority previously granted by the Commission:

(1) House located on the Cascade Locks-Viento Section of the Columbia River Highway, sold to M. L. Morgan, Cascade Locks, for $266.00.

(2) House located on the Sylvan Section of the Sunset Highway, sold to Dorothy Helmcke Westfall, Portland, for $350.00.

(3) Hot water tank, salvaged in connection with right of way settlement on the Dodson-Bonneville Section of the Columbia River Highway, sold to Walter J. Warren, North Bonneville, for $15.00.

(4) Buildings located on the Viento Park Section of the Columbia River Highway sold to Parker-Schramm Company, General Contractors, Portland, for $200.00.

The Commission unanimously approved the sale of the properties at the prices quoted.

Consideration was given by the Commission to the bids received in Salem on October 9 for the purchase of a 22.377-acre tract of land adjacent to the Tillamook-Pleasant Valley Section of the Oregon Coast Highway in Tillamook County. The Right of Way Engineer advised that only one bid was received, that of A. J. Swett, Tillamook in the amount of $12,000. However, Mr. Swett also submitted an alternate proposition to the effect that he will pay the sum of $13,425 for the property (amount stated in the formal advertisement) on the following basis: $3,425 cash, and $1,000 annually thereafter on the balance, with 4% interest. The Commission indicated a preference for a cash deal, but did not consider that $12,000 was enough. As a result of discussion, the Right of Way Engineer was instructed to tell Mr. Swett that the Commission will sell the property to him for $12,500 cash, or on the basis of his alternate offer.

The Right of Way Engineer presented a typewritten report on the status of right of way acquisitions for uncompleted projects in the Second Postwar Construction Program of 1950-1951, including both primary and secondary highways, and a similar report on the status of right of way acquisition for projects tentatively programmed for first-year construction in the Primary Federal Aid Program for 1952-1954. The Commission took no action on the report.

The Right of Way Engineer reported a controversy between two property owners on the North Santiam Highway involving a fence. It appears that right of way was acquired from Mr. Olaf Knutsen which severed a small corner of his property. Mr. Knutsen alleges that as a part of the consideration he was given an existing fence along this severed portion of his property, whereas his neighbor demands one-half of the fence. The Right of Way Engineer stated that the record discloses no indication of the ownership of the fence, but Mr. Knutsen claims he will be damaged in the amount of $75.00 unless the fence is given to him. In order to settle this controversy the Right of Way Engineer recommended payment of such sum to Mr. Knutsen. The Commission approved the recommendation unanimously.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

Pursuant to the Commission's instructions at the morning session, the Chief Counsel reported the results of his conference with Mr. Paul Martin during the noon recess with respect to the Commission's condemnation case against him involving acquisition of right of way for the new Columbia River Highway near Troutdale. He presented the following offer from Mr. Martin: Mr. Martin will deed to the state the property that the state needs, if the state will deed to him in exchange therefor 19 acres of land located nearby which is no particular value for state highway purposes; and in addition thereto, will grant him one farm crossing and two additional points of access, one of which shall be a par-

tially commercial access to serve a service station only; and will pay him the sum of $10,000 cash. He explained that the $10,000 cash payment consists of $4,700 for buildings, $1,200 for a well, $3,000 for moving a dwelling, and $1,100 for severance damages. He also advised that if the Commission sees fit to grant the accesses desired by Mr. Martin, it has legal authority to control traffic at any of such access points in any manner that it considers necessary. He recommended settlement with Mr. Martin on the basis of his offer. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously and ordered that the matter be covered either by written agreement or by stipulation in the court proceedings.

In the discussion of state park matters, Chairman Chandler mentioned receipt of a deed from Borax Consolidated, of London, England, conveying to the state a considerable acreage of ocean frontage north of Brookings, Curry County, as an addition to Samuel H. Boardman State Park. He pointed out that the property was presented to the state as a gift and he gave as his feeling that it would be appropriate for the Commission to thank the Company in writing for its very generous contribution. The suggestion was approved by Commissioners Reynolds and McIver, whereupon the Chief Counsel and the Secretary were instructed to prepare a letter of appreciation for approval and execution by the Commission at its next regular meeting.

The Commission had under consideration the formulation of a construction program for Federal Aid funds recently authorized by the Congress for the fiscal years 1952 and 1953. The amounts available for such program are: Federal funds, $15,520,000; State match money, $10,280,000, and $1,800,000 extra State funds to finance acquisition of right of way for T. H. Banfield Expressway in Sullivan Gulch, Portland, totaling $27,600,000.

The Engineer presented a list of suggested projects to take up the total funds now available for fiscal years 1952 and 1953, and additional funds which it is expected the Congress will authorize later for the fiscal year 1954.

The Commission decided to limit consideration to Primary and Urban Federal Aid projects suggested by the Engineer for undertaking during the first fiscal year. As a result of careful consideration of the list of projects presented by the Engineer, the Commission unanimously selected the following and authorized the Engineer to submit them to the Bureau of Public Roads for its approval when the apportionment of funds for the first fiscal year has been made.

PRIMARY FEDERAL AID

County	Highway, Section and Description	Amount	Year
	DIVISION NO. 1		
Hood River	Columbia River. Cascade Locks-Herman Road, 2.93 mi. Grad., Pav. and Bridge	$ 350,000	1
Hood River	Columbia River. Herman Road-Gorton Creek, 3.53 mi. Grad., Pav. and Bridge	800,000	1

PRIMARY FEDERAL AID

County	Highway, Section and Description	Amount	Year
	DIVISION NO. 2		
Clatsop	Oregon Coast. Cannon Beach-Arcadia (Sta. 200 to 430), 4.3 mi. Grad., Surf., Oil & Ldscapg.	$ 380,000	1
Clatsop	Columbia River. Big Creek Section, (Knappa) 1.5 mi.Grad., Pav.,Ldscapg. and 2 Bridges	300,000	1
Lincoln	Oregon Coast. Big Creek Section (MP 152), 1.1 mi. Grad., Surf., Bit. Mac., Ldscapg. and Structure	214,000	1
Marion	Pacific East. Hayesville to Lana Ave. Salem, 1.5 mi. 4-lane A.C. Pavement and Ldscapg.	253,000	1
Polk	Pacific West. Monmouth-Suver, 5.0 mi. A.C. Resurface	100,000	1
Tillamook & Washington	Wilson River. Tunnel and Crossings 3, 4 and 5 of Wilson River; also 2 Crossings of Gales Cr.	180,000	1
	DIVISION NO. 3		
Coos	Oregon Coast. Bunker Hill-Delmar, 6.6 mi. Grading, Structures, Paving and Ldscapg.	$ 1,010,000	1
Douglas	Umpqua. Reedsport-Deans Creek, 2.7 mi. Grad. and Pav.	175,000	1
Lane	Pacific. Judkins Pt.-Goshen, 5 mi. Grad., Pav., Ldscapg. and O'xing (4-lane pavement)	700,000	1
	DIVISION NO. 4		
Hood River & Wasco	Columbia River. Hood River-Mosier, 8.3 mi. Roadbed Construction	$ 1,000,000	1
Wheeler	Ochoco. Bridge Creek Bridge, 0.8 mi. Grad., Surf. and Bridge	100,000	1
	DIVISION NO. 5		
Morrow	Columbia River. Heppner Junction-Boardman, 17 mi. Paving	400,000	1
Union	Old Oregon Trail. LaGrande-Ladd Canyon, 11 mi. Grading and Surfacing	1,000,000	1

(cont.)

URBAN FEDERAL AID

County	Highway, Section and Description	Amount	Year
	DIVISION NO. 1		
Multnomah	Pacific East (Union Ave.,). Columbia Slough-Columbia Blvd., 0.31 mi. Widen Bridge, Grading and Paving	$ 250,000	1
Multnomah	Pacific East (Union Ave.). Bridgeton Road-Gerts Road, 1.7 mi. Grading, Paving, Undercrossing and Service Roads	350,000	1
Multnomah	Sullivan Gulch. Unit 5. (82nd to Sun Dial), 8.8 mi. Grad., Surf., Structures & Landscaping	500,000	1
	DIVISION NO. 2		
Marion	Salem-Dallas. Center Street Bridge (Salem), Reconstruct Bridge and Approaches	$ 750,000	1

The following instructions were given the Engineer by the Commission in connection with the discussion of the above program:

PRIMARY FEDERAL AID PROGRAM

1. Division No. 2, Big Creek Section of the Columbia River Highway in Clatsop County:

   The Engineer was instructed to expedite this project.

2. Division No. 3, Reedsport-Deans Creek Section of the Umpqua Highway in Douglas County:

   This project was approved by the Commission and the Engineer was instructed also to include in the program provision for the elimination of the covered bridge over Lake Creek.

STATE CONSTRUCTION PROGRAM

1. Division No. 3, Florence Section of the Oregon Coast Highway in Lane County:

   The Engineer was instructed to include in the program provision for the improvement of the highway through this town and to canvass the state for additional city projects of similar type which also should be included in the program.

The Right of Way Engineer requested blanket authority to grant permits for the use of excess state highway properties for agricultural purposes. He said that the form of permit would contain provision for the revocation of the privileges when the property is needed for state highway use. The Commission approved the request.

Consideration was given by the Commission to granting an encroachment permit to Austinna S. Loudenbeck on the Scott Creek Section of the Alsea Highway. The Right of Way Engineer stated that Mrs. Loudenbeck's residence extends one and one-half feet into the new highway right of way and that Mrs. Loudenbeck has requested permission to let it stay there for the time being. The building, he said, does not interfere in any way with the state's use of the highway, and he suggested that Mrs. Loudenbeck be allowed this slight encroachment for the remainder of her lifetime so as to avoid the expense of moving the building, which would be rather costly. The Commission approved the suggestion unanimously and ordered that the permit contain provision for the moving of the building when the property is needed for state highway purposes.

The Right of Way Engineer brought to the Commission's attention a request from the Hammond Lumber Company for a change in the access points from their property to the North Santiam Highway in the vicinity of Detroit. He recommended approval of the request as an advantage not only to the Company but also to the State. The Commission approved the recommendation.

The Right of Way Engineer presented for the Commission's consideration a form of deed conveying to the Southern Pacific Company certain property located on the Oregon City-New Era Section of US99E. He explained that this deed is to correct an error recently discovered in a deed previously executed by the Commission on July 20, 1948, which error involved a tie to a section corner. The Commission approved and signed the deed.

The Right of Way Engineer also asked the Commission to approve and sign a "Satisfaction of Mortgage" given by Fred M. Mallory and O. L. Smith in connection with a property sale on US99E in the town of Canemah. He explained that the property concerned was acquired from Mr. W. A. Hodges in connection with a right of way settlement and subsequently a portion of it was sold for $1,750 to Messrs. Mallory and Smith who paid $500 cash and gave the state a mortgage for the balance. The mortgage, he said, was recorded in the county records and the Highway Department records disclose that it was satisfied later on and that the mortgagor was given an executed instrument showing fulfillment of the obligation; however, it now appears that the satisfaction of mortgage was not recorded in the county records and a re-sale of the property is being held up thereby. He recommended execution of a duplicate "Satisfaction of Mortgage" in order to clear up the situation. The Commission approved the recommendation.

The Chief Counsel presented a form of deed conveying to the City of Pendleton certain properties situate adjacent to the Pendleton Airport Road. He said that this conveyance is in conformity with the provisions of the agreement which the Commission executed with Umatilla County and the City of Pendleton on May 22, 1950, and he assured the Commission that the obligations of the city and county have been fulfilled. He recommended execution of the deed. The Commission

approved the recommendation unanimously and thereupon signed the deed. In this connection the Chief Counsel suggested that, in view of the fact that the city and the county have fulfilled their obligations with respect to this three-party agreement, it would be in order at this time for the Commission to formally remove the Pendleton Airport Road from the State Secondary Highway System, provision for which was contained in the agreement. He presented a form of resolution covering the matter. The Commission unanimously adopted the resolution, a copy of which, marked EXHIBIT "B", is attached hereto and by this reference is made a part hereof with like effect as though extended in full herein.

The Chief Counsel also presented to the Commission a form of agreement with Lock-Wood, Inc., Portland, relative to property that is being acquired from this company as right of way for the T. H. Banfield Expressway in Sullivan's Gulch in Portland. He recalled that the Commission at its meeting on August 21, 1950, approved the option that was presented for the acquisition of this property, which option contained a great number of conditions which it was not practical to recite in full in the deed of conveyance. The purpose of the present instrument, he said, is to continue in force and in writing the agreed conditions as supplementary to the original instrument of conveyance. In view of this explanation the Commission unanimously approved and signed the agreement.

The Commission also approved and signed a deed conveying unto the U. S. Government for the sum of $25.00, a small parcel of land triangular in shape, situate adjacent to the Pleasant Hill-Lost Creek Section of the Willamette Highway, Lane County, the sale of which was authorized by the Commission at its meeting on August 22, 1950. (The deed was signed later in the session.)

The Chief Counsel presented a list of properties heretofore authorized for condemnation but upon which complaints have not as yet been filed, and a list of condemnation cases that are now pending in circuit court. The Commission took no action.

The Chief Counsel requested instructions relative to the encroachment of two buildings on the right of way of the Oregon Coast Highway in the city of Coos Bay. He said that these buildings are owned by the Marshfield Bargain House and Junk Company, and that the encroachment concerns only the eaves of the buildings which extend over the right of way line about six inches. He gave as his feeling that the company should not be required to go to the expense of moving the buildings just because of this slight encroachment, and he recommended that the encroachments be allowed under a revocable permit which will preserve without question the state's rights with respect to all of the property that it acquired. The Commission approved the recommendation.

The Chief Counsel also requested instructions concerning the removal of advertising signs being maintained on the right of way of state highways at the following locations: Harrisburg, in Linn County; Pacific Highway at Drain, Douglas County; Klamath Falls, Klamath County. He said that the owners of the signs repeatedly have been requested to remove them, but to date, no response has been received. He requested authority to proceed against the owners in

conformity with statutory provisions. The Commission authorized the Chief Counsel to do what is necessary to secure the removal of the signs.

The Chief Counsel also requested instructions as to the action to take against a certain logging concern at Lakeview for wrongful cutting of trees growing on state highway property near Lakeview. He said that the law provides that recovery may be had at twice, or three times the value of the trees and the question arises whether or not a demand should be made for payment of more than their normal value. He was instructed by the Commission to collect only the normal value of the trees.

The Chief Counsel presented a claim from the Enterprise Telephone Company in the amount of about $500, representing the cost of re-arranging its telephone poles in the city of Enterprise, necessitated by a highway improvement at that place. He said that the poles had occupied space in the street for a considerable length of time, but were moved back by the company to accommodate the highway improvement and the Company is now asking for reimbursement for the expense. He also stated that he has examined the city ordinance by which the company is occupying the street and there is nothing in that ordinance or in the city charter which would require the company to pay for moving the poles. Action in this matter was deferred by the Commission until its next meeting. The Chief Counsel was instructed to ascertain in the meantime the attitude of the City Attorney with respect thereto.

Instructions were requested by the Chief Counsel regarding a farm crossing on US99E between Salem and Albany. It appears that when right of way was acquired for the highway the owner of the property was allowed a vehicle crossing for purely farm purposes, inasmuch as he owned the land on both sides of the highway at this location. It also appears that subsequently this man sold the land on one side of the highway, but the crossing is used, notwithstanding a provision in the deed of conveyance that in such cases the crossing should be closed. He requested authority to take action as may be necessary to close crossings in instances of this kind. The Commission approved the request.

The Chief Counsel rendered a report on subsequent developments rising out of the decision of Judge King, Circuit Judge of Coos County, with respect to the injunction that he issued allowing log haulers whose permits were suspended for over-loading, to resume their operations. He said that the Court will not consider this case until a judiciable issue has been entered; that he has endeavored to secure a bona fide party to represent the loggers and an attorney to plead the case, but without success, in view of which it is not possible to appeal the case to higher court without a declaratory judgment. The only recourse, he said, is to have the law amended by the Legislature and he is now preparing a bill for this purpose. He was instructed by the Commission to secure proper legislation covering the matter. The Engineer was instructed, in the meantime, to keep a complete record of the violations, but not to cite the offenders to the courts unless the total gross weight of their loads is in excess of 72,000 lbs. or in excess of 32,000 lbs. for dual axle plus the tolerance allowed by law. He was also instructed to post for reduced weight loads the road sections over which log hauling is being carried on when he considers

that is necessary to preserve the highway surfaces. This action of the Commission is to apply to all parts of the state.

The Engineer reported that pursuant to the Commission's instructions he has ascertained through Senator Guy Cordon that the federal bill appropriating funds for the construction of Indian roads does not contain provision for a $75,000 allotment for the Sprague River Road in Klamath County as was reported by Mr. Forrest E. Cooper, Lakeview, counsel for the Public Lands Committee of the Association of Oregon Counties. Senator Cordon, he said, advises that the Senate's Public Appropriation Bill provided the sum of $500,000 for Indian roads, $75,000 of which was specifically earmarked for the Sprague River Road, with the requirement that the state match it with a like sum. However, in a conference with the House Committee the entire $500,000 appropriation was deleted. For the Commission's further information the Engineer advised that the unimproved section of this road extends from a point about two miles west of the town of Sprague River easterly to a connection with the Klamath Falls-Lakeview Highway, a distance of 13.25 miles, and that the estimated cost to bring it to accepted secondary highway standards is $250,000. The Commission approved the report and ordered it filed.

There was presented to the Commission for consideration a request from the Umatilla County Court for an exchange of roads in the state's secondary highway system. The County Court proposes that the County take jurisdiction over the Sunnyside-Umapine State Secondary Highway No. 332 (7.25 miles in length) and the Freewater State Secondary Highway No. 339 (5.26 miles in length); and that the State assume jurisdiction over the former route of the Old Oregon Trail between Umatilla and Hermiston (6.83 miles in length), the county road which serves as a cut-off between the Hermiston State Secondary Highway and the old route of the Old Oregon Trail (1.48 miles in length), and a 1.5-mile section of county road which extends from the Pendleton-John Day Highway into the town of Ukiah. The Engineer pointed out that by this proposed exchange the state would take on 9.81 miles of county road, and the county would take 12.51 miles. He recommended that the request be denied. The Commission deferred action on the matter until its next meeting.

The Commission discussed a request from the City of North Powder for the widening of the Old Oregon Trail (old route) through this town. The Engineer estimated the cost to provide a full width oiled surface between "D" Street and "F" Street, through the business district, at $1,100. The Commission authorized the expenditure by unanimous vote.

The Commission discussed and approved a cooperative agreement with the U. S. Bureau of Public Roads providing for the maintenance of the Pendleton-John Day Highway in the vicinity of Ukiah, Umatilla County, a forest highway section. (The agreement was signed later in the session.)

The Engineer reported that pursuant to authority previously granted him by the Commission he has awarded contracts for certain highway improvements for which bids were received by the Commission on September 28-29, 1950,

the conditions of the awards having been satisfied. The Commission unanimously confirmed the awards as follows:

(1) Grading Stout Creek-Mill City Section, North Santiam Highway, Marion County. Bids received September 29 - contract awarded October 10 to Cosmo Gilo, low bidder.

(2) Construction of maintenance building at Estacada, Clackamas County. Bids received September 28, contract awarded October 5, to Foothills Construction Company, low bidder.

(3) Construction of Yoncalla Section, Douglas County. Bids received September 29, contract awarded October 5, to Western Paving and Construction Company, only bidder.

(4) Grading and paving Garden Valley Road-Roseburg Section, Pacific Highway, Douglas County. Bids received September 29, contract awarded October 4 to K. F. Jacobsen & Company, low bidder.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction contracts:

1. Kuckenberg Construction Company, Contract No. 3094 for grading, paving and bridge construction on the Steel Bridge-Ankeny Street Section of the Pacific Highway West (Front Avenue) in Portland, requested an extension of time of 45 days from September 30 to November 15, 1950, within which to complete this job. They attributed their failure to complete the project within the specified time limit to additional work that they were required to perform under force orders, and to difficulties experienced in securing competent workmen. The Engineer advised that the contractor completed the structural work on this project about 60 days before the expiration of the specified time limit, and the structure has been in use since then. He also stated that the contractor did experience considerable difficulty in obtaining sufficient competent men to perform concrete finishing work, hence was not able to complete the work in the specified time. He recommended in view of the circumstances that the extension of time, as requested, be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

2. C. J. Montag & Sons, Contract No. 3236, for grading, paving and bridge construction on the Tillamook Street-Broadway Bridge Section of the Pacific Highway West in Portland, requested an extension of time of 304 days from September 30, 1950 to August 1, 1951, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit: delays incident to the failure of the Western Union Telegraph Company to revise its facilities; failure of the contractor for the Portland interceptor sewer to complete his work on the east side of Interstate Avenue; and an agreement with the State Highway Bridge Engineer to defer construction of the shooflies on Broadway so

as not to impair the flow of traffic across the Broadway Bridge until the Steel Bridge, then closed, was re-opened to traffic. The Engineer stated that the provisions of the contract called for completion of all the work on this project on or before September 30, 1950; however, during the progress of the work the City of Portland awarded a contract for construction of an interceptor sewer on the east side of the Willamette River. This sewer, he said, crossed through the area that was included in the Montag contract, and due to the slowness of the sewer contractor, the state's contractor was not able to start portions of his work until late in the spring. This delay, he said, made it impossible to complete the project during the 1950 working season, so it will be necessary to postpone the surfacing work until suitable weather prevails next year. He recommended, in view of the circumstances, that the extension of time, as requested, be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

3. Lindstrom Bros., Inc., Contract No. 3214, for construction of the Elk Creek Bridge and the Sunset Boulevard grade separation structure on the Oregon Coast Highway in Clatsop County, requested an extension of time of 31 days from September 30 to October 31, 1950 within which to complete this job. They attributed their failure to complete the project within the specified time limit to unusually severe weather conditions during the 1949-1950 winter season, and to extra time required to perform certain force account work. The Engineer advised that these structures were substantially completed within the specified time limit, and that the thirty days extra time requested is simply to clean up both sites. He verified the contractor's statement that unusually severe weather conditions during the past winter accounted for the overrun of time limit. He recommended in view of the circumstances that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

4. J. C. Compton Company, Contract No. 3346, for grading and paving the Cave Junction-California State Line Section of the Redwood Highway in Josephine County, requested an extension of time of 45 days, from September 30 to November 15, 1950, within which to complete this job. They alleged that regulations of the State Forestry Department which will not permit the burning of slashings of trees until the rainy season has set in, delayed that feature of their work and caused the overrun of the time limit. The Engineer advised that all of the surfacing and shoulder construction on this project was completed by October 15. The contractor, he said, has handled this project very satisfactorily and has done an excellent job. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. E. C. Hall Company, Contract No. 3334, for rock production on The Dalles-California Highway at Dufur, Wasco County, requested an extension of time of five days from August 31 to September 5, 1950, within which to complete this project. They alleged that unforeseen circum-

stances in connection with their contract with the Bureau of Public Roads on the Timberline Highway prevented them from moving their operations to the Dufur location in sufficient time to complete this contract within the specified time limit. The Engineer advised that the reason given by the contractor for overrunning the time limit of the contract is correct. The delay, he said, has caused no inconvenience to the Highway Department, nor to the travelling public. Moreover, the state's expense for engineering supervision has not been increased. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

6. A. H. Saxton & Sons, Contract No. 3296, for construction of an oil mat surface on the Forest Boundary-Jones Ranch Section of the Ochoco Highway, Wheeler County, requested an extension of time of thirty days, from September 30 to October 30, 1950, within which to complete this job. The contractor stated that all work in connection with the project, except construction of the metal guard rail, was completed within the specified time limit, and that he had been requested by the Engineer to postpone the guardrail construction until the surfacing and oiling were finished, which accounted for the overrun in time limit. The Engineer stated that the reasons given by the contractor for failure to complete the project within the specified time are correct -- he was requested to defer the guardrail construction until the oiling and surfacing were done in order to secure a better job. The Engineer recommended that the time extension as requested be granted without penalty. A letter from the Bureau of Public Roads was presented concurring therein. The Commission unanimously approved the recommendation.

7. Valley Concrete Company, Contract No. 3358, for pavement widening on the Ashland Undercrossing Section of the Pacific Highway, Jackson County, requested an extension of time of 30 days, from September 30 to October 31, 1950 within which to complete this job. They alleged that they were unable to complete the project within the specified time limit because excavation work required much more drilling and shooting of rock than was anticipated when they bid the project, with the result that their schedule of work time was disrupted. The Engineer stated that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

8. L. R. Kauffman, Contract 3245, for surfacing the Cougar Creek-Preacher Creek Section of the Alsea-Deadwood Secondary Highway, Lane County, requested an additional extension of time of nine days, from August 15 to August 24, within which to complete this work. He alleged that he was unable to complete the project within the previously extended time limit because of orders from the Engineer to furnish an increased amount of rock in stock-pile. The Engineer advised that Mr. Kauffman's previous request for extension of time to August 15 was granted subject to the condition that he would reimburse the state for engineering expense incurred subsequent to June 15, and Mr. Kauffman was so advised, but he protests the penalty, alleging that the

overrun of time limit was through no fault of his own but was the result of adverse weather conditions and the condition of the road over which he had to transport his materials. Mr. Kauffman's allegations, he said, have been investigated, and a review of the conditions by the Division and Construction Engineers reveals that not sufficient consideration was given to road conditions. Moreover, a letter has been received from County Judge F. E. Gilkey of Lincoln County to the effect that Mr. Kauffman was seriously handicapped in his hauling operations by the poor condition of the Five Rivers Road. He recommended, in view of the circumstances, that the extension of time as requested by Mr. Kauffman be granted without penalty, and that he also be relieved of payment of the penalty previously assessed. The Commission approved the recommendation.

9. Allen E. Sackett, Contract No. 3353, for grading and oil mat surfacing on the Salisbury Junction-Poker Creek Section of the Sumpter Valley Secondary Highway, Baker County, requested an extension of time of 273 days, from September 30, 1950 to June 30, 1951, within which to complete this job. He alleged that delay in the award of the contract, and extra work that he was required to perform, were the reasons for overrunning the specified time limit. The Engineer advised that bids for this project were opened on April 25, 1950, but the contract was not awarded until June 7, 1950, due to right of way difficulties. The Contractor, he said, started work on June 19 and has prosecuted the work diligently ever since, notwithstanding which it was not feasible or possible to do the oiling because of the lateness of the season. He recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

10. The Central Heating Company, Contract No. 3328, for grading and paving on the Cascade Gorge-Prospect Section of the Crater Lake Highway, Jackson County, requested an extension of time of 60 days, from September 15 to November 15, 1950, within which to complete this project. They attributed their failure to complete the job within the specified time limit to failure of the first quarry that they opened up, which proved to be unsatisfactory, necessitating re-establishing their plant in another quarry. The Engineer advised that the state specified a certain quarry to be used on this job, but after it was opened up by the contractor it was found to be unsatisfactory for the work. The Contractor, he said, had already set up his plant in this quarry, and was ready to commence operating, but because of conditions he was told not to do so, and to wait until such time as the state could locate and secure another quarry. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

11. Oscar E. Joelson, Contract No. 3282, for rock production on the Rock Creek-Condon-Service Creek Section of Wasco-Heppner and John Day Highways, Gilliam and Wheeler Counties, requested an extension of time of 48 days, from July 15 to September 1, 1950, within which to complete this job. He attributed his failure to complete the project within the specified time limit to the fact that he was engaged as a subcontractor by

George Corliss to produce rock for the Scott Canyon Project, Contract No. 3274, and by Vernie Jarl to furnish rock in connection with Contract No. 3279. This subcontracting work, Mr. Joelson alleged, delayed commencement of operations on his own contract. The Engineer advised that the reasons given by the contractor for his failure to complete the project within the specified time limit are correct. The general public, he said, has not been inconvenienced, neither has the state incurred any extra expense for engineering supervision. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

12. Bemis & Company, Contract No. 3292, for construction of a maintenance headquarters building at Veneta, Lane County, requested an extension of time of 25 days, from September 30 to October 25, 1950, within which to complete this job. They attributed their failure to complete the project within the specified time limit to labor and material difficulties. The Engineer advised that the delay in completing the project has occasioned only minor inconvenience and that the state has incurred no additional engineering expense. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

13. Valley Construction Company, Contract No. 3349, for construction of a bridge over Willow Creek on the Imbler-Dry Creek Road in Union County, requested an extension of time of 60 days, from September 30 to November 29, 1950, within which to complete this project. They alleged that the overrun of the specified time limit was caused by difficulties in securing piling. The Engineer advised that investigation reveals that the contractor ordered his materials sufficiently early to complete the project within the specified time limit, but due to the amount of treated timber that is now being used, and the limited capacity of treating plants, he was not able to get delivery of the treated piling until September 19. However, since that time he has had an adequate crew on the job and has expedited the job in a satisfactory manner. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

The Engineer reported that Contracts Nos.3195,3212,3246,3275,3276,3279, 3282, 3284, 3316, 3326, 3334, 3358, 3361, 3398, for construction of state highway projects have been completed according to the requirements of the contracts, or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from the South Benton County Chamber of Commerce requesting the following projects:

1. Improvement of Long Tom River Bridge and approaches thereto, on US99W at Monroe.

2. Complete paving of Territorial Secondary Highway between Monroe and Cheshire.

3. Designation and development of a State Secondary Highway extending from US99W through Bellfountain to Alsea.

The Commission deferred action on these requests and instructed the Secretary to include the matter in the list of unfinished business.

A resolution was presented from the Morrow County Farm Bureau requesting that state and federal funds allocated to Morrow County be expended for improvement of the Ione-Gooseberry Road and the Rhea Creek Road in preference to the Lena-Pilot Rock Road. The Commission decided unanimously to continue with its original plan to improve the Lena-Pilot Rock Section of the Heppner Highway, and instructed the Secretary to so inform the petitioners.

A letter was presented from Senator Stewart Hardie of Condon, requesting an extension of the proposed improvement of the Wasco-Heppner Secondary Highway because of a development that is being made by the U. S. Army Engineers about six miles west of Condon. The Commission ordered that Senator Hardie be informed that the Commission is improving this highway as rapidly as is possible with the funds available.

The Commission had under discussion the abandonment of certain portions of the right of way of Joseph-Wallowa Lake Secondary Highway (old route) which no longer are valuable for highway purposes since the highway has been improved on revised alignment. The Engineer exhibited a map showing the portions to be abandoned and pointed out that there are two small parcels. He recommended that they be abandoned as a part of the state highway system and placed hereafter under the jurisdiction and control of the County Court of Wallowa County for vacation or for such public use as the County may determine. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed and upon recommendation of the Engineer approved the termination of a lease agreement with the Southern Pacific Company, heretofore entered into with the company in 1942, for use of an unloading and oil storage site on the Coos Bay Branch of the Southern Pacific Railroad adjacent to Sheridan Avenue in North Bend. (A "termination of lease" was signed by the Commission later in the session.)

The Engineer reported the need to prohibit the parking of vehicles along the Pacific Highway East at Marine Moorage, about one mile south of Oregon City. He said that this place caters to motorboat enthusiasts on the Willamette River, and on Saturdays, Sundays and holidays there is a considerable congestion of vehicular traffic to and from Marine Moorage, where parking facilities are limited. This results in heavy parking of cars on the shoulders of the highway, many of them being very close to the edge of the pavement. The parking of cars on the shoulders of this heavily travelled

highway, he said, creates a serious traffic hazard, and he recommended the adoption of an appropriate order prohibiting such parking for a distance of about 400 feet on either side of the moorage. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also recommended the designation of a "NO PARKING ON HIGHWAY SHOULDERS" zone on the Beaverton-Hillsdale Highway near the town of Beaverton, particularly opposite a drive-in theater which is in operation at this place. He said that the theater's screen can be partially seen from the highway and as a result motorists park their cars on the shoulders of the highway to look at the pictures, causing a very hazardous situation, inasmuch as the highway shoulders are quite narrow. As a result of discussion, the Commission unanimously approved the Engineer's recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a report from the Engineer concering a 25-mile per hour speed restriction which has been in effect on the Pacific Highway through the town of Wolf Creek for several years. The Engineer advised that a recent study indicates that a 25-mile per hour speed limit through this town is now too slow in view of the fact that the highway has been reconstructed on modern high speed alignment, bypassing the central part of this town, and he recommended that it be raised to 40 miles per hour. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from Mrs. J. C. Banks, Portland, urging the Highway Commission to reconsider its action taken on September 28, 1950, denying a request for the establishment of a 30-mile per hour speed zone on the Oswego Highway from S. W. Edgecliff Drive to Dunthorpe. As a result of discussion the Commission decided not to change its previous decision in this matter.

The Commission discussed a request for erection of a textboard on the Central Oregon Highway near Juntura, Malheur County, giving pertinent information concerning Peter Skene Ogden, and Hudson's Bay Company's Fifth Trapping Expedition into the Snake Country. It was explained to the Commission that the trapping expeditions of Peter Skene Ogden were pioneers in the exploration of the Oregon Country and are of historical importance, many rivers and locations having received their names from these expeditions. The Engineer estimated the cost of the textboard at about $300, and he recommended approval of the expenditure. He also recommended approval of the following inscription for the textboard, which he said has the approval of the Memorials Committee of the Oregon Historical Society. The Commission approved both recommendations unanimously.

"Peter Skene Ogden, leading a party of Hudson's Bay Company trappers, camped near here on October 11, 1828. On this, Ogden's fifth and final expedition into the "Snake Country", he started on September 22 from Fort Nez Perce (Walla Walla). From here, passing Alvord Lake, he went south to the Humboldt River and thence east to Great Salt Lake, first reached by him on his initial expedition of 1824-25. Retracing the route on its return journey, the party followed the Humboldt, turned north to the Silvies, crossed over into the John Day valley and reached Fort Nez Perce in July, 1829. Over 2,000 beaver were taken by the party."

The Commission discussed a petition from landowners, residents, and citizens from Powell Butte, Crook County, requesting designation of a restricted speed zone on Highway 28 adjacent to their public school, church and business district. In the discussion, it was recalled that this matter has been before the Commission several times in the past, and the facts then disclosed that a reduced speed zone is not warranted. The Engineer recommended that, as there is no change in the facts previously presented, the petition be denied. The Commission approved the recommendation.

The Secretary presented a summary of "unfinished business". Action on the matters listed therein was deferred by the Commission until its next meeting.

The Commission discussed a date for its regular meeting in December, heretofore tentatively set for Wednesday and Thursday, December 20 and 21. It was decided to hold such meeting on Tuesday and Wednesday, December 19 and 20, 1950. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel, Portland. The Commission verified the dates for its earlier, approaching meeting on Thursday and Friday, November 9 and 10.

A request was presented from the City of Waldport for sidewalk construction on the Oregon Coast Highway in front of a storage site owned by the State Highway Department, in Waldport. The Engineer advised that the city has an ordinance which requires property owners to construct sidewalks when so instructed by the City Council, and that the property owners along the highway have built sidewalks almost to the Highway Department's storage site. The law, he said, does not compel the State Highway Commission to construct a sidewalk in front of its property, but he gave as his feeling that it would be advisable to do so in this instance so as not to leave a gap in sidewalks already constructed by local people. He estimated the cost of the sidewalk at $340, and recommended approval of the expenditure. The Commission approved the recommendation unanimously.

The Engineer requested instructions relative to the proposed improvement of the Holland Loop County Road (Federal Aid Secondary Highway No.267) in Josephine County. He explained that the present program includes an item of $100,000 of Federal Aid Secondary Highway funds for the construction of bridges on this road, such allocation being approved on the condition that the County will perform necessary grading work which is estimated to cost about $25,000. He further stated that information just received from the County Court is to the effect that the County does not have funds available to meet its obligation so it appears necessary either to defer the bridge construction until the county can finance the grading or to advance money to the county secured by an order on the Secretary of State for payment of the County's share in one year out of the County's share of State Highway revenues. After carefully considering the matter the Commission decided unanimously to defer the bridge construction until the County has completed the grading work.

The Right of Way Engineer presented for the Commission's consideration a quit claim deed reconveying to Linnie Thayer a small tract of land that was acquired from her as a hauling road in connection with the improvement of the Ontario-Nyssa Section of the Old Oregon Trail. He explained that after the state had purchased this property the Bureau of Reclamation stopped the state from taking materials from its quarry because they needed the material themselves, hence the hauling road is of no further use to the state. Mrs. Thayer, he said, wants the property reconveyed to her and she has agreed to pay for it the exact amount that she received from the state. He recommended approval of the reconveyance. The Commission approved the recommendation. (The deed was signed later in the session).

The Engineer reported an inquiry from the Department of State Police if the Highway Commission will approve an increase in the amount of the contribution of the State Highway Department to the Department of State Police for the coming biennium. He pointed out that the Budget as approved at this meeting contains an amount of $2,036,000 for State Police activities whereas the Superintendent of State Police has asked that this be increased to $2,105,024, an increase of $69,024. The Commission unanimously approved a contribution to the State Police Department of the sum legally authorized, but no more.

The Engineer also reported a letter from Mr. John Poorman, Director of Civil Defense, regarding the use of the State Highway offices at Milwaukie for his organization. It appears that the Civil Defense authorities have investigated office space for their use and have concluded that the Highway Department's Milwaukie offices are most desirable, so they have requested that the Highway Department vacate the premises. The Commission emphatically denied the request.

The Commission approved and signed the following agreements, etc.:

Agreement with F. C. Hathaway for logging dead timber on Sunset Highway.

(cont.)

Agreements, etc. cont.:

Permit agreement with Dan J. Melton covering logging road construction and operation across Maria C. Jackson State Park.

Encroachment permit to Austinna S. Loudenbeck to occupy small area of right of way on Scott Creek Section, Alsea Highway.

Indenture of Access granting Hammond Lumber Company changes in access points to the North Santiam Highway in town of Detroit.

Deed to correct error in deed executed July 20, 1948, conveying properties to Southern Pacific Company on Oregon City-New Era Section of US99E.

Satisfaction of Mortgage from Fred M. Mallory and O. L. Smith acknowledging payment for land purchased.

Deed conveying to City of Pendleton properties adjacent to Pendleton Airport Road.

Agreement with Lock-Wood, Inc., relative to property being acquired for T. H. Banfield Expressway.

Deed conveying to U. S. Government small parcel adjacent to Pleasant Hill-Lost Creek Section of Willamette Highway.

Agreement with Umatilla County, Oregon; Benton County, Washington; and Washington Toll Bridge Authority with respect to proposed bridge across Columbia River below McNary Dam.

Cooperative agreement with Bureau of Public Roads for maintenance of Pendleton-John Day Highway near Ukiah.

Termination of Lease granted by Southern Pacific Company for use of unloading and oil storage site on railroad property in North Bend.

Quitclaim Deed to Linnie Thayer for a parcel of land in Malheur County, containing 0.25 acre.

The meeting adjourned at 5:00 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

EXHIBITS "A" THROUGH "G"

Minutes of October 26, 1950

EXHIBIT "A"

Minutes of October 26, 1950

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

NORTH ROSEBURG SECTION - PACIFIC HIGHWAY

16506 - Ohman, R. Emma and; Perkins Oil Co. and; Barcus Sales & Service Co. (Haskin)
Right of Way and Easement
Two Options expire March 19, 1951

Parcel I.

1525 sq. ft. at $1.00 per sq. ft. and 15 foot slope easement	$ 1,525.00	$
Allowance - in lieu of moving house	1,000.00	

Parcel II.

1080 sq. ft. at $1.50 per sq. ft. and a 5 foot temporary easement	1,620.00
Allowance - for removing neon sign & release of lease to be paid lessee	300.00

NORTH ROSEBURG SECTION - PACIFIC HIGHWAY

16506 - Ohman, E. Emma and; Perkins Oil Co. and;
Barcus Sales & Service Co. (cont.)

Amount to be paid Ohman - chrg to Right of Way		$ 4,145.00
Amount to be paid Barcus Sales & Service - chrg to Right of Way		300.00
		$ 4,445.00

Access not controlled -

16514 - Sandell, Wendell M. & Edna M. and; Tuttle, Opal E. and; Willis, Jerry W. (Haskin)
Right of Way and Easement
Option expires March 20, 1951

878 sq. ft. at $1.00 per sq. ft. and 15 foot slope easement	$ 878.00	$
Low bid for moving building	4,574.50	
Allowance to lessees for closing of business during moving at $65 per day (Est)	1,950.00	
Amount to be paid owner - chrg to Right of Way		5,452.50
Amount to be paid lessees-chrg to Right of Way		1,950.00
Total Amount Chargeable to Right of Way (Est)		7,402.50

THINGS TO BE DONE BY THE STATE:

Reconstruct driveway at Stat. 2499+90 and 2500+30 (Est)	100.00	
Amount chargeable to Construction		100.00
GRAND TOTAL (Estimated)		$ 7,502.50

EXHIBIT "B"

Minutes of October 26, 1950

RESOLUTION

WHEREAS, State Secondary Highway No. 336, otherwise known as the Airport Road, in Umatilla County, Oregon, is no longer needed for the purpose for which said road was created and designated as a part of the system of secondary highways of the State, but said highway is needed for the use and convenience of people living thereon and communities served thereby; and

WHEREAS, the State Highway Commission, the County Court of Umatilla County, and the municipal authorities of the City of Pendleton heretofore entered into an agreement, which agreement bears date of May 22, 1950, a part of which agreement provided that said Airport Road, which has been designated State Secondary Highway No. 336, should be removed from said system of secondary state highways; and

WHEREAS, said Airport Road was made a part of the system of state secondary highways pursuant to the authority vested in the Highway Commission by Subsection 36 of Section 100-115, O. C. L. A., and said road was therefore designated as a secondary state highway, with the approval of the County Court of Umatilla County; and

WHEREAS, said act provides that "with the written consent of the county court of the county in which a particular highway or highways or parts thereof may be located, the highway commission may, when in its opinion the interests of the state will be best served, eliminate from said system of secondary highways any road or highway or part thereof, and thereafter such road or highway or part thereof so eliminated shall become a county road or highway, and the construction, repair, maintenance or improvement, and the jurisdiction over such highway shall be exclusively under the county court of the county in which such highway or road is located"; and

WHEREAS, said agreement referred to in the second paragraph of this resolution contains the County's consent that said secondary highway may be taken from the system of state secondary highways and shall, upon such removal, become a county highway or county road under the jurisdiction and control of the County Court of said Umatilla County; and

WHEREAS, it is the judgment and opinion of the Commission, and the Commission now finds, that the interests of the State will be best served by the removal of said secondary state highway from the state highway system of secondary state highways and the return of the same to its status of and as a county road;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

EXHIBIT "B" (cont.)

1. That all of the Airport Road, which is State Secondary Highway No. 336 and which extends from the north boundary of the right of way of the Old Oregon Trail, State Highway No. 6, to the north end of said secondary highway, all of which is in Section 5, Township 2 North, Range 32 East, and which highway is further identified and shown colored in red on the map attached hereto, marked Exhibit A and by this reference made a part hereof, hereby is removed from said secondary state highway system and said highway from this date shall be known and designated as a county road and shall be maintained as such by the County Court for public travel. The Commission hereby surrenders and relinquishes all jurisdiction over said road and hereby consents that jurisdiction and control over said road may be assumed and exercised by the County Court of Umatilla County. Said road shall from date hereof be maintained by the County or by the City of Pendleton, pursuant to agreement between the City and the County Court, for public use so long as the same may be needed for such purpose.

2. That the County Court of Umatilla County be and said Court is hereby requested to adopt and incorporate in its records all necessary resolutions, papers, and orders required for the purpose of reinstating said Airport Road as a county road to be maintained for public use at county expense.

3. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Umatilla County and to the City Council of Pendleton a duly certified copy thereof, and shall file with the Clerk of Umatilla County and the City Recorder of Pendleton a like certified copy, and said County Court and City Council hereby are respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned old right of way shown colored in red on the map attached hereto and marked Exhibit A, and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. **

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being filed under file No. 218, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "C"

Minutes of October 26, 1950

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3195 with J. R. Taggart & Co. and J. R. Taggart for grading and paving on the Newberg-McMinnville (Units 1, 2 & 3) Section of the Pacific West Highway in Yamhill County, completed September 28, 1950.

Contract No. 3212 with Leonard & Slate Oreg. Ltd. for grading and bituminous macadam surfacing on the Summit-Tolovana Park Section of the Oregon Coast Highway in Clatsop County, completed September 14, 1950.

Contract No. 3275 with C. E. Leseberg for grading and paving on the Pumping Plant Hill-Ontario Section of the Old Oregon Trail Highway in Malheur County, completed September 29, 1950.

Contract No. 3276 with E. C. Swaggart for bituminous macadam surfacing on the Thomas Creek-Lyons Section of the Albany-Lyons Highway in Linn County, completed September 28, 1950.

Contract No. 3279 with Vernie Jarl for furnishing crushed material in stockpiles on the Biggs Section of the Columbia River Highway in Sherman and Wasco Counties, completed June 19, 1950. Removal of contractor's equipment and clean-up of site was not completed until October 5, 1950.

Contract No. 3282 with Oscar E. Joelson for furnishing crushed material in stockpiles on the Rock Creek-Condon-Service Creek Section of the Wasco-Heppner and John Day Highways in Gilliam and Wheeler Counties, completed September 1, 1950. Time extension from July 15 to September 1, 1950 is required.

Contract No. 3284 with Rogers Construction Co. for furnishing crushed material in stockpiles on the Ukiah-Long Creek Section of the Pendleton-John Day Highway in Umatilla and Grant Counties, completed August 30, 1950.

Contract No. 3326 with Meade & Hobson for constructing guard rail and setting sight posts in Division No. 3 on the Pacific and Oregon Coast Highways in Douglas, Coos, Jackson and Josephine Counties, completed September 30, 1950.

EXHIBIT "C" (cont.)

Contract No. 3334 with E. C. Hall Co. for furnishing crushed material in stockpiles on the Dufur Section of The Dalles-California Highway in Wasco County, completed September 5, 1950. Time extension from August 31 to September 5, 1950, is required.

Contract No. 3358 with Valley Concrete Co. for pavement widening on the Ashland Undercrossing Section of the Pacific Highway in Jackson County, completed October 17, 1950. Time extension from September 30 to October 17, 1950, is required.

Contract No. 3398 with J. C. Compton Co. for grading and paving on the Cave Junction (Lister St.) Section of Cave Junction City Streets in Josephine County, completed October 14, 1950.

Contract No. 3246 with J. C. Compton Co. for constructing bridge and approaches on the Little Luckiamute River in Polk County, completed September 30, 1950.

Contract No. 3316 with Saxton Painting Co. for painting on the Yaquina Bay Bridge on the Oregon Coast Highway in Lincoln County, completed September 27, 1950.

Contract No. 3361 with William B. Hickey for constructing a dwelling at Blue Mountain Patrol Station in Malheur County, completed October 13, 1950.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "D"

Minutes of October 26, 1950

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the Joseph-Wallowa Lake Highway in Wallowa County, the northerly terminus of which is at Highway Engineer's Station 16+00 of the relocated line and the southerly terminus of which is at Highway Engineer's Station 355+00 of the relocated line; and

WHEREAS, by reason of the relocation of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundary of the new location, which eliminated sections or units will no longer be needed for highway purposes; and

WHEREAS, the contract for the construction of the relocated Joseph-Wallowa Lake Highway was completed on September 15, 1950, and highway traffic is now routed over said relocated highway; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the several sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portions of the old right of way which by reason of the relocation of said highway are no longer within the boundaries of the new right of way, which for the purpose of this resolution are identified as Units "A" and "B" and are shown colored in brown on the map attached hereto and marked "Exhibit A", are more particularly described as follows:

Unit "A"

Beginning opposite State Highway Engineer's Station 32+25 of the relocated Joseph-Wallowa Lake Secondary Highway in the northwest quarter of the southwest quarter of Section 32, Township 2 South, Range 45 East, W. M.; thence southerly via the former route of the Joseph-Wallowa Lake Secondary Highway to State Highway Engineer's Station 41+47.47 of the relocated Joseph-Wallowa Lake Secondary Highway in the northeast quarter of the southwest quarter of Section 32, Township 2 South, Range 45 East, W. M.

Unit "B"

Beginning opposite State Highway Engineer's Station 52+25 of the relocated Joseph-Wallowa Lake Secondary Highway in the southeast

Unit "B" (cont.)

quarter of the southwest quarter of Section 32, Township 2 South, Range 45 East, W. M.; thence southerly via the former route of the Joseph-Wallowa Lake Secondary Highway to State Highway Engineer's Station 59+15 of the relocated Joseph-Wallowa Lake Secondary Highway in the northeast quarter of the northwest quarter of Section 5, Township 3 South, Range 45 East, W. M.

Said portions of the old right of way shall be abandoned as a part of said highway and hereafter shall be under the jurisdiction and control of the County and may be vacated or kept by the County for such public use as the County may determine.

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way and likewise for highway construction, improvement, maintenance, and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. **

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Wallowa County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto and marked "Exhibit A".

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being filed under file No. 219, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "E"

Minutes of October 26, 1950

R E S O L U T I O N

WHEREAS, Pacific Highway East, extending from the Oregon-Washington state line at the Columbia River Interstate Bridge north of Portland, southerly via Portland, Milwaukie, Oregon City, Salem, Albany and Harrisburg to a junction with the Pacific Highway and Pacific Highway West at or near the north city limits of Junction City, is a state highway, and as such is under the jurisdiction and control of the State Highway Commission, and said highway is identified in the Highway Commission's records as highway No. 1E; and

WHEREAS, the section of said highway from Oregon City south to the Clackamas County line serves a large amount of traffic; and

WHEREAS, the parking of vehicles along and upon the shoulders of said highway between M.P. 16.10 (Engineer's Station 150+50) and M. P. 16.26 (Engineer's Station 158+50), and the maneuvering of vehicles within the traveled portion of said highway in connection with parking and unparking of said vehicles within said area, create a hazard to traffic moving upon said highway and to parked vehicles and the occupants thereof, which hazard, in the opinion of the Highway Commission, should be prohibited; and

WHEREAS, the Commission, based upon the report of its Traffic Engineer and the recommendations of the State Highway Engineer, is of the opinion that for safety and convenience of traffic, all parking upon the shoulders of said highway within said area should be prohibited;

NOW, THEREFORE, all members of the Commission being present and voting affirmatively, the Commission does hereby order:

1. That based upon the facts and recommendations placed before this Commission, the Commission does hereby find and declare that the parking of motor vehicles upon and along the shoulders of the Pacific Highway East in Clackamas County between M.P. 16.10 (Engineer's Station 150+50) and M.P. 16.26 (Engineer's Station 158+50), a distance of approximately 800 feet, creates a hazard to traffic on said highway and to parked vehicles and occupants thereof, which hazard, in the opinion of this Commission, should be removed.

2. That for the purpose of protecting the general public, and especially the motoring public using said highway in said vicinity, it is hereby ordered that parking of vehicles on and along the shoulders of said highway in Clackamas County between M. P. 16.10 (Engineer's Station 150+50) and M. P. 16.26 (Engineer's Station 158+50) is prohibited.

3. The State Highway Engineer hereby is directed to erect and thereafter maintain on and along said highway at the termini of said area, and at such points between said termini, as in his judgment may be necessary to properly inform and advise the public, suitable and adequate signs containing the words "NO PARKING ON HIGHWAY SHOULDERS."

4. A copy of this resolution be delivered to the Superintendent of State Police and to the Sheriff of Clackamas County, Oregon.

5. That this resolution be entered in the minutes and records of the Highway Commission as of the twenty-sixth day of October, 1950.

EXHIBIT "F"

Minutes of October 26, 1950

R E S O L U T I O N

WHEREAS, the Beaverton-Hillsdale Highway, extending from a junction with the Tualatin Valley Highway in Beaverton, easterly via Hillsdale to a junction with the Pacific Highway West in Portland, is a state highway, and as such is under the jurisdiction and control of the State Highway Commission, and said highway is identified in the Commission's records as highway No. 40; and

WHEREAS, the parking of cars along and upon shoulders of said highway near the east city limits of Beaverton, between M. P. 5.70 (Engineer's Station 129+00) and M. P. 5.90 (Engineer's Station 139+56), creates a traffic hazard which, in the opinion of the Highway Commission, should be prohibited; and

WHEREAS, the maneuvering of vehicles within the traveled portion of said highway in connection with the parking and unparking of said vehicles upon the shoulders thereof restricts and impairs the use of said traveled portion of said highway, and thereby creates a hazard to through traffic moving upon said highway, and to parked vehicles and the occupants thereof; and

WHEREAS, the Commission, based upon the report of its Traffic Engineer and the recommendations of the State Highway Engineer, is of the opinion that for safety and convenience of traffic, all parking upon the shoulders of said highway within said area should be prohibited;

NOW, THEREFORE, all members of the Commission being present and voting affirmatively, the Commission does hereby order:

1. That based upon the facts and recommendations placed before this Commission, the Commission does hereby find and declare that the parking of motor vehicles upon and along the shoulders of the Beaverton-Hillsdale Highway near the east limits of the City of Beaverton, between M. P. 5.70 (Engineer's Station 129+00) and M. P. 5.90 (Engineer's Station 139+56), a distance of approximately 1,000 feet, creates a hazard to traffic on said highway and to parked vehicles and the occupants thereof, which hazard, in the opinion of this Commission, should be removed.

2. That for the purpose of protecting the general public, and especially the motoring public using said highway in said vicinity, it is hereby ordered that parking of vehicles on and along the shoulders of said highway near the east limits of the City of Beaverton, between M. P. 5.70 (Engineer's Station 129+00) and M. P. 5.90 (Engineer's Station 139+56), is prohibited.

3. The State Highway Engineer hereby is directed to erect and thereafter maintain on and along said highway at the termini of said area, and at such points between said termini, as in his judgment may be necessary to properly inform and advise the public, suitable and adequate signs containing the words "NO PARKING ON HIGHWAY SHOULDERS".

4. That a copy of this resolution be delivered to the Superintendent of State Police and to the Sheriff of Washington County, Oregon.

5. That this resolution be entered in the minutes and records of the Highway Commission as of the twenty-sixth day of October, 1950.

EXHIBIT "G"

Minutes of October 26, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Pacific Highway

Highway number: 1 Route number: US99

Location of Termini			Established Speed
M.P. 254.46 (North edge of the town of Wolf Creek, Douglas County)	to M.P.	255.02 (South edge of the town of Wolf Creek)	40 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provision of this order hereby is vacated and annulled.

BE IT FURTHER ORDERED that this resolution be entered in the minutes and records of the State Highway Commission as of the 26th day of October, 1950, effective as of that date.

October 26, 1950

Portland, Oregon
November 9, 1950

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
C. H. Armstrong, Parks Superintendent
M. H. Hawke, Auditor
H. B. Glaisyer, Secretary

Bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, following which, Chairman Chandler announced that the awards of contracts would be made at 4:00 p.m.:

WARNER SECONDARY HIGHWAY IN LAKE COUNTY

DRAKE CREEK-ADEL SECTION

Spada Bros., Portland	$245,700.70
Newport Constr. Co., Portland	251,920.00
Durbin Bros., Eugene	277,814.00
A. H. Saxton & Sons, Corvallis	280,101.50
Halvorson Constr. Co., Salem *	282,201.00
G. D. Dennis & Sons, Portland	295,984.00
F. L. Somers, Klamath Falls	298,471.00
Heavy Hauling Co., Astoria	308,677.00
Inter City Sand & Gravel Co., Inc., Eugene	319,977.40
McNutt Bros., Eugene	326,733.80
Leonard & Slate Oregon Ltd., Portland	332,197.00
J. N. & M. J. Conley, Portland	337,020.80
E. C. Hall Co., Portland	340,552.50
Peter Kiewit Sons' Co., Longview, Wn.	356,479.40
C. J. Eldon, Portland	363,675.00

* Bidder will accept award of only one project.

SIUSLAW HIGHWAY IN LANE COUNTY

GREENLEAF CREEK BRIDGE

E. C. Hall Co., Portland	$ 31,710.00
VaDare Constr. Co., Portland	34,025.00
Glenn Snook, Eugene	37,045.00
R & M Constr. Co., Central Point	37,425.00
Wall & Son, Portland *	37,975.00
Tauf Charneski, Eugene	41,915.00

* Bidder will accept award of only one project.

PAYETTE SPUR OF OLD OREGON TRAIL HIGHWAY
MALHEUR COUNTY, OREGON, AND PAYETTE COUNTY, IDAHO

PAYETTE (SNAKE RIVER) BRIDGE SECTION

Lindstrom Bros., Inc., Portland	$444,705.00
Valley Constr. Co., Portland	447,643.25
Lee Hoffman & J. A. Troxell, Portland	487,315.00
J. H. Wise & Son, Boise, Idaho	489,627.00
General Constr. Co., Portland	499,405.00
Guy F. Atkinson Co., Portland	555,238.50

CENTRAL OREGON HIGHWAY IN MALHEUR AND HARNEY COUNTIES

DREWSEY-JUNTURA AND HARPER-HOPE ROCK PRODUCTION PROJECT

C. E. Leseberg, Nyssa	$ 29,079.00
Barney B. Helser, Vale	32,620.00
Oscar E. Joelson, Eugene	37,187.00
McNutt Bros., Eugene	45,668.00

DALLAS-COAST SECONDARY HIGHWAY IN POLK COUNTY

YAMHILL RIVER-SALT CREEK SECTION

Porter W. Yett, Portland	$110,240.00
Parker-Schram Co., Portland	116,350.00
Rogers Constr. Co. & Babler Bros., Portland	119,240.00
Warren Northwest, Inc., Portland	119,560.00
D-H Paving Co., Vancouver, Wn.	119,857.50
J. C. Compton Co., McMinnville	123,657.50
Acme Constr. Co., Eugene	130,385.00
Central Paving Co., Independence	139,200.00

November 9, 1950

LITTLE NESTUCCA SECONDARY HIGHWAY IN TILLAMOOK COUNTY

WEED AND MUSCOTT BRIDGES

Lindstrom Bros., Inc., Portland	$ 78,765.00
C. J. Kildon, Portland	81,060.00
E. C. Hall Co., Portland	84,071.00
Wall & Son, Portland *	84,567.50
Birkemeier & Saremal, Portland	87,035.00
Don L. Cooney, Inc., Seattle, Wn.	97,542.00

* Bidder will accept award of only one project.

The Commission unanimously approved the minutes of the meetings of the Commission held on September 4, 1950 and on September 28 - 29, 1950.

The State Parks Superintendent reported on the following park matters:

1. Petition signed by 64 residents of Aurora and St. Paul requesting improvements in Champoeg State Park: The Parks Superintendent advised that this group desires the installation of playground facilities for children, including a swimming pool, swings and other apparatus. He advised also that some other improvements requested had already been taken care of and cited the enlargement of the parking area for cars. He outlined his plans for 1951 improvement which includes the planting of trees and grass in a portion of the area now leased for farming purposes. He recommended that the request for playground facilities be denied confirming the previous policy adopted in this matter. The Commission approved the recommendation.

2. Leasing of a portion of Champoeg State Park to Henry Zorn for agricultural purposes: The Parks Superintendent advised that Mr. Zorn has leased 70 acres in this park the past 14 years at a price of $5.00 per acre per year. He recommended renewal of the arrangement on a four-year basis subject to limiting the area to the 45 acres in the south portion of the park, and that Mr. Henry Zorn shall pay the taxes that may be assessed against the property. Under this proposed agreement, he said, Mr. Zorn will plant a grass crop on the 45 acres in 1951 and will be allowed to harvest the seed thereafter during the life of the lease, and he will also permit the planting of trees in the area as may be necessary in the development of the property. The Commission approved the recommendation unanimously.

3. Development of a wayside picnic area along the Grand Ronde River in Union County at the junction of the Starkey Secondary Highway and the Old Oregon Trail on property owned by the U. S. Forest Service: The Parks Superintendent presented a map on which was outlined in red the land owned

by the Forest Service,and in blue, the property that is privately owned. He said that he has been unable to determine who owns the private tract, which contains a spring that can be used to advantage in the picnic area but he recommended that it be acquired along with the government-owned property. Commissioner Reynolds questioned the advisability of developing the spring because the river water is pure and has been used by picnickers for many years. After some further discussion the Commission authorized the Park Superintendent to negotiate acquisition of the government-owned property only.

4. Development of a park area near "Red Bridge" over the Grand Ronde River on the Starkey Secondary Highway about eight miles west of Hilgard: The Parks Superintendent advised that this tract, which is owned by the Mt. Emily Lumber Co., is an ideal picnic spot and is now used extensively by the public for such purposes. He also said that the Company has indicated a willingness to sell the land to the State and he recommended that he be given authority to negotiate purchase of the tract. The Commission approved the recommendation.

5. Application of Gordon H. Duffield for permission to rent boats on Sunset Bay. The Parks Superintendent recalled that a similar concession heretofore granted to a Mr. Smith proved very unsatisfactory due to legal technicalities which limit the Highway Commission's control of the waters in the bay. He advised that Mr. Smith is continuing to use the bay for renting boats but that his operations are conducted on a float which is outside of the Highway Commission's control. Inasmuch as the remuneration to be received from Mr. Duffield's concession would not be a material amount, and because of the indefinite control of his operations, he recommended that the application be refused. The Commission approved the recommendation.

6. Acquisition of additional property at Wallowa Lake for overnight camping purposes: The Parks Superintendent reported that negotiations had been undertaken with Mrs. Wiggins for acquisition of 33 acres on which there is located a house, a barn and a corral, and that she wants $25,000 for her property,which he considers is far too much. He recommended acquisition of the property by condemnation. The Right of Way Engineer gave as his opinion that the property is worth only about one-half the price Mrs. Wiggins is asking for it. The Commission indicated a reluctance to condemn the property at this time and ordered continuance of the negotiations. The Commission also ordered reappraisal of the property by "Fee" appraisers, if necessary, and conclusion of the negotiations as rapidly as is possible so as not to delay the development of overnight camping facilities in this park.

7. Acquisition of a wayside area containing Myrtle trees along the Umpqua Highway about seven miles west of Elkton: The Parks Superintendent advised that this tract is a strip of land about 100 feet wide lying between the highway and the Umpqua River and that it contains about 3 acres on which is the only good stand of myrtle trees

east of Scottsburg. He also said that there is a roadway across the property which is suitable for the launching of boats in the river. He recommended purchase of the area, which is owned by the Henry Jenkins' estate, for a sum not to exceed $500. The Commission authorized negotiations with the owners on such basis.

8. Construction of a latrine at Battlerock State Park near Port Orford: The Parks Superintendent recalled that this project had been advertised for bids on two occasions, first at the August meeting of the Commission when all bids were rejected as being too high, and then at the September meeting when no bids were received. Since then, he said, two informal offers have been received, one being that of Mr. Robert C. Wilson, a building contractor, who offers to construct the latrine for $4,050 which is under the estimated cost of $4,550, and the other being for $4,800. He recommended approval of a negotiated contract with Mr. Wilson for $4,050. In the discussion of this matter the Commission questioned the advisability of constructing a latrine at this location due to its proximity to Port Orford, and due to the probability that it would serve more as a facility for local residents than for the traveling public. Accordingly, action on the matter was deferred pending personal inspection of the premises by Chairman Chandler at some future date.

9. Publicizing the Borax Company's gift of land as a part of the Samuel H. Boardman State Park in Curry County: The Parks Superintendent reported that Mr. S. H. Boardman, retired Parks Superintendent, had expressed a feeling that a letter or resolution of thanks from the Highway Commission should be sent to the Borax Company. Chairman Chandler recalled that at the last Highway Commission meeting the Chief Counsel and the Secretary were instructed to prepare such a letter for approval by the Commission. The Secretary presented the letter which the Commission approved and signed. He was instructed to furnish copies of the letter to the press. In this connection the Parks Superintendent suggested that it would be appropriate to erect a marker or a monument of some sort on the property containing wording to show that the property was the gift of the Borax Company. He estimated the cost of such a marker at $200. The Commission unanimously approved the suggestion and so ordered.

10. Request from Portland Chamber of Commerce for survey of needs of Oregon State Parks. This matter was discussed very briefly but action was deferred pending the appearance of a delegation on the following day.

11. Request of the Federation of Western Outdoor Clubs, Mill Valley, California, urging that provision be made for overnight camping in state parks of Oregon: The Commission approved the Secretary's acknowledgement of this request in which he advised briefly the plans of the Commission with regard to such facilities.

Acquisition of Beulah Moore property at Depoe Bay on the Oregon Coast Highway: The Chief Counsel reported that pursuant to previous instructions, he has made diligent attempts to negotiate for the purchase of this property but Mrs. Moore will not discuss the sale of her land and has threatened suit to force

an opening in the stone wall to give direct access to her property from the highway if she can't get satisfaction in any other way. The Chief Counsel also advised that the Commission is not obligated to cut the stone wall and that the property cannot again be condemned under the present ownership. The Commission ordered that negotiations for purchase of the Moore property be abandoned.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

The Engineer reported completion of the survey for the permanent location of the Sams Valley State Secondary Highway between Gold Hill and Snider Creek, in Jackson County. He submitted for the Commission's consideration a map showing the proposed location, and other engineering data. He explained that the 1950-1951 Budget contains an item of $215,000 for construction of the section between Sams Creek and Snider Creek, where a connection is made with a completed section of the highway, and he pointed out that whereas only a portion of the uncompleted section is contemplated for improvement, the survey extends throughout the uncompleted section of the highway easterly from Gold Hill. He asked the Commission to approve the survey so that construction of the Sams Creek-Snider Creek Section can be advertised for bids as soon as the right of way has been acquired. After careful consideration the Commission unanimously approved the survey by the adoption of the attached resolution relative thereto marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Right of Way Engineer presented a list of options for acquisition of real property that is needed for various highway improvements through the state, and he explained the details. After careful consideration of the individual items the Commission authorized closure of the options at the purchase prices mentioned therein. The attached resolution with regard thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Engineer reported briefly on the damage done to highways in Southern Oregon by reason of the recent heavy rain storm. He estimated that repairs will cost between $75,000 and $100,000.

The Commission discussed a report from the Engineer on the request of the Union County Sportsmen's Club for a long-term lease of state-owned property at the southern edge of the city of Union, on the Medical Springs Highway, which property the Club is now using. The Engineer reviewed the history of this property briefly, citing the fact that it had been purchased from the State Game Commission in 1942 with the understanding that there was to be some reservation in the transfer of the property to allow the Sportsmen's Club to continue to use the 1.01 acres which they were then occupying. On December 18, 1942, he said, an agreement was executed by the Commission leasing 1.01 acres to the Union County Sportsmen's Club for a period of 15

years to November, 1957. He gave as his understanding that the Sportsmen's Club now wishes to construct a new and modern club house and is desirous of obtaining a long-term lease to protect their investment. He recommended that the club be given a new lease of 15 years duration, starting now, covering the same area that it is now using under the existing lease. The Commission unanimously approved the recommendation.

A report was submitted by the Engineer on a previous request from the Hillsboro Chamber of Commerce for further improvement of the Cornelius Pass Road and improvement of the road which extends from Hillsboro to North Plains. According to the report the section the Chamber wishes improved on the Cornelius Pass Road is a four-mile section extending from a point near Orenco to West Union where a connection is made with a section improved last year. The Engineer estimated the cost to improve such section, which is designated as Ray's Ranch-West Union Section, at $175,000, and he advised that the project is included in the tentative program for secondary highways which is now under consideration. The road from Hillsboro to North Plains, he said, also is a federal aid secondary county road and in need of improvement; however, there are not sufficient funds available in the current set-up for two projects in Washington County, in view of which he recommended that no attempt be made to improve the Hillsboro-North Plains road, which is six miles long and involves an expenditure of $240,000, in the present program. The Commission deferred action on the matter for future consideration.

The Engineer reported on a request from the city of Milton for installation of a traffic light at the intersection of Main and Parallel streets in Milton. He advised that this intersection is a junction of the old Oregon-Washington Highway and the new route from Milton to Walla Walla, and that a traffic study indicates that a signal is not warranted at this point; however, the study does indicate that conditions could be improved by construction of a traffic island to channelize the movement of traffic, which will cost about $350. He recommended construction of the traffic island and that the request for a traffic signal be denied. The Commission approved the recommendation.

The Commission considered a report submitted by the Engineer with reference to a request from the Empire-Charleston Chamber of Commerce for guard fence construction at Charleston Bridge on the Cape Arago Secondary Highway and the oiling of a triangular area on this highway at the intersection of Broadway and Powell Street in Charleston. The Engineer advised that investigation reveals no definite need either for the guard fence construction or for the oiling. He recommended that both requests be denied because there are so many other locations on the state highway system where the need for such types of improvement is much greater. The Commission approved the recommendation.

The Commission considered briefly a report submitted by the Engineer with reference to a request from the Columbia County-Pomona Grange for improvement of the Columbia River Highway between Rainier and Astoria. The Engineer recalled that action on this request previously was deferred by the Commission pending submission of his economic study on the highway situation in Clatsop County, the results of which were reported to the Commission at its meeting on

September 28 and 29, 1950 but no action was taken on it. He also recalled that the federal aid program which the Commission approved on October 26, 1950, includes an item of $300,000 for improvement of the Big Creek section, 1.5 miles in length, which work is contemplated in the first year of this 3-year program; moreover, an additional expenditure of $205,000 is contemplated on the same section in the second construction year. The Commission deferred action on the report pending the appearance of a delegation on the following day.

The Engineer reported on a request presented by a delegation from Warrenton several months ago that options be secured for right of way needed for a proposed relocation of the Oregon Coast Highway across Youngs Bay, between Smith Point and Glenwood, in Clatsop County. He advised that investigation reveals only four property owners involved, two of which are Clatsop County and the Astoria Airport, leaving two private ownerships. He estimated the right of way cost at $25,000, of which $10,000 is for airport property, $12,900 is for county property, and $2,100 is for privately-owned right of way. He pointed out that the estimate is based only on a reconnaissance survey and that a detailed survey might show some variation from the right of way appraisals as submitted. He recommended against the making of a definite survey at this time because there are no funds available to finance the project. The Commission accepted the report but deferred action on it pending appearance of a delegation on the following day.

The Commission discussed a report from the Engineer concerning a request from the city of Corvallis for improvements to the Pacific Highway West in Corvallis and between Corvallis and McMinnville. The Engineer exhibited a map showing the proposed future arrangement of state highways in the North Corvallis area which involves construction of a railroad grade separation at the north edge of the city and the extension of the city's one-way street system on Third and Fourth streets northward to a point just south of the railroad overcrossing. The Engineer stated that the City of Corvallis has for several years asked for a by-pass of the business district, on First Street adjacent to and paralleling the Willamette River, and that the city is scheduled to come before the Commission on the following day to renew its request. The practicality of the city's plan, he stated, is based on the future abandonment of a sawmill immediately north of Marys River and the abandonment of the Southern Pacific Company's tracks on First Street, and unless the sawmill and railroad tracks are eliminated, the cost of the project will be prohibitive. He estimated the cost of the First Street project at $844,000.

The Engineer further advised that the delegation is going to ask for improvements to the Pacific Highway West between Monmouth and McMinnville. He exhibited a second map showing the improvements desired and explained details concerning them, including costs involved.

In the discussion that followed the Engineer gave as his understanding that the sawmill at the south end of First Street is expected to stop operating in about two years and he suggested deferment of that project until

that has become a fact. With respect to the other project, the question arose whether to proceed with the proposed improvement of this highway at Monroe, for which $408,000 has been tentatively provided in the new construction program, or to transfer the amount to improve the section north of Monmouth. The question was not decided. Action by the Commission on both projects was deferred pending discussion with the City Council. (For details of the Engineer's presentation see copy of his report, dated November 6, 1950, in general files.) (See additional entry ahead under delegations.)

The Commission considered a report submitted by the Engineer concerning the routing of logging trucks along and across the Pacific Highway East in the city of Gladstone. The Engineer advised that a delegation is to appear before the Commission on the following day concerning this subject and he explained to the Commission the problems involved. It appears that most of the log hauling originates above Estacada and moves westerly through the city of Gladstone across US99E, thence to a log dump in the Willamette River. The routing was along the Cascade Secondary Highway to Gladstone under permit granted by the Highway Commission. thence along Clackamas Boulevard through the city of Gladstone under authority of a permit from Clackamas County, this street at that time being a county road, thence directly across US99E by right of permit from the Highway Commission, thence northerly on River Road which was also a county road at that time, thence westerly to the log dump. Subsequently the city of Gladstone acquired jurisdiction over both Clackamas Boulevard and River Road and on October 3, 1950, the city passed an ordinance which reroutes the logging trucks so that now they have to make a right turn, from east to north, at the intersection of Clackamas Boulevard and US99E and proceed north along US99E for six blocks to the intersection at Gloucester Street where they turn left across US99E and proceed to the dump. The Engineer declared that such routing creates a very serious hazard to traffic on US99E because when making the right turn at Clackamas Avenue, the trucks not only occupy both northbound traffic lanes but also have to encroach upon the southbound traffic lanes to the extent of about 4 feet, and when making the left turn at Gloucester Street an even more dangerous situation is caused. He recommended action to correct the condition. The Commission deferred action on the matter pending discussion with the city's representatives. (See additional entry ahead.)

The Commission considered a request from the city of Nyssa for the widening of US20 full width, with curbs, between Main Street and the north city limits. The Engineer advised that the plans for the improvement of the highway between Ontario and Nyssa, a portion of which lies within the city limits of Nyssa, provide for uniform 24-foot width pavement throughout, and that the city is asking that the portion within the city be constructed full width, with curbs, because of anticipated expansion of business development along that section. Investigation, he said, discloses that the district is developing quite rapidly and the prediction is that within a few years' time most of the culture here will be commercial. He recalled past practice of the Commission not to install full width paving and curbs in any locality until the expense is justified by development and he recommended in view thereof that the present request be denied until such condition materializes in Nyssa. The Commission deferred action pending additional information from the Engineer who was instructed to give the matter his personal attention.

The Engineer reported on a request from School District No. 11, Astoria, for widening a section of the Nehalem Secondary Highway between Greenwood Cemetery and Leahy's Hill, and for the widening of the first curve east of the Naval housing unit and the installation of a guard fence on this curve. The Engineer stated that the curve referred to lies directly east of the Naval housing unit, between mileposts 3.78 and 3.83, where the original pavement is only 16 feet wide and the shoulders so narrow that there is not sufficient room to install a guard fence or sight posts. He recommended approval of the roadbed widening on this curve to a 26-foot standard width including five-foot shoulders at an estimated cost of $1,000, the work to be done as a minor betterment project. The balance of the section, he said, is the narrow dike section between mileposts 4.12 and 4.76 where the shoulders average about three feet in width but are well stabilized with grass as a protection against wave action. The cost to widen this section he estimated at $15,000 and recommended that it be deferred, as a reconnaissance survey indicates a future line change at this point. The Commission approved both recommendations.

The Commission considered a request from the city of Portland for cooperative improvement of the intersection of Northeast 33rd Avenue and Sandy Boulevard (US30) by the construction of a by-pass on the southerly side of Sandy Boulevard to eliminate left turn movements into 33rd Avenue from Sandy Boulevard for eastbound traffic. The Engineer reported that this intersection now has a traffic volume of 30,926 vehicles daily and of this amount 70 percent enter from Sandy Boulevard and 30 percent from 33rd Avenue. The traffic study also indicates that there are approximately 1,355 daily left turns from the west to the north which creates serious traffic congestion as well as being hazardous. This intersection, he said, is one of the worst on Sandy Boulevard wherefor the city of Portland is anxious for the improvement which is estimated to cost $36,500. He recommended approval of the project on the basis that the state's contribution shall not exceed fifty percent of the total cost, or $18,250. The Commission deferred action on the matter and instructed the Secretary to include it in the list of "unfinished business".

The Chief Counsel requested authority to acquire by condemnation certain parcels of real property that are needed for various highway improvements, which property he has been unable to acquire by negotiation. He presented a list of such properties together with the offer that he recommended for each tract, as follows:

Cascade Locks - Viento Section of Columbia River Highway		Recommended Offer
R 15944 Mildred Dunn Kohler		
(Right of Way)		
(Hood River County)		
Land:		
Parcel No. 1: 9.87 acres (of which 0.19 acre is within existing right of way) at $250.00 per acre	$2,500.00	
Parcel No. 2: 1.7 acres	250.00	
	$2,750.00	$2,750.00

(cont.)

Recommendations for Condemnation (cont.)

			Recommended Offer
Unit #3 Section of the Sullivan Gulch Highway			
R 14887	Emery B. Kelley (Right of Way) (Multnomah County) Land: 5,000 sq. ft. at $0.12 per sq. ft.	$ 600.00	$ 800.00
Canyonville-Johns Section of the Pacific Highway			
R 15084	Lawrence Jackson Boyle (Right of Way) (Douglas County) Land, 1.65 acres suitable for subdv. or equivalent to 11 lots at $500.00 per	$5,500.00	
	House, 1500 sq. ft. lower floor 1500 sq. ft. upper floor 3000 sq. ft. at $2.00 per sq. ft.	6,000.00	
	Porch 400 sq. ft. at $1.00 per sq. ft.	400.00	
	Barn 720 sq. ft. at $1.00 per sq. ft.	720.00	
	Chicken house	50.00	
	Shed	50.00	
	Well	500.00	
	Hog pen	25.00	
	Fencing, 14 rods elec. fence to reestab. at $3.00	42.00	
	8 rods of 4 str. barb at $3.50	28.00	
		$13,315.00	$13,325.00
Heppner Junction-Boardman Section of Columbia River Highway			
R 16738	D. W. Ewing (Right of Way) (Morrow County) 1.842 acres of land at $750.00 per acre	$ 1,381.50	$ 1,400.00
Unit #2 Section of the Sullivan Gulch Highway			
R 15753	Lloyd Corporation, Ltd. (Right of Way) (Multnomah) Fee ownership of Lloyd Corporation (including $410,000.00 previously authorized) (Also includes Lloyd Corporation's interest in land leased to SP&S Ry.Co. but does not include railroad company's interests)	$415,000.00	$415,000.00
Columbia River Highway Junction Section of Pendleton-Cold Springs Highway			
R 16739	R. W. Richmond, et ux. (Right of Way) (Umatilla County) 2.61 acres of land at $25.00 per acre	$ 65.25	
	160 rods of fence at $ 3.00 per rod	480.00	
		$ 545.25	$ 550.00

The Commission unanimously approved the offers as recommended and authorized condemnation of the several tracts by the adoption of the attached resolutions relative thereto, marked EXHIBITS "F-1", "F-2", "F-3", "F-4", "F-5", "F-6", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

In considering the above listed condemnation cases, special attention was given by the Commission to a proposed offer to Lloyd Corporation, Ltd., The Right of Way Engineer explained that the proposed offer to the Lloyd Corporation does not include the interests of the S.P.& S. Ry. Co. which is occupying a portion of the property under lease agreement. The Chief Counsel pointed out that the Railroad Company has been very cooperative in its dealings with the Highway Commission and he suggested, in view thereof, that further dealings with the Company be left entirely separate from those with Lloyd Corporation. He also said that a number of appraisals of the Lloyd Corporation property have been made and that the average appraised value is about $400,000. There was some discussion as to whether further appraisals should be made. Commissioner McIver stated that the entire matter had been gone over thoroughly and he thereupon moved that the Lloyd Corporation, Ltd. be offered $415,000 for its property, and that the property be condemned if the offer is refused. Commissioner Reynolds seconded the motion which carried unanimously. The Right of Way Engineer was instructed to negotiate a separate settlement with the Spokane, Portland and Seattle Railway Company for its lease interests.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and at 4:00 p.m., Chairman Chandler announced the Commission's decision with respect to each project, as follows, the Commission's action in each case being by unanimous vote:

"Rock production project on the Birkenfeld-Washington County Line Section of the Nehalem Secondary Highway near Vernonia, Columbia County. Heavy Hauling Company, Astoria, submitted the low bid for this work at $33,204. There were four higher bids. The Commission has awarded the contract to the low bidder, Heavy Hauling Company at its bid price.

"Rock production project on the Days Creek-Tiller Section of the Tiller-Trail Secondary Highway east of Canyonville, Douglas County. Vernie Jarl, Gresham, submitted the low bid for this work at $21,502. Five higher bids were received. The Commission has awarded the contract to the low bidder, Vernie Jarl, at his bid price.

"Grading, paving and structures on the Canyonville Section of the Pacific Highway at Canyonville, Douglas County. Roy L. Houck and Son, Salem, submitted the low bid for this work at $240,229.50. There were eleven higher bids. The Commission has awarded the contract to the low bidder, Roy L. Houck and Son, at their bid price.

"Rock production on the Madras-Prineville, Ochoco and Crooked River Highways near Prineville, in Jefferson and Crook counties. Rogers Construction Company of Portland were the low bidders for this work at

(cont.)

Contract awards (cont.)

$45,472.50. There were ten higher bids. The contract has been awarded to the low bidder, Rogers Construction Company, at its bid price.

"Grading, surfacing and oiling on the Drake Creek-Adel Section of the Warner Secondary Highway, in Lake County. The low bid for this work was submitted by Spada Brothers, Portland, at $245,700.70. Fourteen higher bids were submitted. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Construction of a reinforced concrete viaduct over Greenleaf Creek on the Siuslaw Highway in Lane County. E. C. Hall Company, Portland, submitted the low bid for this work at $31,710. Five higher bids were submitted. The Commission has awarded the contract to the low bidder, E. C. Hall Company, at its bid price.

"Construction of a bridge across the Snake River and 0.668 mile highway roadbed on the Payette Bridge Section of the Payette Spur of the Old Oregon Trail in Malheur County, Oregon and Payette County, Idaho. Lindstrom Brothers, Inc., Portland, submitted the low bid for this work at $444,705. There were five higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Rock production on the Drewsey-Juntura and Harper-Hope sections of the Central Oregon Highway near Juntura and Harper, in Malheur and Harney counties. C. E. Leseberg, Nyssa, was the low bidder for this work at $29,079. Four higher bids were submitted. The contract has been awarded to the low bidder, C. E. Leseberg, at his bid price.

"Paving on the Yamhill River-Salt Creek Section of the Dallas-Coast Secondary Highway, Polk County. Porter W. Yett, Portland, submitted the low bid for this work at $110,240. Seven higher bids were received. The contract has been awarded to the low bidder, Porter W. Yett at his bid price.

"Moving, erecting and painting of two bridges at the Weed and Muscott bridge sites on the Little Nestucca Secondary Highway, in Tillamook County. Lindstrom Brothers, Inc., Portland, submitted the low bid for this work at $78,765. Five higher bids were received. The contract has been awarded to the low bidder, Lindstrom Brothers, Inc., at their bid price."

The Right of Way Engineer reported on the final disposition of an offer submitted by H. A. Swett to purchase 22.377 acres of state-owned land south of the city of Tillamook. He recalled that the Commission at the previous meeting declared a preference for a cash settlement and agreed to accept

$12,500 as payment in full for the property. Such information, he said, was conveyed to Mr. Swett who refused to pay more than $12,000 cash, the amount of his original offer. In view of this information the Commission decided unanimously to accept Mr. Swett's alternate offer -- $13,425, payable $3,425 cash and the remainder in ten equal annual payments of $1,000 each, with interest at the rate of 4% on the balances. (An agreement covering the matter was signed by the Commission on the following day.)

The Right of Way Engineer presented for the Commission's consideration a deed conveying to the city of Pendleton a small tract of land along the Umatilla River approximately a mile west of Pendleton. He said that the property is not needed for highway purposes and that the city will pay $300 for it. He recommended acceptance of the offer. The Commission approved the recommendation. (The deed was signed on the following day.)

The Commission considered and approved a lease agreement with J. W. and Reba J. Bubb, Huntington, providing for a one-year extension of an existing lease of a maintenance site. Consideration, $25.00 per month. (The agreement was signed on the following day.)

The Commission also considered and approved a one-year extension of a lease agreement with Carl N. Stevens, et al, for use of a maintenance headquarters' site at Newberg, consideration, $45.00 per month. (The Commission signed the lease agreement on the following day.)

The Right of Way Engineer brought up for discussion a proposed settlement of the claim of Wade H. Arstill for damage to a well which Mr. Arstill alleges dried up by reason of the construction of the Dolph Corner-Salt Creek Section of the Dallas-Coast Highway, in Polk County. He said that this is an old case which has not been settled heretofore because there was a question as to the state's liability. He added that Mr. Arstill's original well did dry up and he was forced to sink a new one at a cost of $778. He recommended in order to dispose of the matter that Mr. Arstill be paid the sum of $389 which is 50% of the cost of the new well. The Commission approved the recommendation and ordered that a "Waiver of Claim" be obtained from Mr. Arstill upon payment of the amount.

The Commission considered the leasing of certain state-owned property situate at the junction of Broadway and Franklin Boulevard in Eugene, to Catherine A. Ruth. The Right of Way Engineer advised that he has checked the leasing of this property with the Engineer who offered no objection thereto and joins him in recommending that it be leased to Mrs. Ruth for a consideration of $550.00 a year. He also said that the form of lease, as prepared, contains a six-months' cancellation clause. The Commission unanimously approved the recommendation. (Lease agreement was signed on the following day.)

A request from Mr. Joseph P. Garske, Goshen, for a change in the points of access heretofore granted him on the Goshen-Creswell Section of the Pacific Highway, was considered by the Commission. The Right of Way Engineer advised that the requested changes will not act to the detriment of the highway or to the traveling public in any way, and he recommended approval of the request. The Commission approved the recommendation. (An "Indenture of Access" was signed by the Commission on the following day.)

The Chief Counsel presented a report as follows, concerning condemnation cases which have been settled since the making of his last similar report:

1. State vs. Jeannie Barry. The Chief Counsel advised that this case was filed on August 19, 1948, and involved acquisition of an undivided one-half interest in 0.08 acres of land that is needed as right of way for the Tualatin Valley Highway in Washington County; further, that a settlement was negotiated prior to presenting the matter to a jury with the result that it was agreed that the state would pay the sum of $261.38 for the property plus the sum of $50.00 for attorney's fee, making a total of $311.38.

2. State vs. Irene Roemhildt. The Chief Counsel advised that complaint on this action was filed on May 20, 1950, and that the case involves acquisition of three city lots and one-half of two other city lots in the city of Salem which are needed as right of way for the Pacific Highway East. The filing of this complaint, he stated, was necessary in order to secure a conveyance from the conservator of the true owner of the property; also, that the case was settled out of court, by negotiation, for the sum of $6,000, the amount of the state's original offer, plus $150.00 attorney's fee.

3. State vs. Myrtle Standley Miller. The Chief Counsel advised that this complaint was filed on July 7, 1950, for the acquisition of one-half of two city lots for right of way in Sullivan Gulch, Portland. Subsequent to the filing of the complaint and by reason of changes in the alignment of the highway, it was determined that this property was no longer needed and an order has been entered in court dismissing this case.

4. State vs. Dan Norman, et ux. The Chief Counsel stated that this complaint was filed on August 30, 1950, to acquire two city lots needed as right of way in Sullivan Gulch, Portland, after an offer of $13,500 had been made for the land and all improvements thereon. Subsequent thereto, he said, settlement was negotiated whereby the State purchases the land and improvements thereon, except two residences which the defendants are to retain and are to be paid the sum of $6,014 to move and re-establish them. In addition thereto the State is to pay the sum of $5,236 representing the appraised value of the real estate and the remaining improvements, making a total sum of $11,250 to be paid the defendants. The defendants, he stated, have executed an option and a deed conveying the property to the State and when paid the cash consideration a motion will be filed for dismissal of the case.

The Commission unanimously approved all of the settlements as reported by the Chief Counsel.

The Chief Counsel reported the status of the controversy with Andy R. Gigler, Klamath Falls, concerning an advertising sign that Mr. Gigler has attached to a power pole belonging to the California-Oregon Power Company on South Sixth Street near Klamath Falls, route of the Klamath Falls-Lakeview Highway. He said that it was first thought that the sign was within the city limits where the city has jurisdiction but now it has been determined that it is outside of the city. The Power Company, he said, can't get rid of it without litigation, but it is willing to cooperate in any way that it can to effect removal of the sign. The company also advises that whoever removes the sign should have adequate physical protection as Mr. Gigler has threatened to cause trouble if anyone attempts to remove the sign. In the discussion that followed, the question arose -- who originated the complaint. The Chief Counsel advised that the first complaint was filed by the District Attorney of Klamath County, and later a similar one was filed by the Power Company. He was instructed by the Commission to pursue the matter further and do what is necessary to eliminate the sign.

The Commission considered a communication from residents of Klamath Falls protesting the use of Alameda Avenue (Klamath Falls-Malin Highway) by truck traffic. The Chief Counsel advised that Mr. Paul Farrens, Klamath Falls attorney who represents the property owners, writes that when Alameda Avenue was originally dedicated to public use, livestock and heavy trucks were prohibited and such traffic was required by stipulation to take some other route. He questioned the legality of limiting a public highway to a certain class of traffic and advised that it is the intention of Mr. Farrens to make an issue of the matter. He requested instructions. The Engineer advised that the section of highway referred to is a highly improved section of the Esplanade development that was constructed under a three-party agreement among the city, the county and the state, which contains no clause that would prohibit the use of the street by any class of legal traffic. The Commission decided unanimously to postpone action on the matter until further developments occur.

W. C. Williams, Assistant Engineer, reported on a request from the California Highway Department for cooperative improvement of a section of county road along the Oregon-California State Line westerly from the town of Hatfield a distance of four miles. He said that pursuant to a request from the California Highway Department, he attended a conference in Klamath Falls on November 1, 1950, when this project was discussed with representatives of the California Highway Department and the county courts of Klamath County, Oregon and Siskiyou County, California. The road concerned, he said, lies on the California-Oregon line-half of it being in Oregon and half in California, and is one of the roads in the California Federal Aid Secondary Highway system, but insofar as Oregon is concerned, it simply is another county road. He explained that California wants the road improved, in fact has already constructed a standard improvement on the 16-mile section adjoining on the west, and wants to know how much cooperation can be secured from the Oregon State Highway Department or from Klamath County, since California law forbids the expenditure of its funds outside that state. The Klamath County Court, he said, declared that the county does not have the money to finance the Oregon portion, and it also expressed opposition to the allocation of federal funds to this project because of its preference for improvement of the Klamath Lake Secondary High-

way, so it appears that State of Oregon funds must be provided if the project is to go forward. The estimated cost of the project, he said, is $180,000 of which there is available $97,200 of California Federal Aid Secondary funds, leaving a balance of $82,800 to be provided from some other source, possibly $41,40C by Siskiyou County and $41,400 by either Klamath County or the State of Oregon. He pointed out that the road passes through a very highly productive district, hence is a meritorius project, and he recommended approval of a contribution of $41,400 of Oregon Federal Aid Secondary Highway funds to assist in financing the work, on the condition that Klamath County will agree to the transfer of such amount from the total amount of Federal Aid Secondary Highway funds that have been allocated to that county, but not otherwise. The Commission approved the recommendation unanimously.

The Commission considered a petition from residents along the Richardson-Eugene Secondary Highway, Lane County, requesting the paving of this highway between Noti and Austa Mill to provide for the safety of school children. The Engineer reported that the major portion of this section, particularly the 18 miles between Elmira and Globe Station, was surfaced with crushed rock in the latter part of 1947 at a cost of $110,000 and in 1950 an oil mat wearing surface was placed between Elmira and Noti, a distance of five and one-half miles, at a cost of $75,000. The estimated cost to construct the remaining 19 miles to an acceptable standard, he said, is about $350,000 for which no money is available now. The Commission denied the request.

A request from the city council of Troutdale for the elimination of a bad drainage condition on the south side of Main Street in Troutdale was considered by the Commission. The Engineer advised that Main Street is the original route of the Columbia River Highway, now known as the Crown Point Secondary Highway, and that the improvement desired consists of the installation of an enclosed storm sewer adjacent to a high curb, and the resurfacing of the street, all of which is estimated to cost $13,000. He pointed out that the improvement primarily is for the benefit of the city although it lies within the area over which the State Highway Commission has jurisdiction. The condition, he said, has existed many years without any bad effects, and he recommended for that reason and because the street carries so much less traffic since the Columbia River Highway was rerouted, that the request be denied. The Commission adopted the recommendation unanimously.

The Secretary presented a resolution from the Klamath County Court recommending to the Commission consideration of the following projects in the formulation of future highway programs:

1. Elimination of the "bottle-neck" condition at the junction of US99 and the Willamette Highway at Goshen.

2. Completion of the Algoma-Modoc Point Section on US97.

3. Re-alignment and modernization of the Diamond Lake Junction-Deschutes Klamath County Line Section of US97.

4. Development of a west side by-pass around the city of Klamath Falls.

5. Erection of a viaduct on South Sixth Street, Klamath Falls, over the Southern Pacific Railroad.

6. Widening of the Merill-Hatfield Highway.

7. Re-alignment and modernization of Oregon Highway 66 east of the Merrill-Lakeview Junction.

8. Construction of the West Side Klamath Lake project and the surfacing of the existing Midland Road.

9. Completion of the Sprague River County Road in cooperation with the Federal Government.

The Commission discussed the resolution briefly and ordered it filed for future reference.

The Engineer reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of State Tax Street Funds that accrued to them during the first half of the year 1950, and that the plans for the improvements contemplated with such funds have been examined and found satisfactory:

Adams	Empire	Hubbard	Prescott
Aumsville	Fairview	Huntington	Rogue River
Aurora	Fossil	Island City	Sandy
Brownsville	Garibaldi	Lafayette	Stanfield
Cove	Gaston	Maupin	Sublimity
Creswell	Gates	Metolius	Taft
Donald	Gearhart	Oceanlake	Tualatin
Dundee	Gervais	Phoenix	Turner
Eagle Point	Helix	Pilot Rock	Wallowa
Elkton			

He recommended approval of the plans by the Commission. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto, marked EXHIBIT "C-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the towns of Mount Vernon and Moro have satisfied legal requirements with respect to the expenditure of State Tax Street Funds that accrued to them during the last half of the year 1949, and that the plans for the improvements contemplated with such funds have been examined and found satisfactory.

He recommended approval of the plans by the Commission. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "C-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission also upon recommendation of the Engineer approved the plans of the town of Moro for expenditure of State Tax Street funds which accrued to it during the first six-month period of the year 1949. The attached resolution relative thereto, marked EXHIBIT "C-3", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was adopted by the Commission by unanimous vote.

A request from the city of Grants Pass for installation of a traffic signal at the intersection of "A" Street with Sixth Avenue (US99) in Grants Pass had the attention of the Commission. The Engineer advised that investigation discloses an average daily traffic of 10,426 of which 73 percent enters from the highway and 23 percent from side streets. The traffic count, he said, is slightly under the national warrant for a signal on the highway street but the volume of traffic from the side streets exceeds the national warrant, which makes the project a border line case. He estimated the cost of the installation at $3,500 and recommended approval of the project because the intersection is a major school crossing wherein the students of both the high school and grade school must cross the highway, provided the city of Grants Pass will agree to pay one-half of the expense involved and will maintain the signal and furnish electrical energy to operate it. The Commission approved the Engineer's recommendation unanimously.

The Commission considered a request from the City of Eugene for elimination of a hazard to pedestrian traffic at the intersection of Mill Street and Broadway Avenue, route of the Pacific Highway through Eugene. The Engineer reported that the highway at this point is on a curve with restricted sight distance and an investigation made by the Traffic Engineer indicates the need for a push-button actuated signal for safety purposes. Such a signal in the northbound lane, synchronized with other signals along the route, would permit pedestrians to safely cross the street without unduly delaying vehicular traffic. He recommended approval of such a signal installation, which he estimated will cost about $1,000, on the condition that the city will pay fifty percent of the expense. The Commission unanimously approved the recommendation.

The Commission considered a request from the city of Albany that the State pay a proportionate share of the cost of certain city street improvements made in front of state highway property as follows, in Albany:

1. Asphaltic pavement, sidewalk and curb construction on 14th Avenue at its intersection with an alley east of Washington Street, $59.76. The Engineer advised that the assessment in this instance is a just share of the improvements and he recommended that the assessment be paid. The Commission approved the recommendation.

2. Street improvements at the intersection of Washington Street and US99E consisting of sidewalk, curb, gutter and asphaltic concrete pavement, $145.50. The Engineer advised that all of this work is within the state highway right of way and is a duplication of improvements that were made by the State in 1940 when the highway was constructed, but which were partially destroyed later on, with city sanction, to accommodate building development.

He gave as his feeling that the State is under no obligation to pay any portion of the cost of repairs and he recommended that the request in this instance be denied. The Commission unanimously approved the recommendation.

The Engineer requested authority to transfer the following amounts in the current budget from the Special Maintenance account to the Betterment or Construction account, where, he said, they rightfully belong:

1.	Oiling Ochoco Highway, Jones Ranch-Mitchell Section -	$26,900
2.	Surfacing and oiling the Hamilton Hill Section, Kimberly-Long Creek Highway -	74,500
3.	Type O-9 oil mat wearing surface on the Forest Boundary-Jefferson County Line Section of the Warm Springs Highway -	81,400

None of these projects, he stated, can properly be considered as maintenance charges and he recommended that they be shown in the records as a charge to Betterment and Construction. The Commission approved the transfer unanimously.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

1. Peter Kiewit Sons' Company, Contract No. 3238, for grading, paving and structures on the Dodson-Bonneville Section of the Columbia River Highway in Multnomah County requested an extension of time of 273 days from October 31, 1950 to July 31, 1951 within which to complete this job. They gave the following reasons for their failure to complete the project within the specified time limit:

   (a) 30 days' delay in the award of the contract;
   (b) abnormal amount of snow and wet spring weather;
   (c) failure of the structure contractor to complete the Tanner Creek Bridge on time;
   (d) the Railroad Company's control of the time for rock blasting; and
   (e) an increase of traffic through the job caused by extensive highway repairs on the Washington side of the river which shunted travel over the Columbia River Highway.

The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended in view thereof that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

2. R. A. Heintz Construction Company, Contract 3303 for grading and paving the South Unit, Denver Avenue-Columbia Slough Section of the Pacific Highway East in Multnomah County, requested an extension of time of 240 days from October 31, 1950, to June 30, 1951 within which to complete this job. They alleged that their failure to complete the job within the specified time limit was due to the following reasons: Thirty-day delay due to necessity of awaiting the outcome of the rising Columbia River when another flood appeared imminent; delay of 30 days due to an order from the Army Engineers to defer excavation of the underpass at Columbia Slough pending recession of high water in the Columbia River; increase in length of piles from 45 to 65 feet which required additional time to drive; an increase of approximately 34,000 cubic yards of embankment material originally scheduled to be taken from the contract on Broadway Bridge; and inclement weather. The Engineer advised that for reasons given by the contractor, the grading portion of the contract was held up until it was too late to attempt the paving work this fall. In view of these circumstances he recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

3. F. L. Somers, Contract No. 3325 for grading and oil mat surfacing on the West Unit, Deschutes County Line-Prineville Section of the O'Neil Secondary Highway in Crook County, requested an extension of time of 243 days from September 30, 1950, to May 31, 1951, within which to complete this job. He alleged that the short time allowed for completion, the removal of utility poles from cut and fill areas, unexpected delays caused by irrigation flooding, and extreme shortage of skilled labor prevented completion of the project within the specified time limit. The Engineer advised that the specified time limit was extremely short and that the contractor had suffered two delays by irrigation flooding; also, that he had difficulty in securing sufficient skilled labor. He recommended in view of these circumstances that the extension of time as requested be granted without penalty. A letter from the Bureau of Public Roads concurring therein was presented. The Commission approved the recommendation.

4. R. E. Steelman Construction, Contract 3401 for excavation in the Oneonta Borrow Pit on the Crown Point Secondary Highway in Multnomah County, requested an extension of time of 44 days from October 15 to November 29, 1950, within which to complete this job. He alleged that he had been unable to proceed with the work due to the failure of the Union Pacific Railroad Company to issue and approve an indemnity agreement and bond until October 17, 1950. The Engineer advised that the specifications for this project required the contractor to provide suitable indemnity bonds to the Union Pacific Railroad Company and that agreement as to the type of bonds was not reached until October 17. The contractor, he said, started work on October 18 and is completing the work as rapidly as is possible. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. Colonial Construction Company, Contract 3111 for rock production on the Mt. Hood Section of the Mt. Hood and Wapinitia highways in Clackamas, Hood River and Wasco Counties, requested an additional extension of time of 98 days from June 15 to September 21, 1950, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to inability to deliver the balance of the rock from the new crusher set-up, after closing down operations to furnish rock for a forest highway project on the Warm Springs Highway. The Engineer advised that in the fall of 1949, the contractor was permitted to close down operations on this contract and move to the Warm Springs Highway to complete the surfacing contract for the Bureau of Public Roads. This move, he said was made with the understanding that the State project would be completed immediately after the Bureau project was completed but no definite time was set. The State, he said, has not incurred any extra expense for supervision nor any inconvenience by reason of the delay and he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

6. Tom Lillebo, Contract 3196, for construction of the Ferry Street Bridge over the Willamette River on the Eugene-Goshen County Road at Eugene, in Lane County, requested an extension of time of 304 days from September 30, 1950, to and including July 31, 1951, within which to complete this work. He alleged that it would be hazardous to remove the old bridge,which is all that remains to be done, due to possible high water taking out the false work and damaging the steel, which hazard prevented his completion of the project in the specified time limit. The Engineer advised that the work yet to be done consists only of removal of the old bridge, the new bridge having been opened to traffic prior to the expiration of the completion date. He also said that due to the dangers incident to the flood waters it was deemed inadvisable to remove the old bridge until next spring. In view of these circumstances, he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

7. M. C. Lininger and Sons, Contract 3294 for rock production on the Pendleton-Hilgard Section of the Old Oregon Trail in Umatilla and Union Counties, requested an extension of time of seven days from September 30 to October 7, 1950, within which to complete this project. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that the State has been caused no inconvenience nor any additional expense by reason of the overrun of time limit, and he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

8. Parker-Schram Company, Contract 3390 for grading and paving the Ochoco Avenue-Milwaukie Service Road, and connections, on the Pacific Highway East in Clackamas County, requested an extension of time of 45 days from October 15 to November 25, 1950, within which to complete this project. They alleged that almost continuous adverse weather conditions after September 25 prevented completion of the project within the specified time limit. The Engineer advised that adverse weather conditions

interfered very seriously with the contractor's operations and was responsible for the overrunning of the time limit specified on the contract. He recommended in view thereof that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

9. Parker-Schram Company, Contract 3377 for grading and paving the Beaverton (Broadway) Section of the Beaverton-Hillsdale Highway in Washington County, requested an extension of time of 45 days from September 30 to November 15, 1950, within which to complete this job. They alleged that they failed to complete the job within the specified time limit because of inability to obtain cement for curb construction, due to the current cement shortage. The Engineer advised that the reason given by the contractor for overrunning the specified time limit is correct. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

10. Del R. Beebe Construction Company, Contract 3227 for grading and paving the Marks Ranch-Lone Rock Bridge Section of the North Umpqua County Road in Douglas County, requested an extension of time of 304 days, from September 30, 1950, to July 31, 1951, within which to complete this job. He alleged that inclement weather in the fall of 1949 and a critical scarcity of skilled labor in 1950 prevented completion of the contract within the specified time limit. The Engineer advised that inclement weather in the fall of 1949 did delay the contractor to some extent but the main reason for failure to complete the project on time was that he did not prosecute the work to the best of his ability. He recommended that the extension of time as requested be granted subject to the condition that he reimburse the State for extra engineering costs incurred by it subsequent to September 30, 1950. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

11. Porter W. Yett, Contract 3305 for grading and paving on the Goshen-Creswell Section of the Pacific Highway in Lane County, requested an extension of time of 45 days from September 30 to November 15, 1950, within which to complete this work. He alleged that unfavorable weather conditions in the early spring, high water in the Camas Slough embankment area and a considerable quantity of unanticipated solid rock excavation prevented completion of the project within the specified time limit. The Engineer advised that unfavorable weather and high water prevented the contractor from fully utilizing his equipment, but he carried the project through to completion to the best of his ability. He recommended that the extension of time as requested be granted without penalty. A letter from the Bureau of Public Roads concurring therein was submitted. The Commission approved the recommendation.

12. Stevenson Construction Company, Contract 3257 for grading, surfacing and oiling the West Unit, Hamilton-Long Creek Section of the Kimberly-Long Creek Secondary Highway in Grant County, requested an extension of time of 304 days from September 30, 1950, to July 31, 1951, within which to complete this job. They stated that the lateness of the season might jeopardize the remaining oiling work. The Engineer advised that because of heavy snows, the contractor was unable to start work until March 15, 1950, and was

unable to complete the grading and surfacing in time to permit the final oiling before rainy weather set in; in fact, the contractor was requested to delay the oiling until next spring. In view of these facts he recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

The Commission, in discussing the requests for extensions of time as listed above, considered but did not necessarily adopt either the recommendations of the Engineer or the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that Contracts number 3206, 3281, 3395, 3111, 3216, 3245, 3294 and 3360 for construction of State Highway projects have been completed according to the requirements of the contracts or modifications thereof and that said contracts are now ready for acceptance. After due consideration the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The meeting adjourned at 5:00 p.m. to reconvene at 9:00 a.m. the following morning in the same room.

Portland, Oregon
November 10, 1950

The meeting of the State Highway Commission reconvened in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel with the same persons present and participating.

Bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, following which Chairman Chandler announced that the awards of contracts would be made at 3:00 p.m.:

CITY OF CANYONVILLE IN DOUGLAS COUNTY

CANYONVILLE (5TH STREET) SECTION

Roy L. Houck & Son, Salem	$ 9,866.00

MT. HOOD HIGHWAY IN HOOD RIVER COUNTY

WHITE RIVER BRIDGE SECTION

E. C. Hall Co., Portland	$ 56,633.00
C. J. Eldon, Portland	67,310.00
Valley Constr. Co., Portland	81,227.50

FREMONT AND KLAMATH FALLS-LAKEVIEW HIGHWAYS IN LAKE COUNTY

LAKEVIEW ROCK PRODUCTION PROJECT

Inter City Sand & Gravel Co., Inc., Eugene	$ 25,900.00
Peter Kiewit Sons' Co., Longview, Wn.	28,980.00
M. C. Lininger & Sons, Medford	31,100.00
Barney B. Helser, Vale	32,500.00
A. H. Saxton & Sons, Corvallis	34,000.00

OREGON COAST AND CORVALLIS-NEWPORT HIGHWAYS IN LINCOLN COUNTY

NEWPORT ROCK PRODUCTION PROJECT

Newport Constr. Co., Portland	$ 23,922.00
A. H. Saxton & Sons, Corvallis	27,200.00
E. C. Hall Co., Portland	29,420.00
McNutt Bros., Eugene	31,960.00

OLD OREGON TRAIL IN MALHEUR AND BAKER COUNTIES

LIME-PAYETTE JUNCTION ROCK PRODUCTION PROJECT

Rush Constr. Co., Enterprise	$ 30,100.00
Oscar E. Joelson, Eugene	32,042.00
C. E. Leseberg, Nyssa	39,560.00
McNutt Bros., Eugene	60,737.50

CITY OF SALEM IN MARION COUNTY

SALEM TRAFFIC SIGNALS

City Electric, Salem	$ 21,903.00
Electric Corp., Salem	25,470.00

The Commission considered a petition from residents of the Highland Parkway District, Portland, requesting that the existing stairway connecting Canyon Road and S. W. Canyon Court near Sylvan intersection be repaired for the benefit and accommodation of bus patrons. The Engineer recalled that the Commission previously denied a similar request because it considered the proper solution of the problem to be the rerouting of the busses on the old road which would eliminate the need for the stairway. In response to an inquiry from Commissioner McIver, the Chief Counsel advised that inasmuch as the stairway is on state highway right of way, the state is responsible for it and must either maintain it properly or remove it. As the result of discussion the Engineer was instructed to inspect the stairway personally and report his recommendation later in the day. (The Engineer made this inspection during the noon-time recess and reported later that because of the refusal of the bus company to reroute its busses, the only solution remaining is to rebuild the stairway which he estimated will cost between $500 and $750. He recommended approval of the project. The Commission approved the recommendation unanimously.)

The Commission discussed a written report by the Auditor concerning the request of the Oregon State Employees Association that the Commission permit payroll deductions to pay premiums for insurance furnished under a group life plan sponsored by the Association. The Auditor reported that the present plan of the Association is very similar to the plan that the Association brought to the Commission's attention about a year ago which the Commission did not approve because: 1) the benefits were limited to Association members only; and 2) the bookkeeping machine did not have space for another deduction column. The West Coast Life Insurance Company carried the insurance at that time, he said, but since then the California-Western States Life Insurance Company has taken over the policies numbering approximately 800, of which 79 are employees

of the Highway Department, most of whom are uninsurable and will have their policies cancelled as of October 31, 1950, unless their premiums can be paid under the payroll deduction plan. The Auditor presented a brief comparison of the premium rates offered under the proposed Association plan and the rate offered under the existing plan, which disclosed that the premiums are proportionately the same, the main difference being that the plan sponsored by the Association offers a wider amount of coverage, varying from $1,000 to $2,500, depending upon the employee's salary, whereas the plan now in effect offers only a one thousand dollar coverage to each employee. As to the handling of the payroll deductions, the Auditor said that there would be no difficulties from that standpoint and that the operation would require only a slight additional portion of the time of one man who now handles that type of work. In the discussion which followed, the Commission expressed the feeling that it does not wish to deprive any of the 79 employees of the benefits they now enjoy under their present policies, nor to deprive other employees of the benefits they might receive under the proposed plan just because they do not belong to the State Employees' Association. As a result of the discussion, the Commission decided unanimously to allow payroll deductions for the Group Insurance Plan provided the insurance is made available to all employees of the Highway Commission on the same basis as regards coverages, benefits and costs.

The Commission considered renewal of agreements with the National Hospital Association and with the Oregon Physicians' Service for the year 1951. Action thereon was deferred at the request of the Chief Counsel, pending clarification of certain features in the original contracts which, he said, are being construed by the companies unfairly, particularly the provision for automatic renewal of the agreements unless the Commission takes definite action to cancel them. The Commission authorized extension of these contracts for one year if modified in accordance with the suggestions offered by the Chief Counsel.

The Commission authorized Mr. R. H. Baldock, State Highway Engineer; J. M. Devers, Chief Counsel; G. S. Paxson, Bridge Engineer, and Mark Astrup, Landscape Engineer, to attend the annual meeting of the Highway Research Board which is to be held in Washington, D. C., January 9 to 12, 1951. The Chief Counsel advised that his expenses would be paid by the Board. The Engineer gave as his feeling that the Board will pay the expenses of more than one delegate. He was instructed to get definite assurance to that effect if possible.

The Engineer reported that it has been necessary to place a reduced load limit on the entire length of the Redwood Highway, effective November 2, 1950, as a precautionary measure, to insure against injuries to the pavement by heavy trucks, following the recent storms and high water in that district which damaged the highway shoulders. Repairs have now been made, he said, and regular highway traffic restored on November 8. The Commission unanimously approved the Engineer's action in this matter.

The Commission considered the matter of granting salary step increases under the Civil Service plan to those employees who are eligible as of January 1, 1951. The Engineer advised that on January 1, 1951, 530 employees will be eligible for such salary increases, which average $12.94 each. He recommended ap-

proval of the increases for those employes whose merit rating is average or better, which, he said, will result in a net estimated annual cost of $67,251. He pointed out that the increase is provided for in the budget. The Commission unanimously approved the increases as recommended.

The Chief Counsel brought up for discussion a proposed settlement with Mr. Blaine G. Johnson for right of way acquired for a revision of the Pacific Highway along Cow Creek, in Douglas County, which matter has been pending as a condemnation case for several years. He said that the principal point of contention is the value of the timber that was destroyed, Mr. Johnson having demanded $10,000 for his property whereas the appraised value is only $6,500. It appears the the State's contractor cut and burned the timber in question before it could be cruised, so that the value of the timber destroyed cannot be definitely determined. The Chief Counsel suggested investigation to determine the value of the timber, and he requested authority to settle the case for $10,000 if the investigation reveals that Mr. Johnson's contention is correct. The Commission authorized settlement of the claim on such basis provided the contentions are supported by facts.

Mr. Erick Enquist, contractor for construction of two bridges across the Long Tom River on the Siuslaw Highway, Lane County, Contract No. 3077, appeared before the Commission regarding the penalty that was imposed on him for his failure to complete this contract within the specified time limit. Mr. Enquist stated the contract was awarded him November 4, 1948, and that he started work January 2, 1949; also, that the progress of the work was handicapped by heavy rains, quicksand and other things that were not anticipated. He urged the Commission to cancel the penalty. He was informed by Chairman Chandler that the Commission's action in imposing penalties for tardy completion of contracts is based upon the Engineer's recommendations and that in this case it appears that Mr. Enquist had not expedited completion of the job to the best of his ability which forced the granting of two extensions of time and put the State to extra expense for engineering supervision. He added that neither the Commission nor the Engineers desire to be unfair in passing on cases of this kind and in this instance it appears that the penalty is fully justified. As the result of further protest by Mr. Enquist, the Commission agreed to review the case.

The Honorable George W. Peavy, Mayor of the City of Corvallis, headed a delegation from that city which appeared before the Commission and requested the rerouting of US99W along First Street in Corvallis, by-passing the business district of the city, and the modernization of this highway between Monmouth and McMinnville. Others in the group were Charles Whiteside, industrialist; Francis Ziegler, State Representative; Sandy McHugh, City Councilman; Robert Ingalls, Editor of the Corvallis Gazette-Times; and James O. Conville, City Manager. Mr. Peavy read aloud and presented to the Commission a brief in support of their oral requests, from which the following is quoted:

"The First Street By-Pass Through Corvallis

The City administration of Corvallis and the people of Corvallis

assume that, in due time, this improvement will be made by the Highway Commission, in cooperation with the City of Corvallis. It is assumed, too, that thus by-passing cities is a fixed policy of the Commission.

In connection with the suggested by-pass, the following points are brought to the attention of the Commission:

1. Due to the limited number of trains now passing through Corvallis via the Corvallis to Albany railroad, now four daily, it is not felt that a highway over-pass is necessary for traffic safety.

2. If the Commission approves the construction of the by-pass, the City will assume the cost of acquiring the necessary right-of-way on First Street, between Polk and A Streets. This work has already started.

3. The City will assume the responsibility of securing the removal of the railroad track now in place on First Street, insofar as this track might interfere with the suggested by-pass.

4. Due to reduced speeds in force in Corvallis it is not believed that an over-pass, clearing the yards of the Corvallis Lumber Company is necessary. It is felt the engineers of the Commission can provide southbound connections in a manner which will not materially slow up traffic, and at a cost below that involved in the over-pass.

"Highway 99W between Monmouth and McMinnville

This particular piece of highway is notoriously antiquated and in disrepair. There is no thought on the part of the Corvallis Committee that 99W should rival 99E. It is felt, however, that it should be brought to modern standards of two-lane highways. The attention of the Commission is called to certain very evident defects which should be remedied:

1. Entering Monmouth from the south, a right-angled turn is required, and another right-angled turn is needed to put one back on the old right of way of 99W, leading through the campus of the College of Education. We feel that 99W, without making the first right-angled turn, should continue directly north, joining the main highway to the north of the City, thus eliminating both right-angled turns.

2. Between Monmouth and Rickreall there are two right-angled turns which do not belong in any modern highway and should be eliminated.

3. Just to the south of the little town of Whiteson, there is a curve located on a sharp dip which is Exhibit A in the list of things which should not be in any modern highway."

Mayor Peavy also presented a copy of a letter from President Roben J. Maaske of Oregon College of Education at Monmouth, to the State Highway Engineer, dated October 19, 1950, in support of their request for the elimination of the right-angle turns in this highway in Monmouth.

Mr. Conville presented a map showing the proposed rerouting of the highway in Corvallis. He expressed the feeling that the proposed railroad grade separation structure north of the city is unessential at this time, and he also suggested that considerable expense could be avoided in the construction of the by-pass route were this route connected with the present route before it crosses the Mary's River, thus missing the sawmill located at the south end of First Street, and eliminating the need for a new bridge across the Mary's River. He said that this project is the City's first priority project, and that it is urgently needed now. He also said that the city will provide right of way as may be needed for such route, and will arrange for the removal of railroad tracks from First Street.

This matter was discussed at considerable length, during which the State Highway Engineer explained details from the state's standpoint, including estimates of cost to construct the several units of work making up the total improvement. As the result of the discussion, the Engineer was instructed to give the matter further study, particularly as it concerns the mill situated at the south end of First Street, and Mr. Conville's suggestion for a connection between the proposed and present routes north of the Mary's River.

Mr. Conville also exhibited a map showing the present alignment of US99W between Monmouth and McMinnville, on which map was shown in colors the improvements mentioned in the brief as filed by Mayor Peavy. The delegation urged the construction of these projects as rapidly as funds will permit. Mayor Peavy explained that they do not expect the Highway Commission to construct all of the projects at the same time, but they will appreciate adoption by the Commission of an orderly program for the completion of the improvements as rapidly as is possible. He repeated that the City's No.1 project is the construction of the proposed by-pass route on First Street in Corvallis, and their second, the elimination of the right-angle turns in this highway at Monmouth. Chairman Chandler stated the Commission appreciates the need for the improvements, but it is simply a matter of availability of funds to finance the work. He assured the group that their projects will be given careful consideration in the formulation of future construction programs.

A delegation from the city of Gladstone appeared before the Commission concerning the routing of logging trucks through their city. The delegation consisted of Hon. Walter H. Brunner, Mayor; Harold Uney, City Attorney; Louis J. Biby, Chief of Police; and W. R. Morley, representing Western Logging Co., Portland.

Mr. Uney headed the group. He explained their problem and called on Mr. Morley to give details. Mr. Morley stated that their operations originate in the Estacada district, east of Gladstone, and in transporting the logs to their dump in the Willamette River, they are obliged to truck them through the city of Gladstone. The Original route, he said, was along Arlington Street but this was later changed to Clackamas Blvd. although the crossing of the highway at Arlington Street was retained. He further stated that recently the district west of the highway was taken into the city and the city council took action to prohibit the hauling of logs on River Road,

which stopped the hauling of logs directly across the highway at Arlington Street as was permitted by the Company's P.U.C. permit, so they now enter the highway at that point but travel several blocks northerly on the highway to Gloucester Street where they cross and go to their dump. Such routings, he said, meet with their satisfaction and he requested that their P. U. C. permit be modified accordingly; otherwise, that the Arlington Street crossing be properly signalized and that a roadway be constructed across the state's property on the west side of the highway at this point to enable logging trucks to stop there without the rear ends of the loads extending into the highway.

Chairman Chandler advised that the situation has been carefully studied by the Engineer who points out that the route designated by the City is extremely hazardous because logging trucks making the right turn at Arlington Street are unable to stay within the north-bound traffic lanes, and that the left turn movements across the highway at Gloucester Avenue are even more dangerous. He recalled that the city of Gladstone previously requested a traffic light at the Arlington Street intersection and that the Commission had approved the request on the condition that the City would pay half the cost, which the City refused to do. As a result of the discussion the Commission instructed the Engineer to make further investigations of the problem from the standpoint suggested by Mr. Morley, such investigation to be made on the following Monday if possible, and to telephone the results thereof to the members of the Commission when final action would be taken.

A delegation representing the Lower Columbia Highway Association was present and urged additional improvements to the Lower Columbia River Highway between Rainier and Astoria. Those included in the group were: Guy Boyington, County Judge, Clatsop County, Astoria; Art Steele, President of the Association, Clatskanie; Fred W. Herman, Vice-President of Association, Rainier; Fred Andrus, Secretary of Association, Astoria; H. T. Hacker, Guyon Blissett, Arthur Dempsie, E. L. Pauldanius, E. T. Christenson, and Delbert Moore, all members of Astoria Chamber of Commerce; Clarence E. Short, President, Astoria Chamber of Commerce; Al Hetzel, Manager of Astoria Chamber of Commerce; Brewer A. Billie, City Manager, Astoria; Jay H. Stockman, Attorney, Astoria; Capt. E. A. McFall, Commanding Officer of Tongue Point Naval Base; Richard E. Singleton, City Recorder, St. Helens; Swep Morton, Jr., Superintendent of Public Works, St. Helens; J. W. Hunt, County Judge, Columbia County, St. Helens; L. C. Hall and G. H. Carroll, both of St. Helens Chamber of Commerce; J. A. Ostrom, President, and Clarence E. Enders and E. D. Purcell, members, Progressive Businessmen's Club, Portland.

Mr. Steele who headed the group thanked the Commission for the improved section of highway recently completed between Rainier and Goble and requested early improvement to modern standards of the remaining section between Rainier and Astoria, due to the rapid development of defense shipping in this area. Mr. Short pointed out that activity along this highway is much greater now than when the Engineer made his recent economic survey, due to the war situation. He mentioned the recently enlarged base at Tongue Point and the military traffic which originates in the state of Washington and is routed to Astoria via Longview Bridge across the Columbia River, and the Lower Columbia River Highway in preference to other routes. He also mentioned that the Lower Columbia River

Highway is the western terminus of a transcontinental highway and for that reason should be improved to meet the standards for such class of highway. Capt. McFall read aloud three letters in support of their request, one being from Rear Admiral D. E. Barbey, Commandant 13th Naval District, another from Fenton S. Jacobs, Brigadier General, U. S. Army, and the third from J. D. Shaw, U. S. Navy, in charge of the Columbia River Group, Pacific Reserve Fleet. In these letters the importance of the improvement from the military standpoint was stressed. Mr. Andrus filed with the Commission a brief containing letters, resolutions etc. from numerous cities, towns and organizations along the route, all endorsing the project. Chairman Chandler advised that the members of the Highway Commission are just as interested in the improvement of the Rainier-Astoria section as are the communities represented by the delegation and will give the project fair consideration in the allocation of funds that become available for future construction programs, but due to scarcity of funds, it cannot make a definite commitment at this time.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

County Commissioner J. C. Minson, Crook County, and Mr. T. H. Carstensen, Manager Pine Products Corp. Prineville, appeared before the Commission and inquired as to the Commission's plans for improvement of the Paulina Secondary Highway between Paulina and Prineville, via Combs Flat. They were informed by Chairman Chandler that the Commission has not yet arranged a program for Federal Aid Secondary Funds but the Paulina Highway will be given fair consideration when that is done.

Mr. Minson inquired if it would be possible for the County to secure a quantity of crushed rock from the State's contractor who is now operating near Prineville. He was instructed by the Engineer to contact the contractor direct concerning this material.

Mr. Thornton T. Munger, Chairman Roadside Control Committee of the Oregon Roadside Council, appeared before the Commission concerning the determination of a policy for the control of roadside development, including advertising signs. He explained that the Roadside Council is considering the advisability of securing legislation at the next meeting of the Legislature to determine such a policy which will conform with policies of some of the other states. He asked the Commission to endorse such a policy with a view of securing administrative backing by the Governor ir his inaugural address. He left with the Commission copies of excerpts from the messages of Governor Vanderbilt, Rhode Island, and Governor Lehman, New York, to their respective legislatures on January 7, 1940 and in 1941 to illustrate what he has in mind. Chairman Chandler advised that the Commission is mindful of the situation and realizes the importance of the subject. Following Mr. Munger's departure, the Chief Counsel advised that the Roadside Council has asked his assistance in preparing a model bill to control roadside development, particularly signs. He was authorized to consult with members of the Roadside Council regarding such matters, the results thereof to be reported to the Commission.

There appeared before the Commission a delegation representing the Recreational and Natural Resources Committee of the Portland Chamber of Commerce which asked the Commission to authorize a survey of state park needs, and a larger expenditure of funds for the development of state parks. The following were included: Don Parks, Marshall N. Dana, G. E. Cannon, A.A.Lobe, David B. Charlton, and J. Stanley Emery of Coos Bay. Mr. Parks was spokesman. He urged the Commission to spend more money for acquisition and development of parks, and to conduct a state-wide survey to determine the need for more of such facilities in the various parts of the state. He pointed out that in Eastern Oregon, particularly, more picnic areas are needed; and that while some sections of the state are well provided with parks, other sections are not so well favored. He presented a written digest of a statement prepared by Edgar W. Smith. President, Portland Chamber of Commerce, outlining the need for more and better state parks, and recommending the installation of facilities for overnight camping in a number of them. Mr. Dana entered a plea for additional wayside picnic areas, what he termed "sandwich boxes", particularly throughout eastern Oregon, for the accommodation of tourists who stop a short time for picnic lunches. He endorsed the proposal for a state-wide survey. He expressed the feeling that one member of the Commission should be assigned the duty to pass on state park matters. Chairman Chandler advised that the Commission is interested in this matter and is adding to the facilities from time to time—in fact, on the previous day authorized two projects. The Commission, he said, is now thinking more along the lines of developing the parks it now has rather than the acquisition of additional areas, and has made provision in its 1951 budget for construction of overnight camping facilities in three of the main parks. He also said that there is a question as to how much of the highway fund should be spent for parks and that the Commission has in mind the securing of a directive from the legislature to clarify the situation. As to assigning to one Commissioner the responsibility for state parks, Chairman Chandler advised that under the present set-up, each Commissioner is responsible for the parks in his district.

A delegation representing the Warrenton Chamber of Commerce and the Warrenton City Commission appeared before the Commission in behalf of the early construction of the Oregon Coast Highway across Youngs Bay on a proposed new route between Smith Point and Warrenton. The delegation consisted of the following: Emerson R. Baldwin, Warrenton City Manager; Dale Craven and Larry Lenhard, both members of Warrenton Chamber of Commerce; and Paul A. Scoggin and P. M. Neil, both members of Seaside Chamber of Commerce. Mr. Baldwin, who acted as spokesman, stated that they did not wish to pinpoint the location of the proposed route, but in the interests of economy and for the convenience of the traveling public, he urged that the proposed route be constructed as soon as possible. He cited records from the local hospital which indicate that three times as many patients come from the Warrenton, Hammond and Seaside area as from points on the Columbia River. He left typed statements with the Commission from the Warrenton Chamber of Commerce, the Astoria Clinic, the Seaside Chamber of Commerce, the City of Warrenton, the West End Development League and the Oregon Coast Association, all endorsing the proposed project across Youngs Bay. Mr. Baldwin also pointed out that most of the necessary right of way can be acquired without cost, from the city of Warrenton and from Clatsop County. Chairman Chandler advised that the Commission at this time is not in a position to make any commit-

ment or promise with respect to this project inasmuch as information at hand is based on an economic study only, no survey as yet having been authorized, and there is also the question of funds. He concluded the discussion by stating that the Commission will keep the project in mind.

The Commission discussed with the Engineer the proposals submitted at the morning session for construction of contract projects. The Engineer pointed out that identical bids were submitted by Oscar E. Joelson and Rush Construction Co. for the Union-Miles Bridge Rock Production project. The Commission elected to decide the successful bidder by the toss of a coin, whereupon the coin was flipped by the Chairman in the presence of Homer G. Johnson, representing Mr. Joelson, and Lee Shannon, representing Rush Construction Co. The toss was won by Rush Construction Co. At 3:00 p.m., Chairman Chandler publicly announced the awards as follows, the Commission's decision in each instance being by unanimous vote:

"Grading and paving 0.20 mile on Fifth Street in Canyonville, Douglas County. Roy L. Houck and Son, Salem, submitted the only bid on this project at $9,866. The Commission has awarded the contract to Roy L. Houck and Son at their bid price.

"Construction of a concrete viaduct and 0.31 mile of highway roadbed on the White River Bridge Section of the Mt. Hood Highway in Hood River County. E. C. Hall Company, Portland, submitted the low bid for this project at $56,633. Two higher bids were received. The Commission has awarded the contract to the low bidder, E. C. Hall Company, at its bid price.

"Lakeview Rock Production Project on the Fremont and Klamath Falls-Lakeview Highway near Lakeview in Lake County. Inter City Sand and Gravel Company, Inc., Eugene, submitted the low bid for this job at $25,900. Four higher bids were received. The Commission has awarded the contract to the low bidder, Inter City Sand and Gravel Company, Inc., at its bid price.

"Newport Rock Production Project on the Oregon Coast and Corvallis-Newport Highways near Newport, Lincoln County. Newport Construction Company, Portland, submitted the low bid for this job at $23,922. Three higher bids were received. The Commission has awarded the contract to the low bidder, Newport Construction Company, at its bid price.

"Lime-Payette Junction Rock Production Project on the Old Oregon Trail north of Ontario in Malheur and Baker Counties. Rush Construction Company, Enterprise, submitted the low bid for this job at $30,100. Three higher bids were received. The Commission has awarded the contract to the low bidder, Rush Construction Company, at its bid price.

"Installation of traffic signals at nine intersections in Salem, Marion County. City Electric, Salem, submitted the low bid for these installations at $21,903. Three higher bids were received. The Commission has awarded the contract to the low bidder, City Electric, at its bid price.

"Grading and topping 17.1 miles of highway between Heppner Junction and Boardman on the Willow Creek-Boardman Section of the Columbia River Highway in Morrow and Gilliam Counties. Berke Brothers, Portland, submitted the low bid for this work at $509,302.60. Nine higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Union-Miles Bridge Rock Production Project on the Medical Springs Secondary Highway southeast of Union in Union and Baker Counties. Three bids were received for this project. Oscar E. Joelson, Eugene, and Rush Construction, Enterprise, submitted identical bids at $22,736. The Commission has awarded the contract to Rush Construction Company as previously determined by the toss of a coin.

"Construction of the Carlton Bridge over the North Yamhill River on the Moores Valley County Road in Yamhill County. J. F. Johnston, Sherwood, submitted the low bid for this job at $104,840. Four higher bids were received. The Commission has awarded the contract to the low bidder, J. F. Johnston, at his bid price.

A group of ladies from the town of St. Paul and vicinity came before the Commission in regard to the installation of playground equipment in Champoeg State Park. The following were included: Mrs. Carl Smith, Mrs. Morris Merten and Mrs. Morris Smith, all of St. Paul; Mrs. A. W. Oberg and Mrs. Tom Jette, both of Champoeg. Mrs. Carl Smith acted as spokesman for the delegation. She urged the installation of swings, a softball diamond, a wading pool and more playground equipment in general. She urged the facilities for the benefit of the large number of children who visit the park in connection with their studies of Oregon History. Champoeg Park, she said, has great historical significance in the development of Oregon, and as a result, many school children make group visits to the park. She also requested that some sort of fence be put up along the river bank to keep small children from falling into the deep water. Chairman Chandler expressed appreciation for the interest shown in the park by the group, and he advised them of the Commission's policy not to install playground equipment, and the reason therefor. The function of the Commission in respect to parks, he stated, is to improve the appearance and general usefulness of the parks. Mr. C. H. Armstrong, Parks Superintendent, who was present, outlined the plans for development of this park, which include the planting of more trees and grass, the enlargement of facilities for parking cars and plans for more tables and toilet facilities. Mrs. Smith then inquired if the group would be allowed to install playground facilities at its own expense. Chairman Chandler stated that this could not be allowed, as such facilities, even though installed without cost to the tax payers, would still involve supervision and the Parks Department is not set up to provide such supervision.

Consideration was given by the Commission to items of unfinished business listed on the Secretary's summary, dated October 26, 1950, as follows:

Proposed legislation to be submitted to the 1951 Legislature: The Chief Counsel reported that drafts of such legislation are being prepared and

will be forwarded to the Commission for study. The secretary was instructed to retain this item on the list of unfinished business.

Re-alignment of the Oregon Coast Highway through Seaside on Roosevelt Drive: The Engineer advised that he will endeavor to report this matter to the Commission at its next meeting in December.

Action to be taken on option secured for Peterson property on the Ladd Canyon Section of the Old Oregon Trail: The Engineer advised that he has revised the alignment of the highway at this point so the Peterson property no longer is required. The Commission approved the report and ordered this item deleted.

Development of government-owned tracts for a park site at McNary Dam: The Parks Superintendent reported that a group of interested citizens in Umatilla County is formulating action to aid in this development. He was instructed to keep in contact with them. The Commission ordered this item retained on the list of unfinished business.

Improvement of the Haines-Anthony Lakes Secondary Highway: The Engineer recalled that he was instructed to ascertain if the Baker County Court desires this project in preference to contemplated work on the Baker-Unity Highway but he has not had an opportunity to discuss it with the Court as yet. The Commission ordered this item retained on the list of unfinished business.

Request of Union Oil Company for re-instatement of slope easement, heretofore granted the state on US101 between North Bend and Coos Bay, which was relinquished in 1950: The Engineer reported that this matter had been investigated and that it is his recommendation that the request be granted. The Commission approved the recommendation. This item to be removed from list of unfinished business.

Protest from N. Ray Alber that the 35-mile per hour speed limit on the Tualatin Valley Highway between Portland and Beaverton is too low: The Engineer reported that an investigation by the Traffic Engineer discloses that on the major part of this section, a higher rate of speed could safely be allowed. He recommended that the allowable speed limit be raised from 35 miles per hour to 45 miles per hour, except at two short sections, one at Scholls Ferry Road junction and the other at the junction with the Old Canyon Road. The Commission approved the Engineer's recommendation unanimously by the adoption of the attached resolutions relative thereto, marked EXHIBITS "B-1" and "B-2", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

Proposed cut-off from Hood Street to Macadam Avenue at the west end of Ross Island Bridge in Portland to relieve Harbor Drive of the Oswego traffic: The Engineer advised that his report on this situation is not ready but he will discuss the matter with Commissioner McIver, as instructed, and will render a report at the next meeting if possible.

Proposed addition to Silver Falls State Park to secure a water supply to serve the overnight camping area: The Parks Superintendent reported that pursuant to previous instructions he contacted the owner of the land as to how much he wanted for it and had also inspected the spring for quantity and quality of water. The property owner, he said, does not wish to dispose of his property. The Commission ordered the item deleted from the list of unfinished business.

Proposed addition to Umpqua Lighthouse State Park: The Right of Way Engineer reported that as previously instructed he contacted the local representative of the Menasha Woodenware Co., owners of the property, on the basis of conveying the property to the state as a gift, and he is now awaiting the final decision of the Company's Board of Directors in Wisconsin.

Collection of amount of bid bond furnished by the State Construction Company in connection with its proposal to construct the Marion Street Bridge piers in Salem: The Chief Counsel reported a conference had been held with the bonding company and the contractor and that a report would be made soon. The Commission ordered retention of this item on the list of unfinished business.

Maintenance of gasoline pumps on highway rights of way: The Engineer advised that he would try to have his report on this subject ready for consideration by the Commission at its meeting in December or in January. The Secretary was instructed to retain this item on the list of unfinished business.

Request for permanent improvement of the Paulina Secondary Highway between Prineville and Paulina: The Commission ordered that this item be removed from the list of unfinished business as the requested improvement is to be considered in formulating the next secondary highway construction program.

Request for snow removal on the Cooper Spur Road as an accommodation to winter sports enthusiasts of Hood River: The Engineer advised that his report on this request will be ready in the near future. The Commission ordered retention of this item on the list of unfinished business.

Request for oiling a one and one-half mile section of the Fox Hollow State Secondary Highway south of Eugene: The Engineer advised that as previously instructed, an investigation is under way to determine the cost and feasibility of the improvement and that a report would be ready for the next meeting.

Proposed expenditure of $175,000 to reconstruct the Astoria-Megler Ferry terminals: The Engineer advised that he expects to render a report on this subject sometime in January, 1951.

Wage increase and cost of living adjustment as approved by the Civil Service Commission, the Governor and the Emergency Board: The First Assistant State Highway Engineer, W. C. Williams, reported that the large majority of the revised pay scales for the various classifications are acceptable, but in some instances further adjustments should be made. The Commission ordered this item retained on the list of unfinished business for further consideration.

Proposed development in Rooster Rock State Park, Multnomah County: The Parks Superintendent advised that he has not yet completed the detailed plans for the contemplated improvements but will render a report as soon as he can. The Secretary was instructed to retain this item on the list of unfinished business.

Construction of the Lake Creek Bridge Section on the Umpqua Highway: The Engineer advised that pursuant to previous instructions, a study is being made of this project with a view to including it in the 1951 construction program and that the report would be ready sometime in January or February, 1951. The item is to remain on the list of unfinished business.

Claim of the Enterprise Telephone Company for re-establishing its telephone facilities in Enterprise to accommodate a highway improvement. The Chief Counsel reported that as previously instructed he had contacted the City Attorney, and also inspected a copy of the City's ordinance but can find nothing therein that will require the Company to move its poles at Company expense. The Engineer stated that the Company was told to move the poles upon being advised by the City Attorney that the Company was obliged to move them at its own expense; however, the Company was not told that it would be reimbursed. The Chief Counsel was instructed to pursue the matter further.

Request of Umatilla County for exchange of roads: The Engineer recalled that this matter was considered by the Commission at the October 26 meeting when he recommended that the request be denied, but action was deferred for further study. He stated that his previous recommendation still stands. The Commission indicated its approval of the recommendation but deferred definite action for the record pending discussion of the matter with County Judge James H. Sturgis. The Secretary was instructed to delete the item from the list of unfinished business.

Request of the South Benton County Chamber of Commerce for (1) improvement of the Pacific Highway West at the Long Tom River Bridge at Monroe, (2) paving of the Territorial Secondary Highway between Monroe and Cheshire, (3) designation and development as a secondary highway of a road extending from the Pacific Highway West through Bellfountain, to Alsea. The Engineer reported that items No. 1 and 2 are being considered in the tentative list of projects for the next construction program in the second and third years, and that the third request cannot be considered at this time due to lack of funds. In view of this information the Commission ordered deletion of this item from the list of unfinished business.

Improvement of state highway routes through cities and towns: The Engineer advised that pursuant to previous instructions, an investigation is being made in various cities over the state as to where and what type of improvements are needed. The necessary information, he said, is not yet complete but a report of the findings will be made later. The Commission ordered this item retained on the list of unfinished business.

The Chief Counsel reported that some representatives of the logging and lumbering industry want to "sit in" with the Commission when amendments to

existing laws which govern their operations are discussed, because they want to cooperate. The Commission indicated a willingness for a "round table" discussion of such matters.

Commissioner Reynolds brought up for discussion the matter of installing signs at each end of each highway construction project giving pertinent information about the job -- what agency is doing the work, costs involved, name of contractor, etc. The Engineer advised that he now is studying such feature and will have something to report to the Commission later on.

Mr. Ralph Watson, Public Relations Consultant, was present and inquired as to what the Commission might want him to do during the coming legislative session, whether or not the Commission expects him to act as its representative on pending highway legislation. Chairman Chandler stated that an arrangement has already been made through the Engineer to keep the members of the Commission advised on legislative matters, and present indications are that it will not be necessary for Mr. Watson to maintain residence in Salem during the session unless something unforeseen arises,of which he will be advised.

The Engineer reported that on or about December 15, 1950, the new section of the Ochoco Highway along Marks Creek in Crook and Wheeler Counties, that is being constructed by the Bureau of Public Roads, will be opened to traffic, which will make this highway eligible for Group I classification throughout its entire length from Prineville to the John Day Highway junction, as determined by test runs. He recommended approval of such reclassification along the newly constructed section, it being understood that the old highway between Ranger Station, west of Ochoco Summit, and the junction of the old and new highways east of the summit, which the state still maintains, shall retain the Group II classification. The Commission approved the recommendation unanimously.

Mr. W. W. Stiffler, Second Assistant State Highway Engineer, reported a request from the Swisshome Cooperative Sawmill, Swisshome, for permission to truck-haul logs over the Siuslaw Highway during Saturday and Sunday, November 11 and 12, so as to avoid closing down their mill operations. He said that the mill gets its logs from the area east of Swisshome, which is served by a county road on which there is a bridge that is closed for repairs, and it is alleged that, because of a shortage of supply of logs in their pond, the mill will have to shut down unless the supply can be replenished from some other source during the prohibited period. He recommended that their request be denied because inquiry of the county engineer reveals that the bridge repairs will be completed on Monday, November 13, when regular hauling can be resumed. The Commission approved the Engineer's recommendation.

The Engineer also reported a request from Charles M. Nelson, Hood River, to truck-haul logs over the Columbia River Highway from milepost 61.63, near Mitchell Point, to the Jarman Lumber Co. Mill at Hood River. He said that the logs are short and will be transported on a solo truck involving an overall length not in excess of 35 feet. He gave as his feeling that the operation will not prove hazardous to other traffic and he recommended approval of the request. The Commission approved the recommendation unanimously.

The Commission considered, approved and signed agreements, etcetera, as follows:

Agreement with Thuron H. Cross to construct, maintain and use a logging road over and across state-owned property in Curry County, known as Humbug Mountain State Park.

Agreement between Yamhill County, City of Carlton and the State in connection with the construction of the Carlton Bridge on FAS Hwy. 111.

Yamhill County Maintenance Agreement covering N. Yamhill River Bridge Section at Carlton.

Resolutions (five speed limit, two parallel-parking-only, and one load limit). These resolutions were all adopted at Commission meeting of September 28, 1950.

Deed to City of Pendleton for small tract of land on Umatilla River.

Extension of lease with J. W. and Reba J. Bubb, for highway maintenance site.

Extension of lease with Carl N. Stevens, et al, maintenance headquarters site at Newberg.

Agreement with H. A. Swett re purchase of state-owned land south of Tillamook.

Lease for Mrs. Catherine A. Ruth for state-owned property in Eugene.

Indenture of Access for Joseph P. Garske for change in granted points of access to Goshen-Creswell Section of Pacific Hwy.

Deed conveying to U. S. Army 0.16 acre of land in Lane County. (Lookout Point Reservoir Project.)

Agreement with City of Canyonville covering street improvements involving the expenditure of a portion of the $250,000 special city allotment.

Letter to B.P.R. re alignment revision for the Arlington-Umatilla Section, Project No. FAP-145, FA Route 18.

The meeting adjourned at 4:30 p.m.

Chairman

State Highway Engineer

Commissioner

ATTEST:

EXHIBITS "A" THROUGH "F"

Minutes of November 9 and 10, 1950

EXHIBIT "A"

Minutes of November 9 and 10, 1950

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

UNIT #2 - SULLIVAN GULCH HIGHWAY

Minutes of November 9 and 10, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Tualatin Valley Highway

Highway Number: 29 Route Number: Oregon 6

Location of Termini	Established Speed
M.P. 0.00 (Junction Sunset Hwy.) to M.P. 1.25 (just east of junction with old Canyon Road)	45 miles per hour

Moro 872.97

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 9th day of November, 1950.

Minutes of November 9 and 10, 1950

R E S O L U T I O N

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

> SAMS VALLEY SECONDARY HIGHWAY between the town of Gold Hill, Jackson County, and a point approximately 8.0 miles easterly thereof, near Snider Creek.

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said maps, reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above mentioned section of state highway, particularly between Engineer's Station 30+00, approximately one-half mile easterly from the town of Gold Hill, and Engineer's Station 44+05, near Snider Creek in Section 33, Township 35 South, Range 2 West, W.M., together with the map, which for identification purposes bears Map File Nos. 7B-3, 7B-4, 7B-5, field notes and other engineering data submitted by the Engineer, hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon; and

2. It is further ordered that the said route and the survey of the same hereby are adopted as the route and location of the SAMS VALLEY SECONDARY HIGHWAY between the above described points.

3. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

4. That this resolution be entered in the minutes and records of the Commission as of the 9th day of November, 1950.

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3111 with Colonial Construction Co. for furnishing crushed rock in stockpile on the Mt. Hood Section of the Mt. Hood and Wapinitia Highways in Clackamas, Hood River and Wasco Counties, completed September 21, 1950. Request for time extension is being presented at this meeting.

Contract No. 3216 with R & M Construction Co. for grading, paving and landscaping on the Redwood Junction Section of the Pacific Highway in Josephine County, completed September 30, 1950.

Contract No. 3245 with L. R. Kauffman for surfacing on the Cougar Creek-Preacher Creek Section of the Alsea-Deadwood Highway in Lane County, completed August 24, 1950.

Contract No. 3294 with M. C. Lininger & Sons for furnishing crushed material in stockpile on the Pendleton-Hilgard Section of the Old Oregon Trail Highway in Umatilla and Union Counties, completed October 7, 1950. Request for time extension is being presented at this meeting.

Contract No. 3360 with A. H. Saxton & Sons for furnishing crushed material in stockpiles on the Santiam Junction Section of the Santiam and North Santiam Highways in Linn and Jefferson Counties, completed October 10, 1950.

Contract No. 3206 with Durbin Brothers for grading and oil mat surfacing on the North Unit, Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway in Wallowa County, completed August 31, 1950. Removal of contractor's equipment and clean-up of site was finished November 1, 1950.

(cont.)

EXHIBIT "E" (cont.)

Contract No. 3281 with O. C. Yocom for oil mat surfacing on the Wilson Creek-Spitzenberg Section of the Pittsburg-Scappoose County Road in Columbia County, completed September 13, 1950.

Contract No. 3395 with Swendig & Son for constructing Lava Caves State Park latrine in Deschutes County, completed October 31, 1950.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Minutes of November 9 and 10, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to, or any interest in, any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the Sullivan Gulch Highway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing, and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation of motor vehicles promoted, and highway travel in general safeguarded, the real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the Sullivan Gulch Highway, for the purpose of establishing, constructing and maintaining a throughway, the following-described property, to-wit:

Lot 2, Block 3, Avalon Addition to the City of Portland, situated in Section 31, Township 1 North, Range 2 East, W.M., Multnomah County, Oregon, containing 5,000 square feet.

(cont.)

2. That the highway facility for which the aforesaid property is required and is being taken, has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said property.

4. That upon the trial of any suit or action instituted to acquire the said property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stiuplation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the 9th day of November, 1950.

November 9, 1950

EXHIBIT "F-2"

Minutes of November 9 and 10, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and in the event right of way or property of any railroad company is required or needed for state highway location or state highway construction, and if any portion of such property or right of way is likewise needed and required by the railroad company for the proper operation of its trains and the usual and ordinary conduct of its business, but which property or land the said railroad company is willing to deed to the state for highway purposes in exchange for a like amount of land in close proximity thereto, the State Highway Commission is authorized to acquire by purchase, agreement, or by the exercise of the right and power of eminent domain, an equal amount of land or property contiguous thereto, or as nearly adjacent thereto as possible, and, after acquiring said land or property, to convey the same to said railroad company in exchange for the land or property needed and required from said railroad company for highway purposes; and

WHEREAS, the Columbia River Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate, construct, and improve the Cascade Locks-Viento Section of the Columbia River Highway, and for such purposes, and in connection therewith, the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property, and, in addition, the Commission is authorized to take any and all rights of access from property abutting upon a highway; and

WHEREAS, the Columbia River Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

EXHIBIT "F-2" (cont.)

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation, construction, improvement, and maintenance of the Cascade Locks-Viento Section of the Columbia River Highway a parcel of real property located in Hood River County, Oregon, and described as follows, to-wit:

A parcel of land lying in the Northwest quarter (NW¼) of the Northwest quarter (NW¼) of Section 1, Township 2 North, Range 8 East, W.M., Hood River County, Oregon; the said parcel being all that portion of the Northwest quarter (NW¼) of the Northwest quarter (NW¼) of Section 1 included in a strip of land of variable width, lying on each side of the center line of the Columbia River Highway as said highway has been relocated over and across or adjacent to the said property, which center line is described as follows:

Beginning at a point which is Engineer's center line Station 467+43.92; said point being approximately 175 feet south and 370 feet west of the northwest corner of Section 1, Township 2 North, Range 8 East, W.M.; thence on a spiral curve left (the long chord of which bears North 87° 41' 30" East) 500 feet; thence North 84° 21' 30" East 14.48 feet to Engineer's center line Station 472+58.40 back equals 472+54.77 ahead; thence North 84° 21' 30" East 1245.23 feet to Engineer's center line Station 485+00; said center line crossing the west and east lines of the said Northwest quarter (NW¼) of the Northwest quarter (NW¼) of Section 1 approximately at center line Stations 471+15 and 484+40 respectively.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Width on Northerly Side of Center Line	Width on Southerly Side of Center Line
467+43.92	472+58.40 back equals 472+54.77 ahead	North line of Sec. 1	150
472+54.77	485+00	North line of Sec. 1	Variable to existing highway right of way

The parcel of land to which this description applies contains 9.87 acres, of which 0.19 acre lies within the existing right of way, title to which hereby is acknowledged to be in the public, and 9.68 acres lie outside of the existing right of way.

2. The Commission does hereby find and declare that, in exchange for a like amount of land to be deeded by the Oregon-Washington Railroad & Navigation Company to the State of Oregon for right of way of said Columbia River Highway, there is needed and required for conveyance by the State of Oregon to the

said Oregon-Washington Railroad & Navigation Company for right of way for use in connection with the relocation, construction and maintenance of its railway a parcel of real property located in Hood River County, Oregon, and described as follows, to-wit:

A parcel of land being all that part of Government Lot 3 of Section 6, Township 2 North, Range 9 East, W.M., Hood River County, Oregon, lying north of the Oregon-Washington Railroad & Navigation Company's right of way, containing 1.7 acres.

3. That the highway facility requiring and making necessary acquisition of the aforesaid parcels of real property has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That, in addition to acquisition of fee simple title to the aforesaid parcels of real property, it is necessary that there be acquired or extinguished such interests or rights, if any there be, by which a right of access, or any right in the nature of a right of access, may accrue by virtue of the adjacency of the relocated Columbia River Highway, when constructed upon said parcel of land described in paragraph 1 above, and the existing Columbia River Highway to real property lying southerly of and adjacent to the existing Columbia River Highway opposite and between Highway Engineer's Station 471+15 and Highway Engineer's Station 484+40 of said relocated highway; except there shall be reserved unto the owners of said abutting real property right of access to the existing Columbia River Highway, said existing Columbia River Highway to serve as a frontage road and to be connected to the relocated Columbia River Highway (main highway) only at such point or points as designated by the State of Oregon.

5. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

6. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgement may be for the best interests of the State, the State Highway Commission, or the property owners.

7. That this resolution be entered in full in the minutes and records of the Commission as of the ninth day of November, 1950.

EXHIBIT "F-3"

Minutes of November 9 and 10, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pacific Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate a section of said highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and, in addition, the Commission is authorized to take any and all rights of access from property abutting upon a highway; and

WHEREAS, the Pacific Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way purposes for use in connection with the proper relocation, construction, and maintenance of the Canyonville-Johns Section of the Pacific Highway the following-described real property, to-wit:

A parcel of land lying in the Northeast quarter ($NE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 34, Township 30 South, Range 5 West, W.M., Douglas County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Lawrence Jackson Boyle, recorded in Book 106, Page 395 of Douglas County Record of Deeds; the said parcel being all that portion of the foregoing-described property included in a strip of land 80 feet wide on the easterly side and 112 feet wide on the westerly side of the center line of the Pacific Highway as said highway has been relocated over and across or adjacent to the said property, which center line is described as follows:

(cont.)

EXHIBIT "F-3" (cont.)

Beginning at a point which is Engineer's center line Station 51+59.8, said point being on the southerly line of Block 16, City of Canyonville, and 14 feet westerly from the southeast corner of said Block 16; thence South 30° 12' 30" East 954.53 feet to Station 61+14.33, said line crossing the northerly and southerly lines of said property approximately at Stations 53+69.4 and 58+92.2 respectively.

Also, that part of said property described as follows: Beginning at the most westerly corner of the foregoing-described parcel; thence South 30° 12' 30" East 354.55 feet; thence North 35° 50' West 361.4 feet to the northwesterly line of said property; thence North 68° 00' East 35.79 feet to the place of beginning.

The parcels of land to which this description applies contain 1.65 acres.

2. That in addition to acquisition of fee simple title to the aforesaid-described property, it is necessary that there be acquired all easements of access and all rights of ingress, egress, and regress to, from, and between the remaining land of the larger tract, of which the above-described property is a part, and the above-described property, and any highway now or hereafter constructed thereon, except that there shall be reserved unto the owners of said remaining property right of access to a frontage road to be constructed upon the above-described property and southwesterly of the main highway, said frontage road to be connected to the main highway only at such point or points as designated by the State of Oregon.

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the ninth day of November, 1950.

EXHIBIT "F-4"

Minutes of November 9 and 10, 1950

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Columbia River Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate, construct, and improve the Heppner Junction-Boardman Section of said Columbia River Highway, and for such purpose, and in connection therewith, the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Columbia River Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation, construction, improvement, and maintenance of the Heppner Junction-Boardman Section of the Columbia River Highway two parcels of real property located in Morrow County, Oregon, and described as follows, to-wit:

Parcel No. 1:

A parcel of land lying in Lot 2, Block 7, Ewing Addition to the City of Boardman, Section 8, Township 4 North, Range 25 East, W.M., Morrow County, Oregon; the said parcel being described as follows:

Beginning at the southeast corner of said Lot 2; thence west on the south line of said Lot 2, 240.76 feet to the southwest corner of the East half ($E\frac{1}{2}$) of said Lot 2; thence North 0° 24' West, 69.99 feet on the center line of said Lot; thence North 63° 35' 40" East 242.88 feet to the north line of said Lot 2; thence east on said north line 23.71 feet to the northeast corner of said Lot 2; thence south along the east line, 178 feet to the point of beginning, containing 0.716 acre.

(cont.)

Parcel No. 2:

A parcel of land lying in Lot 2, Block 6, Ewing Addition to the City of Boardman, Section 8, Township 4 North, Range 25 East, W.M., Morrow County, Oregon; the said parcel being described as follows:

Beginning at the southwest corner of Lot 2, Block 6, Ewing Addition to the City of Boardman; thence north 178 feet to the northwest corner of said Lot 2; thence east 454.83 feet along the north line of Lot 2; thence South 63° 35' 40" West 400.25 feet to the south line of Lot 2; thence west 96.34 feet to the point of beginning, containing 1.126 acres.

2. That in addition to acquisition of fee simple title to the aforesaid described property, it is necessary that there be acquired or extinguished such interests or rights if any there be, by which rights of access, or any rights in the nature of rights of access, may accrue by virtue of the adjacency of the relocated Columbia River Highway, when constructed upon the aforesaid described parcels of real property, to the remaining lands of the larger tracts, of which the aforesaid-described parcels are parts, and that all access to the aforesaid-described parcels, and the Columbia River Highway to be constructed thereon, from said remaining lands of the larger tracts and all approach or access from said highway to said remaining lands be restricted and prohibited except there shall be reserved unto the owners of the remaining larger tract, of which said parcel No. 1 is a part, right of access to a frontage road to be constructed by the State of Oregon upon said parcel No. 1 and northerly of the main highway, said frontage road to be connected to the main highway only at such point or points as designated by the State of Oregon.

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the ninth day of November, 1950.

EXHIBIT "F-5"

Minutes of November 9 and 10, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the Sullivan Gulch Highway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing, and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation by motor vehicles promoted, highway travel in general safeguarded, and public welfare promoted, it is the judgment of the Commission that the real property hereinafter described is necessary and that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there are needed and required, and are being appropriated for right of way of the Sullivan Gulch Highway, for the purpose of establishing, constructing, and maintaining a throughway, the following-described 18 parcels of land situated in the City of Portland, Multnomah County, Oregon, to-wit:

Parcel No. 1:

All that portion of Block 110, recorded plat of East Portland, now within the corporate limits of the City of Portland, lying south of the O. W. R. R. & N. Co. right of way, execpt west 10 feet owned

by the City of Portland, Resolution No. 19626, 5-14-30, containing 26,725 square feet, more or less.

Parcel No. 2:

All of Lots 1, 2, 3, 4, and 8, Block 113, recorded plat of East Portland, now within the corporate limits of the City of Portland, and that portion of Lots 6 and 7 of said Block 113 lying north of a line which begins at the southwest corner of Lot 6, said Block 113, and runs northeasterly on a straight line to the northeast corner of Lot 7, said Block 113, containing 28,000 square feet, more or less.

Parcel No. 3:

All that portion of Block 151, recorded plat of East Portland, now within the corporate limits of the City of Portland, lying south of the O. W. R. R. & N. Co. right of way, except the east 10 feet of said described tract owned by the City of Portland, Ordinance No. 58074, 2-13-30.

The parcel of land to which this description applies contains 40,230 square feet, more or less.

Parcel No. 4:

That portion of Block 152, recorded plat of East Portland, now within the corporate limits of the City of Portland, described as follows:

Beginning at the northwest corner of said Block 152; thence east on the north line of said Block 152 to a point 75 feet west of the northeast corner of said Block 152; thence southwesterly to a point on the west line 125 feet north of the southwest corner of said Block 152; thence north on said west line to the place of beginning, except the west 10 feet of said described tract owned by the City of Portland, Ordinance No. 58074, 2-13-30.

The parcel of land to which this description applies contains 5,550 square feet more or less.

Parcel No. 5:

All that portion of Block 87, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland, lying south of the O. W. R. R. & N. Co. right of way, containing 28,370 square feet, more or less.

Parcel No. 6:

All that portion of Block 106, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland, lying north of a line described as follows:

(cont.)

EXHIBIT "F-5" (cont.)

Beginning at a point on the west line of said Block 106 that is 30 feet north of the southwest corner of said Block 106; thence northeasterly on a straight line to the northeast corner of Lot 3; thence northeasterly on a straight line to the northeast corner of Lot 7, said Block 106, containing 21,000 square feet, more or less.

Parcel No. 7:

All that portion of Block 105, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland, lying south of the O.W.R.R.& N. Co. right of way, containing 9,840 square feet, more or less.

Parcel No. 8:

All that portion of Block 108, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland, lying south of the O.W.R.R. & N. Co. right of way, containing 39,440 square feet, more or less.

Parcel No. 9:

All that portion of Block 125, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland, lying north of a line which begins at the southwest corner of Lot 2, Block 125 and runs northeasterly on a straight line to a point on the east line of said Block 125, which point is 20 feet south of the northeast corner of said Block 125, containing 12,000 square feet, more or less.

Parcel No. 10:

All those portions of Blocks 143, 144, 149, 150, 162, 163, 170 and 171, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland, that portion of vacated N. E. 13th Ave., that portion of vacated N. E. 14th Ave., that portion of vacated N. E. 15th Ave., that portion of vacated N. E. Oregon Street, that portion of vacated N. E. Pacific Street, and that portion of vacated N. E. Holladay Street lying within a tract of land which is bounded on the west by N. E. 12th Ave., on the east by N. E. 16th Ave., on the north by the O.W.R.R. & N. Co. right of way, and on the south by a line which begins on the west line of said Block 144 at the southwest corner of Lot 2, said Block 144, and runs northeasterly on a straight line to the southwest corner of Lot 1, said Block 170, and said line running thence to the southeast corner of Lot 8, said Block 170, containing 193,200 square feet, more or less.

Parcel No. 11:

A tract of land consisting of Block 182, portions of Blocks 181, 183, 191, and 192, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland, and portions of vacated N. E. Holladay

(cont.)

and vacated N. E. Pacific Streets, and a portion of vacated N. E. 17th Ave., which tract of land is bounded on the west by N. E. 16th Ave., on the north by the O.W.R.R. & N. Co. right of way , on the east by N. E. 18th Ave., and on the south by a line which begins on the east line of N. E. 16th Ave., at a point 27 feet south of the northwest corner of said Block 183 and runs thence northeasterly to the southeast corner of said Block 182; thence northeasterly to the northeast corner of Lot 6, said Block 191, containing 142,300 square feet, more or less.

Parcel No. 12:

Beginning at the southwest corner of Block 152, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland; thence southeasterly to the northeast corner of Lot 1 of Block 162, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland; thence southeasterly to the point of intersection of the south line of Lot 8 of said Block 162 with the northerly right of way line of the O.W.R.R. & N. Co.; thence southwesterly along said right of way line to the south line of Block 151, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland; thence westerly along the southerly line of said Block 151, a distance of 169.50 feet to its intersection with the easterly extension of the southerly line of N. E. Lloyd Blvd.; thence southwesterly along said easterly extension, a distance of 66.24 feet to the southerly line of said N. E. Lloyd Blvd.; thence northeasterly on an 87 foot radius curve left (the chord of which bears North 35° 29' 47" East, 105.40 feet) 113.22 feet to the easterly line of N. E. 13th Ave.; thence North 1° 47' 13" West along said easterly line of N. E. 13th Ave. to the place of beginning, containing 83,500 square feet, more or less.

Parcel No. 13:

All that portion of Block 112, recorded plat of East Portland, now within the corporate limits of the City of Portland, lying south of the O.W.R.R. & N. Co. right of way, containing 8,580 square feet, more or less.

Parcel No. 14:

All that portion of Block 37, Sullivan's Addition to East Portland, now within the corporate limits of the City of Portland, and the vacated portion of N. E. 18th Ave. that lies southerly of the south line of N. E. Holladay Street and northerly of a line which begins on the west line of the T. Sullivan's D. L. C. No. 71, 90 feet south of the south line of N. E. Holladay Street and runs thence northeasterly to the southwest corner of the North half ($N\frac{1}{2}$) of Lot 2 of said Block 37; thence east to a point on the east line of said Block 37, which

(cont.)

point is 75 feet south of the northeast corner thereof, containing 18,400 square feet, more or less.

Parcel No. 15:

All of Lot 1, Block 38, Sullivan's Addition to East Portland, now within the corporate limits of the City of Portland, containing 5,000 square feet, more or less.

Parcel No. 16:

All of Tax Lots 19 and 54 of Section 35, Township 1 North, Range 1 East, which Tax Lots are bounded on the south by the north line of N. E. Holladay Street, on the north by the south line of the O.W.R.R. & N. Co. right of way, on the west by the west line of the T. Sullivan's D. L. C. No. 71, and on the east by the northerly extension of the north and south line running through the center of Block 38 of Sullivan's Addition to East Portland, now within the corporate limits of the City of Portland, containing 7,510 square feet, more or less.

Parcel No. 17:

All of that portion of Block 86, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland, lying south of the O.W.R.R. & N. Co. right of way, containing 518 square feet, more or less.

Parcel No. 18:

All of that portion of Block 109, Holladay's Addition to East Portland, now within the corporate limits of the City of Portland, lying south of the O.W.R.R. & N. Co. right of way, containing 650 square feet, more or less.

2. That, in addition to acquisition of fee simple title to the aforesaid parcels of real property, it is necessary that there be acquired or extinguished such interests or rights, if any there be, by which rights of access or any rights in the nature of rights of access may accrue by virtue of the adjacency of the Sullivan Gulch Highway, when constructed upon the aforesaid-described parcels of real property, to the remaining lands of the larger tracts, of which the aforesaid-described parcels are parts, and other lands in common ownership with and adjacent to the aforesaid-described parcels, and that all access from said highway to be constructed upon the aforesaid-described parcels to said adjacent lands be restricted and prohibited.

3. That the highway facility for which the aforesaid parcels of real property are required and are being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

(cont.)

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said parcels of property as to the compensation to be paid for the taking, including the damages, if any, and, in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcels of real property.

5. That upon the trial of any suit or action instituted to acquire the said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owner.

6. That this resolution be entered in full in the minutes and records of the Commission as of the ninth day of November, 1950.

EXHIBIT "F-6"

Minutes of November 9 and 10, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pendleton-Cold Springs Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate a section of said highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Highway Commission is authorized to take fee title to said real property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way purposes for use in connection with the proper relocation, construction, and maintenance of the Columbia River Highway Junction Section of the Pendleton-Cold Springs Highway the following-described real property, to-wit:

A parcel of land lying in Section 13, Township 5 North, Range 29 East, W. M., Umatilla County, Oregon; the said parcel being that portion of said Section 13 included in a strip of land 40 feet in width, lying on the southerly side of the center line of the Pendleton -Cold Springs Highway as said highway has been relocated, which center line is described as follows:

(cont.)

Beginning in the center of the existing Pendleton-Cold Springs Highway at Engineer's center line Station 40+00, said Station being 2828.85 feet south and 3629.38 feet west of the northeast corner of said Section 13; thence North 83° 51' East 342 feet; thence on a 573.69 foot radius curve left (the long chord of which bears North 75° 10' 30" East) 173.5 feet; thence North 66° 30' East 475.37 feet; thence on a 1432.69 foot radius curve right (the long chord of which bears North 74° 26' 30" East) 397.2 feet; thence North 82° 23' East 1511.04 feet to Station 68+99.11, which Station lies in the center of the existing Pendleton-Cold Springs Highway; also that portion of said Section 13 lying between said strip of land and the existing Pendleton-Cold Springs Highway, containing 3.305 acres, more or less; subject to the rights and interests of the Oregon-Washington Railroad & Navigation Company that now exist and may be acquired by reason of that certain action in eminent domain filed in the Circuit Court of the State of Oregon for the County of Umatilla, entitled Oregon-Washington Railroad & Navigation Company, a corporation, plaintiff, vs. R. W. Richmond and Elsie L. Richmond, defendants, case number 5854, for acquisition of right of way for the relocation and construction of the main tracks of Oregon-Washington Railroad & Navigation Company in and to a strip of land 200 feet in width over and across said parcel above described, as said strip of land is described in the complaint in said action.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the ninth day of November, 1950.

		Special State Tax Street Fund Program.
		Curry County. Port Orford. C. W. Smith claims damages.
		Legislative bill re contractors developing county roads.
17759		Washington County. Tualatin Valley Hwy. Porposed Baseline Road.
		Union County. Alicel-Lower Cove Road.
		Portland. Improvement of Pacific Hwy. at Portland Stockyards.
		Linn County request that county road be designated as a state secdy. hwy.
		Meeting recessed at 12:00 noon to reconvene at 2:00 p.m.
		Hood River County. City of Hood River. Delegation urges better connections to new Columbia River Hwy. Action deferred.
17760		Hood River County. Dee. Improvement of bridge on county road.
		Union County. Old Oregon Trail. Ladd Canyon Section. R/w settlement with A. J. McCall approved.
		Douglas County. Elkton-Sutherlin Secdy. Hwy. Delegation urges improvement. No commitment.
17761		Award of contracts. Commissioner Reynolds makes public announcement.
17762		Salem. Off-street parking on US99E. Land not to be acquired by the State.
17763		Harney County. Delegation urges improvement to Rome-Princeton Secdy. Hwy. No commitment.
		Multnomah County. Sandy River Bridge at Troutdale. Alger's and
17764		Hibbard's claim for damages due to faulty bridge rail denied.
		Curry County. Oregon Coast Hwy. Brookings. Elmer Bankus requests return of r/w to him. Action deferred.
17765		Curry County. Oregon Coast Hwy. Brookings. Bankus proposes exchange of land. Action deferred.
		Signs. Oregon Roadside Council and Garden Clubs urge prohibition of roadside advertising. Urge support of Senate Bill No.94. Commission declines administration of proposed law.
17766		Trucks on city streets. Legality of city action designating certain streets. No action.
		Commission meeting date set for April 12 and 13, 1951.
		Agreements and other papers signed.
17769		EXHIBIT "A". Real property options.
17798		EXHIBIT "B". US99. Goshen. Survey adopted.
17800		EXHIBIT "C". State Tax Street Funds. Apportionment on 1951 population.
17807		EXHIBIT "D". State Tax Street Funds
17808		EXHIBIT "E". State Tax Street Funds
17810		EXHIBIT "F". Contracts completed and accepted
17812		EXHIBIT "G". Reduced load limits
17814		EXHIBIT "H". US99W. No parking south of Corvallis
17816		EXHIBIT "I". Wilson River Hwy. Reduced speed zone
17818		EXHIBIT "J". US99W. Reduced speed zone
17820		EXHIBIT "K". Condemnation. Banfield Expressway

Portland, Oregon
December 19, 1950

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
C. H. Armstrong, Parks Superintendent
M. H. Hawke, Auditor
H. B. Glaisyer, Secretary.

Commissioner McIver was excused from attendance at this meeting.

Bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, following which Chairman Chandler announced that the awards of contracts would be made at 3:00 p.m.:

SUNSET HIGHWAY IN CLATSOP AND WASHINGTON COUNTIES

ELSIE-SUNSET TUNNEL ROCK PRODUCTION PROJECT

A. H. Saxton & Sons, Corvallis	$ 47,985.00
G. D. Dennis & Sons, Portland	48,975.00
Jed Wilson, Seaside	50,325.00
E. C. Hall Co., Portland	54,475.50
J. N. & M. J. Conley, Portland	55,140.00
Heavy Hauling Co., Astoria	55,290.00
Newport Constr. Co., Portland	61,563.00
P. B. Doherty & Son, Portland *	61,681.50
Rogers Constr. Co., Portland	64,425.00

* Bidder will accept only one project.

WASCO-HEPPNER HIGHWAY IN GILLIAM COUNTY

EAST COTTONWOOD CANYON-YORK RANCH SECTION

Rush Constr. Co., Enterprise	$ 74,567.00
Vernie Jarl, Gresham	75,090.00
Rogers Constr. Co., Portland	77,980.00
J. N. & M. J. Conley, Portland	78,678.00
A. H. Saxton & Sons, Corvallis	85,036.50
E. H. Itschner Co., Molalla *	87,045.50
E. C. Hall Co., Portland	87,944.50

East Cottonwood Canyon-York Ranch Section of Wasco-Heppner Highway (cont.)

Newport Constr. Co., Portland	$ 88,910.00
M. L. & C. R. O'Neil, Creswell	92,705.50
Rex C. Ayers Constr. Co., Portland	96,031.00
T. W. Thomas, Portland	99,470.50
P. B. Doherty & Son, Portland *	101,999.40

* Bidder will accept only one project.

JOHN DAY HIGHWAY IN GRANT AND WHEELER COUNTIES

SERVICE CREEK-MT. VERNON ROCK PRODUCTION PROJECT

E. C. Hall Co., Portland	$ 56,657.00
Rogers Constr. Co., Portland	58,795.00
Oscar E. Joelson, Eugene	59,469.00
Vernie Jarl, Gresham	60,736.00
A. H. Saxton & Sons, Corvallis	60,933.00
Rush Constr. Co., Enterprise	63,071.00
E. H. Itschner Co., Molalla *	70,767.80
Newport Constr. Co., Portland	79,747.40

* Bidder will accept only one project.

SAMS VALLEY SECONDARY HIGHWAY IN JACKSON COUNTY

SAMS CREEK-SNIDER CREEK SECTION

R. A. Heintz Constr. Co., Portland	$180,864.00
Stevenson Constr. Co., Salem	188,239.00
F. L. Somers, Klamath Falls	197,245.50
Durbin Bros., Eugene	206,795.50
M. L. & C. R. O'Neil, Creswell	207,562.00
E. C. Hall Co., Portland	209,961.50
Rogers Constr. Co., Portland	215,716.00
Leonard & Slate Ore. Ltd., Portland	218,933.00
K. F. Jacobsen Co., Portland	221,598.00
J. E. & M. J. Conley, Portland	222,801.00
G. D. Dennis & Sons, Portland	227,859.50
Floyd Grahm Constr. Co., Lebanon	229,695.00

HOLLAND LOOP COUNTY ROAD IN JOSEPHINE COUNTY

HOLLAND LOOP SECTION NEAR GRANTS PASS

R & M Construction Co., Central Point	$130,041.50
Loyd Calkins Co., Ocean Lake	145,885.00
C. J. Eldon, Portland	147,215.00
Tom Lillebo, Reedsport	162,908.00

December 19, 1950

THE DALLES-CALIFORNIA, EAST DIAMOND LAKE SECONDARY AND WILLAMETTE HIGHWAYS
KLAMATH COUNTY
CHEMULT ROCK PRODUCTION PROJECT

M. C. Lininger & Sons, Medford	$ 43,625.00
Rogers Constr. Co., Portland	46,750.00
Peter Kiewit Sons, Longview, Wn.	51,500.00
A. H. Saxton & Sons, Corvallis	52,250.00
E. C. Hall Co., Portland	58,750.00
F. L. Somers, Klamath Falls	58,750.00
J. N. & M. J. Conley, Portland	72,500.00
F. H. McEwen, Eugene	74,250.00
Newport Constr. Co., Portland	90,500.00

HEPPNER HIGHWAY IN MORROW COUNTY

HEPPNER (MAY STREET-HEPPNER SCHOOL) SECTION

G. D. Dennis & Sons, Portland	$ 17,727.00
Arthur Simonsen, Baker	18,632.00
Russell Olsen Constr. Co., Pendleton	18,730.00
Rex C. Ayers, Constr. Co., Portland	18,870.00
I. H. Peters, Eugene	20,905.00

The State Parks Superintendent reported on the following park matters:

1. Offer of Pacific Power and Light Company to donate an area for a park near Wallowa Lake: The Parks Superintendent advised that this area is a nice picnic spot located about a mile from the Wallowa Lake Park Lodge. It was the feeling of the Commission that the area is too close to the present park to be of any particular advantage, in view of which the offer was declined. The Parks Superintendent was instructed to thank the Power Company for the offer.

2. Acceptance of deeds from Tillamook County for 853 acres of land along the Wilson River Highway: The Parks Superintendent explained that when the right of way for this highway was acquired through the holdings of the Weyerhaeuser Timber Company, the Company deeded the 853 acres to Tillamook County without charge, it being understood that the county, later on, would reconvey the property to the State when the highway was completed. The matter, he said, was inadvertently overlooked until recently, when it was called to the attention of the County Court, which immediately executed deeds conveying the property to the State. He exhibited a map showing the location of the property in Sections 8, 9, 16, 17, 18 and 19, Township 1 North, Range 7 West, and in Section 25, Township 1 North, Range 8 West, W.M., and he pointed out that pursuant to action taken by the Commission some time ago, a portion of the property beyond the limits of a 400 foot right of way strip will be deeded to the

State Forestry Department for reforestation purposes. He recommended acceptance of the deeds by the Commission. The Commission accepted the deeds unanimously and instructed the Parks Superintendent to thank the County for the gift.

3. Result of receiving bids at Salem on December 4, for purchase of dead timber along the Sunset and Salmon River Highways: The Parks Superintendent presented a tabulation of the bids received as follows:

Sunset Highway Timber

Area No. 1. Sec. 31, T. 4N., R.5W., S 1/2 SE 1/4, SE 1/4 SW 1/4

1. G. C. Coe, Forest Grove	$ 8.05 M-FBM
2. Ben D. Olson, Seaside	7.15 M-FBM
3. Angelo DeRoia, Vernonia	5.00 M-FBM

Area No. 2 Sec. 5, T.3N., R.5W., S 1/2 SW 1/4

1. F. C. Hathaway, Seaside	9.75 M-FBM
2. Angelo DeRoia, Vernonia	5.00 M-FBM
3. G. C. Coe, Forest Grove	2.05 M-FBM

Salmon River Highway Timber

Area No. 3. Secs. 11, 14, 15, T.6S., R.9W.

1. Coastal Lumber Company, Grande Ronde	6.10 M-FBM
2. Angelo DeRoia, Vernonia	2.00 M-FBM

He advised that the State Forester has been charging $1.00 per M-FBM for logs of similar grade and recommended acceptance of the high offers shown on the bid tabulation. The Commission unanimously approved the recommendation.

4. Application of Kerber Brothers, Gold Beach, for permission to construct and operate a logging roadway across Cape Sebastian State Park in Curry County: The Parks Superintendent advised that Kerber Brothers own land adjoining Cape Sebastian Park, access to which is only afforded across a corner of the Park. Such crossing, he said, will not act to the detriment of the park, and he recommended approval of the application. The Commission approved the granting of a revocable permit to Kerber Brothers containing provision for immediate cancellation of the permit if their loads are not kept within prescribed weight limits.

In this connection the Parks Superintendent reported an offer from Kerber Brothers to purchase, at the rate of $8.00 per M-FBM, about 30 M-FBM

of state-owned timber which was felled during construction of a power line across the park. He recommended acceptance of the offer which, he said, is above the market value of the logs. The Commission adopted the recommendation unanimously.

5. Leasing of Federal lands for recreational purposes: The Parks Superintendent advised that presently the state is leasing from the federal government certain lands that are being used for recreational purposes and for which a rental charge is being paid. The suggestion has been made by the U. S. Bureau of Land Management, he said, that rental on a number of the properties can be eliminated were they set aside by executive order for park and recreational use, which would not lessen the state's control of the properties nor prevent development by the state as it desired. He cited a few instances where the State is now paying rental, and he recommended that these properties, and others that are eligible, be acquired on the withdrawal basis as suggested by the Bureau. The Commission approved the recommendation.

6. Proposed park in Ladd Canyon, Union County: The Parks Superintendent reported an offer from Mr. Kenneth L. Brown, La Grande, to deed to the State for park purposes, a small tract situate adjacent to the new location of the Old Oregon Trail in Ladd Canyon, which he want named McCall Memorial Park. The property, he said, is located at the junction of two canyons in Section 14, Township 4 South, Range 38 East, W.M., and consists of one acre of land on a steep hillside which is hard to reach. He pointed out that he has plans to develop another area about 3/4 mile north of Mr. Brown's site, in view of which he questioned the advisability of accepting Mr. Brown's gift. The Commission deferred action on the matter pending investigation by Commissioner Reynolds.

7. Designation of State Parks as game refuges: The Parks Superintendent reported that for a number of years it has been thought that all state parks are legally designated game refuges and that the areas were protected from hunting by law; however, according to advice recently received from the State Police, that is not the case and existing laws do not give the police authority to make arrests within the park areas under the control of the state, but is limited to those under control of cities. He suggested that action of some kind should be taken to prohibit the use of fire arms in state parks because of the hazards to patrons of the parks. The Chief Counsel advised that in order to give the State Police definite authority to make arrests for hunting violations, it would be necessary to amend the law to clarify its application to state parks. He was instructed by the Commission to prepare an appropriate amendment for adoption by the 1951 legislature.

8. Application of Robert W. Burns, Yachats, to truck-haul logs across Muriel O. Ponsler State Park in Douglas County: The Parks Superintendent advised that Mr. Burns wants to salvage stray logs that have accumulated on the beach from sea-going rafts. He recommended that the application be denied because the hauling of the logs through the park would be extremely harmful to it, and because it is possible for Mr.Burns

to arrange to truck-haul them across adjoining privately owned property. The Commission approved the recommendation unanimously.

9. Claim of Mrs. Fairweather who was injured in Silver Falls State Park: The Parks Superintendent reported that Mrs. Fairweather claims she was injured by a board falling from one of the open air kitchens. The board, he said, apparently came loose from its original position by reason of shrinkage. He questioned that the State is liable for damages. Action on this matter was deferred pending a study of the case by the Chief Counsel and report at the next meeting.

10. Agreement with David C. Shaw for grazing sheep in Cape Sebastian State Park: The Parks Superintendent recalled that the Commission at its meeting on May 25, 1950, authorized this agreement with Mr. Shaw and the matter now before the Commission is simply approval of the provisions of the agreement. The Commission approved the agreement unanimously. (The agreement was signed later in the session.)

11. Dangerous trees along the Wilson River Highway: The Parks Superintendent reported that at a location about two miles west of the summit of the Coast Range, there are between 40 and 50 trees scattered on a steep sidehill which are a menace to highway traffic in that they may fall at any time. He gave as his feeling that they should be removed and requested authority to advertise them for sale. The Commission approved the recommendation unanimously with the stipulation that the successful bidder shall be required to furnish a bond and insurance to take care of possible damage to the highway and to protect the Commission in case of injury to the public.

In this connection Chairman Chandler pointed out that a similar condition exists along the Oregon Coast Highway in Coos and Curry Counties and along other state highways. He gave as his feeling that dangerous trees along all state highways should be removed. The Chief Counsel advised that if the Commission has knowledge of trees that constitute a hazard to traffic and does not cause them to be removed, then the Commission can be held liable for damage or injury that may occur should the trees fall. As a result of discussion the Engineer was instructed to make a state-wide check for dangerous trees along state highway rights of way and to remove the trees if he deems that necessary.

The Parks Superintendent brought up the matter of retaining the services of Mr. S. H. Boardman, retired Parks Superintendent. He recalled that Mr. Boardman had been hired by the Commission in an advisory capacity following his retirement, and that he had put in the maximum time of 600 hours allowed under the retirement law for the year ending June 30, 1951. Mr. Boardman, he stated, has offered to continue his services in an advisory capacity without compensation until July 1, 1951, when he will again be eligible for another 600 hours of employment. He recommended that Mr. Boardman's offer be accepted and that he be re-employed again after July 1, 1951, with pay. The Commission approved the recommendation and instructed the Parks Superintendent to convey the information to Mr. Boardman, and also to convey to him the good wishes of the Commission.

The Right of Way Engineer presented a list of options for acquisition of real property that is needed for various highway improvements throughout the state, and he explained details. After careful consideration of the individual items, the Commission authorized closure on options at the purchase prices mentioned therein. The attached resolution in regard thereto marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

In discussing acquisition of real property, the Right of Way Engineer pointed out that for the Cedar Point-Coquille Section of the Oregon Coast Highway, on which bids are to be received December 20, options on only 11 out of 57 parcels have been secured to date. Four right of way agents, he said, are working on this job and if difficulties are not encountered, acquisition should be completed in about three weeks. The Commission instructed the Engineer to notify the successful bidder on this job that award of the contract would be held up for about 30 days. The Chief Counsel was authorized to institute condemnation proceedings to acquire any of these properties if necessary.

The Right of Way Engineer requested instructions regarding a settlement with a Mr. John S. Day for right of way needed for the Gold Hill-Snider Creek Section of the Sams Valley Highway. He said that Mr. Day demands an 80-foot entrance to his property and the privilege of planting certain low-growing shrubs on state highway right of way at this entrance, for beautification purposes, which is contrary to the usual practice in such matters. Action was deferred by the Commission for the time being and the Right of Way Engineer was instructed to contact Mr. Day to determine if he would recede from his request. (On the following day the Right of Way Engineer reported that he had contacted Mr. Day who remains adamant in his demands. Concerning the details of Mr. Day's request, he stated that the right of way at this location is one hundred feet wide and that the bushes to be planted would be at least 20 feet from the roadway. The planting of certain low-growing shrubs, he said, would not be detrimental to the highway interests, but the controversy concerns the Commission's policy with respect to allowing planting on state highway rights of way. The Engineer recommended that Mr. Day's request be granted with the understanding that legal action be taken to remove the shrubs later on if the arrangement does not prove satisfactory. The Chief Counsel advised that there is a provision in the Oregon Laws which allows private plantings on public property. The Commission approved the Engineer's recommendation.)

The Chief Counsel requested authority to institute condemnation proceedings to acquire right of way for a number of highway projects which he has been unable to acquire by negotiation. He submitted a list of the properties and the offer that he recommended for each as follows:

		Recommended Offer
Salem-West Salem Section of the Salem-Dallas Highway		
R 16386 Gilbert A. Lieser	(Right of Way)	
1500 sq. ft. at 40¢	$ 600.00	
0.0575 acre at $1,000.00	57.50	
	$ 657.50	$ 675.00

(cont.)

Recommendations for Condemnation (cont.)

		Recommended Offer
Salem-West Salem Section of the Salem-Dallas Highway (cont.)		
R 16387 A. L. Cummins, et ux. 1400 sq. ft. at 40¢ 0.0575 acre at $1,000.00	(Right of Way) $ 560.00 57.50 $ 617.50	$ 650.00
R 16384 Karl Heyden, et al. 1500 sq. ft. at 40¢ 0.0575 acre at $1,000.00	(Right of Way) $ 600.00 57.50 $ 657.50	$ 675.00
Unit #4 Section of the T. H. Banfield Expressway		
R 14876 Bessie Brudwig Two 25' x 100' lots	(Right of Way) $ 400.00	$ 800.00
R 14875 Joseph Trail Land: 9400 sq. ft. at $0.10 Allowance of shrubs and trees House: 748 sq. ft. at $7.00 Allowance for glassed-in porch	(Right of Way) $ 940.00 374.00 5,236.00 132.00 $ 6,682.00	$ 8,000.00
Unit #5 Section of the T. H. Banfield Expressway		
R 15502 Perry A. Jorgensen, et ux. 0.39 acre at $2,300	(Right of Way) $ 897.00	$ 900.00
Sylvan Section of the Sunset Highway		
R 15139 R 15140 Helen M. Lovin Land (1.36 acre) 58,242 sq. ft. at 45¢ per sq. ft. 2.0 acres at $7,500.00 per acre Service Station Tavern and Restaurant 2-story dwelling 1230 sq. ft. at $2.	(Right of Way) $26,208.90 15,000.00 12,000.00 5,000.00 2,460.00 $60,668.90	$61,000.00

As a result of discussion, the Commission approved the request by the adoption of the attached resolutions relative thereto marked EXHIBITS "B-1", "B-2" and "B-3", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Right of Way Engineer reported the following sales of miscellaneous properties and requested confirmation of the same by the Commission:

Item	Former Owner and Location	Purchaser	Sale Price
Youngstown Kitchen Sink	L. D. Gordon Steel Bridge-Broadway Bridge Pacific Hwy.	W. A. Reeves Salem	$ 100.00
2 windows - 26 x 28	Nemic Auto Court Canyonville-Johns Section, Pacific Hwy.	A.W.Rockafellow Salem	3.00
Small residence and 9 cabins.	Anna Steiner, Dodson-Bonneville Section Columbia River Hwy.	C. B. Burt 2035 SE 82nd St., Portland	365.00
30-gal.gas heater, Youngstown sink, oil burner.	L. D. Gordan,Cherry St.-Steel Bridge, Pacific Hwy. West, 1081 N.Crosby Street	Sullivan Wrecking Co. Portland	122.80
G. E. Water heater, oil burner.	Rose Kehrli, Cherry St.-Steel Bridge, Pacific Hwy. West 1079 N.Crosby Street	Sullivan Wrecking Co. Portland	111.86
Residence Building	Harry J. Goldhammer Cherry St.-Steel Bridge, Pacific Hwy. West, 362 N.McMillan	Sullivan Wrecking Co. Portland	57.50
Residence Building	Maren Nielsen, Cherry St.-Steel Bridge, Pacific Hwy. West. 309 N.Halsey St.	Gordon R. Gemmell 12807 SE Lincoln Portland	564.00
Cabin	T. W. McFadden Canyonville Section Pacific Highway	L. G. Carnes Canyonville	20.50
Residence Building	South Umpqua Rod and Gun Club, Canyonville(Son, Salem Section, Pacific Hwy.	Roy L. Houck &	501.50
Residence Building	Homer Radford,Canyonville Section,Pacific(Son, Salem Hwy.	Roy L. Houck &	101.50

Item	Former Owner and Location	Purchaser	Sale Price
"Prosperity" gas house range.	Pioneer Auto Court Canyonville Section Pacific Hwy.	Craig Coyner, Jr. Bend	$ 40.00
Rayoil oil burner	Rose Kehrli, Cherry St.-Steel Bridge Pacific Hwy. West	E. F. Halik	50.00
Residence Building	Bruce W. Wheeler Cascade Locks-Viento Section, Columbia River Hwy.	C. B. Burt 2035 SE 82nd Portland	50.00
Residence Building	Clara B. Smith Stout Creek-Mehama Section, North Santiam Hwy.	Cosmo Gilo Mehama	150.00
Factory Building	Big Lake Box Co. South 6th Street Klamath Falls	West-Hitchcock Corporation Klamath Falls	525.00
Building	State Land Board Necanicum Junction Oregon Coast Hwy.	G. Harms Hamlet Route Seaside	35.00
Factory Building	Nanny Lindstrom Sullivan Gulch Sec. Unit #4, NE corner 74th & E. Broadway Portland	Matheny & Bacon, Inc. 8905 N. Vancouver Portland 11, Ore.	164.30
Residence Building	Oren E. Small Mehama-Stout Creek Section, North Santiam Hwy.	Oren C. Small Mehama	425.00
Residence Building	Cora Berry Mehama-Stout Creek Section, North Santiam Hwy.	Fred A. & Carl H. Lindemann Lyons, Oregon	200.00
Residence Building	Mrs. Raymond Robertson) Mehama-Stout Creek Section, North Santiam Hwy.	A. W. Bellin Mehama	261.00

The Commission unanimously confirmed the sales as reported.

December 19, 1950

The Chief Counsel presented for the Commission's approval a form of permit allowing two buildings belonging to Morris Rubenstein to encroach slightly over the right of way of the Oregon Coast Highway in the City of Coos Bay. He recalled that the encroachment was authorized by the Commission at its meeting on October 26 and the permit has been prepared in conformity with instructions given at that time. He recommended execution of the form as prepared. The Commission approved the recommendation. (The permit was signed later in the day.)

The Chief Counsel also presented for the Commission's consideration a proposed agreement with the Southern Pacific Company covering an exchange of properties in connection with the Front Street Project on the Oregon Coast Highway in Coos Bay. He recalled that on May 26, 1950, the Commission authorized payment of $63,000 to the Railroad Company in connection with this matter, whereas the agreement provides for payment of a lesser sum of $60,335. He also said that the engineering and construction features contained in the agreement have been discussed with the Engineer who advises that they are all being taken care of. He recommended approval of the agreement as prepared. The Commission accepted the Chief Counsel's recommendation. (The agreement was signed later in the day.)

The Commission considered an easement agreement with the Union Oil Company pertaining to re-establishment of a previous easement concerning right of way in the city of Coos Bay, which had been relinquished. The Chief Counsel explained that the Company some time previously approved relinquishment of the original easement but recently had a change of mind and now wants it reinstated. The matter, he said, has been fully investigated and reinstatement of the easement will not have any adverse effects. He recommended that the original easement be restored. The Commission approved the recommendation. (The agreement was signed later in the day.)

The Assistant Counsel, Mr. J. W. DeSouza, presented a report concerning the renewal of agreements with the National Hospital Association and the Oregon Physicians Service providing for medical and hospital benefits to State Highway employees. He recalled that renewal of these agreements was considered by the Commission at its last meeting but action was deferred to consider possible changes in the previous agreements. He outlined briefly the major changes involved, advising that Oregon Physicians Service had eliminated most dental services but had modified the one-year continuous coverage clause to allow twelve months continuous medical care or twelve months intermittently over a period of three years. The National Hospital Association, he said, now requires employees to pay for the first medical call in any one illness and has raised its service charge from $3.50 to $4.00 per month. He also said that this company has extended its continuous coverage clause from one to two years and its hospital care clause from six months to nine months; also that employees are given until January 31, 1951 to decide whether or not they wish to continue the service. He recommended approval of the revised contracts. The Commission adopted the recommendation unanimously and ordered a copy of the agreements sent to each employee with an explanatory letter for his information in reaching his decision.

The Engineer presented a report showing the status of completion of survey projects, heretofore authorized by the Commission for state primary and secondary highway improvements, as of December 15, 1950. The Commission took no action on this report.

The Engineer requested confirmation of verbal authority heretofore given him by the Commission to conduct snow removal operations on the Cooper Spur Road for the benefit of winter sports enthusiasts of Hood River County. He recalled that the local Ski Association is cooperating in the project and that the estimated cost to the state for this winter's operation is $1,000. The Commission approved the project unanimously.

The Commission discussed a report by the Engineer on a request from the city council of Delake for the Commission's approval to the City constructing a public restroom on state highway right of way at the south end of "D" River Bridge on the Oregon Coast Highway in Delake. The Engineer advised that the proposed location is between the highway and ocean shore where a restroom would materially detract from the ocean view; moreover, it would cause traffic congestion at the bridge end and would create a pedestrian traffic hazard. He pointed out that the City also wants the Highway Commission to assume a portion of the cost of construction but the City will maintain the facility. It was his thought that were the Commission to cooperate in this installation, a precedent would be established that would be difficult to avoid in passing on like requests of other communities, and he recommended that both requests be denied. The Commission approved the recommendation.

The Engineer presented a report on the cost to oil a one and one-half-mile section of the Fox Hollow Secondary Highway south of Eugene, heretofore requested by a delegation from that district. He said that this highway is either paved or oiled from its connection with the Pacific Highway in Eugene to a point just outside the south limits of Eugene, but from that point southerly the road is gravel-surfaced which is difficult to maintain during the winter season and dusty in summer. The 2.22 mile section immediately south of the paved portion, he said, serves about fifty families and the average daily traffic is approximately 350 vehicles. He estimated the cost to improve this 2.22 mile section at $45,000 and suggested, if the Commission desires, the transfer of such sum from the $320,000 tentatively allotted to the Territorial Highway in the same county. The Commission deferred its decision pending adoption of a program for Secondary Highway funds.

The Engineer reported the results of investigations with regard to the routing of logging trucks on the Pacific Highway East in Gladstone, Clackamas County, pursuant to instructions from the Commission at the previous meeting when a delegation appeared concerning the subject. He said that the city officials were consulted and a joint inspection was made of the premises which resulted in a solution of the problem in the following manner, subject to the Commission's approval:

(1) Installation of a "Stop and Go" automatic traffic signal at the intersection of Arlington Street and US99E at an estimated cost of $3,000, fifty percent of which will be paid by the State and fifty percent by the

City; $500 of the City's share is to be paid when the installation is completed and the balance by assignment of a portion of the money that the City will receive from the State on or after July 1, 1951, from the State Tax Street Fund account.

(2) The State shall widen the pavement on the curve at the intersection of River Road and US99E so as to facilitate movement of loaded logging trucks at this place.

(3) The State shall widen the pavement on River Road to a 24-foot width for a distance of about 976 feet northerly from River Road intersection with US99E, provided the City will request such an improvement as a State Tax Street Fund project.

The Engineer estimated the cost to do the widening work at about $6,000, all of which, he said, would be paid from the State Tax Street Fund account. He recommended approval of the arrangement. This matter was discussed at some length and as a result, the Commission approved the project on the basis outlined by the Engineer, as a traffic safety proposition, and ordered that it be covered by written agreement between the City and the State.

The Commission considered a request from the City of Seaside for widening the pavement on Holladay Drive (Oregon Coast Highway) between "A" Avenue and "K" Avenue, in Seaside. The Engineer recalled that this matter has been before the Commission on several occasions in the past and each time the request was denied because of the possibilities of re-routing the highway along Roosevelt Drive, about a block east of Holladay Drive. He recommended that the request again be denied for the same reason. The Commission approved the recommendation.

A communication from the Glenwood Businessmen's Association in Eugene, recommending an engineering investigation to determine the feasibility and cost of controlling flood waters between Eugene and Springfield, had the attention of the Commission. The Commission considered that this matter is not a proper one for the Highway Department because it is without authority to act, but rightfully belongs to United States Army Engineers. The communication was ordered filed.

The Commission considered a request from the Tillamook County Court for reconstruction of two bridges on the County's "farm to market road" system, particularly the Johnson Bridge over the Trask River, which the Court states requires a new approach to the main span and redecking of the structure, and the Daugherty Slough Bridge on the Maple Leaf Road, which requires replacement. The Court asked that these two projects be given preference over the Pelz Corner-Trask River Road reconstruction project, heretofore recommended for the next secondary Federal Aid Program in Tillamook County. The Engineer estimated the cost of the requested improvements at approximately $87,000, and he suggested that the projects be considered in formulating the next secondary highway construction program. The Commission deferred a decision pending discussion with the County Court which was scheduled to be present on the following day. (The delegation did not appear.)

A request from Jewell Grange No. 876 for improvements to the Fish Hawk Falls county road between Elsie and Jewell, to provide uninterrupted travel during flood periods, was considered by the Commission. The Engineer recalled that a similar request previously had been received and denied by the Commission because the volume of travel on this road did not warrant the expenditure of funds required to raise the grade above flood waters, and because there are other sections on more important highways which are subject to similar flooding and should be given priority consideration. He pointed out that the road is a county road and is being maintained by the state only until such time as the Fish Hawk Falls Secondary State Highway is constructed, and that the state is under no obligation to provide betterments. He recommended that the request be again denied. The Chief Counsel read aloud provisions from the Commission's agreement with the County outlining the State's responsibility in connection with the road. W. W. Stiffler, Assistant Highway Engineer, advised that daily traffic over the road consists of approximately 250 vehicles and that the road has been and now is being maintained very adequately for the traffic which uses it. The Commission unanimously approved the Engineer's recommendation.

The Commission discussed and ordered filed for future consideration at the proper time, a communication from the Oregon Coast Association, containing a digest of resolutions that were adopted by the Association at its last annual convention, as follows:

(1) Approval of a $75,000,000 revenue bond issue to be funded over a three-year period from gas tax revenue, the money to be used for highway construction;

(2) That all points on the highway system which are being flooded periodically be raised, and specifically, the section north of the Kilchis River in Tillamook County;

(3) That the Oregon Coast Highway be realigned between Bay City and Garabaldi;

(4) That signs indicating local points of interest be maintained along the Oregon Coast Highway;

(5) That the Astoria-Warrenton section of the Oregon Coast Highway be improved at an early date.

The Engineer reported on a proposed connection between the T.H. Banfield Expressway and the Steel Bridge, in Portland. An investigation, he said, indicates that a connection from the Expressway at approximately 3rd Avenue can be made into existing city streets at Glisan Street. He exhibited a map showing in color the proposed plan which he estimated will cost about $275,000. The plan, he said, is quite reasonable and the benefits will be material. He also said that Commissioner McIver favors it. He recommended that the project be included in the over-all plan for this expressway and that authority be given to make necessary surveys and to negotiate necessary right of way. The Commission approved the recommendation.

The Engineer requested approval of an increase of $8,000 in the project authorization for construction of the McCord Creek bridge project on the Dodson-Bonneville section of the Columbia River Highway, in Multnomah County. He explained that the additional amount is required to pay for construction of a retaining wall and to take care of a number of small unanticipated over-runs. The Commission approved the Engineer's request unanimously.

The Commission considered and denied a request from the City of Seaside for assistance in removing sand from the ocean beach adjacent to the city, it being the opinion of the Commission that it has no responsibility in the matter, and there being a question as to the Commission's authority to spend state highway funds for such purpose which is not of general public interest.

The Commission considered a request from the Ontario Chamber of Commerce that action be taken to eliminate the cause of accidents on the Snake River Bridge at Ontario. They suggested the placing of reduced speed signs on the bridge and also construction of a traffic divider along the center of the bridge. The Engineer advised that this matter has been investigated by the Traffic Engineer in company with the Traffic Engineer of the State of Idaho, inasmuch as the bridge lies partially in both states; and it has been determined that the traffic divider, as suggested, is impractical due to the narrowness of the structure, although the volume of traffic does warrant a reduction in speed. He recommended that the request for the divider be denied, that the maximum speed of vehicles crossing the structure be limited to 25 miles per hour, and that "Narrow Bridge" signs be maintained at each end of the bridge. He also said that his recommendations carry the concurrence of Mr. E. L. Mathes, Traffic Engineer for the Idaho Department of Highways. The Commission unanimously approved the Engineer's recommendations, and thereupon adopted the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer presented a request from the Union Pacific Railroad Company for State aid in correcting a drainage condition along the newly constructed section of the Columbia River Highway just east of Bridal Veil, in Multnomah County. He explained that the highway fill at this point was constructed on marshy land adjacent to a railroad fill, and apparently has compressed the underlying soil to the extent that the railroad road bed does not drain properly. It is quite apparent, he said, that the condition was caused by the highway construction, wherefore he recommended approval of an expenditure of state highway funds for corrective measures. The State's share of the expense, he said, will be $2,197, which is about one-half of the total cost of the project. He recommended approval of the expenditure. The Commission approved the recommendation.

The Commission considered an agreement with Josephine County providing for the financing of construction of bridges and grading on the Holland Loop County Road, (Federal Aid Secondary Highway No. 267.) The Engineer recalled that the Commission previously authorized the bridge construction on the condition that the county would do the grading work; however, the County Court now advises that it is unable to finance the necessary grading because of heavy expense to repair county roads that were damaged by severe storms, but is willing to assign to the State Highway Department a sufficient amount of the next monies

due the County from State Highway revenues to pay the grading expense if the Highway Commission will perform the work. The Engineer estimated the cost of the County's share at $23,140 and recommended approval of the arrangement. He presented a form of agreement with the County covering the matter previously executed by the County. The Commission approved the recommendation unanimously. (The agreement was signed by the Commission later in the session.)

The Commission also considered and approved an agreement with Josephine County providing for the maintainance of the Holland Loop County Road by the County after construction is completed. (This agreement was also signed by the Commission later in the session.)

The meeting recessed at 12:00 noon for luncheon and reconvened in the same room at 2:00 p.m. with the same persons present and participating.

The Engineer requested authority to construct a service station building at the Salem Shops at an estimated cost of $25,000. He said that the building is badly needed to provide adequate facilities for servicing and washing equipment, and that the plan calls for a fire-proof, reinforced concrete structure 106 feet by 36 feet in dimension. He pointed out that this building was anticipated when the 1951 Budget was prepared and $15,000 was set up for it; however, because of a change in the plans, an additional $10,000 is required which is available from the unexpended balance in the 1950 Budget for construction of buildings and improvements. The Commission approved the request unanimously.

The Commission considered and denied requests from the Lake County Examiner-Tribune and the Kelly Creek Parent-Teachers Association of Lakeview for footpath construction along US395 south of Lakeview, between New Pine Creek and Kelly School, a distance of one-half mile. The Commission's action was based on a report by the Engineer to the effect that the traffic volume on this section of highway is not sufficient to warrant construction of the footpath.

The Commission considered renewal of an agreement with the City of Portland whereby the State furnishes to the City certain information concerning traffic accidents and analysis thereof. The Engineer advised that the agreement has been in effect for a number of years, being renewed annually, and contains provision that the City of Portland shall pay to the State $200.00 per month for the data furnished. The information gathered, he said, is beneficial not only to the City but also to the State, and it is desirable to continue it if the City will agree to pay $300 per month to take care of increased costs. He recommended renewal of the agreement on such basis and that it be prepared for a three-year term rather than on an annual basis. The Commission approved the recommendation unanimously.

The Engineer reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of State Tax Street Funds that accrued to them during the second half of the year 1950, and that the plans for the improvements contemplated with such funds have been examined and found satisfactory:

State Tax Street Funds (cont.)

Amity	$2,187.47	Jefferson	$2,131.93
Arlington	1,878.94	Malin	1,650.63
Butte Falls	1,045.91	Monument	364.06
Carlton	2,974.22	North Powder	1,160.07
Coburg	2,017.78	Rockaway	2,937.19
Condon	2,832.29	Sherwood	1,737.02
Cornelius	2,409.61	Sodaville	305.44
Culver	558.44	Summerville	246.82
Dufur	1,209.43	Troutdale	1,659.88
Eastside	2,736.65	Waldport	1,943.63
Estacada	2,076.40	Wasco	934.84
Florence	1,866.60	Wheeler	799.09
Imbler	561.52	Yamhill	1,289.65
Ione	808.34	Yoncalla	1,166.24

He recommended approval of the plans by the Commission. The Commission approved the recommendation by adoption of the attached resolution relative thereto marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered an agreement with the U. S. Bureau of Public Roads supplementing a previous agreement which provided for winter maintenance by the State, at government expense, of a portion of the Warm Springs Highway. The Engineer advised that the original agreement expired on May 31, 1950 and that the supplemental agreement is necessary simply to extend the period of maintenance from May 31 to June 15, 1950 so the State can secure reimbursement from the government for expenditures made after May 31, amounting to $794.08. He recommended approval of the agreement. The Commission approved the recommendation. (The agreement was signed later in the day.)

The Commission considered and denied a request from Neal W. Busch, Hillsboro, for installation of a yellow "blinker" light on the Tualatin Valley Highway at Aloha, about two and one-half miles west of Beaverton, on advice from the Engineer that there is now a 25-mile speed zone at this location and that the signal, in his estimation, will not reduce the excessive speed which Mr. Busch complains of as no intersection is involved.

A request from the Nelscott Improvement Club for installation of additional mercury vapor lights on the Oregon Coast Highway in Nelscott was considered by the Commission. The Engineer advised that investigation reveals that the three mercury vapor units previously installed to illuminate the concrete traffic separator and island at this place are entirely adequate. He recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed a request from the City of Canby for the installation of two traffic signals on the Pacific Highway East in this town, particularly at the Molalla Street and Elm Street intersections. The Engineer

stated that the City has requested signals at these points several times in the past but studies have not revealed justification for them until now, and the requests were denied; however, it has been determined by a recent investigation that a signal at the Molalla Street intersection is warranted, but not at Elm Street. He recommended installation of a semi-actuated traffic signal at the intersection of Molalla Street with the Pacific Highway at an estimated cost of $3,800, provided the City will pay half the cost and will furnish necessary electrical energy to operate it. He also recommended that the request for the signal at the intersection of Elm Street with the Pacific Highway be denied. The Commission approved both recommendations.

The Commission considered a request from Jewell Grange No. 876, Clatsop County, and a letter of endorsement from the Astoria Chamber of Commerce, for the lighting of Sunset Tunnel on the Sunset Highway, to eliminate what they termed is a serious traffic hazard. The Engineer advised that provision has been made in the 1951 Minor Betterment Budget for the illumination of this tunnel with mercury vapor lights, and that plans are now being made for the installation. The Secretary was instructed to inform the Grange that present plans call for lighting the tunnel in 1951.

The Commission considered and denied a request from the Fossil Community Club, Fossil, for the installation of a "blinker" light at the intersection of First and Main streets on the John Day Highway in this town, upon advice from the Engineer who reported that investigation reveals that the installation is not warranted.

A request from the City of Independence for an investigation of traffic problems and the installation of a "stop and go" traffic signal at the intersection of the Monmouth-Independence and Independence state highways, was considered by the Commission. The Engineer reported that an investigation made by the Traffic Engineering Department does not show warrant for a "stop and go" traffic signal at this intersection; however, it does indicate justification for a flashing beacon. He recommended approval of a flashing beacon at an estimated cost of $400.00, and that it be financed entirely with State Minor Betterment Funds because it is at the intersection of two state highways. The Commission approved the recommendation unanimously.

The Engineer presented for the Commission's consideration a cooperative arrangement with property owners who conduct businesses along the Santiam Highway at its junction with the county road which leads to the town of Foster, Linn County, for elimination of a bad drainage condition on the highway at this place. The Engineer reported that these people complain of the muddy condition of the unsurfaced area between the highway pavement and the business establishments, covering a highway frontage of about 350 feet, and in order to improve the condition, they have offered to construct concrete curbs and sidewalks at their own expense if the State will surface and oil the area. He estimated the cost of the curbs and sidewalks at about $500 and the cost to do the oiling at a like figure; he recommended approval of the arrangement, the work to be done in 1951 as a Minor Betterment project. The Commission approved the recommendation.

The Engineer reported that pursuant to authority previously granted him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission at its meeting on November 9 and 10, 1950, the conditions of the awards having been satisfied:

(1) Grading, surfacing and oiling the Drake Creek-Adel Section of the Warner Secondary Highway, in Lake County. Bids received November 9, contract awarded November 21, 1950, to Spada Brothers, low bidders.

(2) Construction of a bridge over Snake River on the Payette Spur section of the Old Oregon Trail. Bids received November 9, contract awarded November 15, 1950, to Lindstrom Brothers, Inc., low bidders.

He asked the Commission to confirm the awards. The Commission unanimously approved the awards as reported.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

1. The Gilpin Construction Company, Contract No. 3105, for construction of the Sauvies Island Bridge in Multnomah County, requested an extension of time of 181 days from October 31, 1950 to April 30, 1951,within which to complete this job. They attributed their failure to complete the contract within the specified time limits to an unsuitable piling foundation on pier 3 which required the removing of previously placed wood piling and the extending of the sheet piling to solid rock, causing a delay of three months' time which placed the job in the high water period and, in turn, delayed steel erection and painting of the steel. The bridge, they stated, was opened to traffic on October 2, 1950 and all work now is completed with the exception of certain painting work and the placing of the lower sections of the web walls in piers 2 and 3,which work cannot be done until the river drops to extreme low level. The Engineer recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

2. A. H. Saxton and Sons, Contract No. 3251, for grading and bituminous macadam surfacing on the Squally Hook-Quinton section of the Columbia River Highway, in Gilliam County, requested an extension of time of 258 days from September 30, 1950 to June 16, 1951, within which to complete this job. They alleged that grading conditions which proved more difficult than anticipated, an increase in quantities, extremely heavy traffic, and early cold weather prevented completion of the contract within the specified time limit. The Engineer advised that the contractor did not prosecute the work in a manner which would enable completion of the grading and surfacing sufficiently early in the year to permit oiling during the seasonable weather. He recommended, in view of these circumstances, that the extension of time be

granted as requested, but that the contractor be charged, as a penalty, with engineering expense incurred by the State from September 30 to the actual date of completion. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

3. A. H. Saxton and Sons, Contract No. 3296, for oil mat surfacing on the Forest Boundary-Jones Ranch section of the Ochoco Highway, in Wheeler County, requested an additional extension of time of 11 days, from October 30 to November 10, 1950, within which to complete this job. They alleged that bad weather, including snow, delayed painting of the guard rail and completion of the job within the limits of the previously extended time limit. The Engineer advised that all work on this project, with the exception of construction of the metal guard rail, was completed within the specified time limit, and that he asked the contractor to defer the guard rail construction until the oiling was completed in order to secure a better job. He also said that bad weather during October prevented painting of the guard rail. No inconvenience has been caused the traveling public, he said, and the State has incurred no extra expense for engineering supervision. He recommended that the additional extension of time be granted as requested, without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

4. Lee Hoffman, Contract 3348 for construction of the Marion Street Bridge piers on the Salem-Dallas Highway in Marion and Polk counties, requested an extension of time of 90 days from November 30, 1950, to March 1, 1951, within which to complete this job. He alleged that unexpected and unusually early and severe high water during the months of October and November prevented working on piers 3 and 4, and caused the flooding of cofferdam on pier 5, which forced the finishing operations into the winter months with consequent delays due to freezing and rain. The Engineer advised that the contractor had made every effort to expedite the job, and prior to the high water in October, had worked three shifts a day, seven days a week. Structural steel erection, he said, cannot begin until about the first of May, so the over-run of time limit will not interfere with the progress of the completed bridge structure. He recommended that the extension of time be granted as requested, without penalty. The Commission approved the recommendation.

5. Lindstrom Brothers, Contract 3214 for construction of the Elk Creek Bridge and Sunset Boulevard grade separation structure on the Oregon Coast Highway in Clatsop County, requested an additional extension of time of ten days from November 1 to November 10, 1950, within which to complete this job. They stated that the contract was substantially complete as of October 31, 1950, but poor weather conditions, which prevented completion of the required cement finishing, prevented actual completion within the specified time. The Engineer advised that all work on this structure, with the exception of some finishing work which could not be completed due to weather conditions, was completed prior to the expiration of the previous time extension. He recommended, in view of these circumstances, that a second extension of time be granted as requested, without penalty. A letter

from the Bureau of Public Roads concurring therein was presented. The Commission approved the recommendation.

6. Meade and Hobson, Contract 3339 for construction of the Powder River Bridge on the Salisbury Junction-Poker Creek Section of the Sumpter Valley Highway in Baker County, requested an additional extension of time of 10 days from October 15 to October 25, 1950, within which to complete this job. They alleged that their failure to complete the project within the previously extended time limit was due to slow delivery of steel. The Engineer advised that all work on this job, other than cleaning up the site, was completed prior to the expiration of the first extension of time; also, that no interference to traffic had been experienced because of the delay, and no additional engineering expense had been incurred by the State thereby. He recommended that the additional extension of time as requested be granted, without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

7. D-H Paving Company, Contract 3344 for recoiling the Morrow County line-Condon-Service Creek Section on the Wasco-Heppner and John Day highways, in Gilliam and Wheeler counties, requested an extension of time of 307 days from August 31, 1950 to June 30, 1951, within which to complete this job. They alleged that the necessary aggregate was not available in stockpiles until approximately August 20, which required a revision of their work and postponement of the oiling work so that it could not be done while favorable weather still existed. The Engineer advised that this contract was awarded with the understanding that another contractor, Oscar Joelson, would furnish the aggregate for the recoiling work, but he failed to do so in time to permit the D-H Paving Company to complete the project before unsuitable weather set in. Since the over-run was not the fault of the principal contractor, he recommended that the extension of time as requested, be granted without penalty. The Commission approved the recommendation.

8. N. A. Toole, Contract 3312 for grading, oil mat surfacing and rock production on the North Powder ("E" Street) and Telocaset Junction-Wingville Junction Section of the Old Oregon Trail, and City of North Powder Section, in Baker and Union counties, requested an additional extension of time of 273 days from September 30, 1950, to June 30, 1951, within which to complete this job. He alleged that because of delays in the crushing of materials needed for the oiling work, it was not feasible to do the oiling in 1950. The Engineer advised that due to exceptionally high water covering his gravel bar and hauling road, the contractor was unable to start operations until the middle of June, which accounted for the fact that he was unable to produce the crushed rock in time to perform the oiling work before unfavorable fall weather set in. In view of the circumstances, he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

9. Warren Northwest, Inc., Contract 3264 for pavement resurfacing on the Jordan Creek-McNamara Camp Section of the Wilson River Highway, in Tillamook County, requested an extension of time of 25 days from August 31, 1950, to September 25, 1950, within which to complete this job. They alleged that excessive late spring rains prevented completion of the job within the specified time limit. The Engineer advised that the section was completed within a few days of the specified date, but due to other state obligations the contractor deferred placing of shoulders for a few days. He also said that no inconvenience has been caused the traveling public by the delay, neither has the State incurred any extra expense for supervision. He recommended that the extension of time be granted as requested, without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

10. Edwin C. Gerber, Contract 3104 for grading, paving and structures on the Tillamook-Pleasant Valley Section of the Oregon Coast Highway in Tillamook County, requested an extension of time of 60 days from August 31 to October 29, 1950, within which to complete this job. He alleged that wet weather prevented completion of the grading work in time to do the base and paving work within the specified time limit. The Engineer advised that the contractor failed to expedite the surfacing work in the early summer so that the pavement work could be done within the time limit specified, although he was repeatedly requested to do so. He recommended,in view of the circumstances, that the extension of time be granted as requested, but that the contractor be charged with engineering costs incurred from August 31, 1950, to the date of completion as a penalty for over-running the specified time. A letter from the Bureau of Public Roads concurring therein was presented. The Commission approved the recommendation.

11. Edwin C. Gerber, Contract 3247 for oil mat surfacing and rock production on the Sherars Bridge-Grass Valley Section of the Sherars Bridge Secondary Highway in Sherman County, requested an extension of time of 242 days from October 31, 1950, to June 30, 1951, within which to complete this job. He alleged that because weather conditions are not suitable for oiling work between September 15, 1950, and May 15, 1951, he will be unable to do that part of the work until the spring of 1951. The Engineer advised that the contractor had attempted to work on this project and also on the Tillamook-Pleasant Valley Section at the same time, but was unable to properly supervise either project. He also said that he knows of no legitimate reason why the project should not be completed within the specified time limit, and he accordingly recommended that the extension of time be granted as requested with the stipulation that the contractor be required to reimburse the State for engineering expenses incurred between October 31, 1950 and the actual date of completion of the work. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

12. C. and S. Electric, Contract 3287 for installation of traffic signals on the Pacific Highway in Eugene, Lane County, requested an additional extension of time of 55 days from September 30 to November 24, 1950, within which to complete this job. They alleged that they had been unable to complete the contract within the previously extended time limit because they had to wait for repairs for some of their equipment that was damaged by parties unknown, and because of unsuitable weather for painting. The Engineer advised that the previous extension of time was granted because of delays in delivery of equipment, and when the equipment was received, it was found that the pedestrian signals had been broken, either in shipment or after receiving. The additional extension of time, he said, covers that period in which the contractor was waiting for new parts for the signals. He recommended that the extension of time be granted as requested, without penalty. The Commission approved the recommendation.

The Commission in discussing requests for extensions of time as listed above, considered but did not necessarily adopt either the recommendations of the Engineer or the reasons given by the contractors for failure to complete their projects within the specified time limit.

The Engineer reported that contracts No. 3214, 3296, 3339, 3357, 3375, 3377, 3393, 3401, 3264, 3287 and 3404 for construction of State Highway projects have been completed according to the requirements of the contracts or modifications thereof and that said contracts are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered a request from the Weyerhaeuser Timber Company for permits to truck-haul logs across the McKenzie Highway 4.14 miles east of Springfield during Saturdays, Sundays, and holidays. The Engineer advised that this company operates over a private road which crosses the highway at grade, and that the crossing is protected by a traffic signal that it maintains under Public Utilities Commission order No. 20164, dated July 14, 1948. In order for the Company to operate its private road across the State highway on Saturdays, Sundays, and holidays, it will be necessary for the Weyerhaeuser Timber Company to submit an amended petition to the Public Utilities Commission requesting such privilege which will be granted if the Highway Commission recommends favorably. He gave as his opinion that, since the crossing is protected by signal, it would be satisfactory to let the Company operate across the highway during Saturdays, Sundays, and holidays as requested, and he so recommended. The Commission approved the recommendation.

In this connection the Commission also discussed the matter of permitting logging trucks to operate during hours of darkness. The legality of such hauling was questioned. The Engineer was instructed to confer with the Chief Counsel and submit a report at the next meeting of the Commission.

The Commission considered a request from the Bonneville Power Administration to construct a power line over and across a state-owned gravel pit site on the Umatilla-Hermiston Section of the Old Oregon Trail, in Section 16, Township 5 north, Range 28 east, W.M. in Umatilla County. The Chief Counsel advised that the issuance of such a permit has been studied and approved by the Engineer and that it does not appear that the erection of the power lines will in any way interfer with the taking of materials from the pit. He recommended that the permit be granted. The Commission approved the recommendation.

The Commission considered and approved a recommendation from the Travel Advisory Committee that the Commission's existing agreement with Wilkins, Cole, and Weber, Advertising Consultants, Portland, be extended for one year, from February 26, 1951 to February 25, 1952. (An agreement covering the matter was signed by the Commission later in the day.)

The Engineer presented a claim submitted by Mr. Claude M. Johns, Assistant Attorney General, for reimbursement of expense incurred by him in repairing his car which was damaged by a State paving crew on the Oregon Coast Highway north of Nehalem. The Engineer advised that the accident occurred on September 20, 1950, while a paving crew was repairing the pavement on the Oregon Coast Highway about one-half a mile north of Nehalem. It appears that one of the crew, while applying hot asphalt to the surface of the highway between one-way traffic signs,was forced to jump to avoid being struck by a car which was attempting to pass another car, and as he jumped, he sprinkled some asphalt on Mr. Johns car causing damage that cost $21.00 to repair. Mr. Johns, he said, was told to take his car to a garage and have the asphalt removed, under the belief that the insurance carrier for highway equipment would pay the bill; however, it develops that this type of damage is not covered by the State's insurance. He gave as his feeling that the State is liable and recommended that the claim be paid. The Commission approved the recommendation.

The Engineer also presented the claim of John G. Albuschie for reimbursement of damages sustained to his automobile by the highway paving crew on the Oregon Coast Highway just north of Tillamook. The Engineer advised that on October 2, 1950, paving crew No. 1 was repairing the surface of the highway at M.P. 76.71 when Mr. Albuschie, under direction of the flagman, drove past the men that were working just behind a truck. A hard lump of material was shoveled by a member of the crew across the path of Mr. Albuschie's car striking the grill and breaking it in two pieces. He recommended that the claim in the amount of $25.50 be paid inasmuch as the paving crew jointly had failed to work safely. The Commission approved the recommendation.

The Commission considered adoption of a resolution abandoning in favor of the City of Tillamook and Tillamook County, certain sections of the old route of the Oregon Coast Highway between Tillamook and Pleasant Valley. The Engineer advised that construction of the new route has been completed and that under the terms of a previous agreement, portions of the old route are to be turned over to the City and the County for future maintenance, provision for which is contained in the resolution. He recommended approval of the resolution. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "F", which resolution by

this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a notice and petition presented by Mark B. Bump, Attorney, Hillsboro, in behalf of local citizens, for the establishment of a county road along a dedicated street in the town of North Plains, Washington County. Mr. Bump explains in his letter that the petition is simply a request for a change in classification of a dedicated street to provide a county road connection between two existing county roads. The Engineer advised that the signing of the "consent" form will not obligate the State in any way, and he recommended approval of the request. The Commission approved the recommendation. (The "consent" form was signed by the Commission later in the day.)

A letter from Robert D. Lytle, City Attorney, Vale, requesting ratification of a city ordinance designating a section of Washington Street in Vale as a truck route had the attention of the Commission. The Engineer advised that Washington Street is an east and west street, parallel to and one block north of the Central Oregon Highway; also, that an investigation by the Traffic Engineer reveals that from the standpoint of traffic congestion and traffic safety, the designation is not warranted. He pointed out that the average daily traffic on the highway was only 2500 vehicles in 1949 which is far below the capacity of two-lane urban highways, and that were Washington Street designated a truck route, there would be more turning movements of trucks with a corresponding increase in traffic hazards. He recommended that the request be denied. The Commission approved the recommendation.

The Engineer requested the Commission's approval of a change in "Stop" signs on the Woodburn-Estacada Secondary Highway in Clackamas County where it connects with the Barlow-Monitor County road, 5.17 miles east of Woodburn. He recalled that several years ago, when the Woodburn-Estacada section was designated as a "Stop" highway, that, due to a larger volume of traffic on the county road then on the secondary highway, the stop sign had been placed on the secondary highway, allowing the county road traffic to cross the secondary without stopping. This condition, he said, has now changed and the secondary highway now carries more traffic than the county road. He recommended in view thereof, that the signs be reversed so as to require county road traffic to stop before entering the intersection and to allow the highway traffic to proceed without stopping. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer brought up for discussion the matter of extending the reduced speed zone recently designated on the Pacific Highway through the town of Wilbur in Douglas County. He said that by mistake, the zone was limited to the section between Mile Post 190.6 and Mile Post 191.3, whereas it should have included a school area at Mile Post 191.6. He recommended an extension of the zone to Mile Post 191.6 to include the school. The Commission approved the recommendation by the adoption of the attached resolution relative thereto marked EXHIBIT "H-1", which resolution by this reference is made a part hereof

with like effect as though extended in full herein.

The Commission considered a request from the Oregon State Police for the establishment of a 35-mile per hour speed limit on the entire length of the Timberline Secondary Highway in Clackamas County. The Engineer advised that this highway, which was recently constructed by the Bureau of Public Roads, has good alignment and grade so traffic moves over it at high speed which is conducive to accidents, particularly when the road is covered with snow or ice. He gave as his opinion that traffic should be slowed down during such times and accordingly, he recommended designation of a 35-mile per hour speed limit throughout the highway during the winter months, such restrictions to be removed during the summer months. The Commission approved the recommendation and thereupon by unanimous vote, adopted the attached resolution relative thereto, marked EXHIBIT "H-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer presented a letter from Lyle B. Thurman, Medford, forwarded from the Office of the Secretary of State, requesting establishment of a reduced speed zone on the Medford-Provolt Secondary Highway at the west edge of Medford. He said that this matter has been investigated by the Traffic Engineer who advises that there is warrant for speed restriction between the city limits, mile post 24.15, and a point 2.15 miles westerly thereof, and who recommends designation of a maximum speed of 40 miles per hour between those points. He stated his concurrence in the recommendation. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "H-3", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission had under consideration the confirmation of oral authority given the Engineer to purchase from the Bureau of Public Roads four pieces of heavy-duty snow-plowing equipment formerly used by the Forest Service in maintaining the Timberline Lodge forest road, consideration $1,000. The Engineer recalled that the appraised value of this equipment is $15,000. The Commission confirmed the purchase for $1,000, and approved the form of agreement conveying title to the State. (The agreement was signed later in the session.)

The Engineer requested authority for an expenditure of $6,800 to purchase miscellaneous maintenance-station equipment consisting of battery chargers, air compressors, alemite air chassis grease guns, etc. for which, he said, provision is included in the 1951 Budget. The Commission approved the request unanimously. (For a list of the equipment see copy of Engineer's letter dated December 12, 1950, to the State Highway Commission in the general files.)

The Engineer also requested authority to purchase office furniture and equipment for the Maintenance Department, including all of its branches throughout the state, involving a total expenditure of $5,165.00. He said that the material being furnished consists of filing cabinets, calculators, desks, typewriters, etc.; also that provision for the purchases is included in the 1951 Budget. The Commission approved the request. (For a list of equipment see copy of Engineer's letter directed to the State Highway Commission dated December 12, 1950, in general files.)

The Commission had under discussion a proposed agreement with Klamath County providing for the abandonment in favor of the County, of a section of the Klamath Lake Secondary Highway between Rocky Creek and Wocus Marsh when construction of the new highway between these points has been completed. The Engineer recommended approval of the agreement, which provides that the County shall take jurisdiction over the old route when the new section is open to travel. He exhibited a map showing the sections affected. The Commission approved the arrangement unanimously. (The agreement was signed by the Commission later in the session.)

The Commission also considered an agreement with Jackson County providing for future maintenance by the County of the old route of the Sams Valley State Secondary Highway between Gold Hill and Snider Creek when the new route between these points has been constructed by the State. The Engineer exhibited a map showing the section in question and recommended approval of the agreement. The Commission approved the recommendation. (The agreement was signed by the Commission later in the session.)

The Commission also considered an agreement with Gilliam County covering disposition of certain sections of the Wasco-Heppner Secondary Highway (old route) when this highway has been constructed on revised alignment. The Engineer exhibited a map showing the location of the affected sections and recommended approval of the agreement which provides that certain portions of the old highway shall revert to the County to be maintained as county roads, and that certain portions shall revert to the County for vacation or reversion to the abutting property owners as the County may determine. The Commission approved the recommendation unanimously. (The agreement was signed later in the session.)

The Secretary presented a letter from the Honorable Ralph T. Moore, Chairman of the Legislative Highway Interim Committee, in which Mr. Moore expresses appreciation for assistance given him by the Highway Commission and its staff in the Committee's study of highway problems. The Commission was gratified to receive this indication and ordered it filed in the highway records.

The Commission had under discussion the setting of a time for its next regular meeting and decided to hold such meeting in Portland on Tuesday and Wednesday, January 23 and 24, 1951. The Secretary was instructed to make the usual arrangements for the use of the Green Room in the Imperial Hotel, in which to hold this meeting.

The Right of Way Engineer brought up for discussion the matter of transferring to the Weyerhaeuser Timber Company the State's title and interest in and to a portion of the roadway which leads from US101 in North Bend, Coos County, to the old ferry slip at that place. He said that the roadway beyond the entrance to Simpson State Park, which is adjacent, is of very little, if any, value for state highway purposes since the Coos Bay Bridge has replaced the ferry operation across Coos Bay, and he recommended that such portion of the roadway be conveyed to the Weyerhaeuser Timber Company, which can use it to good advantage in its operations. The Commission approved the recommendation unanimously.

The Commission discussed and upon recommendation of the Engineer approved an agreement with Gilliam County disposing of a portion of the Columbia River Highway (old route) between Heppner Junction and Boardman, when construction of the highway on revised alignment has been completed. (The agreement was signed later in the session.)

The Commission also discussed and upon recommendation of the Engineer approved an agreement with Morrow County providing for the disposition of certain sections of the Columbia River Highway (old route) between Willow Creek and Boardman when the highway has been reconstructed on revised alignment. (The agreement was signed later in the session.)

The Right of Way Engineer presented for the Commission's approval three bargain and sale deeds reconveying to the original property owners certain right of way which was acquired by Marion County for the Mehama-Mill City Section of the North Santiam Highway, and which no longer is needed for the purpose acquired, because of a change in the highway alignment. He explained that when the right of way along the revised alignment was acquired, it was agreed with the property owners that the parcels they sold to the county would be reconveyed to them, which is effected by the deeds now under consideration. He mentioned that the property owners affected are Alfred M. Ward and wife, Keith R. Phillips and wife, and E. C. Goschie and wife; and advised that the deeds now before the Commission are simply to complete the arrangement. The Commission unanimously approved the deeding of the properties as recommended. (The deeds were signed by the Commission later in the session.)

The Right of Way Engineer also presented for the Commission's approval a bargain and sale deed conveying unto the Klamath County School District two parcels of land which were purchased from the District in 1946 in connection with acquisition of right of way for the South Sixth Street-City Limits Section of the Klamath Falls-Lakeview Highway in Klamath Falls. He said that a total of 36,894 square feet of land is involved in this deal, for which the school district is paying the state the sum of 10¢ per square foot, or a total of $3,689.40. He recalled that the transaction had previously received the Commission's approval and recommended approval of the sale. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein. (The deed was signed by the Commission later in the session.)

The Right of Way Engineer requested authority to sell certain real property situate in the City of Portland, which property is described as a westerly 75.5 feet of Lot 5, Block 56, Carruthers Addition to Portland, and is situate adjacent to Front Avenue. He advised that the property is of no value for state highway purposes and he recommended that it be advertised for sale in accordance with the terms and provisions of Chapter 437, Oregon Laws, 1949, at a price of not less than $2,500, which, he said, is the reasonable market value of the property. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "J", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Right of Way Engineer presented for the Commission's approval three bargain and sale deeds conveying unto the City of Redmond four parcels of land situate adjacent to The Dalles-California Highway in that City, being portions of Lot 42, Sothman Addition to the City. He explained that these parcels are needed by the City in connection with the widening of Oak Street at its intersection with the highway, and for the construction of a sidewalk thereon. He also said that the property is not needed for State Highway purposes. He recommended that the several parcels be deeded to the City for its use, for a consideration of $1, except that one parcel containing 0.115 acre, which has a reasonable market value of less than $1000, shall not be sold unless a satisfactory price is offered for it. The Commission approved the recommendation and authorized the Chief Counsel to solicit offers for the purchase of the 0.115 acre tract. The results thereof are to be reported to the Commission for final instructions. The attached resolutions relative to the disposal of the properties, marked EXHIBIT "K-1", "K-2", and "K-3", which resolutions by this reference are made a part hereof with like effect as though extended in full herein, were thereupon adopted by the Commission by unanimous vote. (Bargain and sale deeds were signed by the Commission later in the session.)

The Right of Way Engineer recommended that a small parcel of land containing 600 square feet, situate adjacent to the Columbia River Highway between Cascade Locks and Viento, in Hood River County, be sold to Roy L. and Gertrude B. Duvall, who own the abutting property. He explained that the tract lies outside of the standard width right of way and is not needed for highway purposes; also, that in the negotiations for the right of way it was understood that this tract would be conveyed to the Duvalls for a consideration of $60, with complete restriction of access to the highway, if it was not needed by the State. In view of this explanation the Commission unanimously approved the sale of the property to Mr. and Mrs. Duvall by the adoption of the attached resolution relative thereto, marked EXHIBIT "L", which resolution by this reference is made a part hereof with like effect as though extended in full herein. (The Commission executed a bargain and sale deed later in the session.)

The Right of Way Engineer brought up for discussion the release to the Klamath Indian Agency certain hauling roads that were used in connection with the construction of the Mazama Junction-Lobert Section of The Dalles-California Highway in Klamath County, which roads are identified in the records by the numbers 13551-A and 13551-E. He said that these roads over which gravel was hauled to the highway, are no longer required by the State, and he recommended that they be released to the Indian Agency. The Commission approved the recommendation and so ordered. (Release agreements were signed by the Commission later in the session.)

The Commission had under discussion the matter of deeding to School District No. 8, Douglas County, 2.48 acres of land situate on the Canyonville Section of the Pacific Highway. The Right of Way Engineer advised that this transfer is part consideration in connection with the settlement of a right of way purchase, and he recommended that the property be deeded to the District for the sum of $1.00. The Commission approved the recommendation. (A bargain and sale deed was signed later in the session.)

The Commission also upon recommendation of the Right of Way Engineer approved the sale, to Earl Goldhammer, Portland, of 3,519 square feet of land lying in Lots 2 and 3 of Block 2, McMillan's Addition to East Portland, for a consideration of $1.00 cash plus his deeding to the State certain property of equal value. The Right of Way Engineer explained that this property is located on the Cherry Street-Steel Bridge Section of the route of the Pacific Highway West in Portland and is not needed for State highway purposes. (Bargain and sale deed conveying property to Mr. Goldhammer was signed later in the session.)

The Commission discussed a proposed agreement with Lake County providing for the maintenance of the Goose Lake Project on Federal Aid Secondary Highways No. 407 and No. 408 in that County, when construction of this project has been completed. It was explained that the agreement provides that the County shall acquire land that is needed to provide right of way at least 60 feet wide throughout the extent of the improvement and shall be responsible for the maintenance of the road after the improvement is done. The Commission unanimously approved the agreements. (Two agreements, one for each highway, were signed by the Commission later in the session.)

The Chief Counsel brought up for discussion the claim of Allen C. Jones, Salem realtor, for damage to his property at the intersection of Marion and Water Streets in Salem that has resulted, and will result, from the construction and maintenance of the easterly approach to the Marion Street Bridge over the Willamette River at this place. Chairman Chandler recalled that the payment of damages in connection with this project was discussed previously and it was decided at that time to take no action with regard to them until the Commission had something definite and substantial to tie them to, or until the bridge was completed. The Commission, he said, is still of the same feeling. The Chief Counsel was thereupon instructed to take no action in the matter for the time being.

The Commission discussed with the Engineer the bids received during the morning session for highway construction, and at 3:00 p.m. Chairman Chandler publicly announced the Commission's decision with respect to each project as follows, the action of the Commission in each instance being by unanimous vote:

"Elsie-Sunset Tunnel Rock Production Project on the Sunset Highway in Clatsop and Washington Counties. There were nine bids on this project. The contract has been awarded to A. H. Saxton & Sons, low bidders, at $47,985.00.

"Grading and rock surfacing on the East Cottonwood Canyon-York Ranch Section of the Wasco-Heppner Highway in Gilliam County. Rush Construction Company was the low bidder of twelve for this work. The contract was awarded to them at their bid price, $74,567.00.

"Service Creek-Mt. Vernon Rock Production Project on the John Day Highway in Grant and Wheeler Counties. There were eight bidders for this contract which has been awarded to F. C. Hall Co. at their low bid price of $58,857.00.

"Grading, surfacing and oiling on the Sams Creek-Snider Creek Section of the Sams Valley Secondary Highway in Jackson County. The Commission has referred to the Engineer the twelve bids received for this project, with authority to award the contract to R. A. Heintz Construction Company, the low bidder, at their bid price of $180,864.00, when certain conditions have been satisfied.

"Construction of four reinforced concrete structures, and grading and surfacing on the Holland Loop County Road in Josephine County. The contract has been awarded to R & M Construction Company, the low bidder of four, at its bid price of $130,041.50.

"Chemult Rock Production Project on The Dalles-California, East Diamond Lake Secondary and Willamette Highways in Klamath County. There were nine bids on this project, all of which have been referred to the Engineer with authority to award the contract to the lowest bidder, M. C. Lininger & Sons, Medford, at their bid price, $43,625, when certain conditions have been satisfied.

"Grading, surfacing and bituminous macadam on the Heppner (May Street-Heppner School) Section of the Heppner Highway in Morrow County. The five bids received for this job have been referred to the Engineer with authority to award the contract to G. D. Dennis & Sons, low bidder, at their bid price of $17,727.00, when certain conditions have been satisfied.

The Chief Counsel brought up for discussion proposed changes in the real estate option form. He said that the present supply of printed forms is exhausted and before ordering a new supply, he thought it best to bring certain features to the Commission's attention for its approval. One of the changes he suggested was to provide protection of the law in cases where an option has been obtained involving acquisition of a building and the building was destroyed before the property was deeded to the state. He cited a case at Bonneville where the option provided payment of $9,000 for a building, which burned before the option was closed. In this case, he said, the matter was taken to court and was decided against the state, which was required to pay $6,000 for the building notwithstanding that the building was not delivered. The second suggestion concerned the acquisition of sufficient width right of way to accommodate an outer highway, or service road, at some future time, and providing that, in the meantime, the property owner be given unlimited access to the highway until such time as the outer highway has been constructed, access privileges then to be cancelled. He gave as his opinion that highways serve two purposes: viz., to provide a way for traffic to pass through the state, and to promote the economic development of the state, and he expressed the feeling that such purposes would be served were his suggestion approved and carried out by the Commission. He said that there are several cases now pending in court in which this question is involved, and it is necessary that the Commission act one way or the other on his suggestion because it involves a considerable expenditure of state highway funds. The Engineer asserted that it would be dangerous to allow unlimited access as proposed by the Chief Counsel. He gave as his considered opinion that the matter should be studied very

carefully before the Commission takes any action, and in the meantime that the state should buy the access rights in the cases now pending. The matter was discussed at considerable length and as a result thereof the Commission deferred action on the subject pending study. The Chief Counsel was instructed, pending such study, to acquire access rights as well as the land in connection with pending cases. He was also instructed to bring the matter to the Commission's attention again at its meeting in January, 1951.

The Chief Counsel also brought up for discussion a proposed settlement of a condemnation case in the city of Portland involving acquisition of right of way at the east end of the Broadway Bridge. He said that this case was instituted by the city and concerns the Front Avenue Project, in connection with which the state is obligated to pay 40% of right of way costs. The verdict returned by the jury, he said, was considerably more than was anticipated, being in the amount of $30,200. However, since then a compromise settlement has been effected whereby the property owner has agreed to accept the sum of $27,000. The property, he said, is very difficult to appraise, being so located that its principal value is for outdoor advertising purposes, from which the owner has been getting considerable income, and Commissioner Bowes of the city recommends acceptance of the compromise figure. He gave as his considered opinion that it would be better to settle the case at the amount of the compromise offer than to appeal the decision to the Supreme Court, which means that the state's contribution will be 40% of $27,000, or $10,800. The Commission approved the recommendation unanimously. In this connection the Chief Counsel advised that the city has requested that the state advance the city's share of the expense (60%) because of a shortage of city funds, with the understanding that an adjustment of the account will be made later giving the state full credit for such advances. He recommended approval of the request. The Commission approved the recommendation.

The Commission discussed a proposed agreement with the Union Pacific Railroad Company covering snow removal from railroad company right of way between Troutdale and The Dalles. The Chief Counsel advised that the agreement as prepared is very similar to an existing agreement between the company and the state with respect to snow removal from the Columbia River Highway in the Columbia Gorge, the difference being that in the instant case the Company is initiating the proposition because the snow is being removed from the railroad company's property and the agreement is for the protection of the highway. He recommended approval of the arrangement. The Commission approved the recommendation.

The Chief Counsel requested instructions as to the actions that he should take with respect to the claims of the federal government against two highway contractors: viz., Albert W. Denton, dba Denton Construction Company; and George E. Corliss. These claims, he said, concern withholding taxes that the contractors deducted from the employees' payrolls and which were not paid over to the government. In the case of the Denton Construction Company, he said, three contracts with the state are involved and one with the Bonneville Power Administration. The contracts were taken over by the bonding company, which has requested release of the payments due Denton Construction Company and has agreed, if the state will release its funds, to furnish a bond to protect the state's interests in the event the government sues and collects the amount of its claim.

He pointed out that it is very difficult to determine just how much of the claim concerns the state and how much of the claim concerns the government, in view of which he recommended acceptance of the bonding company's offer. The Commission approved the recommendation with the strict understanding that no monies shall be paid to the bonding company until it has furnished a bond to protect the state's interests.

The Chief Counsel explained that the Corliss case involves only a state highway contract so there is no question but that the claim is a legitimate one against the project that Mr. Corliss had undertaken. He recommended in this instance payment of the government's claim direct, and that the bonding company be required to settle remaining claims. The Commission approved the recommendation.

The Commission considered, approved and signed agreements, etc., as follows:

Agreement with David C. Shaw for grazing of sheep in Cape Sebastian State Park, Curry County.

Encroachment permit to Morris Rubenstein, et al, for slight encroachment of two buildings over the right of way of US101 in Coos Bay.

Renewal of agreements with National Hospital Association and Oregon Physicians Service.

Agreement with Southern Pacific Company covering exchange of properties in connection with Front Street project in Coos Bay.

Easement agreement with Union Oil Company relating to re-establishment of previous easement which has been relinquished.

Agreement with Josephine County for construction of bridges and grading on the Holland Loop County Road.

Agreement with Josephine County providing for maintenance of Holland Loop County Road after construction is completed.

Cooperative agreement with Bureau of Public Roads covering winter maintenance of Warm Springs Highway.

Extension of agreement for one year with McWilkins, Cole and Weber, advertising consultants.

"Consent form" approving the establishment of a new county road in the vicinity of North Plains, Washington County.

Agreement for purchase of snow removal equipment from the U. S. Forest Service previously used on the Timberline Road.

Agreement with Klamath County covering abandonment of an old section of the Klamath Secondary Highway when the Rocky Creek-Wocus Marsh Section is completed.

Agreement with Jackson County for disposal of a section of the old route of the Sams Valley Secondary Highway when the Sams Creek-Snider Creek Section is completed.

Agreement with Gilliam County covering disposition of sections of the Wasco-Heppner Secondary Highway (Old route) when the new route is completed.

Agreement with Gilliam County covering abandonment of an old section of the Columbia River Highway between Heppner Junction and Boardman when new alignment is completed.

Agreement with Morrow County covering abandonment of old sections of the Columbia River Highway when the new Willow Creek-Boardman Section is completed.

Lease agreement with Union County Sportsmen's Club for 15-year lease of property near Union.

Bargain and Sale deeds to E. C. Goschie, Keith Phillips and Alfred M.Ward for property on Mehama-Mill City Section.

Bargain and Sale deed to Klamath County School District for property on South Sixth Street, Klamath Falls.

Bargain and Sale deed to City of Redmond for property on Redmond Section of US97.

Deed to Duvall for property on Cascade Locks-Viento section of Columbia River Highway.

Release of haul roads on the Mazama Junction-Lobert Section of US97 to U. S. Klamath Indian Agency.

Deed to School District No. 8, Douglas County, for 2.48 acres on the Canyonville Section of the Pacific Highway.

Deed to Goldhammer for property on Cherry Street-Steel Bridge Section, US99W, Portland.

Lake County maintenance agreements on Goose Lake Section of two county roads.

Agreement with Union Pacific Railroad Company covering removal of snow from railroad right of way along Columbia River Highway between Troutdale and The Dalles.

Indenture of Access to Harold B. Hurley and Marie R. Hurley on property on northerly side of highway opposite Highway Engineer's Stations 184+87.5 and 186+00, in Douglas County.

Abandonment agreement with Lane County covering abandonment of a small portion of Springfield-Creswell Secdy. Hwy. in vicinity of Jasper.

The meeting adjourned at 4:00 p.m. to reconvene the following morning in the same room.

Portland, Oregon
December 20, 1950

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the same persons present and participating.

Bids as follows for highway construction were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Chandler announced that the award of contracts would be made at 3:00 p.m.

OREGON COAST HIGHWAY IN COOS COUNTY

CEDAR POINT-COQUILLE SECTION

Coos Bay Dredging Co., Coos Bay	$298,774.90
Porter W. Yett, Portland	299,217.50
Warren Northwest, Inc., Portland	308,547.50
Rogers Constr. Co., & Babler Bros., Portland	314,340.00
J. G. Watts Constr. Co., Portland	375,844.00

KLAMATH LAKE SECONDARY HIGHWAY IN KLAMATH COUNTY

ROCKY CREEK-WOCUS MARSH SECTION

F. L. Somers, Klamath Falls	$334,015.00
Leonard & Slate Oregon Ltd., Portland	346,759.50
Rogers Constr. Co., Portland	402,510.00
McNutt Bros., Eugene	424,738.00
Peter Kiewit Sons, Longview, Wn.	563,733.50

COTTONWOOD CREEK AND WEST SIDE COUNTY ROADS IN LAKE COUNTY

GOOSE LAKE SECTION

F. L. Somers, Klamath Falls	$ 89,384.00
Stevenson Constr. Co., Salem	93,012.50
Durbin Bros., Eugene	94,210.50
J. N. & M. J. Conley, Portland	94,306.00
Babler Bros., Portland	96,060.00
John A. Logan, Portland	96,853.00
Rex C. Ayers Constr. Co., Portland	97,460.50
Peter Kiewit Sons Co., Longview, Wn.	99,432.00
Leonard & Slate, Oregon Ltd., Portland	100,720.00
Floyd Graham Constr. Co., Lebanon	104,485.00
M. W. Brown, Redding, Calif.	104,743.40
O and K Construction Co., Gresham	105,101.00
G. D. Dennis & Sons, Portland	105,230.00

SPRINGFIELD-CRESWELL HIGHWAY IN LANE COUNTY

WILLAMETTE RIVER (JASPER) BRIDGE SECTION

Rex C. Ayers Constr. Co., Portland	$ 8,526.50
Hamilton & Thoms, Eugene	9,397.00
I. H. Peters, Eugene	10,787.00
Inter City Sand & Gravel Co., Eugene	11,251.50
Tauf Charneski, Eugene	13,151.75

SALEM-DALLAS HIGHWAY IN MARION AND POLK COUNTIES

MARION STREET BRIDGE APPROACHES IN SALEM

General Construction Co., Portland	$787,736.00
Lindstrom Bros., Portland	797,015.00
Guy F. Atkinson Co., Portland	841,550.00
Lee Hoffman & J. A. Troxell, Portland	845,715.00
C. J. Montag & Sons, Portland	903,165.00

WASCO-HEPPNER HIGHWAY IN MORROW COUNTY

EIGHTMILE-HEPPNER ROCK PRODUCTION PROJECT

Rush Constr. Co., Enterprise	$ 19,110.00
Oscar E. Joelson, Eugene	19,460.00
E. C. Hall Co., Portland	20,650.00
Vernie Jarl, Gresham	21,630.00
E. H. Itschner Co., Molalla *	21,700.00

OCHOCO HIGHWAY IN WHEELER AND GRANT COUNTIES

MITCHELL-JOHN DAY RIVER ROCK PRODUCTION PROJECT

Rogers Constr. Co., Portland	$ 28,680.00
Oscar E. Joelson, Eugene	28,740.00
E. C. Hall Co., Portland	30,360.00
Rush Constr. Co., Enterprise	32,640.00
Vernie Jarl, Gresham	33,480.00
E. H. Itschner Co., Molalla *	33,600.00
A. H. Saxton & Sons, Corvallis	34,740.00

* Bidder will accept only one project.

The Chief Counsel reported a pending lawsuit involving seven highway department employees, all members of a snow plow crew, and arising out of snow removal operations on the Mt. Hood Highway at Battle Axe Inn about two years ago. It is alleged, he said, that this crew, while operating a rotary type plow, covered the roof of the Inn with snow which later slid off and injured a bus driver who was standing nearby, and this man is now claiming $25,000 damages. He also said that there is a question whether or not the company that wrote the State's insurance will assume liability in the case, and he requested instructions whether or not to appear in court in behalf of the employees in the event the company does not assume the liability. He explained that the State is not liable for torts of its employees and if the insurance company does not appear in the case, it will mean personal responsibility of the men that are being sued. Commissioner Reynolds gave as his feeling that it would be difficult in the future to hire operators for snow removal and other equipment if the Commission did not stand back of its employees in court actions such as this, and that in this instance, the Commission should assist the employees as much as possible. As a result of discussion, the Commission instructed the Chief Counsel to appear in court as a "friend of the employees" to protect them against default, but not as a representative of the Commission.

The Commission discussed briefly the dedication of the Sauvies Island Bridge in Multnomah County. The Engineer advised that dedication ceremonies are being planned for the last week in December and that those in charge have stated a desire for the members of the Highway Commission to be present and participate. It was decided that either Chairman Chandler or Commissioner Reynolds will represent the Commission on the occasion if possible.

Messrs. William Hammond, administrator, and Jack Elliot, property custodian for the State Liquor Control Commission were present and inquired whether or not it would be possible for the Liquor Commission to rent office space on the fifth floor of the new Highway Department office building in Salem, when it is ready for occupancy. Mr. Hammond stated that their present quarters in a privately owned building in Salem are inadequate and they are

looking for a new location in a state-owned building. He also said that they would require about 3000 square feet of floor space. Commissioner Chandler stated that it is anticipated the building will be ready for occupancy about June, 1951, and inasmuch as the State Highway construction program is being expanded, the Commission does not know at this time just how much space will be required for State Highway personnel, so is not making any advance commitments of the space that may be available. He suggested that they investigate the possibilities of obtaining rooms in the State Office building when the Highway Department vacates that building. Mr. Hammond agreed to do that and he also inquired if the Commission will give their request first consideration if it is determined later that there will be surplus space available for rental in the State Highway Building. He was assured by the Commission that the Liquor Commission will be given first refusal of any surplus space that may develop in the new building.

The Chief Counsel reported that he has been approached by Mr. Thornton Munger in behalf of the Oregon Roadside Council with a suggestion that the Highway Commission ask the Governor to incorporate in his message to the 1951 legislature a suggestion that roadside advertising signs be removed from property adjacent to public highways. It was the feeling of the Commission that the request should go directly from the Roadside Council to the Governor. The Chief Counsel was instructed so to inform Mr. Munger.

The Engineer brought up for discussion the award of the contract for construction of the Willow Creek-Boardman section of the Columbia River Highway in Morrow and Gilliam Counties, bids for which were received on November 10, 1950. He recalled that the Commission referred the bids to him with authority to award the contract to the low bidder when certain right of way difficulties with the Federal Government had been cleared up. At that time, he said, the only difficulty known was the reservation of the Federal Power Commission which was cleared through the efforts of Senator Cordon, but it now develops that the U. S. Air Corps has another reservation within limits of the contract which will have to be cleared by the authorities in Washington, notwithstanding that the officer in charge of the local area has no objections to the State having the property.

He gave as his feeling that clearance will be obtained within the next few days and he recommended, if it is not cleared, and the contract cannot be awarded by January 5, 1951, as a Federal Aid project, that it be awarded as a state job to be financed solely with state funds. He explained that Berke Bros., the low bidders, are very anxious to start work inasmuch as their bid anticipated performance of much of the work during the winter months. Mr. Tom M. Davis, District Engineer, Bureau of Public Roads, who was present advised that he has no objections to such procedure. The Commission unanimously approved the recommendation and authorized award of the contract on January 5, 1951, as a state job if difficulties with the Air Corps are not ironed out by that time.

Commissioner Reynolds called attention to the rough condition of the Central Oregon Highway between Harper and Juntura in Malheur County. The Engineer was instructed to investigate this section and report his findings at the next meeting of the Commission.

Consideration was given by the Commission to the following items of unfinished business as listed on the Secretary's summary dated November 10, 1950:

1. Matters to be presented to 1951 Legislature: The Engineer reported that he and the Chief Counsel have been working on legislative bills, including a revised truck bill in which they are using the Michigan truck law as a guide. The Commission ordered this item of unfinished business retained on the list.

2. Re-alignment of Oregon Coast Highway through Seaside using Roosevelt Drive: The Commission ordered this item deleted from the list of unfinished business, and that it be classed as new business if it arises again.

3. McNary Dam park site: Proposed acquisition of area for possible development as a park in conjunction with the Army Engineers. The Commission ordered this item deleted from the list of unfinished business. It is to be considered as new business when further developments occur.

4. Haines-Anthony Lakes Secondary Highway: Baker County Chamber of Commerce requests improvement. The Engineer reported that he and Commissioner Reynolds will contact the Baker County Court and ascertain if it prefers this project to contemplated work on the Baker-Unity Highway. The Commission ordered this item retained on the list of unfinished business.

5. Ross Island Bridge, Portland. Proposed diagonal cut-over from Hood Street to Macadam Avenue to relieve Harbor Drive of the Oswego traffic: The Engineer reported that pursuant to instructions given him at the meeting November 10, he discussed this matter with Commissioner McIver but they did not inspect the premises so no report is ready now. The matter was ordered removed from the list of unfinished business with the understanding that a report will be rendered later.

6. Proposed picnic area at junction of US30 and Starkey Secondary Highway on which the Parks Superintendent had been previously authorized to negotiate for acquisition of federal land only: Commissioner Reynolds advised that this project is still in progress. The Commission ordered the item retained on the list of unfinished business.

7. Proposed addition to Umpqua Lighthouse State Park -- acquisition of property from Menasha Woodenware Company: The Right of Way Engineer reported that the Company has signed an option whereby it agrees to sell to the State at the rate of $35.00 per acre, 42.02 acres of land tnat the State needs as right of way, and, in addition thereto, the Company agrees to deed to the State, without cost, 111.81 acres for park purposes. He recommended acceptance of the settlement thus arranged. The Commission approved the recommendation and ordered closure of the transaction on the basis thereof. The item is to be deleted from the list of unfinished business.

8. Collection of the amount of the bid bond furnished by State Construction Company with its proposal to construct the piers for the Marion Street Bridge across the Willamette River at Salem: The Chief Counsel reported that no new developments had occurred. The Commission ordered this item retained on the list of unfinished business.

9. Maintenance of gasoline pumps on highway right of way: The Engineer reported that, as previously instructed, a study is being conducted on a state-wide basis with a view to ascertain facts necessary for the adoption of a standard policy, and that the report will be ready in a month or two. The Commission ordered the item retained on the list of unfinished business.

10. Astoria-Megler Ferry terminal: Proposed expenditure of $175,000 to reconstruct Astoria terminal. The Commission ordered this item deleted from the list of unfinished business, instructing the Engineer, however, to render an up-to-date report on the subject, which is to be considered new business when it is presented.

11. Wage increases and cost of living adjustment: Chairman Chandler recalled that the Commission at its November meeting approved the revised pay plan and cost of living adjustment as recommended by the Civil Service Commission and the Governor. The Commission decided that the matter of further wage adjustments should be considered as new business when it again arises -- in the meantime, the item is to be deleted from the list of unfinished business.

12. Proposed development of Rooster Rock State Park on the Columbia River Highway in Multnomah County: The Commission ordered this item removed from the list of unfinished business.

13. Improvement of the Loon Lake Creek Bridge Section of the Umpqua Highway: The Engineer reported that as previously instructed, this project will be included in the next construction program.

14. Claim of Enterprise Telephone Company for reimbursement for expenses incurred in re-arranging its telephone lines in Enterprise to accomodate a highway improvement. The Chief Counsel reported that the moving of the telephone poles was not ordered by any employee of the State Highway Department. He suggested that the matter be dropped until the Company takes action. The Commission approved the suggestion and ordered the item deleted from the list of unfinished business.

15. Special improvements to state highway routes in small towns: It was recalled that the Commission at its meeting on October 26 authorized improvement of the Oregon Coast Highway in the town of Florence and instructed the Engineer to ascertain if there are other places in the state where similar conditions exist. The Commission ordered this item deleted from the list of unfinished business. It is to be considered as new business when the subject again comes up for discussion.

16. Proposed wayside picnic area near Red Bridge on the Starkey Secondary Highway, Union County: This matter was briefly discussed but action deferred at the request of Commissioner Reynolds who stated that he is studying the matter and will report results at the next meeting of the Commission.

17. Wallowa Lake State Park. Acquisition of additional area for over-night parking purposes: The Parks Superintendent reported that no new developments had occurred in the negotiations with Mrs. Wiggins for the property. The Commission ordered this item retained on the list of unfinished business.

18. Request of City of Nyssa for construction of full width pavement and curbs on US20 within the city. Action was again deferred on this matter pending inspection of the project by Commissioner Reynolds and the Engineer. Retain on list of unfinished business.

19. Controversy with Andy Gigler regarding an advertising sign on South Sixth Street in Klamath Falls: The Chief Counsel reported that he would send someone in company with an officer of the law to have the sign removed from the state highway right of way. In view of the report, this item was ordered removed from the list of unfinished business.

20. Request of the City of Portland for State aid in constructing a by-pass on Sandy Boulevard (US30) at 33rd Street. The Commission ordered this item removed from the list of unfinished business. It is to be considered as new business if it again arises.

21. Request of the City of Corvallis for rerouting of US99W on First Street in Corvallis so as to by-pass the business district: The Engineer reported that as instructed at the November meeting, a study of the matter is under way. The Commission ordered the item retained on the list of unfinished business.

A delegation representing the Oregon U. S. Highway 20 Association appeared before the Commission requesting improvements to Highway U. S. 20. Included in the group were the following: F. E. Gilkey, Lincoln County Judge; Darwin Nash, Newport; James Howes, Association Secretary, Newport; Frank Updike, President, Oregon U. S. Highway 20 Association; Alex Allen, Councilman, Toledo; H. C. Bogert, Mayor-elect, Toledo; Mrs. H. C. Bogert, Councilwoman, Toledo; M. G. Hammerness, Mayor of Toledo and Director of Oregon Highway 20 Association; Joseph P. Maker, President of the Toledo Chamber of Commerce; Ernest Willer, Past President U. S. 20 Association, Newport; William Niskanen, Vice-President, U.S.Highway 20 Association, Bend; John H. Gallagher, Director, U. S. Highway 20 Association, Corvallis.

Mr. Hammerness headed the group and introduced the members of the delegation. He urged improvement of U.S. Highway 20 between Newport and Corvallis, particularly the section between Newport and Toledo, then easterly across the state. He urged acquisition of necessary rights of way between Newport and Toledo in 1951 and that this section be improved at the earliest

possible date from the military and evacuation standpoints. He alleged that U. S. 20 is a vital east-west route across Oregon and, in the event of a disaster, would be a much needed highway to relieve traffic on the Columbia River Highway. He also said that the Association will support a bond issue to finance highway construction and he asked the Commission for assurance that the Toledo-Newport section will be constructed soon.

Mr. Gallagher presented a letter in favor of development of this highway emphasizing its strategic value as an east-west route. (At his request the letter was read aloud by the Commission's Secretary.) He inquired if the Commission will furnish maps and other data concerning U. S. Highway 20 for the Association's information. He was informed by Chairman Chandler that the Commission will be glad to accommodate the Association with any information that is available and he was instructed to make his wants known to the Engineer at the Salem office. In reply to a further inquiry from Mr. Gallagher as to the Newport-Toledo section, Chairman Chandler advised that the survey for this section is now about 50 percent complete and will be finished --also that the Commission is interested in the project and hopes to be able to construct it within a reasonable length of time. He also outlined briefly other improvements that the Commission has in mind for this highway, including the following, which, he said, the Commission hopes to be able to undertake soon: Bend-Tumulo Section; section across the northeast corner of Lake County; realignment of Sage Hen Hill grade; and improvements between Juntura and Vale. He pointed out that the Commission, in order to undertake more rapid development of highways, and to catch up with its contemplated program must have more money which the Legislature is going to be asked to provide by authorizing the sale of bonds. He mentioned a number of improvements on the state highway system that the Commission hopes to finance with the bond money. Mr. Niskanen urged fast action on the following U. S. 20 projects: Better maintenance between Juntura and Vale, and standardization of the section between Bend and Tumalo, including a new bridge across Deschutes River.

Judge Gilkey urged the improvement between Toledo and Newport and advised that the county will assist as much as possible in obtaining right of way.

Chairman Chandler concluded the discussion by stating that he had outlined as fully as is possible what the Commission has in mind for U. S. 20, but how soon the improvements can be accomplished depends upon how soon the money becomes available to finance them. He assured the delegation that their requests will be given fair consideration.

The meeting recessed at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

Mr. J. C. Minson, County Commissioner, Crook County, appeared before the Commission concerning improvement of the Paulina Secondary Highway No. 380, with particular reference to the section across Combs Flat. He referred to a newspaper item to the effect that Federal Aid Secondary Funds will be available after the first of the year and he inquired, if such allocation is made, what improvement can they expect on the Paulina Highway. He was informed that the

allocation of Federal Aid Secondary Funds has not yet been made but is anticipated sometime in January, and until the regulations for the expenditure of the funds is received, the Commission cannot make commitments. Mr. Minson was assured that this project will not be overlooked in formulating the Secondary Construction Program.

The Right of Way Engineer presented a damage claim from Mr. R. C. Barrie, owner of a service station at the junction of the Payette Spur with the Old Oregon Trail north of Ontario, in Malheur County. He explained that the State purchased some right of way from Mr. Barrie in 1932 and that he was permitted at that time to maintain his service station on the property in lieu of the State going to the expense of moving it; further, that as a result of the improvement of the highway last year which necessitated raising the highway grade, the service station has been left in a hole. Mr. Barrie, he said, has protested vehemently but finally has agreed to a cash settlement whereby if the State will pay him $1125.00, he will move his buildings from the State's property at his own expense, and will release the State from further obligation. He recommended approval of such settlement. The Commission approved the recommendation unanimously on the condition that Mr. Barrie will give the State a complete release for all damages, in writing, and will move the buildings before any money is paid him.

The Right of Way Engineer also presented a request from a Mr. Harold Hurley for a revision of his point of access to the Pacific Highway about four miles south of Canyonville. He explained that Mr. Hurley now has two access points which are rather far apart and all that he wants is permission to substitute a new location for one of them, which will create no additional hazard to the traveling public and has the approval of the Engineer. He recommended approval of the change. The Commission approved the recommendation.

The Engineer brought up for discussion the improvement of several county roads in Jefferson County as Federal Aid Secondary Highway projects, particularly the following:

South Unit, Gateway-Agency Plains Highway No. 546 -- 8 miles of pit run surfacing, estimated cost $50,000.

Metolius-Culver Highway No. 548 -- 9 miles crushed rock surfacing, estimated cost $55,000.

Culver-Juniper Butte Highway No. 547 -- 7 miles crushed rock surfacing, estimated cost $45,000.

He recalled that these county roads were placed on the Federal Aid Secondary Highway system by resolution adopted by the Commission at its meeting on September 28, 1950, as substitutes for the Willowdale-Ashwood Road, for which an amount of $150,000 was allocated in the 1950-51 Federal Aid Secondary Highway program, but the Commission did not at that time authorize the transfer of the funds. He asked the Commission to approve the transfer of the funds so work might proceed. The Commission approved the re-allocation of funds as requested.

The Commission discussed a proposed agreement with Lane County providing for the disposition of certain portions of the Springfield-Creswell Secondary Highway No. 222 which will be rendered valueless from the state highway standpoint when the new bridge over the Willamette River at Jasper is completed. The Engineer exhibited a map showing the new highway location and the old road that is to be disposed of. He particularly pointed out that a short section of the old road just east of the town of Jasper must be maintained as a public highway for the benefit and services of people residing thereon, but another section, on which the old bridge is located, may be allowed to revert to the owners of abutting property if the county court so desires. He recommended approval of the agreement, which provides that both sections shall be abandoned as a part of the state highway, and turned over to the County Court of Lane County for future control. The Commission approved the recommendation unanimously, and thereupon signed the agreement, which previously had been signed by the Lane County Court.

The Engineer presented for the Commission's consideration a revised plan for the improvement of US99E in North Salem, which plan contemplates the off-street parking of vehicles rather than the widening of the highway as originally intended. He recalled that the Commission's agreement with the City of Salem covering highway improvements within the city, provides that the State shall widen certain portions of the present highway where such widening work can be done at reasonable expense and that the city shall provide off-street parking areas for cars along other portions where no widening is contemplated because of building construction. He said that the current estimated cost to do the widening work is $65,000, whereas the cost to provide additional off-street parking space for the same number of cars that would be accommodated by the widening work is only about $45,000, in view of which he recommended approval of the plans, as revised, which would effect the saving of some $20,000 of state funds. He exhibited a map showing what he had in mind. This matter was given very careful consideration by the Commission and in the discussion of it the Chief Counsel advised that the Commission is without legal authority to spend state funds for off-street parking purposes. He read aloud provisions of the agreement with the City and particularly pointed out that it is the obligation of the city to provide such parking areas. As a result of the discussion the Commission decided unanimously to adhere strictly to the provisions of the original agreement. The Engineer was instructed to expedite the completion of the plans for the Salem by-pass project, and to arrange for contracting as rapidly as is possible other projects which have been approved by the Commission.

The Chief Counsel reported difficulties in obtaining right of way from a number of the property owners along the Cedar Point-Coquille Section of the Oregon Coast Highway, Coos County. He requested authority to condemn the right of way in the event that further negotiations reveal that procedure necessary. The Commission indicated its approval of the request, but instructed the Chief Counsel to consult with Chairman Chandler before taking action. It was left with Chairman Chandler to decide definitely whether or not to condemn the properties, and to specify the amounts of the several offers in condemnations if condemnation action is required.

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3:00 p.m. Chairman Chandler announced the Commission's decision with respect to each project as follows, the Commission's action in each case being by unanimous vote:

"Construction of rock base, paving and structures on the Cedar Point-Coquille Section of the Oregon Coast Highway in and north of the city of Coquille. Coos Bay Dredging Company, Coos Bay, submitted the low bid for this job at $298,774.90. Four higher bids were received. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading, surfacing and construction of a bridge on the Rocky Creek-Wocus Marsh Section of the Klamath Lake Secondary Highway about 17 miles north of Klamath Falls, Klamath County. F. L. Somers, Klamath Falls, submitted the low bid for this job at $334,015. Four higher bids were received. The Commission has rejected all of the bids as being too high.

"Grading and surfacing on the Goose Lake Section of the Cottonwood Creek and West Side county roads about six miles west and north of Lakeview, Lake County. F. L. Somers, Klamath Falls, submitted the low bid for this job at $89,384. Twelve higher bids were received. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading, surfacing and oiling bridge approaches on the Willamette River (Jasper) Bridge Section of the Springfield-Creswell Secondary Highway, Lane County. Rex C. Ayers Construction Company, Portland, submitted the low bid for this work at $8,526.50. Four higher bids were received. The Commission has awarded the contract to the low bidder, Rex C. Ayers Construction Company, at its bid price.

"Construction of concrete viaduct approaches to the Willamette River Bridge at Salem, in Marion and Polk counties. General Construction Company, Portland, submitted the low bid for this work at $787,736. Four higher bids were received. The Commission has awarded the contract to General Construction Company at its bid price.

"Rock production on the Wasco-Heppner Highway west of Heppner in Morrow County. Rush Construction Company, Enterprise, submitted the low bid for this job at $19,110. Five higher bids were received. The Commission has awarded the contract to the low bidder, Rush Construction Company, at its bid price.

"Rock production project on the Mitchell-John Day River Section on the Ochoco Highway east of Mitchell, in Wheeler and Grant counties. Rogers Construction Company, Portland, submitted the low bid for this job at $28,680. Six higher bids were received. The Commission has awarded the contract to the low bidder, Rogers Construction Company, at its bid price."

There being no further business to come before the Commission at this time, the meeting adjourned at 3:00 p.m.

Chairman

State Highway Engineer

ATTEST:

Secretary

Commissioner

Commissioner

EXHIBITS "A" THROUGH "L"

Minutes of December 19 and 20, 1950

EXHIBIT "A"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SULLIVAN GULCH HIGHWAY - UNIT #2

15924 - The First National Bank, Portland; Henricke, Dr. Samuel George. (Mayhew)
Right of Way and Easement
Option expires April 26, 1951

1600 sq. ft. with lawn and retaining wall	$ 2,460.00	
Severance 3% of remainder estimated at $63,500.00	1,900.00	
Charged to Right of Way		$ 4,360.00
THINGS TO BE DONE BY THE STATE:		
Deed following property to Grantor		
Lot 2, Block 31, Laurelhurst Addition 2375 sq. ft. at $.40 per sq. ft.	950.00	
Lot 3, Block 31, Laurelhurst Addition 1625 sq. ft. at $.35 per sq. ft.	568.75	
Lot 4, Block 31, Laurelhurst Addition 1375 sq. ft. at $.30 per sq. ft.	412.50	
Credit to Right of Way		1,931.25
GRAND TOTAL - To be paid owner		$ 2,428.75

Access controlled - No access allowed.

EXHIBIT "A" (cont.)

SULLIVAN GULCH HIGHWAY - UNIT #3

14814 - Adams, Gerald Wayne; Life Estate to Frances Adams Rexford (Boone)
Right of Way
Option expires May 3, 1951

4,250 sq. ft. at $.20 per sq. ft.	$ 850.00	
House: 960 sq. ft. at $5.90 per sq.ft.	5,664.00	
Allowance - To clear Title	146.00	
Amount to be paid owner - chrg to Right of Way		$ 6,660.00

Takes all -

14821 - Palmer, Harmon S. and Lillian A. (Boone)
Right of Way
Option expires April 23, 1951

7,500 sq. ft. at $0.25 sq. ft.	$1,875.00	
House - 1½ story, 1288 sq. ft.with garage	9,859.00	
Amount to be paid owner - chrg to Right of Way		$11,734.00

Takes all -

SULLIVAN GULCH HIGHWAY - UNIT #5

15530 - McFadden, William and Orrille (Johnson)
Right of Way
Option expires May 6, 1951

1.92 acres at $1,000.00 per acre	$1,920.00	
Bunk house, 240 sq. ft. at $2.00	480.00	
Chicken house 1080 sq. ft. at $2.50	2,700.00	
Severance damages, 10% on remaining	960.00	
Amount to be paid owner - chrg to Right of Way		$ 6,060.00

Access controlled - No access allowed

15527 - Gaines, Ray B. and Ruby (Johnson)
Right of Way
Option expires January 24, 1951

1.71 acres at $1,200.00 per acre	$2,052.00	
Barn, 442 sq. ft. at $2.00 per foot	884.00	
Severance damages - 1.3 acres at $768.54 per acre	1,000.00	
Amount to be paid owner - chrg to Right of Way		$ 3,936.00

Access controlled - No access allowed.

EXHIBIT "B-1"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Salem-Dallas Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate, construct, and improve the Salem-West Salem Section of said Salem-Dallas Highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Salem-Dallas Highway is a major highway of the State, and as such carries large volumes of traffic, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, two members thereof being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation, construction, improvement, and maintenance of the Salem-West Salem Section of the Salem-Dallas Highway three parcels of real property located in Polk County, Oregon, and described as follows, to-wit:

Parcel No. 1
Owner: Gilbert A. Lieser
File No. 16386

A parcel of land lying in West Salem, situated in Township 7 South, Range 3 West, W. M., Polk County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Gilbert A. Lieser, recorded in Book 131, Page 500,

(cont.)

of Polk County Record of Deeds; the said parcel being the southerly 80 feet of said property, the northerly line of said parcel being 70 feet southerly from and parallel to the southerly line of Edgewater Street, containing 4,000 square feet.

Parcel No. 2
Owner: A. L. Cummins and Lillian H. Cummins
File No. 16387

A parcel of land lying in West Salem, situated in Township 7 South, Range 3 West, W. M., Polk County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to A. L. Cummins and Lillian H. Cummins recorded in Book 133, Page 139 of Polk County Record of Deeds; the said parcel being the southerly 80 feet of said property, the northerly line of said parcel being 70 feet southerly from and parallel to the southerly line of Edgewater Street, containing 4,000 square feet.

Parcel No. 3
Owner: Karl Heyden and Mildred Heyden and John Painter
File No. 16384

A parcel of land lying in Sections 21 and 22, Township 7 South, Range 3 West, W. M., Polk County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Karl Heyden and Mildred Heyden, recorded in Book 132, Page 8, of Polk County Record of Deeds; the said parcel being the southerly 80 feet of said property, the northerly line of said parcel being 70 feet southerly from and parallel to the southerly line of Edgewater Street, containing 4,000 square feet.

2. That in addition to acquisition of fee simple title to the aforesaid-described parcels of real property, it is necessary that there be acquired or extinguished such interest or rights, if any there be, by which rights of access or any rights in the nature of rights of access may accrue by virtue of the adjacency of the relocated Salem-Dallas Highway, when constructed upon the aforesaid-described parcels of real property, to the remaining lands of the larger tracts, of which the aforesaid-described parcels are parts, and that all access to the aforesaid-described parcels and the Salem-Dallas Highway, to be constructed, thereon, from said remaining lands of said larger tracts, and all approaches or access from said highway to said remaining lands be restricted and prohibited.

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the nineteenth day of December, 1950.

EXHIBIT "B-2"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to, or any interest in, any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the T. H. Banfield Expressway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing, and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation of motor vehicles promoted, and highway travel in general safeguarded, the real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members thereof being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the T. H. Banfield Expressway, for the purpose of establishing, constructing and maintaining a throughway, the following-described property, to-wit:

Parcel No. 1
Owner: Bessie Brudwig
File No. 14876

Lots 1 and 2, Block 12, Lee-Bow Park Addition to the City of Portland, situated in Section 33, Township 1 North, Range 2 East, W. M., Multnomah County, Oregon, containing 5,000 square feet.

Parcel No. 2
Owner: Joseph Trail
File No. 14875

Lots 1 and 2, Block 11, Lee-Bow Park Addition to the City of Portland, situated in Section 33, Township 1 North, Range 2 East, W. M., Multnomah County, Oregon, containing 9,400 square feet.

Parcel No. 3
Owner: Perry A. Jorgensen and Sarah Jorgensen
File No. 15502

A parcel of land lying in the East half (E½) of Section 28, Township 1 North, Range 2 East, W. M., Multnomah County, Oregon, and being the following-described property: That tract of land known as Tax Lot 79 which was conveyed by that certain deed to Perry A. Jorgensen and Sarah Jorgensen, recorded in Book 1197, Page 97, of Multnomah County Record of Deeds; the said parcel being described as follows:

A tract of land beginning at a point in the east side line of Section 28, Township 1 North, Range 2 East of the Willamette Meridian, said point being South 0° 35' 15" West 1396.1 feet from the northeast corner of said Section 28; running thence North 89° 53' 45" West 341.51 feet to an iron pipe on the easterly line of right of way of the O.W.R.R. & N.Co., thence southwesterly along said easterly line of right of way a distance of 80.18 feet to an iron pipe; thence South 89° 53' 45" East on a line 75 feet southerly from and parallel with the northerly boundary line of the within described tract, a distance of 369.07 feet to a point in the east line of said Section 28; thence North 0° 35' 15" East 75 feet to the point of beginning; excepting all that part thereof which is included within the boundaries of County Road No. 444, otherwise known as N. E. 102nd Avenue in the County of Multnomah and State of Oregon.

EXHIBIT "B-2" (cont.)

Except that tract of land conveyed to John C. Koeser and Mildred G. Koeser by deed dated November 28, 1949, and recorded December 2, 1949, in Deed Book 1374, Page 62 of Multnomah County Deed Records.

The parcel of land to which this description applies contains 0.39 acre, more or less.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said property.

4. That upon the trial of any suit or action instituted to acquire the said property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the 19th day of December, 1950.

EXHIBIT "B-3"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Sunset Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and improve the Sylvan Section of the Sunset Highway, and to construct and maintain approach or connecting roads between the said highway and S. W. Scholls Ferry Road, Multnomah County Road No. 1202, S. W. Hewitt Blvd., Multnomah County Road No. 405, and S. W. Humphrey Blvd., Multnomah County Road No. 1263, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members thereof being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, construction, improvement, and maintenance of the Sylvan Section of the Sunset Highway and the construction and maintenance of approach or connecting roads between said highway and S. W. Scholls Ferry Road, Multnomah County Road No. 1202, S. W. Hewitt Blvd.; Multnomah County Road No. 405, and S. W. Humphrey Blvd., Multnomah County Road No. 1263, a parcel of real property located in Multnomah County, Oregon, described as follows, to-wit:

A tract of land lying in the West half ($W\frac{1}{2}$) of Section 6, Township 1 South, Range 1 East, W. M., Multnomah County, Oregon, being more particularly described as follows:

Beginning at a point 14.96 chains north and 4.5 chains west of the quarter corner between Sections 6 and 7, and running thence west 6.97 chains; thence north 400 feet to the south line of Canyon Road; thence easterly along said south line of Canyon Road 6.97 chains to a point

(cont.)

north of the beginning point; and thence south to the point of beginning. Except 0.4 acre added for correction (1927) and except 0.64 acre for County Road Nos. 1138 and 979.

The foregoing-described property is referred to in the records of the Multnomah County Assessor as Tax Lots 45 and 48 of Section 6, Township 1 South, Range 1 East, W. M., and comprises a total of 3.36 acres.

2. That the highway facilities for which the aforesaid property is required and is being taken have been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owner.

5. That this resolution be entered in full in the minutes and records of the Commission as of the nineteenth day of December, 1950.

EXHIBIT "C"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Old Oregon Trail

Highway number: 6 Route number: US 30

Location of Termini			Established Speed
M.P. 419.043 (West end of Snake River Bridge east of Ontario)	to M.P. 419.133 (Oregon-Idaho State line on Snake River Bridge east of Ontario)		25 miles per hour

(cont.)

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

BE IT FURTHER ORDERED that this resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 19th day of December, 1950.

EXHIBIT "D"

Minutes of December 19 and 20, 1950

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws, 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the first six-month period of 1950 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Amity	$2,187.47	Jefferson . . .	$2,131.93
Arlington . . .	1,878.94	Malin	1,650.63
Butte Falls . .	1,045.91	Monument. . . .	364.06
Carlton	2,974.22	North Powder. .	1,160.07
Coburg.	2,017.78	Rockaway. . . .	2,937.19
Condon.	2,832.29	Sherwood. . . .	1,737.02
Cornelius . . .	2,409.61	Sodaville . . .	305.44
Culver.	558.44	Summerville . .	246.82
Dufur	1,209.43	Troutdale . . .	1,659.88
Eastside. . . .	2,736.65	Waldport . . .	1,943.73
Estacada. . . .	2,076.40	Wasco	934.84
Florence. . . .	1,866.60	Wheeler	799.09
Imbler.	561.52	Yamhill	1,289.65
Ione.	808.34	Yoncalla. . . .	1,166.24

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

EXHIBIT "D" (cont.)

3. That the resolutions adopted by the City of Sisters and approved by the State Highway Commission for the years 1947, 1948, 1949, and 1950 (First Half) be modified in accordance with the resolution adopted by the City of Sisters on November 9, 1950, and placed on file with the State Highway Commission.

4. That the resolutions adopted by the City of North Powder and approved by the State Highway Commission for the years 1949 and 1950 (First Half) be modified in accordance with the resolution adopted by the City of North Powder on November 6, 1950, and placed on file with the State Highway Commission.

5. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 19th day of December, 1950.

EXHIBIT "E"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3214 with Lindstrom Bros., Inc., for constructing the Elk Creek Bridge and Sunset Boulevard Overcrossing in Clatsop County, completed November 10, 1950.

Contract No. 3296 with A. H. Saxton & Sons for oil mat surfacing on the Forest Boundary-Jones Ranch Section of the Ochoco Highway in Wheeler County, completed November 10, 1950.

Contract No. 3339 with Meade & Hobson for constructing the Powder River bridge in Baker County, completed October 25, 1950. Acceptance was held pending time extension approval.

Contract No. 3357 with R. H. Jones for constructing a maintenance building at Prospect, in Jackson County, completed November 30, 1950.

Contract No. 3375 with Groesbeck & Hickson for grading and topping on the Hilgard Junction-Red Bridge Section of the Starkey Highway in Union County, completed December 8, 1950.

Contract No. 3377 with Parker-Schram Co. for grading and paving on the Beaverton (Broadway Avenue) Section of the Beaverton-Hillsdale Highway in Washington County, completed November 15, 1950.

Contract No. 3393 with Rich & Sons Nursery for constructing guard rail on the Coos Bay-Roseburg and Oregon Coast Highways in Coos and Curry Counties, completed November 30, 1950.

Contract No. 3401 with R. E. Steelman Construction Co. for excavation and embankment on the Oneonta Borrow Pit Section of the Columbia River Highway in Multnomah County, completed November 3, 1950.

Contract No. 3264 with Warren Northwest, Inc., for pavement resurfacing on the Jordan Creek-McNamars Camp Section of the Wilson River Highway in Tillamook County, completed September 25, 1950.

EXHIBIT "E" (cont.)

Contract No. 3287 with C & S Electric for installation of traffic signals in Eugene, completed November 22, 1950.

Contract No. 3404 with Gilbert Roberts for constructing a maintenance building at Mitchell in Wheeler County, completed December 5, 1950.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "F"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Oregon Coast Highway known as the Tillamook-Pleasant Valley Section in Tillamook County, the northerly terminus of which is at Highway Engineer's Station 383+00 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 92+86.8 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, which eliminated sections or areas are no longer needed for state highway purposes; and

WHEREAS, Tillamook County, the City of Tillamook and the Commission have entered into an agreement under date of January 25th, 1949, relating to the use and jurisdiction of said abandoned sections; and

WHEREAS, the contract for the construction of said relocated section of the Oregon Coast Highway has been completed and highway traffic is now routed over said new section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the construction of the section of the Oregon Coast Highway, State Highway No. 9, which section begins at State Highway Engineer's Station 383+00 on the new route and ends at State Highway Engineer's Station 92+86.8 of the new route, is now completed; therefore, the sections of the old route herein defined and described as Units "A", "B" and "C" shall no longer be a part or parts of the route of the Oregon Coast Highway, State Highway No. 9, but shall be and hereby are eliminated therefrom.

2. That the portions of the old right of way which by reason of the relocation of said highway are no longer within the boundaries of the new right of way, which parts or units for the purpose of this resolution are identified as Units "A" and "B" and are shown colored in red on map attached hereto and marked "Exhibit A", and are more particularly described as follows:

(cont.)

EXHIBIT "F" (cont.)

Unit "A"

Beginning at State Highway Engineer's Station 94+00 of the relocated Oregon Coast Highway in the Northwest quarter of the Southwest quarter of Section 21, Township 2 South, Range 9 West, W. M.; thence northerly via the former route of the Oregon Coast Highway to State Highway Engineer's Station 205+50 of the relocated Oregon Coast Highway in the Southwest quarter of the Southwest quarter of Section 8, Township 2 South, Range 9 West, W. M.

Unit "B"

Beginning at State Highway Engineer's Station 279+00 of the relocated Oregon Coast Highway in the Northeast quarter of the Southeast quarter of Section 6, Township 2 South, Range 9 West, W. M.; thence northerly via the former route of the Oregon Coast Highway to the south city limits of the City of Tillamook, 62.26 feet north of the Southwest corner of Section 30, Township 1 South, Range 9 West, W. M.

shall hereafter be maintained by the County as county roads for the benefit and service of persons living thereon and communities served thereby. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said roads may be assumed and exercised by the County Court of Tillamook County, and said roads shall hereafter be maintained by the County for public travel. **

3. The section of the old route of the Oregon Coast Highway, State Highway No. 9, which for the purpose of this resolution is identified as Unit "C" and shown colored in blue on map attached hereto and marked "Exhibit A", and is more particularly described as follows:

Unit "C"

Beginning at the south city limits of the City of Tillamook, 62.26 feet north of the Southwest corner of Section 30, Township 1 South, Range 9 West, W.M.; thence northerly and easterly via the former route of the Oregon Coast Highway to its intersection with the west right of way line of the new route at State Highway Engineer's Station 382+00 in the Southwest quarter of the Southwest quarter of Section 30, Township 1 South, Range 9 West, W.M.

shall hereafter be maintained by the City of Tillamook as a city street for the benefit and service of persons living thereon and communities served thereby. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the City Council of the City of Tillamook and said road shall hereafter be maintained by the City of Tillamook for public travel. **

EXHIBIT "F" (cont.)

4. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway and other public purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. **

5. The boundaries of all real properties acquired for right of way and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

6. The county court of Tillamook County hereby is respectfully requested to adopt such resolutions and make all appropriate entries and records required of the court to make and establish as a county road the sections of the old right of way which, pursuant to the agreement between the county and the state, are to be taken over by the county and maintained as county roads.

7. That the City of Tillamook, through its municipal officers, hereby is respectfully requested to make, pass and adopt such ordinances or other records as are necessary to place under the control and jurisdiction of the municipality the abandoned section of said right of way which, pursuant to the agreement between the city and the county and the state, is to be taken over by the city and established and maintained as a city street.

8. That this resolution be entered in the minutes and records of the Highway Commission as of the 19th day of December, 1950, and the Secretary be, and he hereby is instructed to deliver to the County Judge of Tillamook County a duly certified copy of said resolution and to the mayor of the city of Tillamook a like certified copy of said resolution. Said Secretary is further authorized to request of the County Judge of Tillamook County and the mayor of the city of Tillamook a certified copy of the respective records with respect to said matter.

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being filed under File No. 200, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "G"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, by the provisions of O.C.L.A., § 115-351, as amended by Chapter 428, Oregon Laws, 1941, the State Highway Commission, with respect to state highways, is authorized to designate main-traveled or through highways, or sections thereof, by placing at the entrance thereto from intersecting highways signs or markers notifying drivers of vehicles to stop before entering or crossing such designated highway or highways, and the State Highway Commission is authorized to designate particular intersections and place such stop signs or markers at one or more entrances thereto; and

WHEREAS, the Highway Commission has heretofore, to-wit: On the twenty-sixth day of August, 1947, adopted a resolution by which several state highways and sections thereof have been declared to be and have been designated as through highways, and the State Highway Engineer instructed to properly mark the same; and

WHEREAS, by said resolution of August 26, 1947, the Highway Commission declared the Woodburn-Estacada Secondary Highway No. 161 between Pacific Highway East junction, near Woodburn (mile post 0.00), and Clackamas Secondary Highway junction, at Estacada (mile post 34.19) to be a through highway, and ordered that all traffic entering said highway from intersecting streets, roads, and highways shall come to a stop before entering said highway, except that vehicles traveling upon said highway shall be required to stop (a) before entering the Monitor-Barlow County Road intersection at mile post 5.26 of said state highway, and (b) before entering Cascade Secondary Highway intersection at mile post 11.34, near the City of Molalla; and

WHEREAS, since the adoption of said resolution of August 26, 1947, a traffic engineering investigation and report have been made, and based upon said investigation and report the State Highway Engineer has recommended that vehicles traveling upon said Woodburn-Estacada Highway not be required to stop before entering said Monitor-Barlow County Road intersection, and that vehicles traveling upon said Monitor-Barlow County Road be required to stop before entering or crossing said Woodburn-Estacada Highway;

NOW, THEREFORE, based upon said traffic engineering investigation and report made by its employees and upon the recommendation of the State Highway Engineer, this Commission, two members being present and voting affirmatively, does hereby find, declare, resolve, and order as follows:

1. That so much of said resolution of August 26, 1947, requiring that vehicles traveling upon said Woodburn-Estacada Secondary Highway No. 161 shall come to a stop before entering said Monitor- Barlow County Road inter-

(cont.)

section at mile post 5.26 of said state highway, be and hereby is repealed; and in all other respects said resolution of August 26, 1947, is hereby reaffirmed.

2. That all vehicles entering said Woodburn-Estacada Secondary Highway No. 161 from said Monitor-Barlow County Road, at the intersection of said state highway and said county road at mile post 5.26 of said highway, shall come to a stop before entering said state highway.

3. That the State Highway Engineer be and he hereby is instructed to place, or cause to be placed, and thereafter maintain the necessary signs and markers to accomplish the traffic control and regulation contemplated by law and by this resolution. Such signs as may be erected at said intersection shall conform to the types and standards heretofore approved by the Commission.

4. The State Highway Engineer is instructed to place such signs or markers as nearly as practicable at the place where said intersecting county road meets a prolongation of the nearest property line of said state highway, and such signs or markers so placed or installed shall indicate or designate to all drivers of motor vehicles entering said state highway from said intersecting county road the place where the stop shall be made.

5. This resolution shall be entered in the minutes and records of the Commission as of the 19th day of December, 1950, and a duly certified copy thereof delivered to the Bureau of Public Roads and to the County Court of Clackamas County.

EXHIBIT "H-1"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Pacific Highway

Highway number: 1 Route number: US 99

Location of Termini		Established Speed
M. P. 191.3 (Jct. Garden Valley Road in Wilbur)	to M.P. 191.6 (School House south of Wilbur)	35 miles per hour

(cont.)

December 19, 1950

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

BE IT FURTHER ORDERED that this resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 19th day of December, 1950.

EXHIBIT "H-2"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of O. C. L. A., § 115-320, as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made of Timberline Secondary State Highway No. 173; and

WHEREAS, the data, facts, and information obtained by said investigation are on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon the engineering and traffic investigation, the Commission has determined that the designated speed set forth in subsection (b) of § 115-320, O. C. L. A., as amended, is greater than is reasonable and safe at certain times of the year because of snow, ice, and other adverse weather conditions, and the Commission has, therefore, determined to designate a different speed upon said highway during the times of the year that such conditions require;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members being present and voting affirmatively as follows:

1. Based upon said engineering and traffic investigation and upon the findings and determination made by the Commission with respect thereto and within the meaning and purpose of O. C. L. A., § 115-320, as amended, it is hereby ordered that the designated speed for any vehicle on said Timberline Secondary Highway No. 173 shall be thirty-five miles per hour during all times that snow, ice, and other adverse weather conditions make said highway unsafe for speeds in excess thereof, and when appropriate signs giving notice of said designated speed are erected on said highway.

2. That the State Highway Engineer hereby is ordered and directed to maintain a continual surveillance of said highway, and at any time when in his judgment snow, ice, and other adverse weather conditions make said highway unsafe for the operation thereon of vehicles at any speed in excess of thirty-five miles per hour, to erect in

(cont.)

appropriate places in sufficient numbers adequate signs giving notice that the designated speed on said highway is thirty-five miles per hour.

3. This resolution shall be entered in the minutes and records of the Commission as of the 19th day of December, 1950, and a certified copy thereof delivered to the Superintendent of State Police and to the Secretary of State.

EXHIBIT "H-3"

Minutes of December 19 and 20, 1950

December 19, 1950

EXHIBIT "I"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner of record of two parcels of land along and adjacent to the Klamath Falls-Lakeview Highway, described as follows, to-wit:

Parcel No. 1:

A parcel of land lying in the Northeast quarter of the Southeast quarter ($NE\frac{1}{4}$ $SE\frac{1}{4}$) of Section 3, Township 39 South, Range 9 East, W.M., in Klamath County, Oregon, and being a portion of the following described property, that tract of land designated as Parcel #2 in that certain deed to State of Oregon, by and through its State Highway Commission, recorded in Book 200, page 155, Deed Records of Klamath County, said parcel being described as follows:

Beginning on the west line of said property at a point 13 feet south of the northwest corner of said property, said point being 53 feet southerly of (when measured at right angles to) the relocated center line of the Klamath Falls-Malin Highway, said point also being 55 feet south and 430.1 feet west of the east quarter corner of said Section 3; thence easterly 150.1 feet, parallel to said highway center line, to the east line of said property; thence along the east, south and west boundaries as follows: South 0° 30' 30" East 137 feet; North 89° 58' 30" West 150.1 feet, and North 0° 30' 30" West 137 feet to the point of beginning, containing 20,550 square feet.

Parcel No. 2:

A parcel of land lying in the Northeast quarter of the Southeast quarter ($NE\frac{1}{4}$ $SE\frac{1}{4}$) of Section 3, Township 39 South, Range 9 East, W.M., in Klamath County, Oregon, and being a portion of the following described property, that tract of land designated as Parcel #1 in that certain deed to State of Oregon, by and through its State Highway Commission, recorded in Book 200, page 155, Deed Records of Klamath County, said parcel being described as follows:

Beginning on the west line of said property at a point 13 feet south of the Northwest corner of said property, said point being 53 feet southerly from (when measured at right angles to) the relocated center line of the Klamath Falls-Malin Highway; said point also being 54 feet south and 749.3 feet west of the east quarter corner of said Section 3; thence Easterly 119.3 feet, parallel to said highway center line, to the east line of said property; thence along the east, south

(cont.)

and west boundaries as follows: South 0° 30' 30" East 137 feet; North 89° 58' 30" West 119.3 feet, and North 0° 30' 30" East 137 feet to the point of beginning, containing 16,344 square feet.

WHEREAS, an investigation has been made and this Commission has received reports from its State Highway Engineer and Chief Counsel that the said property is no longer needed, required, or useful for highway purposes, and

WHEREAS, the said properties were acquired from Klamath County School District by Deed executed December 4, 1946, and recorded December 20, 1946, in Book 200, at Page 155 of the Deed Records of Klamath County, which said deed contained a provision to the effect that the said Klamath County School District should have the first option, for a period of sixty (60) days after determination by the State Highway Commission that any part of the lands conveyed by said deed are not needed or necessary for highway purposes, to repurchase such said access lands at the same price paid per square foot for the lands acquired under said deed, and

WHEREAS, the said lands were purchased at a price of ten (10¢) cents per square foot and Klamath County School District has heretofore given notice that it desires to reacquire title to the access lands hereinabove described at the agreed price of ten (10¢) cents per square foot.

NOW, THEREFORE, BE IT RESOLVED that this Commission hereby finds and declares that the said property is no longer needed, required, or useful for said highway purposes, and

BE IT FURTHER RESOLVED that the State Highway Commission execute and deliver unto Klamath County School District a sufficient Bargain and Sale Deed, without proof of title, conveying the said property to Klamath County School District for a consideration of Three Thousand Six Hundred Eighty-nine and 40/100 ($3,689.40) Dollars, the same being to cover payment for 36,894 square feet at the unit price of ten (10¢) cents per square foot.

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner of record of a parcel of land acquired for the Front Avenue Section of the Pacific Highway West in the City of Portland, described as follows, to-wit:

The West 75.5 feet of Lot 5, Block 56, Caruther's Addition to Caruther's Addition to the City of Portland, in the City of Portland, County of Multnomah and State of Oregon

WHEREAS, an investigation has been made and this Commission has received reports from its State Highway Engineer and Chief Counsel that the said property is no longer needed, required, or useful for highway purposes, and

WHEREAS, the said property has been appraised by competent and experienced appraisers and the reasonable market value thereof found to be the sum of Two Thousand Five Hundred and no/100 Dollars ($2,500.00), and the Commission is desirous of selling and disposing of said property at a price not less than the said appraised amount, without restriction of access to the abutting Pacific Highway West.

NOW, THEREFORE, BE IT RESOLVED that this Commission hereby finds and declares that the said property is no longer needed, required, or useful for highway purposes; and

BE IT FURTHER RESOLVED that the Secretary of the Commission be, and he hereby is authorized and instructed to advertise the said property for sale in accordance with the terms and provisions of Chapter 437, Oregon Laws 1949; - sealed bids for the sale of the said property shall be received by the said Secretary in the office of the Commission in Salem, Oregon, at 2:00 o'clock P.M., on February 23, 1951, which bids shall be opened in the presence of the Commission's Chief Counsel, or his authorized representative. The results and tabulations of the bids received shall be reported to the Commission at its next succeeding regular or special meeting.

Published notice for the receiving of bids shall fix a minimum of $2,500.00 for which the property shall be sold and shall further provide that the sale shall be made for cash or upon terms of 33% of the total bid price as an initial payment, with the balance payable in three equal annual installments on principal accompanied by payment of 6% accrued interest on unpaid balances.

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner of record of two parcels of land along and adjacent to the north bound traffic location of the The Dalles-California Highway, described as follows, to-wit:

Parcel No. 1:

A parcel of land lying in Lot 42, Sothman Addition to the City of Redmond, situated in Section 9, Township 15 South, Range 13 East, W.M., Deschutes County, Oregon, said parcel being described as follows:

Beginning at the northwest corner of said Lot 42; thence South 30 feet along the west line of said Lot 42; thence East 18.5 feet, more or less, to a line parallel to and 30 feet westerly of the center line of 5th Street; thence North 30 feet, parallel to said center line to the north line of said lot; thence West to the place of beginning, containing 0.013 acre.

Parcel No. 2:

A parcel of land lying in Lot 42, Sothman Addition to the City of Redmond, situated in Section 9, Township 15 South, Range 13 East, W.M., Deschutes County, Oregon, said parcel being described as follows:

Beginning at the northeast corner of that tract of land conveyed to the State of Oregon, by deed recorded in Book 94, page 191, Deed Records of Deschutes County, said point being on the north line of said Lot 42, 94.25 feet east of the northwest corner of Lot 42; thence South 30 feet along the east line of said State tract; thence West 15.75 feet, more or less, to a line parallel to and 30 feet east of the center line of 5th Street; thence North 30 feet parallel to said center line to the North line of said lot; thence East to the place of beginning, containing 0.011 acre; and

WHEREAS, an investigation has been made and this Commission has received reports from its State Highway Engineer and Chief Counsel that the said properties are no longer needed, required or useful for highway purposes, and

WHEREAS, the said properties have been appraised by competent and experienced appraisers and the reasonable market value thereof found to be not in excess of the sum of One Thousand and no/100 Dollars ($1,000.00), and

EXHIBIT "K-1" (cont.)

WHEREAS, the City of Redmond, a municipal corporation of the State of Oregon, desires to acquire title to said properties, for the purpose of widening Oak Street in said City of Redmond at its intersection with the said section of The Dalles-California Highway, and the said widening of Oak Street will be an advantage and benefit to the State Highway system of the State of Oregon, and this Commission is desirous of conveying title to the said properties to the said city for such uses and purposes.

NOW, THEREFORE, BE IT RESOLVED, that this Commission hereby finds and declares that the said properties are no longer needed, required or useful for highway purposes, and

BE IT FURTHER RESOLVED that the State Highway Commission execute and deliver unto the City of Redmond, a municipal corporation of the State of Oregon, a sufficient bargain and sale deed, without proof of title and for a nominal consideration of One Dollar ($1.00), conveying the said properties unto the said City of Redmond, for street purposes.

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner of record of a parcel of land along and adjacent to the north bound traffic location of The Dalles-California Highway, described as follows, to-wit:

A parcel of land lying in Lot 42, Sothman Addition to the City of Redmond, situated in Section 9, Township 15 South, Range 13 East, W.M., Deschutes County, Oregon, and being a portion of the following described property, that tract of land which was conveyed by that certain deed to the State of Oregon, by and through its State Highway Commission, recorded in Book 94, page 191, Deed Records of Deschutes County, said parcel being that part of the foregoing described property lying east of a line parallel to and 30 feet east of the center line of 5th Street, except the north 30 feet, said parcel being approximately 270 feet by 15.75 feet, containing 0.098 acre; and

WHEREAS, said property has been appraised by competent and experienced appraisers and the reasonable market value thereof found to be not in excess of the sum of One Thousand Dollars ($1,000.00); and

WHEREAS, the City of Redmond, a municipal corporation of the State of Oregon, desires to acquire the said parcel of land for the construction of a sidewalk on and along the north bound traffic location of The Dalles-California Highway; and

WHEREAS, it has been estimated that the said sidewalk construction will cost the sum of $425.00, and the said city has agreed to release the State of Oregon, by and through its State Highway Commission, from all costs in the construction and maintenance of said sidewalk, in consideration of the conveyance of the parcel of land hereinabove described; and

WHEREAS, it is and will be of advantage to the State of Oregon to convey the said property to the City of Redmond for the said uses and purposes, and for the purpose of being relieved of all costs or obligations in connection with the construction or maintenance of said sidewalk.

NOW, THEREFORE, BE IT RESOLVED that this Commission finds and declares that said property is no longer needed, required or useful for highway purposes; and

BE IT FURTHER RESOLVED, that the State Highway Commission execute and deliver unto the City of Redmond, a municipal corporation of the State of Oregon,

(cont.)

a sufficient bargain and sale deed, without proof of title, conveying said property to said city of Redmond, for the nominal consideration of One Dollar ($1.00) and the benefits and advantages to be derived; and

BE IT FURTHER RESOLVED that the said conveyance of title be upon the basis of a complete restriction of access from the said property to the abutting The Dalles-California Highway, except there may be granted rights of access from the said abutting land to the said highway of a width of not to exceed 25 feet on the easterly side of said highway, opposite Engineer's Stations 44+16 and 45+05, for traveling to and from the abutting land for all lawful purposes.

R E S O L U T I O N

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner of record of a parcel of land along and adjacent to The Dalles-California Highway, described as follows, to-wit:

A parcel of land lying in Lot 42, Sothman Addition to the City of Redmond, situated in Section 9, Township 15 South, Range 13 East, W.M., in Deschutes County, Oregon, said parcel being that part of said Lot 42 lying west of a line parallel to and 30 feet west of the center line of 5th Street and lying south of a line 30 feet south of the south line of Oak Street, said parcel being approximately 270 feet by 18.5 feet, containing 0.115 acre.

WHEREAS, an investigation has been made and this Commission has received reports from its State Highway Engineer and Chief Counsel that the said property is no longer needed, required, or useful for highway purposes; and

WHEREAS, said property has been appraised by competent and experienced appraisers and the reasonable market value thereof found to be not in excess of the sum of One Thousand and no/100 Dollars ($1,000.00), and the Commission is desirous of selling and disposing of said property if a satisfactory offer for said property is received, upon the basis of complete restriction of access to the abutting The Dalles-California Highway, except there is granted the right of access from said abutting land to said highway, of a width not to exceed 25 feet on the westerly side of said highway opposite Highway Engineer's Stations 44+16 and 45+05, for travel to and from the abutting land, for all lawful purposes.

NOW, THEREFORE, BE IT RESOLVED, that this Commission hereby finds and declares that the said property is no longer needed, required, or useful for highway purposes; and

BE IT FURTHER RESOLVED that the Chief Counsel of the Commission be, and he hereby is, authorized and instructed to solicit and receive offers for the purchase of the said property and to report to the Commission the amount, or amounts, of such offer, or offers, together with a complete appraisal of the reasonable market value of the said property, at the next regular or special meeting of the Commission after such offer, or offers, are received.

EXHIBIT "L"

Minutes of December 19 and 20, 1950

R E S O L U T I O N

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner of record of a parcel of land along and adjacent to the Columbia River Highway, described as follows, to-wit:

A parcel of land lying in the south half of the northeast quarter ($S\frac{1}{2}$ $NE\frac{1}{4}$) of Section 12, Township 2 North, Range 7 East, W.M., Hood River County, Oregon, being a portion of the following described property, that tract of land which was conveyed by that certain deed to Alta M. Laber, recorded in Book 37, page 482, Deed Records of Hood River County, said parcel being a triangular tract bounded on the southeast by the northwest line of that tract of land conveyed to Roy L. Duvall and Gertrude B. Duvall, by deed recorded in Book 37, page 575, bounded on the southwest by Edgewood Avenue and bounded on the north by a line parallel to and 150 feet southerly of the relocated center line of the Columbia River Highway, which center line is described as follows:

Beginning at Engineer's center line Station 147+34.49, which station is approximately 515 feet north and 1775 feet west of the east quarter corner of said Section 12; thence on a spiral curve right (the long chord of which bears north 65° 15' 30" East) 400 feet; thence on a 2864.79 foot radius curve right (the long chord of which bears North 69° 17' 30" East) 136.67 feet to Station 152+71.16, the northerly line of said parcel crossing the northeasterly line of Edgewood Avenue approximately opposite Station 151+00, containing 600 square feet.

WHEREAS, an investigation has been made and this Commission has received reports from its State Highway Engineer and Chief Counsel that the said property is no longer needed, required, or useful for highway purposes; and

WHEREAS, said property has been appraised by competent and experienced appraisers and the reasonable market value thereof found to be not in excess of the sum of One Thousand and no/100 Dollars ($1,000.00); and

WHEREAS, in negotiations for right of way it was understood that the above tract of land would be conveyed to Roy L. Duvall and Gertrude B. Duvall, for the consideration of $60.00, for the reason that

(cont.)

it lies outside of the right of way and abuts the property of the Duvalls, and that the same was to be sold by the Highway Department with complete restriction of right of access to the Columbia River Highway from the above described property.

NOW, THEREFORE, BE IT RESOLVED, that this Commission hereby finds and declares that the said property is no longer needed, required, or useful for highway purposes; and

BE IT FURTHER RESOLVED that the State Highway Commission authorizes the sale of the above described property.

Portland, Oregon
January 23, 1951

The State Highway Commission met in regular session at 9:00 a. m. in the Green Room of the Imperial Hotel. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
C. H. Armstrong, Parks Superintendent
M. H. Hawke, Auditor
H. B. Glaisyer, Secretary

Commissioner M. K. McIver was excused. Bids as follows for highway construction were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Chandler announced that the award of contracts would be made at 3:00 p. m.:

January 23, 1951

The Commission approved the minutes of meetings held on October 26, and on November 9 and 10, 1950.

The State Parks Superintendent reported on the following matters:

1. Request of Jaymar Wholesale Lumber Company, Hood River, to purchase timber growing in Seneca Fouts State Park located on the Columbia River Highway near Mitchell Point, Hood River County: The Parks Superintendent recommended that the request be denied. The Commission approved the recommendation.

2. Question of fees to be paid by group campers for use of state park facilities: The Parks Superintendent recommended and the Commission approved rates as follows for use of the facilities at the youth camps at Silver Falls State Park, Emigrant Springs State Park, and other parks where it is possible for youths to camp overnight: Silver Falls Youth Camp, $3.00 flat fee for a group privilege, plus 25¢ per night per each individual; CCC buildings at Silver Falls, Emigrant Springs and Battle Mountain State Parks, $3.00 flat fee for group privileges, plus 15¢ each night for each individual; overnight camping by youth groups in parks where no buildings are used, $3.00 for the first night for a group of twenty or less, and 5¢ per night for each person in excess of twenty and for each night thereafter for the entire group. The Parks Superintendent also recommended and the Commission approved the present method of issuing seasonal permits to organizations for the management of Silver Creek and Smith Creek camps in the Silver Falls recreational area, particularly approving issuance of such permits to the Salem Y. M. C. A. and the Santiam Area Girl Scouts, who have handled the situation in an excellent manner in the past.

3. Proposed state park at Hat Rock near McNary Dam, Umatilla County: County Judge James H. Sturgis appeared before the Commission with regard to this project and accompanying him were Mr. James E. Kuhns, Chairman of the Recreational Committee of the Umatilla County Development Commission, and Mr. B. C. Christiansen, representing the Corps of Army Engineers at Walla Walla, Washington. Speaking in behalf of the project were Messrs. Christiansen and Kuhns. Mr. Christiansen exhibited a map showing in colors the ownership of the various properties, particularly the land owned by Mr. Kik, containing 238 acres, which appears to be the key tract to the entire situation because it is topographically suitable for development and contains a large spring with generous year-round flow. The government-owned land on both sides of the Kik property, he said, can be made available to state agencies without charge on the long-term basis, if it is used for recreational purposes, but the state would have to purchase the property of Mr. Kik. Mr. Kuhns declared that the area is ideally located for recreational purposes, and is

the only logical area for development along the shore of what will be McNary Lake. He pointed out that Mr. Kik has already started to develop his property fronting the Columbia River but has not progressed very far as yet, so his property should not be too costly from that standpoint. He also said that additional land that would have to be purchased is owned by Mr. Richman who contemplates developing it commercially, although he has no definite plans as yet. Mr. Christiansen cautioned that one of the considerations in obtaining the property would be the formulation of a definite plan to develop it, because the people of that part of the state have big ideas about the possibilities of developing the area for recreational purposes and probably would resent the state's taking the land away from the private owners unless it is developed. The matter was discussed at considerable length but action thereon was deferred for study. Following departure of the group, the Commission resumed discussion of the matter with the State Parks Superintendent, who explained further details. Commissioner Reynolds expressed the thought that if the state does not acquire the property now it will not again have such a favorable opportunity to do so, and he gave as his feeling that the matter should be given very careful study, since it appears to be the only feasible area for a state park in this vicinity. Chairman Chandler expressed himself similarly -- in fact, he gave as his feeling that the property should be acquired by the state if it can be purchased at reasonable cost. He also felt that some nice private homes along the river front would not be objectionable from the state park standpoint. As a result of this discussion, the Commission instructed the Parks Superintendent to ascertain from the owners of the property just how much they want for their respective holdings. The negotiations are to be carried on on the following alternate basis: 1) Purchase of the entire holdings of all of the owners; 2) Purchase of all of the property except a strip fronting on the Columbia River that the owners may wish to retain for private purposes. A report is to be rendered to the Commission at its next regular meeting, and sooner, in writing, if possible.

4. Request of Lyda Brothers, Lela Turner and Franck Brothers for permission to use certain state park property along the Wilson River Highway in connection with their logging operations back of the state-owned land: The Parks Superintendent advised that use of the property for the purposes intended will not hurt the park in any way, and he recommended approval of the request. The Commission approved the recommendation.

5. Proposed sale of down and dead timber along the Salmon River Highway in Van Duzer Corridor: The Parks Superintendent advised that Mr. T. C. Barton, Grand Ronde, wants to purchase this timber which is located on the south side of the highway somewhat westerly from timber previously sold. The timber, he said, is scattered and is of no value to the park -- in fact, its removal would be a benefit to the park. He recommended that the timber be sold as a result of competitive bidding for the same. The Commission approved the recommendation.

6, Removal of dead standing timber along Wilson River Highway in Tillamook County: The Parks Superintendent advised that on some of the property which the Highway Commission is conveying to the State Forester along the Wilson River Highway there are a great many dead standing trees, some of which constitute a definite hazard to highway traffic because they are located on exceedingly steep slopes. He suggested that it would be advisable for the Highway Commission to enter into an agreement with the State Forester for the removal of all the snags on these slopes, even where the slopes extend onto the area that the Commission is retaining for highway purposes, and that the State Forester be allowed the benefits of whatever salvage accrues either by removing the trees with his own forces or otherwise, with the understanding that in either case, the operator would be required to furnish liability insurance in sufficient amount to cover any possible damage to the highway or to the traveling public, and that flagmen would be maintained along the highway when operations are underway, as a further safeguard. The Parks Superintendent further stated that he did not believe that it would be possible for loggers to salvage the timber from one exceedingly steep slope opposite Engineer's Station 1420 and he suggested that at that particular location the trees be felled by state forces, which he estimated would cost about $1,000. The Commission unanimously approved the Parks Superintendent's suggestions, both as to the proposed arrangement with the State Forester and as to the removal of the timber on the slope opposite Station 1420, including the expenditure of $1,000 for the purpose.

7, Proposed exchange of properties with the Mt. Emily Lumber Company along Starkey Secondary State Highway, Union County: The Parks Superintendent advised that the State Highway Department owns a small tract of land near the junction of the Starkey Secondary Highway and the Old Oregon Trail in Section 31, Township 2 South, Range 37 East, W. M., and in Section 6, Township 3 South, Range 37 East, W. M., which it acquired from Mr. K. W. Siegrist and which the Mt. Emily Lumber Company is desirous of owning. This tract, he said, contains about ten acres of land which is not particularly of value for state park purposes, being excess property, and in order to obtain title to it the company is willing to deed to the state a 40-acre tract located near Red Bridge on the Starkey Highway, which the state desires for park purposes. He gave as his feeling that this is a very fair exchange in properties, and recommended approval of the arrangement. He also stated that if the Commission acquires the 40-acre tract he would like authority to spend about $2,600 to develop it, including the furnishing of a water supply, stoves, tables, restrooms, etc. The Commission unanimously approved the exchange of properties and also authorized the expenditure of $2,600 for the development of the 40-acre tract.

8. Proposed picnic area at junction of Starkey Secondary Highway and Old Oregon Trail near Hilgard: The Parks Superintendent advised that he received a communication from the U. S. Forest Service, which owns this tract, stating its willingness to grant to the state a special-use permit for the use of the area for the purpose intended. This area, he said, contains about 8 acres of land located in the SE 1/4 of the SE 1/4 of Section 31, Township 2 South, Range 37 East, W. M., and lies south of the Old Oregon Trail. He recommended acceptance of the offer and that he be authorized to spend about $2,000 for development of a water supply and to furnish tables, stoves, restrooms, etc. The Commission unanimously approved the recommendation, including the $2,000 expenditure.

9. Letter from Mr. Thornton T. Munger to Governor McKay regarding developing of a state park program: The Parks Superintendent advised that he has discussed park matters with the Portland Chamber of Commerce Recreational Committee, Mr. Munger being present, during which he outlined the policy and plans of the Highway Commission with respect to acquisition and development of state parks, which appeared to satisfy the majority of the group, although it was not exactly what Mr. Munger hoped for. The Commission ordered the communication filed.

10. Request of Parks Superintendent for authority to inspect overnight camping facilities in western part of the state of Washington: The Parks Superintendent asked that he and Charles E. Low, Engineering Specialist in his department, be permitted to make an inspection of overnight camping facilities in the state of Washington as an aid to similar planning in Oregon. He estimated the expense involved at approximately $40.00. The Commission approved the request unanimously.

11. Proposed addition to Sunset Bay State Park, Coos County: The Parks Superintendent stated that pursuant to instructions from the Commission, the Right of Way Department has carried on negotiations with Mr. Geo. J. Landrith to acquire land that is needed to accommodate overnight camping in this park, but without much success. The Right of Way Engineer explained that Mr Landrith is "soured" on the general public, because his gates are left open and his fences torn down, consequently he is very hard to deal with--in fact, will not listen to reason, so it appears necessary to condemn the property if it is to be acquired. He recommended such procedure. The Commission ordered further negotiations with Mr. Landrith, and authorized the Chief Counsel to condemn the property if it appears that it cannot be acquired by any other means.

12. Maintenance of Vista House at Crown Point: The Parks Superintendent reported that pursuant to a previous arrangement with the Highway Commission, Mr. Jack Flaucher, concessionnaire at the Vista House, Upper Col-

umbia River Highway, desires to close down his business during the months of January and February because of lack of patronage during those months. The roof of the building, he said, leaks very badly and because repairs which are being made by state forces cannot be completed until weather is suitable, Mr. Flaucher has offered to do what is necessary to protect the property from damage during this two-month shut-down period if the Highway Department will pay for heating the building, which is estimated to cost $140.00. He recommended acceptance of the offer. The Commission approved the recommendation.

13. Request for concession privileges at Sandy River Bridge during smelt run in Sandy River: The Parks Superintendent reported receipt of a communication from Mr. Bruce Bender requesting that he be granted permission to sell soft drinks, popcorn, etc., and to rent nets during the time that the smelt are running in the river. The Engineer recommended that the request be denied because of the traffic hazard that would be created thereby. In the discussion of the matter the question arose whether or not the operation of such a concession would create as much of a traffic hazard now as it has in the past, in view of the lesser volume of traffic over this road since the new Columbia River Highway was opened for public use. The Commission indicated that it would grant the concession if the traffic situation is not unfavorable because it would be such a convenience to people who throng there during the smelt run. Accordingly, the Commission deferred its decision in the matter pending a check on the traffic. The Engineer was instructed to investigate traffic conditions and report back to the Commission.

The Commission discussed briefly and ordered filed a letter from Borax, Ltd., London, England, acknowledging receipt of the Commission's letter of November 10 expressing appreciation for the gift of company land near Brookings, Curry County, as a part of S. H. Boardman State Park.

The Right of Way Engineer reported settlement, by stipulation, of the following condemnation cases for acquisition of right of way needed for the Glendale Junction-Johns Section of the Pacific Highway in Douglas County:

State vs. J. B. Moore, and
State vs. Blaine G. Johnson.

The Moore case, he said, was settled on the basis of payment of $6,500, the deeding to the Moores of a small tract of state-owned land, and the granting of three private access points. The Johnson case was settled on the basis of payment of $8,425. The Commission unanimously approved both settlements upon motion of Commission Reynolds.

The Right of Way Engineer presented for the Commission's consideration options that have been obtained for the acquisition of real property that is needed for various state highway purposes throughout the state, and explained details. The Commission considered carefully the terms of each of the options and as a result thereof authorized the Right of Way Engineer to close them at the amounts stated therein. The attached resolution relative thereto marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Chief Counsel requested authority to condemn certain parcels of real property which he has been unable to acquire by negotiation. He presented a list of such properties, together with the offers that he recommends in condemnation, as follows:

			Recommended Offer
Siletz Bay-Newport Section of the Oregon Coast Highway			
R 4251	F. R. Salway (Right of Way) 7.38 acres of land, 0.63 acre within the existing right of way, 2.68 acres within the Atlantic Western Corp. Railway right of way	(Lincoln County)	$ 1,250.00
Weston-Weston Mountain Section of the Weston-Elgin Highway			
R 17047	Olive Key Kirk 4.82 acres quarry site 1.70 acres stockpile site	(Umatilla County)	$ 1,500.00
Chemult-Diamond Lake Junction Section of The Dalles-California Highway			
R 16774	St. Helens Pulp and Paper Co. (Cinder pit) 10 acres with timber 11.52 acres with timber	(Klamath County) $ 800.00 925.00 $ 1,725.00	$ 1,725.00
Unit #4 Section of the T. H. Banfield Expressway			
R 14907	Charles D. Harter (Right of Way) 0.88 acres at $1,500.00	(Multnomah County) $ 1,320.00	

Unit #4 Section of the T. H. Banfield Expressway (cont.)

			Recommended Offer
R 14907	Charles D. Harter (cont.)		
	Moving garage, shed, and reestablish cess pool	$ 700.00	
	10% severance damage to remaining property valued at $7,500.00	750.00	
		$ 2,770.00	$ 2,800.00

Cedar Point-Coquille Section of the Oregon Coast Highway

R16921	Daniel Steinmetz (Coos County)		
	(Right of Way)

		Total: $12,431.00	$12,500.00
R 15921	Lyle E. Hammond (Right of Way) 6.675 acres	(Hood River County)	3,600.00

As a result of careful consideration the Commission unanimously approved the request and the recommended offers. The attached resolutions relative thereto, marked EXHIBITS "J-1", "J-2", "J-3" and "J-4", which resolutions by this reference are made a part hereof with like effect as though extended in full herein, were thereupon adopted by the Commission by unanimous vote.

The Right of Way Engineer reported the following sales of miscellaneous properties and asked the Commission to confirm them. The Commission unanimously approved the sales as reported.

Item	Former Owner and Location	Purchaser	Sale Price
Bath tub	Andrew Gray Bay Park-Delmar Section, Oregon Coast Highway	Walter C. Tugler 301 Sunnyvale Coos Bay, Oregon	$25.00
"Toledo" grocery scales	Andrew Gray Bay Park-Delmar Section, Oregon Coast Highway	Jay Francisco Coos Bay	50.00
Medicine cabinet.	Andrew Gray Bay Park-Delmar Section, Oregon Coast Highway	Charles O. Newton Coos Bay	2.00
Toilet, 2 lavatories, laundry trays	Andrew Gray Bay Park-Delmar Section, Oregon Coast Highway	Mrs. McGuire Coos Bay	24.00

Sales of Miscellaneous Properties (cont.)

Item	Former Owner and Location	Purchaser	Sale Price
3 wooden framed garage buildings	Estate, Laurence J. O. Saldern Broadway Bridge-Steel Bridge, Pacific Highway West	O. K. Auto Sales 4800 NE Union Ave., Portland	$123.23
2 x 6 Door and Switch Box	D. L. Sisson Cascade Locks-Viento Section, Columbia River Hwy.	Richard F. Smart 520 N. 23rd Street Salem	6.00

The Commission discussed a written report from the Right of Way Engineer with respect to a longstanding controversy with Mr. Elmer Bankus, Brookings, concerning right of way on the Oregon Coast Highway north of the town of Brookings, Curry County. (For details see copy of the report and map in general files). Briefly, the Right of Way Engineer explained that when the highway was constructed north of the town of Brookings the Commission acquired considerable right of way from the Brookings Land and Townsite Company, which is owned by Mr. Bankus, the deed being dated October 28, 1940. He said that the settlement was quite involved and the cash consideration paid by the state was $2,561.13, which amount included a certain sum for moving a building; further, that in addition to the cash consideration the Commission deeded to the Brookings Land and Townsite Company several small parcels that were not needed as right of way. He also explained that according to the record, no cash payment was involved in acquiring certain right of way immediately north of the town, although the state did pay some back taxes, and Mr. Bankus alleges that there was an agreement to the effect that the Highway Commission would either landscape the area beyond the limits of the travelled portion of the highway and shoulders, or would deed these areas back to him. The Right of Way Engineer stated that the allegations are not substantiated by the records. He exhibited a map showing the properties under discussion and advised that Mr. Bankus has plans to commercialize them. He gave as his feeling that the state's interests would be served best if title to the properties were retained by the state, and he so recommended. The matter was given very careful consideration by the Commission and as a result of discussion, the recommendation was adopted unanimously.

The Right of Way Engineer presented for the Commission's consideration a lease agreement with the Gilchrist Lumber Company providing for the renewal of a quarry site lease that expired on November 30, 1946. He pointed out that the new lease if for twenty years duration and that the company is making no charge for the use of its property. The Commission approved the lease unanimously. (The lease agreement was signed later in the session).

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. with the same persons present and participating.

The Commission conferred with representatives of the U. S. Bureau of Public Roads and the U. S. Forest Service regarding the programming of fiscal year 1952 Forest Highway funds totaling $3,185,000.00, made up as follows:

Funds Available for Allocation		
1952 F.Y. Apportionment		$2,754,914.00
Less W.O. Reserve	275,491.00	
Less State Contingent	158,135.90	433,626.90
		$2,321,287.10
*Present State Contingent, Unobligated. (Incl. Savings & Returned W.O. Reserve)		863,712.90
Total funds available to allocate to projects		$3,185,000.00

*Included in State Contingent	
Total savings from previous projects	$224,620.90
Reduction of Proj. 15-A2	467,000.00
Returned from W.O. reserve	172,092.00
Total available from previous programs	$863,712.90

Present representing the Bureau of Public Roads were Messrs. W. H. Lynch, Division Engineer, T. M. Davis, District Engineer, Frank E. Andrews, Principal Engineer, Clifford G. Polk, Manager, and R. N. Kellogg, Senior Highway Engineer. Representing the U. S. Forest Service were Messrs. Horace J. Andrews, Regional Forester, James Frankland, Regional Engineer, and William L. McDonald. As a result of discussion it was mutually agreed to recommend to the Chief of the U. S. Forest Service and to the Commissioner of Public Roads, Washington, D. C. the following projects for this program:

TENTATIVE PROJECTS FOR PROGRAM

Project No.	Highway	Type of Work	Miles	Est. Cost	Selected Projects	
					Amount	Remarks
8-C2, B1	Umpqua	Gr., Surf., Bit. Surf. & Bridge	0.75	$ 175,000		Mill Creek Br. & Grading
9-A3, B3, C or A3, B3	Oregon Coast	Grading	9.6	600,000		Grade all or Gr. & Surf. 1/2 + and build overpass.
10-D4	Oregon Coast	Gr., Surf. & Bit. Surf.	1.0	125,000		
12-A2	Redwood	Gr., Surf. & Bit. Surf.	2.0	400,000		Completes Route
16-C4, E4, F5	Tiller-Trail	Surf. and Bit. Surf.	6.6	195,000		Summit North
24-A6, B8, C2	No. Santiam	Surf. and Bit. Surf.	15.5	St/150,000 FH/250,000		Completes surf. & oil, Niagara to Idanha
25-A7	Mt. Hood	Gr., Surf. & Bridges	1.0	110,000		Replaces Twin Bridges & One Mile Bridge
38-A3	Flora--Enterprise	Grading, Surf. and oil.	4.0 8.0	260,000		Grade add'l four miles & surface this & previous job
35-D4	John Day-Burns	Gr., Surf. & Bit. Surf.	8.26	425,000		County line north through Silvies Valley
47-B4	N. Umpqua	Grading	2.3	70,000		Increase present program
21-D4	Willamette	Gr., Surf. & Bit. Surf.	4.0	400,000		From east end of reconstr. by Army
Survey				100,000	100,000	
Maintenance				75,000	75,000	

January 23, 1951

It was understood that this program is tentative only, because the total amount that will be available is not yet definitely known. In addition to the above listed projects, it was also mutually greed that the following are preference projects and must be given first consideration for the next Forest Highway funds that become available: Improvements on the North Santiam Highway and on the North Umpqua Highway, and construction of the Poison Creek section of the John Day-Burns Highway. It was understood that the Poison Creek project includes surfacing and oiling on a previously constructed grade, and that the contemplated work is all that remains to be done to complete this highway throughout its entire length. The further improvement of the Pendleton-John Day Highway in Camas Creek by grading, surfacing and oiling was also considered. This project is six miles in length and is estimated to cost $350,000. It was deleted from the program because of lack of funds to finance it, but is to be considered for future funds.

The State Highway Engineer brought into the discussion the desirability of improving the West Diamond Lake Highway. He said that it was first intended to include this project in the program, but it was omitted because it was thought best to finance the work as a Federal Aid Secondary Highway project. It now develops, however, that this highway is not on the Federal Aid Secondary Highway system. He requested authority from the Commission to ask the federal authorities to approve its designation as a federal aid secondary highway. The Commission approved the request. The Engineer also stated that some thought had been given to an allocation of forest highway funds for the Cascade Lakes Forest Highway which is a hold-over project from a previous program but it was decided to omit this project also because the road is strictly recreational in character and undoubtedly would not be approved because of war-time conditions now existing. Reference also was made to the Starkey-Ukiah Road, it being an extension of the Starkey State Secondary Highway, Union County. Mr. Lynch stated that the Bureau of Public Roads at one time agreed to make a survey of this project but that has not been done because an engineering crew has not been available to assign to the work He gave as his feeling that it might be possible to conduct the survey sometime this year.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and at 3:00 p.m. Chairman Chandler announced the Commission's decision with respect to each project as follows, the Commission's action in each instance being unanimous:

"Grading, surfacing and oiling on the Prineville Section of the Crooked River Highway, in Crook County. There were four bids on this project. The contract has been awarded to the low bidder, Babler Bros., at $7,722.00.

"Caretaker's Cottage in Yaquina State Park just north of Newport, in Lincoln County. T. J. Patzer was the low bidder of three, and the contract has been awarded to him for $13,882.50.

"Redecking of Steel Bridge in Portland. General Construction Company was the low bidder of three for this work. The contract has been awarded this company at its bid of $170,773.00.

"Pavement resurfacing on the Monmouth-Suver Road Section of the Pacific Highway West in Polk County. There were six bids on this project, the lowest being that of Warren Northwest, Inc., at $84,665.00, for which amount the contract has been awarded to them.

"East Unit, La Grande-Ladd Canyon Section of the relocated Old Oregon Trail in Union County. The bid submitted by Leonard & Slate, Oregon Ltd., and E. C. Hall Company as a joint venture, in the amount of $850,863.50 was the lowest of ten submitted. The contract has been awarded to this partnership at its bid price.

"Weston Rock Production Project on five state highways in Umatilla County. Of nine bids submitted on this project the lowest was that of Oscar E. Joelson, at $51,020.00. The bids have been referred to the Engineer with authority to award the contract to the low bidder at his bid price when certain conditions have been satisfied.

"Furnishing ferry service across the Willamette River on the Beaverton-Aurora Secondary Highway at Wilsonville, Clackamas County, for a two-year period beginning April 1, 1951. The contract has been awarded to Theodore E. Bruck, whose bid was $2,490.00 per month.

The Right of Way Engineer brought up for discussion the matter of reimbursing the Standard Oil Company of California for installation of a railroad crossing signal at its bulk plant on the Southern Pacific Railroad in Coos Bay, in the amount of $2,708. He requested authority to reimburse the company for such expense and for additional expenses in the amount of $32,052.82, a total of $34,759.82, as settlement in full of all items and claims pursuant to the agreement effected in 1942. He explained that when negotiations were started in 1942 for the re-arrangement of the company's facilities at its plant, the work was estimated to cost about $16,000 but was not done because of wartime conditions, and in the meantime prices raised so that the final price was practically double that originally estimated. The crossing signal, he said, was not included in the original arrangement but later was deemed necessary because the location is on a curve with short sight distance-- in fact, the company decided that it needed two signals, one at the entrance to its plant and the other at the exit which had to be provided because there was insufficient room for truck-turning movements on the company property. The company, he said, installed both of the signals but is asking reimbursement for only one. The Commission unanimously approved reimbursement to the company for the full amount of its claim (including the signal), $34,759.82, after it has been verified by the Commission's Auditor.

The meeting recessed for a short time during which the Commission conferred with members of the Idaho State Legislature who were present to inform themselves on the Oregon Highway organization, the reorganization of the Idaho Highway Department being under consideration at the present time by the Idaho Legislature.

The Engineer reported the results of a study and appraisal in connection with acquiring access rights along the Junction City-Eugene Section of the Pacific Highway. He recalled that the former Highway Commission, before World War II, purchased sufficient right of way for an ultimate four-lane highway between these points but did not acquire the access rights. Recent studies by the Right of Way Department, he said, indicate that such rights will cost between $400,000 and $450,000. He questioned the advisability of spending so much money for this purpose because of the possibilities of re-routing the highway at some future time south from the town of Harrisburg in order to meet interstate standards. In view thereof he recommended that the access rights not be acquired now. The Commission approved the recommendation.

The Commission had under discussion the matter of quit claiming to Clyde Marriott and Vernetta F. Marriott access rights on the old route of the Pacific Highway near Glendale Junction, Douglas County. It was explained that the state acquired a portion of the old Glendale county road in connection with the acquisition of right of way for a revision of the Pacific Highway. Such acquisition was by judgment in condemnation and included certain rights of access which are of no value for state highway purposes, and the Merriotts, owners of the property abutting this county road, now wish the access restored to them. The Chief Counsel and the Engineer both recommended approval of the request. The Commission approved the recommendation. (Quit claim deed was signed by the Commission later in the session.)

The Right of Way Engineer requested instructions relative to the disposition of the claim of Evelyn Chamberlain, incidental to the moving of a house on the Newberg Dayton Junction Section of US99W. He said that the Commission purchased property from Miss Chamberlain for right of way and agreed to move the house. This was done and a release secured, but later it developed that the sewer on the property, as re-arranged, did not function properly and had to be fixed. Also that Miss Chamberlain had to place additional material on her driveway, all of which cost her $167.60. He recommended settlement of this case for $150.00, which he said Miss Chamberlain has agreed to accept. The Commission approved his recommendation.

The Chief Counsel reported the following settlements in condemnation cases and asked the Commission to approve them.

1. State vs. Lawrence Jackson Boyle. Complaint filed November 22, 1950 and an offer of $13,325 made. He said that this case involves the acquisition of 1.65 acres of land as right of way for the Canyonville-Johns Section of the Pacific Highway in Canyonville. Mr. Boyle demanded the sum of $30,000 and after the complaint was filed employed an attorney, who had the property appraised, one appraisal being in the sum of $15,915, and another in the sum of $16,915. Settlement was finally reached, the Counsel said, for $15,000, and judgment has been made conveying the property to the state on the basis of such sum. The Commission approved the settlement.

2. State vs. Catherine S. Duncan, concerning right of way on Unit II, T. H. Banfield Expressway, Portland. Condemnation authorized on April 24 1950, and a formal offer of $2,500 was approved. The Chief Counsel advised that the property owner demanded $10,000. but settlement was finally effected whereby the state paid the sum of $2,650, which included $150 attorney's fees. The Commission approved the settlement.

The Chief Counsel reported on the state's claim against Paul L. Gaylord for damaging a scale house at Lakeview, repairs to which cost the sum of $388.86. He said that the accident occurred on July 2, 1950 when Mr. Gaylord backed his 1941 Pontiac sedan into the scalehouse, damaging it to the extent of the amount stated. Mr. Gaylord, he said, is not too well off financially but offered to pay the claim at the rate of $25 per month. He requested instructions. It was the feeling of the Commission that Mr. Gaylord should pay the full amount of the claim, reimbursing the state in full in one payment. The Chief Counsel was instructed to file suit to collect the amount due, if necessary.

The Chief Counsel brought up for discussion a controversy which prevails in the city of Klamath Falls with respect to the routing of truck traffic over Alameda Street in that city. He said that he has received a communication from Paul Farrens, Attorney for the complainants, in which Mr. Farrens states that, "If I do not receive advice that the Commission accepts some measure of liability and recognizes that there is at least a substantial merit in our contention, no alternative remains for me except for me to advise our clients to commence litigation." The Chief Counsel advised that the controversy arises out of the allegations of people who reside along Alameda Street that when this street was dedicated for public use a condition was involved that at no time should heavy truck traffic be permitted by municipal or other authority to use it. He also said that the width of the street as originally platted was only 40', but an additional 60' was acquired when the highway was routed over it. He added that a short section about two blocks long was constructed, and that it is intended to continue the improve-

ment on this street in the future when the improvement is extended. He requested instructions. The Commission decided unanimously to take no action on the matter at the present time and to await local developments.

The Chief Counsel rendered brief reports on a number of bills that are pending in the State Legislature, including the following:

1. Enabling act to permit the State Highway Commission to create an arboretum and botanical garden, and to operate and administer the same under the direction of the Parks Department: The Chief Counsel advised that this bill has not as yet been presented to the Legislature, its present status being a report to the Governor by the Legislative Interim Committee that was appointed in 1949. It was the feeling of the Commission that the State Highway Department should have no part in such an undertaking. The Chief Counsel then advised that he has been asked to prepare a bill in his capacity as Assistant Attorney General. He was authorized by the Commission to prepare the bill in that capacity with the strict understanding that the State Highway Department is not to be involved in any way.

2. House Bill No. 48 requiring all work exceeding $10,000 in value be done by contract: The Commission took no action in the matter.

3. House Bill No. 47, which grants to local bidders a ten percent advantage over out-of-state bidders in furnishing materials and performing work for the state: The Chief Counsel gave as his feeling that the Commission should oppose this bill. The Engineer advised that should this bill become a law it would be impossible to secure federal aid funds for many highway projects because it is an ironclad rule of the Bureau of Public Roads that the contracts must be awarded to the low bidder in each instance. The Commission ordered that full information on this subject be placed in the hands of the Highway Committees of both houses.

4. House Bill No. 128 introduced by the Committee on Aviation and Commerce relating to the condemnation of land: The Chief Counsel read aloud the bill, which amends Section 1, Section 12-123, O. C. L. A. and authorizes any corporation organized for the purpose of manufacturing, producing, generating, transporting, selling or distributing fluids, including petroleum and petroleum products or gases for light, heat, propulsion or power purposes, or for the purpose of constructing, laying, maintaining, or operating pipes, pipelines, gas mains, gas lines and appurtenances therefor, to enter upon lands within the state of Oregon outside of cities for the purpose of examining, surveying and locating pipelines, gas mains, etc. and to appropriate and condemn such lands or easements thereover, and to appropriate any part of any public road for the purpose of constructing pipelines and appurtenances thereon. It was the feeling of the Commission that this is a drastic measure which would work to the direct

disadvantage of state highways and should be opposed strenuously. Accordingly, the Commission ordered that its ideas on the subject be brought to the attention of the Highway Committees of both houses.

5. Proposed amendment concerning control of the shore of the ocean: The Chief Counsel presented a copy of the bill, which was read by the Commission. Chairman Chandler stated that the bill does not convey the ideas that the Commission has on this subject—that it should be modified so as to relieve the Highway Commission from any responsibility whatsoever with respect to the ocean beach, and that responsibility should be placed on the State Land Board. Commissioner Reynolds concurred in the viewpoint of the Chairman, whereupon the Chief Counsel was instructed to rewrite the bill accordingly.

The Chief Counsel brought up for discussion the claim of the Western Union Company for reimbursement for the cost of repairing its facilities that were damaged by the Oneonta-Borrow Pit slide on the upper Columbia River Highway in 1945. He said that the company's claim is in the amount of $15,000 and that the company has agreed to accept settlement in full at half of such amount, which is on the same basis as settlement was made with the Union Pacific Company of its claim arising out of the same slide. He recommended settlement on such basis. The Auditor advised that he has checked the claim and has been unable to find anything out of order in the individual items. In view thereof, the Commission unanimously approved the recommendation.

The Commission discussed the matter of deeding to the City of Pendleton a small tract of land situate in the NW 1/4 of the NW 1/4, Section 8, Township 2 North, Range 32 East, W. M., Umatilla County. It was explained that this property was deeded to the city on December 21, 1948, by quit claim deed which contained certain conditions relative to changing the location fo the channel of the Umatilla River, and disposition of materials to be removed from the channel; further, that the restrictions are no longer necessary or desirable, and that the city has requested substitution of a bargain and sale deed at this time in order to remove from the recorded title the restrictions contained in the quit claim deed. The Chief Counsel recommended approval of the city's request. The Commission approved the recommendation unanimously. (The bargain and sale deed was signed later in the session.)

The Engineer rendered a written report on the results of his statewide investigation of gasoline stations that serve state highway traffic at the curb line on city streets that are highway routes. He advised that the investigation reveals 293 stations in this category. He suggested, due to the large number of gasoline pumps that are being operated by these stations, that no attempt be made at this time to force the removal of the pumps en masse,

but that the policy which has been pursued in the past be continued, requiring the removal of such facilities whenever a highway improvement is made along the street in front of the station, which procedure will eventually eliminate all of them. The Commission accepted and approved the report. The Engineer was instructed not to permit any new facilities to be constructed along state highway routes for serving patrons on public property.

The Commission also discussed a report from the Engineer on his investigation of the collapse of the "Dodge Bridge" over the Rogue River on the Sams Valley State Secondary Highway, in Jackson County. The Engineer advised that investigations indicate clearly that the Central Heating Company of Eugene was responsible for the collapse of this structure, the evidence revealing that the damage was caused by the transportation over the bridge of a bucket-loader which struck and broke one of the diagonals of the bridge and caused the bridge to fall. This bridge, he said, is posted for a maximum load of 15 tons, but as closely as can be determined, the equipment which caused its failure weighed 17 tons. He recommended that the Central Heating Company be billed for the depreciated value of the bridge which amounts to approximately $6,600, and that, if the company does not pay the claim, suit be instituted against the company to collect it. The Commission approved the recommendation unanimously and so ordered.

The Commission discussed briefly, and took under advisement, a report from the Engineer showing the results of weighing activities carried on by state weighmasters during 16-hour daily periods at the Highway Department scales located at Bandon, North Medford and Tillamook.

The Secretary presented a letter from Mr. T. B. Watters, Chairman of the Roads Committee of the Klamath County Chamber of Commerce, endorsing the action of the State Highway Commission in imposing load restrictions on sections of state highways in order to avoid damage to the highway surfaces during periods when legal weight loads cannot be transported over them without damaging them. The Secretary was instructed to thank Mr Watters for his letter and the ideas expressed therein, which coincide with those of the Commission.

The Engineer rendered a supplemental report on the request of the people of Monmouth and Independence for construction of a sidewalk along the highway between these two towns, to serve their new Central High School. He recalled that when this matter first came to the attention of the Commission the high school was not yet completed, and that traffic counts taken at that time did not reveal the true status of conditions, so the Commission ordered another investigation when the school was in use. A recent investigation, he said, reveals that the volume of pedestrian travel is still far below that which is considered warrant for a sidewalk, being only an average of 34 daily. Moreover, during the time that high school students would normally use the highway in going to and from school, the count showed only three pedestrians. He estimated the cost of a sidewalk at $7,000, and

recommended in view of the very small amount of pedestrian travel on the highway, that the request be denied. The Commission approved the recommendation unanimously.

The Engineer reported the result of an investigation in the city of Baker of the need for traffic signals heretofore requested by the city. He said that the investigation covered six principal intersections on US30 (2nd Street, Main Street, Court Street, Auburn Street, Campbell Street, and 10th Street), and that it has been determined that the signals are warranted at three of these intersections--Main Street and Broadway (right angle turn in US30), Main Street and Court Street, and Main Street and Auburn Street. In addition there is need for two additional flashing beacons, one at the right angle turn on US30 at Broadway and 10th Street, and one at the right angle turn on the Baker-Homestead Highway at Main and Campbell. He estimated the cost of the three standard signal installations first mentioned at $9,000, and recommended approval of the same on the condition that the City of Baker will pay one-half of the costs involved. He estimated the cost of the two flashing beacons at $600 ($300 each), and recommended that these also be installed, the state to pay the entire expense which is in conformity with past practice. The Commission approved both recommendations unanimously.

The Commission took under advisement a written report from the Engineer, dated January 19, 1951, summarizing the 1946-1949 and the 1950-1951 construction programs. (For details see copy of report in General files.)

The Engineer reported that the survey for the Wilson River Highway between North Plains and a connection with the completed highway at Washburn, Washington County, has been completed. He exhibited a map showing the location, explained details, and asked the Commission to approve the survey so as to permit the preparation of right of way descriptions and the carrying on of negotiations for the right of way when authorized by the Commission. As a result of careful consideration of this matter, the Commission unanimously approved the survey as reported, by adoption of the attached resolution relative thereto, marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported the results of a reconnaissance survey and economic analysis of Tualatin Valley Highway east of the city of Hillsboro as previously authorized by the Commission at the request of a delegation from Hillsboro, Cornelius and Forest Grove. He recalled that the delegation was particularly interested in a new routing for this highway that would extend directly eastward, approximately on the Base Line, from Hillsboro to a connection with the Sunset Highway. He said that while investigations reveal that the suggested route would realize a saving of 0.6 mile in distance over the ex

isting route by Beaverton, and could be constructed as a two-lane facility for approximately $686,000, they also indicated that even were the new highway built it still would be necessary in the not distant future to widen the present highway to a four-lane facility westerly from Beaverton to Reedville, because of the very heavy traffic that is generated by adjacent residential development. He estimated the cost to widen the present highway at $535,000 and he suggested in view of the findings that when funds become available for expenditure on this highway the Commission select as its first project the widening work between Beaverton and Reedville. (For further details see copy of written report dated January 19, 1951 in general files.) The Commission took the matter under advisement.

The Commission had under discussion the selection of projects for a construction program to utilize federal aid secondary highway funds that it is expected will become available during 1952, 1953 and 1954. The Engineer submitted a list of projects in each division that are eligible for the funds in question, from which list the Commission selected the following projects for undertaking during the first fiscal year, 1952, it being understood that the projects for the second and third fiscal years will be decided later.

County	Highway, Section and Description	Amount
	DIVISION NO. 1	
Washington	Nehalem. Forest Grove-Sunset Highway Junction, 9 mi. A. C. Resurf.	$ 160,000
Washington	County Road (Hillsboro-Cornelius Pass). Ray's Ranch-West Union, 4 mi. Grad., Surf. & Pav.	200,000
	DIVISION NO. 2	
Benton	Alsea. Philomath-Alder Creek (MP 48.1 to 59.1) 11 mi. A. C. Resurf.	250,000
Lincoln	County Road (FAS-150). East Unit, Siletz-Logsden, Grad. & Surf.	100,000
Marion	North Santiam. Bridge over Little North Fork.	225,000

Federal Aid Secondary Highway Program (cont.)

County	Highway, Section and Description	Amount
	DIVISION NO. 3	
Coos	County Road. Bullards Bridge over Coquille River near Bandon (County to contribute $300,000)	$ 600,000
Jackson	Crater Lake. Prospect-Union Creek (MP 47.1 to 58.8), 11.7 mi. A. C Resurf.	275,000
Jackson	West Diamond Lake. Junction with Crater Lake Highway to M.P. 8.3, A. C. Resurf.	200,000
Jackson	Sams Valley. Dodge Bridge over Rogue River	250,000
	DIVISION NO. 4	
Crook	Paulina. Prineville-Crooked River, 15.9 mi. Surface and Oil	125,000

Union	County Road. Island City-Lone Tree, 2.8 mi. Grad., Surf. and Oil.	100,000

January 23, 1951

The Commission discussed a proposed agreement with the Bureau of Public Roads covering maintenance of eight federal aid projects on the Willamette Highway, comprising a total distance of 21 miles between Oak Ridge and Salt Creek Tunnel. The Engineer explained that by this agreement the state will perform the maintenance work during the period from October 20, 1950 to October 19, 1951, and the Bureau of Public Roads will reimburse the state in full for costs incurred, not exceeding $950.00 per mile per year, or a maximum of $19,950 for the entire project. He recommended approval of the agreement. The Commission approved the recommendation. (The agreement was signed later in the session.)

A letter was presented from Mr. G. T. McCoy, State Highway Engineer of the State of California, containing a proposal for a joint undertaking to construct four miles of road along the Oregon-California state line westerly from the town of Hatfield, California. Mr. McCoy advises that this road extends from Hatfield to Calore, a distance of 19 miles, and that with the exception of the four-mile section immediately west of Hatfield, lies entirely within the state of California and has been improved as a Federal Aid Secondary Highway project using Federal Aid Secondary funds, Siskiyou County funds, and County Highway Act funds of the State of California. He estimated the cost to construct the four-mile section at $200,000, and suggested the following proposal to finance the work:

California Federal Aid Secondary Highway Funds - -	$100,000
Siskiyou County, California, funds - - - - - - - - - -	46,000
Oregon funds, either state or county - - - - - - - - -	46,000

In the discussion of this matter it was pointed out that Klamath County does not have funds available to contribute to this work, so if Oregon funds are to be used they must come from the Oregon State Highway Department. The Commission could not see its way clear to contribute state highway funds for the purpose because of its many other obligations, and the limited amount of funds at its disposal, and for the further reason that it considers the road primarily a California responsibility. The Secretary was instructed to so inform Mr. McCoy.

The Engineer and the Chief Counsel reported a compromise settlement with Mr Homer Johnson, contractor for the construction of the Siletz-Toledo Section of the Siletz Secondary Highway in Lincoln County, Contract No. 2390, disposing of his claim for additional compensation arising out of this job. It was pointed out that Mr. Johnson originally claimed an amount of $35,538.48 which was based on his allegation that the materials designated by the state were not suitable for use so it was necessary to use another source of materials, which entailed a more costly operation. It was also pointed out that when the claim was denied, the contractor, through his attorneys, filed suit against the State Highway Commission to collect the amount of his claim. However, no court action immedi-

stely followed, but advices now are to the effect that the case will be brought into court for trial soon, if it is not adjusted satisfactorily. The Engineer advised that he has gone over Mr. Johnson's claim very much in detail and it is his considered opinion that Mr. Johnson is entitled to an extra payment of $8,751.23 but no more. Moreover, Mr. Johnson has indicated that he will accept such sum and will withdraw his suit if it is paid to him. The Engineer and the Chief Counsel both recommended settlement with Mr. Johnson on such basis. The Commission approved the recommendation.

A request was presented from citizens of Beaverton for installation of a traffic signal on the Tualatin Valley Highway at its intersection with West Street in Beaverton. The Engineer advised that this matter has been investigated and it has been determined that the hourly volume of traffic entering the intersection during a maximum 8-hour period is only 580 vehicles, which is considerably less than the 750 vehicles per hour required by standard signal warrants for urban intersections. Moreover, the traffic entering the intersection from the side street is also far below the requirements. He pointed out that during the period of January 1, 1946 to October 31, 1950 only four accidents were reported at this intersection, none of which could have been prevented by signals. He recommended in view of the findings that the request be denied. The Commission approved the recommendation and so ordered. dered.

The Engineer reported that pursuant to instructions previously given him by the Commission, signs with the wording "SLOW - HAZARDOUS INTERSECTION" are being placed on both sides of the Dunthorpe Road approach to the Oswego Highway; however, a further study of this intersection indicates that there is a considerable hazard potential, in view of which it would be advisable, in the interests of safety, to illuminate the signs with mercury vapor luminaire units, costing about $450, and he so recommended. The Commission approved the recommendation.

A letter was presented from the Eastham Parent Teachers Association of Oregon City requesting that necessary action be taken to alleviate a dangerous condition for school children who are obliged to cross Molalla Avenue (route of the Cascade Secondary Highway) at its intersection with 7th Street, in Oregon City. A letter was also presented from Mr L. A. King, Superintendent of Oregon City Public Schools, similarly requesting safety measures at this intersection. The Engineer advised that an investigation reveals that a large percentage of the children who attend Eastham School must cross Molalla Avenue which at this point is on a curve, where sight distance is restricted. He also said that the children are subjected to a considerable hazard because of the large volume of traffic that this street carries, and he recommended in view thereof the installation of an illuminated overhead crosswalk sign, at an estimated cost of $700, on the condition that the City of

Oregon City will bear one-half of the expense of the installation. The Commission approved the recommendation.

There was presented for the Commission's consideration a request from the City of Oswego for the installation of traffic signals on the Oswego Highway at its intersection with three city streets, particularly "B" Avenue, "A" Avenue, and Lake Shore Road. The Engineer advised that this matter has been investigated by the Traffic Engineer, who states that there is not sufficient warrant for the signals either at "B" Avenue or Lake Shore Road, but there is a marginal warrant for a signal at the "A" Avenue intersection, which carries a daily traffic of 10,300 vehicles, of which the maximum hourly volume is 735. The accident record for this intersection, he said, also indicates the need for a signal at this point. He recommended, in view of these findings, that a semi-actuated signal costing $4,500 be installed at the intersection of "A" Avenue, provided the City of Oswego will contribute one-half of the expense of the installation, and that the request for signals at "B" Avenue and Lake Shore Road be denied. The Commission approved both recommendations unanimously.

The Commission discussed a report from the Engineer on a request from the Rosedale Community Club, Portland, for installation of a traffic light at the intersection of N. E. 60th Avenue and Lombard Street, route of the Northeast Portland State Secondary Highway bypass. The report also covered a request from the Rose City Water District, Portland, for a signal installation at the intersection of N. E. 82nd Avenue and Killingsworth Street, also route of the Northeast Portland State Secondary Highway. According to the report, which is based on investigations by the Traffic Engineer the signalizing of both intersections is warranted both by reason of highway traffic volume and by bad accident record. The Engineer recommended approval of the signalization of both intersections at an estimated cost of $3,500 each, or a total of $7,000. He pointed out that both intersections are outside the city limits of any incorporated city, so the costs will have to be borne 100% by the state. The Commission approved the recommendation unanimously.

Consideration was given by the Commission to a request from the City of Newberg for installation of traffic signals on US99W at the intersection of First and Main Streets, and at the intersection of First and College in Newberg. The request was in the form of a resolution, to which was attached a number of resolutions from civic organizations, and a petition containing the signatures of 1631 residents. The Engineer advised that the city on a number of occasions in the past has made similar requests, all of which were denied by the Highway Commission because there did not appear to be sufficient warrant for the signals; however, a recent investigation reveals changes in traffic and other conditions which indicate that a stop-and-go signal at the intersection of First and College Streets is now justified, but not at the other. He estimated the cost of the standard signal installation at such intersection at $3,000, and recommended approval of the same on the condition that the city will pay one-half of the costs involved. The Commission approved the recommendation.

The Commission discussed and denied a request from Mrs. Arnold Mackey, Beaverton, for installation of a "push-button" type of stop light for pedestrians on Canyon Road (Tualatin Valley Highway) at its intersection with Lake Road, a short distance east of Beaverton. The Commission's action was based upon a report from the Engineer to the effect that Lake Road is only about one-half mile in length and serves only twenty homes, and that the intersection is now within the limits of a designated 45 mile per hour speed zone.

The Engineer requested authority to join with the City of Salem in the installation of a traffic signal at the intersection of 12th and State Streets in Salem. He said that this intersection is on the route of the Silver Creek Falls State Secondary Highway, which at this point is also the route of the North Santiam Highway, and that the intersection now carries a volume of approximately 22,000 vehicles daily. He pointed out that the intersection is further complicated by the main line tracks of the Southern Pacific Company, which extend along 12th Street. In further support of his request the Engineer advised that the intersection currently is signed for a four-way stop, and that city police officers direct traffic during peak hours in order to keep traffic moving, but there is considerable hazard involved because the police officer has to stand in the middle of the street, next to the railroad tracks. Studies of the situation, he added, indicate that the problem can be solved by installation of automatic signals that can be controlled manually during rush hours and which would operate as flashing red four-way stops at all other times. He estimated the cost of the installation at $750 which, he said, will be paid 50% by the City of Salem and 50% by the State, and he recommended approval of the expenditure. The Commission approved the recommendation.

The Commission discussed a letter from the City of Pendleton concerning the need for a revision of traffic lights, signs, etc., within the city. The Engineer advised that the matter has been investigated by the Traffic Engineer, who consulted with the city officials directly in the solution of the problem and who recommends the following: that the three existing signals on Main Street be provided with interconnection, and master controller, with provision for an all-flashing red in case of fire equipment on call; also that standard illuminated "ONE WAY" signs be installed at the intersection of Court and Main Street and at the intersection of Court and Dorian Street. The total estimated cost of the work, he said, is $1,500, and he recommended approval of the expenditure on the condition that the City of Pendleton will pay one-half of the expense. He also recommended that a request of the city for two new signal installations, at 10th and Court Streets and at 10th and Dorian Streets, be denied. The Commission unanimously approved both recommendations.

The Commission discussed a recommendation from the Memorials Committee of the Oregon Historical Society for the erection of a textboard at Fort Clatsop on the lower Columbia River Highway, where Lewis and Clark encamped on their exploration trip to Oregon in 1805. The Engineer estimated the cost of the textboard at $300 and recommended approval of the expenditure because there is presently no marker on the state highway opposite this spot, and because Fort Clatsop is one of the historical points of Oregon. He presented a text for the board as prepared by the Hon. Robert W. Sawyer, Bend, member of the Memorials Committee, and he recommended approval of the same. The Commission unanimously approved the erection of the textboard and the inscription to be placed thereon, which reads as follows:

FORT CLATSOP

FORT CLATSOP, BUILT BY LEWIS AND CLARK IN DECEMBER, 1805 FOR USE AS WINTER QUARTERS, WAS SITUATED .8 MILE SOUTH OF THIS POINT. THE SITE WAS CHOSEN BECAUSE OF THE GAME IN THE SURROUNDING COUNTRY AND BECAUSE IT WAS CONVENIENT TO THE COAST WHERE SALT COULD BE MADE FOR THE JOURNEY OF THE EXPLORATION PARTY BACK TO THE MISSOURI. ELK WERE FOUND IN ABUNDANCE AND SALT WAS MADE AT WHAT IS NOW SEASIDE. THE LOCAL INDIANS WERE FRIENDLY BUT IT WAS DISAPPOINTING THAT NO TRADING VESSELS ENTERED THE RIVER DURING THE STAY. AFTER ENDURING A WET AND STORMY WINTER THE PARTY LEFT THE FORT ON MARCH 23, 1806 AND TOOK UP ITS "HOMEWARD BOUND JOURNEY".

The Commission had under discussion the matter of providing janitor service and other related services for the new Highway Department Building in Salem when it is ready for occupancy. It was the order of the Commission that the State Highway Engineer and the Bridge Engineer consult with the Secretary of State concerning such features, with the view in mind that such services will be performed under the direction of the Secretary of State. The results thereof are to be reported back to the Commission.

The Engineer requested instructions as to the type of emblem to place in the terrazzo floor of the lobby of the new Highway Department Building. The Commission expressed a preference for a bronze replica of the State Highway Commission seal but was advised by the Engineer that it is very doubtful that bronze would be obtainable now because of governmental restrictions. In view thereof, the Commission ordered the installation of a metal ring only, at this time, with the understanding that when bronze is available a seal of such nature will be placed inside the ring.

In this connection the Engineer requested instructions relative to the names to be placed on the informational plaque that is to be installed in the lobby of the new building. He recommended the names of Mr. T. H. Banfield, who was Chairman of the Commission when the building movement was started, Mr. A. W. Schaupp, who was a member of the Commission at that time, and the names of the present members of the Commission, Ben R. Chandler, Chairman, Charles H. Reynolds, Commissioner, and Milo K. McIver, Commissioner. The Commission approved the recommendation.

The Engineer reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of State Tax Street Funds that accrued to them during the first half of the year 1950, and that the plans for the improvements proposed to be financed with such funds have been examined and found satisfactory.

Antelope	Gold Hill	Lonerock	Port Orford
Athena	Grass Valley	Long Creek	Powers
Boardman	Haines	Lostine	Scotts Mill
Bonanza	Halfway	Madras	Shaniko
Canyon City	Halsey	Manzanita	Siletz
Dayton	Hammond	Merrill	St. Paul
Dayville	Harrisburg	Mosier	Sumpter
Echo	John Day	Myrtle Creek	Talent
Falls City	Joseph	Nehalem	Weston
Glendale	Juntura	Oakland	Willamina
Gold Beach	Lexington	Philomath	

He recommended approval of the plans by the Commission. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "C-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also advised that the towns of Hammond, John Day and Juntura have satisfied the legal requirements with respect to the expenditure of State Tax Street Funds which accrued to them during the last six-month period of 1950, and that the plans for the projects proposed to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "C-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer presented for the Commission's consideration a list of projects that are proposed for the 1951 Special State Tax Street Fund program. The Commission deferred action on the matter pending study.

The Engineer requested authority to advertise for bids for the construction of an addition to the equipment storage building at Meacham. He advised that this addition was contemplated in the preparation of the 1951 budget and an item of $6,000 was provided to finance it. However, since then the design has been changed and it now is contemplated to construct a masonry block building with a metal roof, the cost of which is estimated at $7,425, and in addition thereto it is proposed to do a certain amount of grading, surfacing and fencing with state forces, which is estimated to cost $715, making a total cost of $8,140 and resulting in an overrun of $2,140 in the project authorization. He suggested that the overrun, should any occur, can be balanced within the limits of the existing budget by a reduction or a postponement of some of the other units. The Commission approved the request unanimously.

A letter was presented from the Fremont Highlanders Ski Club, Lakeview, requesting snow removal operations at the ski grounds near the summit of Warner Secondary Highway to provide car parking space for skiers. The Engineer advised that there are two parking areas at this location, which is about five miles east of the Fremont Highway junction, and to provide parking area for 30 cars at one location and for 10 cars at the other will cost about $250. He recommended approval of the request. The Commission approved the recommendation.

The Commission discussed briefly a request from the Engineer that he be permitted to substitute a maintenance headquarters building at Huntington for a similar building at Harper, provision for which is contained in the 1951 budget, the sum of $15,000 having been set up therefor. The Commission deferred action on the matter pending inspection by Commissioner Reynolds.

A petition was presented signed by 64 residents of Winston, Douglas County, requesting construction of additional drainage facilities at the South Umpqua overflow structure on the Pacific Highway about five miles south of Roseburg, so as to provide better release of flood waters. The Engineer advised that this matter has been investigated and it has been ascertained that the petitioners want an additional drainage structure about 100 feet long as an extension to an existing state highway bridge which crosses an overflow channel of the South Umpqua River about 1500 feet south of the river; also that from information gathered, it is evident that the additional drainage facility would not have prevented the recent flooding of the property upstream from the highway for 3/4 of a mile. This matter, he said, has been taken up with the U. S. Army Engineers, who advised that their studies of the situation, although of a brief preliminary nature, indicated that neither the channel work nor levees to protect against

floods such as those which occurred in 1927 and 1950 would be economically feasible. Moreover, the only alternative would be control of headwater storage, which matter will be given full consideration in a comprehensive report on the Umpqua River and its tributaries which they will complete at a future date, depending on the national emergency. The Engineer recommended, in view of the information given by the Army Engineers, that the request be denied. The Commission approved the recommendation.

Petitions were presented from Crow Grange No. 450 and Elmiar Grange No. 523, Lane County, in which the Highway Commission is urged to take immediate action to improve the Old Territorial Road (Territorial Secondary Highway) between Crow and Lorane, Lane County. The petitions were discussed briefly, but action thereon was deferred pending discussion with a delegation which was scheduled to appear the following day.

The Right of Way Engineer brought up for discussion the arrangement heretofore made with Mr. Roos E. Glass covering the directing of traffic over his property and across his private grade crossing of the Southern Pacific railroad tracks south of Eugene pending construction of either a new bridge over the Willamette River at Jasper or the new route of the Pacific Highway between Eugene and Goshen. The Right of Way Engineer explained that because of impaired vertical clearance of the underpasses on the Pacific Highway between Eugene and Goshen it was necessary to effect an arrangement with Mr. Glass to cover movements of excessively high loads, and that the arrangement heretofore approved by the Commission, provided for payment of $600 to Mr. Glass, but it now appears necessary to spend about $300 additional for gates, fencing, etc. which are essential. He requested approval of the extra expenditure. The Commission approved the request unanimously.

The Engineer reported that a problem has arisen in connection with the financing of the May Street-Heppner School Section of the Heppner Highway in the city of Heppner, bids for which were received by the Commission at its previous meeting. He recalled that this project included construction of curbs which were estimated to cost $4,450, and that the city agreed to take care of this item, and did forward its check to the Commission in such amount. It so happens, he said, that the bid for this particular item was $20 per cubic yard more than that estimated, so the amount tendered by the city is somewhat less than the actual cost of the work. The contract, he said, has not been awarded, but the bids were referred to him to award the contract when the city had remitted the extra amount, but the city now advises that it is without funds to satisfy the requirement, so the project cannot go forward unless the state will assume the extra payment. He recommended assumption of the extra expense by the state and that the city's previous payment of $4,450 be considered as payment in full of its obligation in connection with this project. The Commission approved the recommendation unanimously.

The Commission confirmed the following contract awards by the Engineer upon advice from him that the conditions of the awards have been satisfied.

Grading and topping Willow Creek-Boardman Section of Columbia River Highway in Morrow and Gilliam Counties. Bids received November 10. Contract awarded January 5, to Berke Brothers, low bidders.

Grading and surfacing the Goose Lake Section of the Cottonwood Creek and West Side county roads, in Lake County. Bids received December 20. Contract awarded January 12 to F. L. Somers, low bidder.

Sams Creek-Snider Creek Section, Sams Valley Secondary, Jackson County. Bids received December 19. Contract awarded January 18, to R. A. Heintz Company, the low bidder.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway contracts:

1. Kuckenberg Construction Company, Contract No. 3094 for grading, paving and structures on the Front Avenue (Steel Bridge-Ankeny Street) Section of the Pacific Highway West in Portland, requested an additional extension of time of 227 days from November 15, 1950 to June 30, 1951 within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to adverse weather conditions which rendered it impracticable to finish landscaping work until next spring. The Engineer advised that the contractor completed within the previously extended time limit all of the work required under the contract, with the exception of the landscaping and some painting on the steel handrail, which work could not be done during the winter season, and that he had directed the contractor to close down operations until suitable weather obtained in the spring. The structure has been opened to traffic for several months, he said, and the delay in completing the work is not causing any additional expense to the state nor inconvenience to the traveling public. He recommended in view of the circumstances that the additional time requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

2. Porter W. Yett, Contract No. 3305 for grading and paving the Goshen-Creswell Section of the Pacific Highway, Lane County, requested an additional extension of time of 227 days from November 15, 1950 to June 30, 1951 within which to complete this job. He gave unfavorable weather conditions as the reason for his failure to complete the project within the previously extended time limit. The Engineer advised that the reason given by the contractor for over-running the previously extended time limit is correct. Un-

seasonable weather during the month of September and early October stopped paving work and the contractor was directed to close down his operations until suitable weather prevailed in the spring. He recommended in view of the circumstances that the additional extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

3. Porter W. Yett, Contract No. 3288 for pavement resurfacing on the Halsey-Crawfordsville Section of the Halsey-Sweet Home Highway, Linn County, requested an extension of time of 44 days from October 1 to November 13, 1950 within which to complete this job. He alleged that lack of materials at the original stockpile site (Brownsville) necessitated purchase of materials from a commercial source, and that the furnishing of materials from such source was hampered by early floods, which delayed completion of furnishing of materials in stockpiles. The Engineer advised that the contractor completed all of the paving work on this job within the specified time limit and that the extension of time is simply to cover the stockpiling of maintenance materials, which work was delayed by extremely high water in the gravel deposit that he was using. He said that the traveling public has not been inconvenienced by the delay and he recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

4. Parker-Schram Company, Contract No. 3386 for paving the Denver Avenue-Vanport Connection Section of the Pacific Highway West, Multnomah County, requested an extension of time of 243 days from October 15, 1950 to June 15, 1951 within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to a cement shortage during the month of September and consequent inability to obtain concrete for curb construction; also, unfavorable weather conditions after September 25 seriously interfered with normal prosecution of the work. The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct. He recommended in view thereof that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. Parker-Schram Company, Contract No. 3390 for grading and paving the Ochoco Avenue-Milwaukie service road and connections on Pacific Highway East in Clackamas County, requested an additional extension of time of 170 days from November 25, 1950 to May 15, 1951 within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to adverse

weather conditions. The Engineer advised that the reason given by the contractor for overrunning the previously extended time limit is correct. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

6. E. H. Itschner Company, Contract No. 3382 for rock production on the Mt. Vernon-Prairie City Section of the John Day Highway in Grant County, requested an extension of time of 180 days from December 31, 1950 to June 30, 1951 within which to complete this job. They attributed their failure to complete the project within the specified time limit to the fact that they were engaged on another highway contract (surfacing Hamilton Hill Section of the Kimberly-Long Creek Secondary Highway) which they had to complete before moving to the John Day Highway project, resulting in an overrun of the time limit on the latter project. The Engineer stated that the Hamilton Hill Project took considerably longer than was originally anticipated, which in turn delayed the commencement of operations on the Mt. Vernon-Prairie City Project. The delay, he said, will not result in any extra expense for the state if the job is completed within the extended time limit now proposed. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

7. J. A. Struss, Contract No. 3301 for rock production on the Canyon Creek Summit-Soda Mountain Section of the John Day-Burns Highway, requested an additional extension of time from January 1, 1951 to June 1, 1951 within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to adverse weather conditions. The Engineer advised that this is Mr. Struss' second request for an extension of time, the previous extension being from July 31, 1950 to January 1, 1951 with the stipulation that Mr. Struss be charged with engineering expense incurred by the state on this job subsequent to July 31, 1950. He recommended that the additional extension of time now requested be granted on the same basis. The Commission approved the recommendation.

8. Rich & Sons Nursery, Contract No. 3414 for guard rail construction on the Reedsport-Scottsburg Section of the Umpqua Highway in Douglas County, requested an extension of time of 60 days from December 31, 1950 to March 1, 1951 within which to complete this job. They attributed their failure to complete the project within the specified time limit to slow delivery of steel guardrail used in the construction. The Engineer advised that the contractor prosecuted the work to the best of his ability but was handicapped for reasons given by him. He recommended in view of the circumstances that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

9. Parker-Schram Company, Contract No. 3355 for grading and paving on the Brookings-California State Line Section of the Oregon Coast Highway, Curry County, requested an extension of time of 273 days from October 31, 1950 to July 31, 1951 within which to complete this job. They attributed their failure to complete the project within the specified time limit to a delay of thirty days in the awarding of the contract, and to adverse weather conditions. The Engineer advised that the character of the job required that culverts be placed prior to major grading operations and that the delay in awarding the contract reduced the favorable working time for such work so that the contractor was unable to perform the necessary paving before bad weather set in. He recommended in view of the circumstances that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

10. A. R. Averill, Contract No. 3265 for widening the bridge over the Umatilla River on the Columbia River Highway at Umatilla, requested an extension of time of 181 days from December 31, 1950 to July 1, 1951, within which to complete this project. He gave the following reasons for failure to complete the project within the specified time limit: 1) Shortage of competent manpower; 2) Shortage of lumber; 3) High water; 4) Unusually cold weather. The Engineer advised that progress on this project has not been satisfactory because the contractor endeavored to get too much reuse of his form lumber, and because he did not maintain a sufficiently large crew on the job, although he did experience some unusually cold weather which caused some unanticipated delay. He recommended that the extension of time as requested be granted, but that the contractor be charged with all engineering costs that the state incurs in connection with this job after April 30, 1951. The Commission approved the recommendation.

11. Enoch I. Maerz, Contract No. 3410 for construction of a latrine in Cascadia State Park on the Santiam Highway, Linn County, requested an extension of time of 20 days from December 31, 1950 to January 20, 1951 within which to complete this project. He attributed his failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that this overrun of time limit was required in order for the contractor to complete certain painting work and to make a connection to the water system, which work had been delayed because of adverse weather and because of the inability of the state to furnish necessary pipe. He recommended in view of the circumstances that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

12. Lindstrom Bros., Inc., Contract No. 3239 for widening the McCord Creek Bridge on the upper Columbia River Highway in Multnomah County, requested an additional extension of time of 61 days from December 29, 1950 to February 28, 1951, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to extra work which they were required to perform by order of the Engineer. The Engineer advised that because of a slide on the highway near the east end of the bridge, it was necessary to construct a retaining wall as an extra item, which work the contractor was unable to complete within the previously extended time limit. He recommended in view thereof that the additional extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

13. C. S. Whitcombe Company, Inc., Contract 3208 for roadside improvement on the Klamath Falls (First Avenue-Esplanade Street) Section of the Klamath Falls-Malin Highway in Klamath County, requested an extension of time of 106 days from July 31 to November 14, 1950 within which to complete this job. The contractor alleged that all work in connection with this project was completed within the specified time limit except the replacing of some pine trees, which work could not be done during the summer season, and he asked for the extension of time until November 14 to permit the replacement of the trees at the proper time, and insure their growth The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

14. Valley Construction Company, Contract No. 3349 for bridge construction on the Imbler-Dry Creek Section of the Imbler-Dry Creek county road, Union County, requested an additional extension of time of 152 days from November 29, 1950 to April 30, 1951, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to adverse weather conditions. The Engineer advised that all work on this structure, except the concrete finishing, was completed within the limits of the previously extended time and that because of adverse weather conditions, he directed the contractor to postpone such finishing work until next spring. He recommended in view of the circumstances that the additional extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

The action taken by the State Highway Commission upon the above listed requests for extensions of time within which to complete highway contracts was based upon the recommendations of the State Highway Engineer and his reports, which considered but did not necessarily adopt either or any of the reasons given by the contractors in their requests for such extensions of time.

The Engineer reported that Contracts Nos. 2953, 3104, 3208, 3223, 3288, 3302, 3308, 3330, 3410 and 3425 for construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission unanimously authorized the payment of membership dues for 1951 to the Western Association of State Highway Officials, amounting to $50. The Commission also unanimously approved payment of membership dues for 1951 to the American Association of State Highway Officials amounting to $675.

A letter was presented from the City of Woodburn requesting the rerouting of the Hillsboro-Silverton State Secondary Highway immediately east of US99E in this town, particularly along an extension of Young Street to a connection with the present highway about two blocks east of US99E. The Engineer advised that such routing will eliminate a jog in the present route, which is somewhat of a hazard and certainly an inconvenience. He exhibited a map showing the proposed change and recommended approval of the request on the condition that the city of Woodburn will assume future maintenance and control of the abandoned portion of the present highway. The Commission approved the recommendation.

The Commission considered and approved, subject to concurrence by Governor McKay, out-of-state travel authorizations for the following:

Manley F. Robison, Director, Travel Information Department, to attend the annual meeting of the Resort Owners Association in Victoria, B. C., on March 2 and 3, 1951. Estimated expense, $72.50.

W. W. Stiffler, Assistant Highway Engineer, to attend the Sierra-Cascade Logging Conference in Redding, California, during February 8, 9 and 10, 1951. Estimated expense, $35.00.

G. S. Paxon, Bridge Engineer, to attend Convention of American Concrete Institute in San Francisco during February 20, 21 and 22, 1951. Estimated expense, $75.00.

The Engineer reported a proposal recently submitted by Mr. S. L. Miller, Land Acquisition Agent for the State Forester, to provide living memorials to Mr. E. T. Allen, who was instrumental in framing early forestry laws in Oregon; Mr. George Gerlinger, who was a member of the first State

Board of Forestry; and Mr. Nels Rogers, former State Forester, who was prominent in establishing the present forest rehabilitation program in Oregon. Mr. Miller's idea, he said, is to promote roadside picnic areas and to erect suitable markers containing information for the public, and he has suggested three such areas along a 3-mile section of Sunset Highway, two of which are appropriate for development. He advised that it is the opinion of the Landscape Engineer, in which he concurs, that these picnic areas should not be established for a number of reasons. In the first place they are too close together; that affirmative action in this instance would establish a precedent that undoubtedly would become embarrassing in the future; it would be necessary for the State Highway Department to maintain the areas, since the State Board of Forestry has no funds available for such type of forest utilization; and it would be a deviation from present policy which limits memorials to donors of park areas. He recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed and approved a form of agreement with the City of Willamina covering improvement of West Main Street in that town from its intersection with the Salmon River Highway to the west city limits, a distance of approximately 0.27 mile, as a Special State Tax Street Fund project. (The agreement was signed the following day.)

The Commission also discussed and approved a proposed agreement with Coos County covering abandonment of the Catching Slough-Enegren Ferry Section of the Coos River State Secondary Highway when this highway has been reconstructed on revised alignment on the opposite side of the river. (The agreement was signed the following day).

The Commission also discussed and approved an agreement with the City of Coquille providing for a one-way street grid in this city to accommodate northbound and southbound traffic on the Oregon Coast Highway. (The agreement was signed on the following day.)

The Engineer reported that a hazardous condition exists on Canyon Road, Portland (Sunset Highway) in the vicinity of Sylvan, particularly at the point where this highway intersects Skyline Boulevard, S. W. Hewitt Boulevard and S. W. 58th Avenue, by reason of the fact that buses operating on Canyon Road are obliged to stop in the travel lanes while loading and unloading passengers. This condition can be corrected, he said, by designating bus stops on both sides of the highway and by prohibiting other vehicles the use of such areas. He recommended designation of such a bus stop on the north side of Canyon Road between Skyline Boulevard and S. W. 58th Avenue. (Eng. Sta. 155/26 to Eng. Sta. 157/10) and on the south side of Canyon road for a distance of 80 feet westerly from the west line of S. W. Hewitt Boulevard (Eng. Sta. 156/48 to Eng. Sta. 157/28). The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "E", which

resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also asked the Commission to designate a "NO PARKING ON HIGHWAY SHOULDERS" zone on the Redwood Highway near Grants Pass where, he said, a hazardous condition exists by virtue of certain auction marts and other business establishments. He said that investigation by the Traffic Engineer reveals that along a 0.7 mile section of this highway west of its junction with the Pacific Highway, there are located two auction marts, the county fairgrounds, one machine shop, a welding service, a lumber yard, an auto wrecking establishment and numerous auto courts, cafes, etc., and that patrons of these establishments park their cars on the highway shoulders, creating a very dangerous condition on this highway which in 1949 carried an average daily traffic of 5,860 vehicles. A study of the accident record for the section, he said, reveals that during the period from January 1, 1946 to October 31, 1950, 46 accidents occurred, fifteen of which were rear-end collisions and six were sideswipe collisions resulting from the parking of cars on highway shoulders during periods of darkness. He recommended, in view of the findings, the designation of a "NO PARKING ON HIGHWAY SHOULDERS" zone on this highway between Mile Post 45.25 (Eng. Sta. 2252/50) and Mile Post 41.97 (Eng. Sta. 2289/00). The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from Mr. Robert E. Moore, Chairman of the Adair Village Council's Police and Traffic Committee, requesting the designation of a 45 mile-per-hour speed zone on US99W (Pacific Highway West) from a point 2,000 feet north of the main entrance to Adair Village to a point 2,000 feet south of said entrance, to provide greater safety to school children who take the school bus at that point. The Engineer advised that this matter had been investigated by the Traffic Engineer, whose report indicates that there is no warrant for establishment of a reduced speed zone at this location, particularly in view of the fact that signs reading "LOOK OUT FOR PEDESTRIANS AHEAD" are now being maintained on the highway on both sides of the entrance. He recommended that the request be denied but that, in lieu thereof, the intersection be bracketed with standard side-road-symbol signs installed on the highway approaches. The Commission approved the recommendation.

A letter was presented from Lieutenant Colonel Joseph Kaminsky, Commander of the Umatilla Ordnance Depot, Ordnance, Oregon, requesting the designation of a 25 mile-per-hour speed zone on US30 at the entrance to this depot. Colonel Kaminsky alleged that the "blinker" light now installed at this intersection has not proved itself adequate, and he gives as his opinion

that because the territory contiguous to the highway opposite the Depot is occupied by dwellings in use for business, the speed of traffic through the district should be reduced as requested. The Engineer advised that the highway at this point carries an average daily traffic of about 1,000 vehicles and that the record discloses only six accidents occurring from January 1, 1946 to November 30, 1950. A speed check on traffic, he said, shows that 85% of the vehicles move past this entrance at or below a speed of 57 miles per hour, and he gave as his feeling that were a 25 mile-per-hour speed zone designated here, it would not be respected. Accordingly, he recommended that the request be denied. The Commission approved the recommendation.

The Engineer reported that on the Pacific Highway in Linn County there are two small communities, Tangent and Shedd, where 25 mile-per-hour speed zones have been in effect for some time but are not enforced because the communities are not incorporated. He stated his opinion that the restriction is entirely too low, and he recommended that the limit be raised to 45 miles per hour in each of these towns. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer brought to the Commission's attention the fact that the reduced speed limit heretofore in effect on the Oregon Coast Highway between Sunset Highway Junction and the town of Cannon Beach no longer is required since the highway has been reconstructed to modern standards. He recommended in view thereof the lifting of the restrictions along this section (Mile Post 24 to Mile Post 27.86) and the removal of the speed restriction signs. The Commission approved the recommendation by the adoption of the attached resolution relative thereto marked EXHIBIT "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A resolution was presented from the Cannon Beach Community Club protesting any legislative bill which prohibits vehicular traffic or horses on the ocean beach at Cannon Beach and Tolovana Park. The Commission ordered the communication filed.

The Commission discussed a proposed agreement with Benton County which provides for the elimination of the Tampico-Lewisville Secondary Highway from the State Secondary Highway System and the extension of the Alsea-Deadwood Secondary Highway into Lobster Valley. The Commission approved the agreement as prepared, it appearing to the Commission that the provisions thereof are in conformity with its previous understanding with the Benton County Court. The attached resolution concerning this matter, marked EXHIBIT "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote. (The agreement was signed by the Commission on the following day.)

The Commission discussed briefly and ordered filed a resolution from Goshen Grange No. 561, Lane County, in which the State of Oregon is petitioned to forbid the use of flares equipped with spikes to warn the traveling public of accidents or disabled vehicles on public highways The Commission considered that such a matter does not come under its jurisdiction

A request was presented from Mr. Fred G. Dengler, Mayor of the town of Rogue River, for the installation of a flashing beacon at the intersection of US99 with the county road that leads to the town of Rogue River, this intersection being at the south end of the Rogue River Bridge which was recently completed. The Engineer advised that this junction point is a tight "T" intersection with considerable roadside business development both at the intersection and along the highway approaching it, and that a recent traffic count taken over a 16-hour period discloses a total of 5,300 vehicles entering the intersection, of which 23% entered from the county road. During the same period, he said, 47 pedestrians were noted crossing the highway. As to accidents, he said that during the period January 1, 1946 to July 31, 1950, there was a total of eleven reported. He gave as his considered opinion that a flashing beacon is not the solution of the town's problem, and he recommended that the request be denied but that in lieu thereof, a 40-mile per hour speed zone be established on US99 between Mile Post 288.39 and Mile Post 288.89, a distance of one-half mile, and that a small teardrop type island be constructed in the Rogue River "throat" of the intersection to channelize traffic moving to and from the town of Rogue River; further, that this channelization be supplemented by installation of two mast-arm-mounted mercury vapor luminaire units. He estimated the cost of such treatment at $1,000. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "M", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that because of the relocation of the Pacific Highway between Eugene and Goshen, it becomes necessary to change the federal aid designation of that portion of the present highway between Judkins Point, near Eugene, and Springfield Junction by extending Federal Aid Primary Highway No. 5 (McKenzie Highway) westerly 1.3 miles to a point where the relocated route of Federal Aid Highway No. 3 joins the old highway. He asked the Commission to approve such designation. The Commission approved the request and also the following letter relative thereto directed to T. M. Davis, District Engineer of the Bureau of Public Roads. (The letter was signed by the Commission on the following day.)

Letter directed to T. M Davis

OREGON
STATE HIGHWAY COMMISSION
Salem

January 24, 1951

Mr. T. M. Davis, District Engineer
Department of Commerce
Bureau of Public Roads
Post Office Box 3900
Portland 8, Oregon

Dear Sir:

As the revision in Federal-aid Primary Road No. 3, which is to result from construction of the Judkins Point-Goshen Section, Project No. FI-161 (16), by-passes the junction of Federal-aid Primary Road No. 5 with Federal-aid Primary Road No. 3, it becomes necessary to extend Federal-aid Primary Road No. 5 and to change its official description.

Accordingly, the State Highway Commission requests that Federal-aid Primary Road No. 5 be extended at its west end to a connection with Federal-aid Primary Road No. 3 at Judkins Point in the City of Eugene, and that the official description for Federal-aid Road No. 5 be changed to read as follows:

"From a point on Federal-aid Road No. 3 in Eugene via McKenzie Bridge, Redmond, Prineville, Mitchell, John Day and Vale to a point on Federal-aid Road No. 1 in Ontario"

By the above indicated change, the length of Federal-aid Road No. 5 will be increased from 385.00 to 386.30.

Very truly yours,
OREGON STATE HIGHWAY COMM.

By /s/ Ben R. Chandler
As Chairman

By /s/ Chas. R. Reynolds
As Commissioner

Attest:

/s/ H. B. Glaisyer
Secretary

The Commission confirmed telephonic authority previously given the Engineer to purchase radio and rental equipment as follows:

Date Authorized	Type of Equipment	Amount
August 28, 1950	Radio Equipment	$39,000
December 29, 1950	Rental Equipment	87,850
January 3, 1951	Rental Equipment	19,200

The Commission also authorized an expenditure of $187,420 to purchase miscellaneous office and engineering equipment as follows:

Rental equipment	$ 134,750
Office equipment	7,165
Testing laboratory equipment	2,500
Repair Shop equipment	16,810
Radio equipment	6,000
Traffic engineering equipment	8,390
Blueprinting department equipment	4,205
Photographic department equipment	1,325
Parks department equipment	4,060
Engineering equipment, not on rental	2,215
Total authorization requested	$ 187,420

Consideration was given by the Commission to a proposed agreement with Sublimity Telephone Company providing for the rendering of telephone service in Silver Falls State Park. The Chief Counsel advised that the agreement has been prepared on the basis of an arrangement which the Commission authorized at its meeting on July 26, 1950. Moreover, the forms bear the approval of the Assistant State Highway Engineer as well as his own. The Commission approved the agreement unanimously. (The agreement was signed on the following day.)

The Commission discussed dates for its next two regular meetings and decided to hold such meetings in Portland, the first one on Monday and Tuesday, February 26 and 27, and the second one, tentatively, on Thursday and Friday, April 5 and 6, 1951. The Secretary was instructed to make the usual arrangements for the use of the Green Room in the Imperial Hotel.

A letter was presented from Mr. Arthur Skinner, Creswell, Oregon, who states that he represents some 150 petitioners residing in the vicinity of Creswell who wish to renew their request for improvement of the Springfield -

Creswell State Secondary Highway southerly from its junction with the Willamette Highway to the bridge over the Coast Fork of the Willamette River. The Secretary was instructed to inform Mr. Skinner that the Commission is not in a position to make any commitments for this project at the present time, but will keep it in mind for future consideration.

The Commission discussed a letter from the County Court of Union County requesting consideration of an appropriation of funds to finance improvement of the "Valley" Section of the Alicel-Lower Cove Road (Federal Aid Secondary Highway No. 479) during the year 1951. The Engineer was instructed to discuss the project with the County Court. He was authorized to inform the court that the Commission will give it serious consideration for the first funds that become available for allocation.

A resolution was presented from the Jackson County Chamber of Commerce endorsing the bill now before the Oregon Legislature which will permit the State Highway Commission to sell not to exceed $75,000,000 bonds to finance the construction or reconstruction of the interstate and primary highway systems. The Secretary was instructed to thank the Chamber for its expression.

The Commission discussed with the Engineer matters to be presented by delegations scheduled to appear on the following day, but took no definite action.

The Engineer brought up for discussion the claim of Mr. Crawford W. Smith, Port Orford, arising out of a change of grade of the Oregon Coast Highway in the south portion of this town. He said that Mr. Smith has occupied his present premises for many years and when the highway was recently improved, the grade was so constructed in front of Mr. Smith's place that it left his buildings in a considerable depression below the highway, and blocked the ocean view which he had previously enjoyed. Moreover, because of the collapse of the drainage pipe that was installed under the highway grade for his convenience, Mr. Smith is unable to drain his property, or even use his toilet facilities. To correct the situation, he said, will require the widening of the highway as far as Deady Street, which is now a dead-end street, and the construction of a new connection to the old highway south of that street; and he also said that in all fairness to Mr. Smith, the state should raise his residence to the level of the highway. He estimated the cost of the widening work at $5,000 and the cost to raise the house at $2,500, a total of $7,500. In the discussion of the matter, the Engineer pointed out that an additional claim has been filed by Mr. Henry Derendorf, who demands reimbursement in the sum of $4,600 for re establishing his auto court nearby. It appears that the Bureau of Public Roads, which had charge of the highway construction, furnished excess excavation materials to raise the Derendorf property, but Mr. Derendorf took care of his own building changes. The Engineer recommended the widening of the grade to Deady Street and the raising of the Smith building,

but he questioned the payment of the Derendorf claim because Mr. Derendorf purchased his property after the highway survey had been made and he undoubtedly knew what the conditions would be; moreover, he has submitted no detailed evidence as to what he accomplished by the expenditure of $4,600. Chairman Chandler advised that he has inspected the premises and in his estimation there is no question but that Mr. Smith has been hurt by the highway improvement, but how much remains to be determined. It was his thought that the matter should be given very thorough investigation. As a result of discussion, the Right of Way Engineer was instructed to negotiate a settlement, if possible, with Mr Smith but not with Mr. Derendorf, at least for the time being.

The Chief Counsel brought up for discussion the question of clarifying the law with respect to the authority of the Highway Commission to prohibit or otherwise control parking of vehicles along state highway rights of way outside of cities and towns. He said that as the law is now written, it is not clear to what extent the Commission has authority in this respect, and he suggested an amendment to definitely legalize orders that the Commission may make concerning this feature, which would be helpful to the State Police in administering the Act. The Commission authorized the Chief Counsel to prepare such an amendment for consideration by the Legislature which is now in session.

The meeting adjourned at 5:00 p.m. to reconvene the following morning in the same room.

Portland, Oregon
January 24, 1951

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel, the same persons being present and participating. Bids as follows for highway construction were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Chandler announced that the award of contracts would be made at 3:00 p.m.

STATE PROJECT NEAR SEASIDE IN CLATSOP COUNTY

NECANICUM ROCK PRODUCTION PROJECT

A. H. Saxton & Sons, Corvallis	$ 24,210.00
Jed Wilson, Seaside	24,390.00

WILLAMINA (WEST MAIN STREET) SECTION

Porter W. Yett, Portland	$ 14,877.00
Portland Road & Driveway Co., Portland	18,593.00

January 24, 1951

Mr. J. B. Bedingfield, Attorney, Coos Bay, was present and brought to the Commission's attention a bill that he proposes to have introduced in the State Legislature providing for the legalizing of arrangements between logging concerns and County Courts for the maintenance and upkeep of county roads that are used in connection with log hauling operations, particularly county roads in outlying districts. He read aloud the provisions of the proposed bill and explained that in his estimation the arrangements provided therein will not only help the logging industry to market considerable timber that is now wasted, but will also assist the counties in improving certain county roads that cannot be improved now because of lack of funds. He asked the Commission to support the bill as an economic benefit to the state of Oregon. The matter was discussed at some length but no action was taken thereon, it being an entirely new subject to the Commission and needful of study. Mr. Bedingfield was informed that when such study has been made, he would be advised of the results thereof. Following Mr. Bedingfield's departure, the Commission again discussed the matter briefly and referred it to the Engineer and the Chief Counsel to analyze and report back to the Commission.

Chairman Chandler reported that a legislative committee from the state of Washington wishes to meet with a committee from the Oregon Legislature to discuss matters pertaining to the interstate bridge between Rainier, Oregon and Longview, Washington, particularly the solution of a tax problem arising out of an assessment by Columbia County, Oregon, against property owned by the state of Washington at the Oregon end of this bridge; and that he and the Chief Counsel have been designated members of the Oregon group. The Chief Counsel was instructed to arrange for the meeting to be held in Portland, on February 3.

The Engineer requested an increase of $276,000 in the amount previously authorized by the Commission for financing construction of the Herman Creek Road-Gorton Creek Section of the Columbia River Highway east of Cascade Locks, Hood River County. He explained that the original plans for this project provided for construction of certain detours to be used by the public during the construction operations, and the Commission authorized a certain amount of money for the project based on the use of such detours; however, it now develops that the detours as planned are inadequate to handle the traffic satisfactorily and an increase in the authorization is needed to pay for better accommodations and to meet the increase in construction costs that has occurred since the original estimate was prepared. He pointed out that bids for this project were received by the Commission at this meeting, and that the low bid was submitted by Mr. Vernie Jarl, Gresham, at $928,820.00. The Commission authorized the increase as requested.

Commissioner Reynolds brought up for discussion a proposed change in the blanket position bond that was purchased from the General Casualty Company of America some time ago covering State Highway Department employees in the amount of $10,000 each. He pointed out that the present bond is so written that it provides protection for the members of the Commission and the State Highway Engineer or his successor only for dishonest acts of the employees; whereas in his estimation it should include "faithful performance". He suggested, therefore, that the bond be revised to include coverage not only for the dishonest acts but also for performance by the employees, in the amount of $50,000. Such a bond, he said, would cost about $3,808.48 as compared with the cost of approximately $1,700 that was paid for the present bond. He pointed out the need for this type of bond in cases such as the Strusbaugh suit which is now underway. Chairman Chandler expressed his approval of the change and referred the entire matter to Commissioner Reynolds to handle the details.

In this connection Commissioner Reynolds also mentioned that when the new State Highway Department office building in Salem is completed, the insurance that is now carried by the contractor will expire. He suggested that arrangements should be made by the Commission for insurance covering this structure at that time so it will go into effect as soon as the building is accepted. Chairman Chandler concurred in the viewpoint of Commissioner Reynolds in this matter and it was mutually agreed that Commissioner Reynolds should arrange for such insurance in the proper amount when it is needed.

The Commission discussed the advisability of employing special counsel to assist the Commission's Chief Counsel in handling the Strusbaugh suit against the Commission and certain highway department employees, which concerns the removal of materials from an island in the Snake River near Ontario for use in highway construction. It was the feeling of the Commission that legal assistance should be obtained in handling this case, and the services of someone who is an authority on water rights, etc., should be secured. The name of Mr. George T. Cochran, lawyer, La Grande, was mentioned as being very able in matters of this kind. The Chief Counsel was authorized to secure the services of competent legal help to assist him in the case.

Commissioner Reynolds requested clarification of his understanding with respect to the continuation of the recent construction of the Ochoco Highway westerly from the town of Mitchell, Wheeler County. The Engineer advised that the surveys for the project have been completed, but when available funds were recently programmed by the Commission, there did not appear to be sufficient funds in Division 4 to finance this work so it was left out of the program. Chairman Chandler stated that there is no question that the Commission is definitely committed to complete this project. It was decided to give it very careful consideration for funds that become available if the Legislature authorizes the sale of bonds to finance highway improvements.

Commissioner Reynolds also brought up for discussion a letter received by Mr. S. H. Boardman, State Parks Consultant, from Mr. Leo A. Borah, Assistant Editor of the National Geographic Magazine, in which Mr. Borah states that he plans to make a trip to the Pacific Northwest some time during the coming spring or early summer to gather material for a story on the Columbia Basin, and in which he inquires if it will be possible for Mr. Boardman to accompany him on his trip through Oregon. Commissioner Reynolds gave as his understanding that the condition of Mr. Boardman's health is such that it would not be possible for him to make the trip with Mr. Borah and he suggested, in view thereof, that the State Parks Superintendent, Mr. C. H. Armstrong, and one of the Engineers be authorized to do so, to point out and explain places of interest. The Commission approved the suggestion and thereupon instructed the Parks Superintendent to so inform Mr. Borah.

Chairman Chandler brought up for discussion the proposed improvement of the Corvallis-Newport Highway within the city limits of Philomath. He recalled that the Commission previously approved this project for undertaking in connection with the proposed improvement of the Alsea Highway south of Philomath, provided the sewer work that the city has in mind has been completed. The Engineer was instructed to contact the city to ascertain whether or not such sewer work has been done.

The following persons composed a delegation which appeared before the Commission regarding the betterment of highway facilities serving the Portland Union Stockyards and the Pacific International Livestock Exposition Building: Mr. W. E. Williams, President of the Portland Union Stockyards Company; Mr. T. H. Wilcox and Mr. Walter A. Holt, President and Manager, respectively, of the Pacific International Livestock Exposition, and Mr Frank E Kernan, property owner at this location. Mr. Williams headed the group. He said that traffic on Swift Boulevard, which serves the stockyards and the exposition grounds is becoming so great that it is dangerous to travel the road, especially during rush hours. He alleged that from 7,000 to 8,000 cars use the road daily, and that the highway as now constructed is not capable of handling the situation. He gave as his understanding that the Commission is giving some thought to improving conditions, and he stated their willingness to assist in solving the problem insofar as is possible. He mentioned a proposed cut-off extending from Swift Boulevard at the Exposition grounds, to property owned by the Pacific International Livestock Exposition and Mr. Kernan, and he said that they would be willing to donate right of way from the Exposition property, notwithstanding the fact that a portion of the area they have provided for parking of vehicles would be sacrificed, if the state will fill in adjacent property that could be used for additional parking.

The Engineer exhibited a map showing the proposed roadway as laid out along the easterly line of the Exposition property and through the Kernan property, which is proposed for eastbound traffic only. He pointed out that this roadway will make a direct connection with US99W and US99E for people who wish to go to Portland by either of these routes, but the US99E connection will pass under US99W and over the easterly ramp. He estimated the cost to construct such a project at approximately $200,000. Chairman Chandler advised that the Commission has given some study to this plan and has tentatively approved it with the intention of proceeding with construction when money can be found to finance the work. Mr. Wilcox pointed out that they do not have sufficient parking area now, and if they are obliged to give up a 60-foot right of way for this project, it will mean cutting down the area that is already too small to accommodate those who wish to use it. He also suggested that they will consider donating the right of way across the Exposition property if the state will fill in low land south of their parking area. The Engineer suggested that it would be better were the Highway Commission to purchase outright at its actual value, the right of way that it needs from the Exposition property, and that the Exposition people use this money to enlarge the parking area on their own account. He also suggested that the acquisition of the right of way across Mr. Kernan's property be handled in the same manner.

In the further discussion of this matter Commissioner Reynolds stated that the Highway Commission wants to be absolutely certain that the plan as presented by the Engineer meets with the approval of all concerned. Mr. Williams expressed his feeling that it is a feasible plan and that it will meet with the satisfaction of his associates even though the Livestock Exposition is giving up a portion of its parking area for the purpose. As a result of the discussion, the Commission authorized and instructed the Engineer to work up detailed plans of the project as outlined, and the Chief Counsel was instructed to negotiate right of way settlements. Reports covering both subjects are to be presented to the Commission when further instructions will be given. The Engineer was also instructed to prepare an estimate of the cost to fill in the low land on the Exposition grounds to provide the additional parking facilities mentioned by Mr. Williams.

The following persons representing the Cascade Highway Association, Inc. appeared before the Commission in the interests of the improvement, as a state secondary highway, of a county road about nine miles in length which extends from Stayton in Marion County to Scio in Linn County. The group was headed by T. G. Britton, Lebanon, President of the Association, and included L. E. Spraker, Stayton, Secretary; Carl Farmer, Scio, and M. Van Drieshe, Stayton, Directors; Wm. Thomas, Lebanon, member, County Commissioner Ed Rogers, Salem, and Oliver Larson, Secretary of Lebanon Chamber of Commerce. Mr. Thomas was spokesman for the group. He urged the improvement of this nine-mile section to provide an additional paved road between Lebanon

And Portland. He said that it will shorten the driving distance to Portland, And will relieve the traffic congestion on US99E. He also spoke for the improvement from a military standpoint, stating that it would be a valuable highway asset in the event of evacuation. He also said that their interests are not selfish, and he is not speaking from a local advantage standpoint, because such a highway will take away business from local merchants in Lebanon rather than increase it.

Chairman Chandler advised that because of shortage of funds at the Commission's disposal, the Commission has been very reluctant to add any more roads to the state secondary system until completion of the roads now on that system is farther advanced. He also advised that requests for secondary state highway designations must come through the county court of the county in which the road is situated, and he suggested that such procedure be followed in this instance. Upon receipt of a formal request from the county court, he said, the Commission will give the matter careful consideration. In the meantime, the Engineer will be authorized to make a reconnaissance survey of the road to determine what improvement is necessary and what it will cost to do the work. The Engineer was thereupon instructed to make such reconnaissance survey.

A group from Lane County representing the Lorane Board of Education and the Crow community was present regarding the improvement of the Territorial State Secondary Highway between the hamlet of Crow and the Douglas County line. Included in the group were Charles B. Mitchell representing the Lorane Grange; Jack Gruler, Superintendent of School District 36; Harold Foster, Director of School District 36; Arvid Rothauge, representing the Christian Church; Arthur Kragenbrich of the Lorane Grange; Ruth Mavity, Eugene, School District 66; Paul W. Blazer, representing the Crow Grange, and Charles V. Liles, Veneta, also of the Crow Grange. Mr. Mitchell headed the group and introduced the speakers. He said that the highway presently is almost impassable due to the large volume of logging trucks that use it. Mr. Gruler presented a petition signed by 418 taxpayers and citizens of the Lorane Public School District 36 in which the Highway Commission is urged to repair and provide for better maintenance on the road. He declared the road is in deplorable condition and dangerous to travel; also that its use by school buses is a costly undertaking because of the heavy expense for equipment repairs. Mrs. Mavity urged the improvement of the road in behalf of the people of the Crow district. She also mentioned the high cost of upkeep of equipment that is driven over this road.

Chairman Chandler advised that the Commission is aware of the condition of this road and of the problems of the people that use it. He also said that an engineering investigation has been made of the section and that as an immediate remedy, additional crushed rock is being applied to smooth out the worst

places. He added that the Commission has programmed a certain amount of money to reconstruct the eight-mile section between Crow and Gillespie Corner, and that the work is tentatively scheduled for undertaking in 1952. He expressed regrets that the Commission does not have sufficient funds to extend the improvement as requested There followed a general discussion, which was concluded by Chairman Chandler's assurance to the group that, pending construction of the improvement that is now planned, the road will be maintained in the best manner possible with the funds that are available.

Mr. J. C. Minson, County Commissioner of Crook County, was present. He inquired as to the plans of the Commission for the improvement of the Crooked River-Paulina Highway, particularly the section across Combs Flats, southeast of Prineville. He also requested the improvement of the O'Neil State Secondary Highway. He asked for an allocation of funds for both projects and advised that the county court is not going to ask the Commission to spend any money on county roads but intends to limit its requests to improvements of secondary state highways. Mr. Minson was informed by Chairman Chandler that the Commission is without sufficient funds to improve the Crooked River-Paulina Highway throughout at one time, but is considering improvement of the Combs Flat Section between Prineville and Crooked River, 15.9 miles in length, for which an amount of $125,000 has been tentatively provided. Such expenditure, he said, contemplates surfacing and oiling but will not provide the type of road that will stand up under constant pounding by log-hauling traffic; were the Commission to build the type of road that would stand up under such log-hauling traffic, it would require a considerably larger expenditure, which the Commission does not have. The Commission, he said, is doing the best that it can now, but it may be possible at some future time to construct an oil mat surface on this section. This concluded the discussion.

County Judge C. W. Craddock of Harney County and Mr James L. McCulloch, Chairman, Roads and Highways Committee of the Burns Chamber of Commerce, were present and requested the following improvements: 1) Completion of the Rome-Princeton State Secondary Highway between Crane and Follyfarm, about 28 miles in length; 2) Completion of Highway US395 (John Day-Burns Highway) between Poison Creek and the top of the mountain. They urged the oiling of this section which has already been graded to proper standard. Chairman Chandler advised that the Commission has in mind to complete the Crane-Follyfarm Section in its next construction program, a tentative allotment of $520,000 having been set up therefor, and that it is planned to do the work in two units during 1952 or 1953 As to the Poison Creek project, he advised that the grade has already been constructed under a Forest Highway contract and that the only reason that the oiling has not been done is lack of funds to finance it. The Highway Commission, he said, has a tentative agreement with the government officials to allot a portion of the first new monies that become available to do this work, and it is hoped that the work can be placed under contract in 1951.

Mr. McCullough inquired as to the plans of the Commission for the improvement of the Central Oregon Highway and he mentioned rumors to the effect that the Commission intends to build a new road over Sage Hen Hill. He was informed by Chairman Chandler that the Commission has authorized the Engineer to make a survey of the Sage Hen Hill Section, and to check the section in the northeast corner of Lake County, in the vicinity of Glass Butte; Also, that the Engineer has been instructed to provide better maintenance for the section east of Juntura, and to look into the need for improving the section between Burns and Buchanan. Mr. McCullough also inquired as to whether the state intends to provide greater vertical clearance for traffic at underpasses on the Juntura-Harper Section. He was informed by the Engineer that the matter is being studied, but the lowering of the floor of these underpasses would involve a drainage problem which might require pump operation. This concluded the discussion, except for the statement by Mr. McCullough that the people of his district are in favor of a highway bond issue to finance highway improvements and that it is their intention to ask their representatives in the legislature to vote in behalf of the bill that would permit the Highway Commission to sell additional bonds.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

A group representing the Association of Oregon Counties, headed by Mr. L. V. Beckley, County Commissioner of Douglas County, its President, conferred with the Commission on legislative matters. Others in the group were: James H. Sturgis, County Judge, Umatilla County; Ward R. Webber, County Judge, Wasco County; C. F. Hayes, County Judge, Polk County; J. C. Minson, County Commissioner, Crook County; Fred Kruse, County Commissioner, Coos County; F. L. Phipps, The Dalles, Executive Secretary of the Association; Wally Hector, County Engineer, Klamath County; Paul Ryning, County Engineer, Jackson County; Floyd Robb, County Engineer, Coos County; and D. B. Ambler, County Engineer, Lincoln County.

Mr. Beckley, who headed the group, explained that there is no provision in existing statutes that require the counties to maintain an engineering organization or to keep an accurate record of the expenditure of the monies they receive from the state, and, believing that the best interests of the counties and the state would be served were such features made mandatory, the Association is advocating an amendment to the law to that effect. He referred to resolutions that were adopted by the Association at its last annual meeting wherein was expressed the need for legislation requiring each county to employ a competent administrator to head its road department, to procure competent engineering service, and to install a uniform accounting system; and wherein a recommendation was made for financing the engineering and cost accounting functions by allocating to each county an additional $15,000 from

the state motor vehicle revenues, over and above the 19% that the counties now receive. Mr. Beckley stated that they originally had in mind an additional allocation of $10,000 but raised it to $15,000 after discussing the matter with the Legislative Highway Interim Committee, with the understanding that no county would receive the benefit of the allocation if it did not spend its share of the funds for the purposes intended. He added that the Association has in mind to secure legislation in conformity with the ideas expressed in the resolutions, and he requested the Commission's support. Mr. Beckley also mentioned that the Association also adopted a resolution endorsing the sale of highway bonds for the purpose of "speeding up" the construction of roads and bridges on the state primary highway system.

Mr. Ryning stated that it would be to the advantage of both the State and the counties if better engineering and accounting could be secured, in that it would relieve the State of considerable work in checking the county records and will provide for a more economical expenditure of the gas tax monies. He pointed out that under the plan advocated by the Association of Oregon Counties, the State Highway Commission would be given control over the expenditure of the $15,000 allotments and could deprive a county of its share if it did not comply with the requirements. He also said that the counties are not asking for a greater share of the highway revenues than the 19% they now receive, except for the $15,000 allotments. He asked the Commission's earnest consideration of the matter.

Commissioner Reynolds inquired how many of the counties now have county engineers. Mr. Phipps replied that 22 of the counties now have county engineers and others would have them but they cannot afford the expense. Under Oregon law, he added, County Engineers are required to be registered professional engineers.

Commissioner Chandler stated that the Commission is conversant with the county problems but is short of money. He pointed out that the counties now receive about $8,000,000 of the highway revenues and he gave as his opinion that with such sum the counties should be able to pay the cost of adequate engineering and accounting. He added that the Highway Commission can use to good advantage for state highway improvements all of the money that it has for disposal, so will not take a stand either for or against the allocation of the additional money to the counties as has been proposed, but will remain neutral and let the legislature decide the question. Commissioner Reynolds expressed his concurrence by nodding his head. This concluded the conference.

The Commission discussed briefly with Wally M. Hector, County Engineer, Klamath County, who was present, the proposal of the California Division of Highways that Oregon join with California in construction of a 4-mile section of county road which lies partly in California and partly in Klamath

County, Oregon. Commissioner Reynolds inquired as to the feeling of the people of Klamath County with respect to such road. Mr. Hector replied that they consider it definitely a California problem and responsibility. He was informed by the Commission that it is of the same opinion and that action has been taken accordingly.

The Engineer brought to the Commission's attention the need to acquire right of way for the proposed new connection of the Pacific Highway and the Willamette Highway at Goshen. He exhibited a map showing the proposed location and explained details. He advised that the project is not now provided for in any construction program but there is urgent need to acquire the right of way because there is considerable activity in the purchase of real estate for speculative purposes at this location. He asked the Commission to adopt the survey and to authorize the Chief Counsel to negotiate right of way options before prices rise by reason of the speculation. The Commission deferred until its next meeting the adoption of the survey, however, authorized negotiations to secure the right of way options. The Engineer and Chief Counsel were again instructed to expedite the surveys and the right of way negotiations on all approved projects. The Engineer was also instructed to render to the Commission, in writing, before the next meeting, his report on the survey at Goshen.

The Commission discussed with the Engineer the bids received during the morning session for highway construction. Concerning the Coos River Bridge project, the Engineer advised that there is a question whether or not the Bureau of Public Roads will concur in the award of the contract because of the steel situation and governmental restrictions, and it appears that the state must give better reasons for the need of the structure than just the elimination of the cost of the ferry operation that it replaces. He suggested that the bids be referred to him with authority to award the contract to the low bidder if and when the Bureau of Public Roads clears it. The Commission approved the suggestion unanimously.

At 3:00 p.m. Chairman Chandler publicly announced the Commission's decision with regard to each project as follows, the action of the Commission in each instance being by unanimous vote:

"Necanicum Rock Production for three State Highways and two park roads south and east of Seaside in Clatsop County. A. H. Saxton and Sons, Corvallis, submitted the low bid for this project at $24,210. Only one other bid was received. The contract has been awarded to the low bidder, A. H. Saxton and Sons, at their bid price.

"Construction of a reinforced concrete steel bridge over Coos River on the Coos River Secondary Highway in Coos County. Two bids were received for this project, both of which have been referred to the Engineer with authority to award the contract to the low bidder, Tom Lillibo, Reedsport, at his bid price of $553,789 when the project has been cleared by the Bureau of Public Roads.

"Lapine Rock Production Project on The Dalles-California and Fremont Highways near LaPine in Klamath and Deschutes Counties. There were seven bidders for this contract which has been awarded to Oscar E. Joelson, Eugene, at his low bid of $37,591.

"Grading, surfacing, and paving on the Herman Creek Road-Gorton Creek Section of the Columbia River Highway in Hood River County. There were eight bids for this project, all of which have been referred to the Engineer with authority to award the contract to the low bidder, Vernie Jarl, Gresham, at his bid price of $928,820 when certain conditions have been satisfied.

"Grading and paving the Willamina (East Main St.) section in Willamina, Yamhill County. There were two bids submitted for this contract. The Commission has awarded the contract to the low bidder, Porter W. Yett, Portland at his bid price of $14,877.

The Commission discussed a letter dated January 23, 1951, from Mr. A L. Loucks, Mayor of the City of Salem, concerning the routing of Pacific Highway East traffic on Summer Street in Salem. Briefly, the letter states that a meeting of minds has been reached among members of the Capitol Planning Commission, the Oregon State Board of Control, and the Salem City Council, whereby it was agreed to suggest to the Highway Commission an amendment to the city's agreement with the state covering highway improvements in Salem, to provide that, when the Capital Mall is extended northerly beyond Chemeketa Street, south-bound highway traffic shall be diverted west from Summer Street to Winter Street at convenient points north of the Mall. It appeared to the Commission that such disposition of this controversial problem will settle the matter for a long time, whereupon the Commission instructed the Secretary to inform Mayor Loucks that the Commission approves the proposed amendment, as requested. (See general files for Mr. Loucks' letter.)

The Engineer reported the status of surveys for various projects that heretofore have been authorized by the Commission. He was instructed to expedite them to the fullest possible extent. He was also instructed to submit to the Commission a full report, in writing, on this subject.

The Right of Way Engineer reported briefly the status of acquisition of rights of way for construction projects that are to be advertised for bids at the February meeting of the Commission. He said that for the most part, the projects will be cleared insofar as right of way is concerned, but in some instances, property descriptions have not yet been furnished him and in others, condemnation proceedings will very likely be necessary.

In discussing the matter of condemnations, the Commission ordered such proceedings started much earlier than in the past so as to avoid delaying the contracting of the work for which the right of way is being obtained.

In connection with the Summit-Lobster Valley section of the Alsea-Deadwood secondary highway, the Right of Way Engineer reported that some revisions in descriptions are necessary. The Engineer was instructed to delay the advertising of this project for a month or so. In discussing the proposed improvement along the Oregon Coast Highway through the City of Florence, the Right of Way Engineer advised that it is the obligation of the city to pay for construction of curbs and that the city is arranging to do that under the provisions of the Bancroft Bonding Act. The Commission voted unanimously to waive this city obligation and to pay for the curbs with state money, in conformity with the practice followed in other communities.

Commissioner Reynolds suggested that contracting of the Island City (Main Street) State Tax Street Fund project in Union County be deferred until the Island City-Lone Tree F. A. S. Project is ready for contracting, it being his thought that if both jobs were advertised at the same letting, cheaper contracting prices might be secured. The suggestion was approved.

The Right of Way Engineer presented a proposed settlement with the Fox Furniture Company, Portland, for right of way that is needed in connection with T. H. Banfield Expressway (Sullivan Gulch) in Portland. He said that the state is taking 1.22 acres of the company's land for which it is demanding the sum of $47,500, and he further stated that the property has been appraised by four different appraisers whose figures range from $26,000 to $45,000, the two high ones being very close together and based on the income that now is being derived from the property. He recommended payment of $47,500 in order to avoid condemnation. He was instructed by the Commission to try to get the property for $45,000, and to pay $47,500 for it if absolutely necessary.

The Engineer rendered a status report on surveys for projects that were authorized by the Commission on August 22, 1950, and for others that have been authorized but are not contained in the first and second post war programs. The Commission took no action on the report.

The Commission had under discussion the distribution, to the cities and towns of the state, of 10% of state highway revenues, pursuant to the provisions of Chapter 149, Oregon Laws, 1949. The Engineer pointed out that the law provides that the distribution shall be based on "the latest published federal census" and that the Attorney General has ruled in an opinion for the Secretary of State that such census is the census of 1940. He also pointed out that a bill has been introduced in the present legislature authorizing distribution of the funds on the tentative 1950 census figures and it is anticipated that the bill will be enacted into law. As the result of careful consideration of this matter, the Commission instructed the Secretary to ask the Attorney General for an opinion on the subject. The attached resolution marked EXHIBIT "K", which resolution provides for distribution of the funds on the basis of the 1940 census in the event the Attorney General rules that the distribution shall be made on such basis, and which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission unanimously.

The Commission discussed a controversy concerning the construction of a telephone pole line along a section of the Siuslaw Highway within the area formed by its junction with the Pacific Highway south of Junction City. It appears that the Pacific Telephone & Telegraph Company has applied for a permit to construct its pole line along the northerly side of this section but cannot arrange with the Low Pass Telephone Company and the Blachly-Deadwood Telephone Company, which now occupy that side of the highway, for a joint use of poles that would enable all wires to be carried on a single pole line, so it is necessary to refer the matter to the Public Utilities Commissioner for adjucication, under the provisions of Section 112-501, O. C. L. A. as amended by Chapter 235 of the Laws of 1947. The Commission, after due consideration, approved such procedure by adoption of the attached resolution relative thereto, marked EXHIBIT "L", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that the Commission some time ago authorized construction of the Bunker Hill-Delmar Section of the Oregon Coast Highway south of the city of Coos Bay, Coos County, including bridges over the Davis Slough and Shinglehouse Slough, but at that time no particular attention was paid to the fact that Davis Slough and Shinglehouse Slough are navigable and before bridges can be constructed over them, approval must be obtained from the U. S. Army Engineers. In view thereof he requested authority to take up the matter with the Army Engineers and secure their permission to proceed with the construction of these two bridges. The Commission approved the request unanimously.

The Engineer also mentioned that a similar permit must be obtained from the Army Engineers in connection with the widening of the bridge over

Columbia Slough on North Union Avenue in Portland, and he requested authority also to secure the permit for this purpose. The Commission approved the request.

The Commission considered, approved, and signed agreements and other papers as follows:

Renewal lease from Gilchrist Timber Company for quarry site on The Dalles-California Highway.

Quit Claim deed for access rights on US99 (old route) near Glendale Junction.

Quit Claim deed to City of Pendleton for small parcel of land.

Agreement prepared by Bureau of Public Roads covering maintenance of eight federal aid projects on Willamette Highway.

Agreement with City of Willamina covering Special State Tax Street Fund project on West Main Street.

Agreement with Coos County covering abandonment of Catching Slough-Enegren Ferry Section of Coos River Secondary Highway.

Agreement with City of Coquille covering one-way street grid in connection with the Cedar Point-Coquille project.

Agreement with Benton County providing for elimination of Tampico-Lewisville Secondary Highway from state highway system and extension of Alsea-Deadwood Secondary into Lobster Valley.

Letter to Bureau of Public Roads approving extension of Federal Aid Highway No. 5 from Springfield Junction westerly to connection with Federal Aid Highway No. 3 at Judkins Point, Eugene.

Agreement with Sublimity Telephone Company providing telephone service to Silver Falls State Park.

Bargain and Sale Deeds to Blaine G. Johnson and wife, and Jay B. Moore and wife, 2 small parcels of land in Douglas County.

Bargain and Sale Deed conveying to William F. and Bonnie F. Barratt parcel of land in Morrow County.

There being no further business, the meeting adjourned at 4:00 p. m.

Chairman

State Highway Engineer

Commissioner

Commissioner

ATTEST:

EXHIBITS "A" THROUGH "L"

Minutes of January 23 and 24, 1951

EXHIBIT "A"

Minutes of January 23 and 24, 1951

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

T. H. BANFIELD EXPRESSWAY - UNIT #5

(Johnson)

14892 - Boley, Paul L. and Margaret
Right of Way
Option expires March 12, 1951

1.57 acres at $1,500.00 per acre	$ 2,355.00	
5 room house, 1,000 sq. ft.	7,000.00	
Garage: 400 sq. ft. at $1.00 per sq. ft.	400.00	
480 sq. ft. chicken house and 3 animal hutches	829.00	
41 assorted fruit trees at $20.00 each	820.00	
Boysenberries, raspberries and blackberries	100.00	
Amount to be paid owner-chrg to Right of Way		$11,504.00

Access controlled - No access allowed

EXHIBIT "A" (cont.)

T. H. BANFIELD EXPRESSWAY - UNIT #5 (cont.)

15506 - Beadle, Robert and Elizabeth Savage (Johnson)
Right of Way
Option expires July 2, 1951

9.3 acres at $1,500.00 per acre	$13,950.00	
Severance damages for 50 acres	1,860.00	
Amount to be paid owner - chrg to Right of Way		$15,810.00

THINGS TO BE DONE BY THE STATE:

Give grantors a five (5) year easement for present barn encroachment

Access controlled - No access allowed

15488 - Marshall, James H. and Geraldine T., Green, Wilbur J. & Theodora E. (Johnson)
Right of Way
Option expires July 1, 1951

1900 sq. ft. at $0.28 per sq. ft. including severance	$ 528.00	
Amount to be paid owner - chrg to Right of Way		$ 528.00

Access controlled - No access allowed

14896 - Van Atta, Robert L. and Elizabeth V. (Johnson)
Right of Way
Option expires June 12, 1951

11,400 sq. ft. at $0.035+ per sq. ft.	$ 400.00	
Amount to be paid owner - chrg to Right of Way		$ 400.00

Access controlled -No access allowed

14900 - Summer, Norman R. and Adrienne; Eaton, Robert L. and Phyllis. (Johnson)
Right of Way
Option expires June 5, 1951

10,106 sq. ft. at $0.06 per sq. ft.	$ 606.36	
Allowance-Severance Damages to 0.56 acres.	185.64	

(cont.)

15503 - Kunz, John R. and Sadie B. (Johnson)
Right of Way
Option expires June 28, 1951

0.5 acres, more or less, at $2,500 per acre	$ 1,250.00	
House: 1 story, with basement, 1,062 sq. ft. at $11.00 per sq. ft.	11,682.00	
Garage: 240 sq. ft. at $3.00 per sq. ft., and breezeway and patio	918.00	
Allowance: Driveway, lawn, shrubs and fruit trees	800.00	
Chicken house: 200 sq. ft.	200.00	
Amount to be paid owner - chrg to Right of Way		$14,850.00

Takes All -

16778 - Beazel, Howard A. and Mildred L. (Johnson)
Right of Way
Option expires July 7, 1951

10,454 sq. ft. at $0.053+ per sq. ft.	$ 555.06	
Amount to be paid owner - chrg to Right of Way		$ 555.06

Access controlled - No access allowed

15528 - Schmidt, Don and Helen R. (Mayhew) Johnson
Right of Way
Option expires June 20, 1951

2.89 acres at $1,500.00 per acre	$ 4,335.00	
Amount to be paid owner - chrg to Right of Way		$ 4,335.00

Grantor allowed free possession until 4-1-52

Access controlled - No access allowed

EXHIBIT "A" (cont.)

T. H. BANFIELD EXPRESSWAY - UNIT #5 (cont.)

15528A- Schmidt Brothers Nursery Company (Mayhew) Johnson
Right of Way
Option expires June 20, 1951

Buildings and Nursery Stock of the Schmidt Brothers Business. Owned by Don and Helen R. Schmidt; and Daniel and Jane E. Schmidt.

Greenhouse - Wood, steel and glass construction	$ 1,570.00	
Tool House, Oil Storage house, pumice block storage cellar & cutting building	1,378.00	
Packing and shipping shed, and small dwelling	1,608.00	
600 yds. graveled and drained driveway	450.00	
270' of windbreak tree hedge	405.00	
Allowance-Removal of cold frames, plants and equipment	400.00	
Removal of 590' water pipe	590.00	
Sawdust, fertilizer	300.00	
Removal of gas tank & pump	60.00	
Allowance-Nursery stock damage	3,000.00	
Amount to be paid owner - chrg to Right of Way		$ 9,761.00

15529 - Schmidt, Daniel and Jane E. (Mayhew) Johnson
Right of Way
Option expires June 20, 1951

3.71 acres at $1,500 per acre (Nursery Land)	$ 5,565.00	
3.53 acres at $1,200 per acre	4,236.00	
5 room frame house, 900 sq. ft. at $11.86¢ per sq. ft.	10,680.00	
Allowance-Removing 333 shrubs and for approx. 8100 ft. of lawn	1,266.00	
Windbreak tree hedge	510.00	
Amount to be paid owner - chrg to Right of Way		$22,257.00

Takes all -

EXHIBIT "B"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

> WILSON RIVER HIGHWAY between the hamlet of Washburn and its junction with the Sunset Highway in North Plains, Washington County, a distance of approximately 13.21 miles,

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said maps, reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members being present and voting affirmatively as follows:

1. That the survey of the above mentioned section of state highway, particularly between Engineer's Station 2192/00 at Washburn and Engineer's Station 2870/58.14 in North Plains, together with a map, which for identification purposes bears Map File Nos. 7B-4-16, 7B-4-17 and 7B-4-18, field notes and other engineering data submitted by the Engineer, hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon; and

2. It is further ordered that the said route and the survey of the same hereby are adopted as the route and location of the WILSON RIVER HIGHWAY between the above described points.

(cont.)

3. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

4. That this resolution be entered in the minutes and records of the Commission as of the 23rd day of January 1951.

EXHIBIT "C-1"

Minutes of January 23 and 24, 1951

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the first six-month period of 1950 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Antelope	$ 277.68	Lonerock	$ 141.92

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

(cont.)

EXHIBIT "C-1" (cont.)

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them approtioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 23rd day of January, 1951.

EXHIBIT "C-2"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the second six-month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Hammond	$1,192.21
John Day	2,717.79
Juntura	471.80

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or

(cont.)

resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 23rd day of January, 1951.

EXHIBIT "D"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2953 with F. A. Dussault for furnishing crushed material in stockpiles on the Pilot Rock-Ukiah Section of the Pendleton-John Day Highway in Umatilla County, completed January 5, 1949.

Contract No. 3104 with Edwin C. Gerber for grading, paving and structures on the Tillamook-Pleasant Valley Section of the Oregon Coast Highway in Tillamook County, completed October 20, 1950.

Contract No. 3208 with C. S. Whitcomb Co., Inc., for roadside improvement on the Klamath Falls (First Avenue-Esplanade Street) Section of the Klamath Falls-Malin Highway in Klamath County, completed November 14, 1950.

Contract No. 3223 with Newport Construction Co. and Kern & Kibbe for grading and oil mat surfacing on the Holdman Junction-Campbell Ranch Section of the Athena-Holdman and Pendleton-Cold Springs Highways in Umatilla County, completed August 8, 1950.

Contract No. 3288 with Porter W. Yett for pavement resurfacing on the Halsey-Crawfordsville Section of the Halsey-Sweet Home Highway in Linn County, completed November 13, 1950.

Contract No. 3308 with R & M Construction Co. for roadside improvement on the Troutdale-Dodson Section of the Columbia River Highway in Multnomah County, completed December 14, 1950.

Contract No. 3330 with Rogers Construction Company for grading, oil mat surfacing and rock production on the Wasco County Line-Madras Section of three highways in Jefferson County, completed September 14, 1950.

(cont.)

EXHIBIT "D" (cont.)

Contract No. 3425 with Rogers Construction Company for furnishing crushed material in stockpiles on the Prineville Section of the Madras-Prineville and Ochoco Highways in Jefferson and Crook Counties, completed December 23, 1950.

Contract No. 3410 with Enoch I. Maerz for constructing latrine at Cascadia State Park in Linn County, completed January 6, 1951.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "E"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, the Sunset Highway is one of the major state highways of the State, is likewise a part of the Federal Highway system, and is under the control and jurisdiction of the State Highway Commission and which highway, throughout its entire length, carries a large volume of traffic; and

WHEREAS, it appears that in the vicinity of Sylvan, a short distance west of Portland, Multnomah County, a hazardous condition prevails upon a section of said highway by reason of buses having to stop in the travel lanes in loading and unloading passengers; and

WHEREAS, the stopping of buses in the travel lanes of said highway tends to restrict and impair the safety of the highway to such an extent that, in the opinion of the Highway Commission, a hazard is created, not only to through traffic, but to bus passengers entering and leaving the buses; and

WHEREAS, in the opinion of this Commission, public welfare and public safety require that the buses park off the main traveled lanes of said highway and that to accomplish this end, the parking of vehicles along the highway should be prohibited and that the area in which said parking is prohibited be used as bus stops.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports, and recommendations made by and under the supervision of the State Highway Engineer, that the parking of vehicles along the northerly side of the Sunset Highway (Oregon 2 and 6) between Skyline Boulevard and Southwest 58th Avenue (Hwy. Engrs. Sta. 155/26 and Hw. Engrs. Sta. 156/10, respectively) and along the southerly side of said highway between Southwest Hewitt Boulevard and a point 80 feet westerly thereof (Hwy. Engrs. Sta. 156/48 and Hwy. Engrs. Sta. 157/28, respectively) in the vicinity of Sylvan, creates a hazard not only to through traffic but to persons entering and leaving the buses.

(cont.)

2. That in the opinion of this Commission the right of way of said highway at said locations is not of sufficient width to permit parking facilities for vehicles and, at the same time, provide space for bus stops, and to provide the degree of safety and convenience which, in the opinion of this Commission, should be provided bus patrons and the motoring public.

3. That this Commission does further find and declare that the parking of vehicles for long periods of time on the northerly side of said highway between Highway Engineer's Stations 155/26 and 156/10, and on the southerly side of said highway between Highway Engineer's Stations 156/48 and 157/28 should be prohibited.

4. That the State Highway Engineer be and he hereby is instructed to erect "No Parking - Bus Stop" signs at said termini and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

5. That a certified copy of this resolution be sent to each bus company that operates over this highway, and that a like copy be mailed to the superintendent of State Police for his information and guidance.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the 23rd day of January, 1951.

EXHIBIT "F"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, the Redwood Highway is one of the major state highways of the state, is likewise a part of the Federal Highway System, and is under the jurisdiction and control of the State Highway Commission, and which high way throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that on a section of said highway situated a short distance west of the City of Grants Pass in Josephine County, there is located on property adjacent to the said highway, two auction marts, the county fairgrounds and other business establishments, and that patrons of said establishments park their cars within the right of way limit of said highway at such location and leave said cars so parked for extended periods of time, and

WHEREAS, the parking of said cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission, a hazard is created not only to through traffic but to the owners and occupants of said parked cars; and

WHEREAS, in the opinion of this Commission, public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendation made by and under supervision of the State Highway Engineer, that the parking of motor vehicles along the Redwood Highway (US199) between Mile Post 41.25 (Engineer's Station 2252/50), approximately 0.27 mile west of Allen Creek, and Mile Post 41.97 (Engineer's Station 2289/00), approximately 0.54 mile west of a junction with the Pacific Highway (US99), a distance of 0.72 mile in Josephine County, creates a hazard not only to through traffic on said highway but also to persons owning and using said parked cars.

(cont.)

EXHIBIT "F" (cont.)

2. That in the opinion of this Commission the right of way of said highway at said location is not of sufficient width to permit the parking of cars thereon and at the same time to provide the degree of safety and convenience which in the opinion of this Commission should be provided the motoring public.

3. That this Commission does further find and declare that the parking of cars for long periods of time on the right of way of said highway between said Mile Post 41 25 and said Mile Post 41.97 should be prohibited.

4. That the State Highway Engineer be and he hereby is instructed to erect "No Parking on Highway Shoulders" signs at said termini and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

5 That a certified copy of this resolution be sent to the owner and operator of "Grants Pass Livestock Auction Mart" and to the owner and operator of "Redwood Auction Company", and that a like copy be mailed to the Superintendent of State Police and to the Sheriff of Josephine County for their information and guidance.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the twenty-third day of January, 1951.

EXHIBIT "G"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Pacific Highway East

Highway number: 1-E Route number: US99E

(cont.)

EXHIBIT "G" (cont.)

Location of Termini			Established Speed
M. P. 90.35 ("W" Street in the town of Shedd, Linn, Co.)	to	M. P. 91.15 (Approx. 200 ft. south of "H" Street in the town of Shedd.	45 miles per hour.
M. P. 84.35 (Approx. 0.59 mi. north of road to Lebanon in town of Tangent, Linn County.	to	M. P. 85.45 (Approx. 0.51 mi. south of road to Lebanon in town of Tangent, Linn County.	45 miles per hour.

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

BE IT FURTHER ORDERED that this resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the twenty-third day of January, 1951.

EXHIBIT "H"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, caused an engineering and traffic investigation to be made with respect to that certain section of the Oregon Coast Highway which begins at Mile Post 24.00, at Cannon Beach Junction, and ends at Mile Post 36.00, approximately seven miles south of the town of Cannon Beach, Clatsop County; and

WHEREAS, based upon the data, facts and information obtained in connection with said investigation, the Commission did, on the 27th day of June, 1946, adopt a resolution specifiying a maximum speed for traffic along said section of highway which was less than the fixed and designated speeds prescribed by the provisions of sub-section (b) of said Section 115-320, O. C. L. A., as amended; and

WHEREAS, that portion of the said highway extending from Mile Post 24.89, which is approximately 0.23 mile south of Cannon Beach Junction, to Mile Post 27.86, which is about 1.0 mile north of the town of Cannon Beach, has been rebuilt to modern highway standards so that it no longer is necessary for traffic using said section to be restricted to a maximum speed less than that fixed and designated by the provisions of said sub-section (b) of said Section 115-320, O. C. L. A.

NOW, THEREFORE, the facts being as hereinabove stated and as determined by subsequent investigation, the Commission does hereby determine that the reduced speed heretofore ordered by its said resolution of June 27, 1946, insofar as it pertains to that portion of the said Oregon Coast Highway between Mile Post 24.89 and Mile Post 27.86 no longer is required, and the Commission does hereby vacate and annul the speed restriction for said section of the Oregon Coast Highway as contained in said resolution dated June 27, 1946; the speed restriction for traffic on said highway between Mile Post 27.86 and Mile Post 36.00 as specified in said resolution, shall remain in full force and effect until rescinded or annulled by formal order of this Commission; and

BE IT FURTHER ORDERED, that hereafter the maximum speed for traffic along the Oregon Coast Highway between Mile Post 24.89 and Mile Post 27.86 shall be the maximum speed fixed and designated by law, and the State Highway Engineer is hereby ordered to remove from said section of highway all signs containing a lesser speed designation.

BE IT FURTHER ORDERED, that this resolution be entered in the minutes and records of this Commission as of the 23rd day of January, 1951.

EXHIBIT "I"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, that highway designated as the Alsea-Deadwood Secondary Highway, otherwise known and designated as State Highway No. 201, leading south from the Town of Alsea and southwesterly through Alsea Valley and Lobster Valley to the Lincoln County road connecting with the road in Lincoln County at said county line a distance of approximately seven miles, is a state highway under the control and jurisdiction of the State Highway Commission; and

WHEREAS, that highway designated as the Tampico-Lewisville Secondary Highway, otherwise known and designated as State Highway No. 202, beginning at the West Side Pacific Highway at a point approximately 3.2 miles south of the Polk County-Benton County Line, thence in a northwesterly direction along the Tampico-Market Road No. 9 to the Polk County-Benton County Line, is a state highway under the control and jurisdiction of the State Highway Commission; and

WHEREAS, the County Court of Benton County, by Resolution dated December 30, 1949, petitioned the State Highway Commission to extend the Alsea-Deadwood Secondary Highway, and proposed that in exchange for such extension the said County would assume jurisdiction and control over the Tampico-Lewisville Secondary Highway; and

WHEREAS, the State Highway Commission has given due and careful consideration to the matter, based upon the reports and recommendations of the Chief Highway Engineer, and based also upon knowledge of the needs of the traveling public and the state as a whole;

NOW, THEREFORE, based upon the foregoing recitals of existing facts, it is hereby resolved by this Commission, two members being present and affirmatively voting, as follows:

1. That the welfare of the State and the traveling public will be best served by the elimination of the Tampico-Lewisville Secondary Highway from the state system of secondary highways and by the extension of the Alsea-Deadwood Secondary Highway, as hereinafter provided.

EXHIBIT "I" (cont.)

2. That the Alsea-Deadwood Secondary Highway be and hereby is extended for a distance of approximately 2.39 miles, so that the said highway will be located as follows:

Beginning at a junction with the Alsea State Primary Highway (State Highway No. 27) at Mile Post 40.45 in the Town of Alsea; thence southerly and southwesterly through the Alsea Valley to a junction with the county road in Section 4, Township 15 South, Range 8 West, Willamette Meridian, in Lobster Valley, Benton County, Oregon, a distance of approximately 9.69 miles.

3. That from and after the date upon which the said extended route of the Alsea-Deadwood Secondary Highway is constructed and opened for travel, the Tampico-Lewisville Secondary Highway shall be and hereby is eliminated from the state system of secondary highways, and from and after the effective date of said elimination the Tampico-Lewisville Highway shall be under the jurisdiction and control of the County Court of Benton County, and the responsibility and obligation of constructing, repairing, maintaining and improving said highway shall rest upon and be borne by the said County Court.

4. That the Secretary be and he hereby is instructed to furnish the County Court of Benton County with a duly certified copy of this resolution.

5. That this resolution be entered in the minutes and records of the Commission as of the 23rd day of January, 1951.

EXHIBIT "J-1"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compile Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Willamette Highway, The Dalles-California Highway, and the East Diamond Lake Highway are under the jurisdiction and control of the State; and

WHEREAS, for the purpose of maintaining said highways, roadbuilding materials are needed and required, and for such purposes and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for the acquisition of road-building materials and hauling road and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members thereof being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required as a source of road-building materials and for a hauling road for the removal of said road-building materials for use in connection with the maintenance of the Willamette Highway, The Dalles-California Highway, and the East Diamond Lake Highway real property located in Klamath County, Oregon, and described as follows, to-wit:

A parcel of land lying in the East half (E 1/2) of Section 2, Township 29 South, Range 7 East, W. M., Klamath County, Oregon, the said parcel being described as follows:

(cont.)

EXHIBIT "J-1" (cont.)

All of the east half (E 1/2) of the East half (E 1/2) of the Southwest quarter (SW 1/4) of the Northeast quarter (NE 1/4) and the West half (W 1/2) of the West half (W 1/2) of the Southeast quarter (SE 1/4) of the Northeast quarter (NE 1/4) of Section 2, Township 29 South, Range 7 East, W. M. Also a strip of land 30 feet in width, 15 feet on each side of a center line which begins on the south line of the Southeast quarter (SE 1/4) of the Northeast quarter (NE 1/4) of said Section 2 at a point 125 feet east of the southwest corner of said Southeast quarter (SE 1/4) of the Northeast quarter (NE 1/4) and runs thence southerly to the north line of the East Diamond Lake Highway at a point 1220 feet west of the east line of said Section 2.

The parcel of land to which this description applies contains 21.52 acres, more or less.

2. That the highway facilities for which the aforesaid property is required and is being taken has been located, planned and will be used in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-third day of January, 1951.

EXHIBIT "J-2"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compile Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the T. H. Banfield Expressway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation by motor vehicles promoted, highway travel in general safeguarded, and public welfare promoted, it is the judgment of the Commission that the real property hereinafter described is necessary and that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members thereof being present and voting affirmatively, as follows:

EXHIBIT "J-2" (cont.)

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the T. H Banfield Expressway, for the purpose of establishing, constructing and maintaining a throughway, the following-described parcel of real property, to-wit:

A parcel of land lying in the Northwest quarter (NW 1/4) of Section 33, Township 1 North, Range 2 East, W. M., Multnomah County, Oregon, and being a portion of the following-described property: That tract of land known as Tax Lot 37 which was conveyed by that certain deed to Charles D. Harter and Leota M. Harter, his wife, recorded in Book 288, Page 583 of Multnomah County Record of Deeds; the said parcel being described as follows:

Beginning at a point in the eastern boundary of said tract 103.5 feet north of the southeast corner of said tract; said southeast corner being described as the intersection of the center line of Railway Street (now N. E. 91st Avenue) with the center line of a 50-foot road (N. E. Hassalo Street); thence northwesterly across said tract to a point in the west boundary thereof 123.0 feet north of the center line of said N. E. Hassalo Street; thence north along said west boundary of said tract to a point in the south line of the right of way of the Oregon Railway and Navigation Company; thence easterly along the south line of said right of way to the intersection with the center line of Railway Street; thence south along the center line of Railway Street to the place of beginning; excepting, however, the rights of the public in and to so much thereof as may be contained in N. E. 91st Avenue.

The parcel of land to which this description applies contains 1.00 acre, of which 0.12 acre lies within the existing right of way, title to which hereby is acknowledged to be in the public, and 0.88 acre lies outside of the existing right of way.

2. That in addition to acquisition of fee simple title to the aforesaid-described real property, it is necessary that there be acquired or extinguished such interests or rights, if any there be, by which rights of access or any rights in the nature of rights of access may accrue by reason of the adjacency of the T. H. Banfield Expressway, when constructed upon the aforesaid-described real property, to the remaining abutting lands of the larger tract, of which said larger tract the aforesaid-described property is a part, and that all access, ingress, egress and regress to, from and between the aforesaid-described property, including any highway to be constructed thereon, and said remaining abutting property be prohibited.

(cont.)

3. That the highway facility for which the aforesaid real property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcel of property as to the compensation to be paid for the taking, including the damages, if any, and, in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcel of real property.

5. That upon the trial of any suit or action instituted to acquire the said parcel of real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-third day of January, 1951.

EXHIBIT "J-3"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Coast Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and improve the Cedar Point-Coquille Section of the Oregon Coast Highway, and for such purpose and in connection therewith the real property and interests in the real property hereinafter described are necessary; and

WHEREAS, said Commission is authorized to take fee title to or any interest in said real property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members thereof being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening and improvement of the Cedar Point-Coquille Section of the Oregon Coast Highway the following-described real property, in fee simple, located in Coos County, Oregon, and described as follows:

R 16921
James P. Weter

A parcel of land lying in Section 1, Township 28 South, Range 13 West, W.M., Coos County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to James P. Weter, recorded in Book 161, Page 183, of Coos County Record of Deeds; the said parcel being described as follows:

(cont.)

Beginning at the southeast corner of said property; said point being the intersection of the westerly line of Willard Street and the northerly line of Front Street in the City of Coquille; thence northerly on said westerly line of Willard Street 67.21 feet; thence southwesterly on a 90 foot radius curve right 115.45 feet to a point on the northerly line of Front Street which is 67.21 feet westerly from the point of beginning; thence easterly along said northerly line 67.21 feet to the point of beginning, containing 853 square feet.

2. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening and improvement of the Cedar Point-Coquille Section of the Oregon Coast Highway a perpetual right and easement to construct, maintain and repair slopes of cuts or fills of said highway upon real property located in Coos County, Oregon, and described as follows, to-wit:

R 16914
B. Folsom

A parcel of land lying in Lots 8 and 9, Block 7, Elliott's Addition to the City of Coquille, situated in Section 1, Township 28 South, Range 13 West, W.M., Coos County, Oregon; the said parcel being the East 50 feet of said Lot 9, and the East 50 feet of the North 5 feet of said Lot 8.

The parcel of land to which this description applies contains 2,750 square feet.

Subject to a superior right of lateral support, the owners of fee simple title to said property shall have the right to use the same for all lawful purposes, including the right to place and maintain buildings or other improvements thereon.

3. That the highway facility for which the aforesaid real property and interests therein are required and are being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the 23rd day of January, 1951.

EXHIBIT "J-4"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a relocation of the Cascade Locks-Herman Creek Section of the Columbia River Highway, and has ordered and declared that said relocated section shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purposes of establishing, constructing and maintaining the said relocated Cascade Locks-Herman Creek Section of the Columbia River Highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation by motor vehicles promoted, highway travel in general safeguarded, and public welfare promoted, it is the judgment of the Commission that the real property hereinafter described is necessary and that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members thereof being present and voting affirmatively, as follows:

EXHIBIT "J-4" (cont.)

1. The Commission does hereby find and declare that there is needed and required and is being appropriated for right of way of the relocated Cascade Locks-Herman Creek Section of the Columbia River Highway for the purpose of constructing and maintaining a throughway the following-described real property, to-wit:

A parcel of land lying in the Mountainview Addition to Cascade Locks, situated in Section 7, Township 2 North, Range 8 East, W. M., Hood River County, Oregon; the said parcel being that portion of said Mountainview Addition lying south of a line which is parallel to and 100 feet northerly of the center line of the Columbia River Highway as said highway has been relocated, which center line is described as follows:

Beginning at Engineer's center line Station 165/00, said Station being approximately 108 feet west and 140 feet south of the northeast corner of the John Chipman D. L. C., which corner is the initial point of said Mountainview Addition; thence North 74° 39' 30" East 1,000 feet to Station 175/00, said center line crossing the west line of Lot 2, Block 2, and the east line of Lot 23, Block 1, of said Addition, approximately at Stations 166/13 and 172/40, respectively.

The parcel of land to which this description applies contains 6.675 acres, of which 1.613 acres lie within the platted streets and alleys, title to which hereby is acknowledged to be in the public, and 5.062 acres lie outside of said streets and alleys.

2. That in addition to acquisition of fee simple title to the aforesaid-described real property, it is necessary that there be acquired or extinguished such interests or rights, if any there be, by which rights of access or any rights in the nature of rights of access may accrue by reason of the adjacency of the relocated Cascade Locks-Herman Creek Section of the Columbia River Highway, when constructed upon the aforesaid-described real property, to the remaining abutting lands of the larger tract or parcels, of which said larger tract or parcels the aforesaid-described real property is a part, and that all access, ingress, egress and regress to, from and between the aforesaid-described property, including any highway to be constructed thereon, and said remaining abutting property be prohibited.

3. That the highway facility for which the aforesaid real property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcel of property as to the compensation to be paid for the taking, including the damages, if any, and, in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcel of real property.

5. That upon the trial of any suit or action instituted to acquire the said parcel of real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-third day of January, 1951.

EXHIBIT "K"

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, by the enactment of Chapter 149, Oregon Laws 1949, it is provided as follows:

"Beginning with the year 1949 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 10 per cent of all monies credited to the state highway fund by the state treasurer between January 1 and December 31 of each year and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O. C. L. A.; section 15 chapter 413, Oregon Laws 1945, as amended by section 4, chapter 114, Oregon Laws 1947; and section 29, chapter 467, Oregon Laws 1947; and from fines and penalties collected for violations of the motor vehicle and transportation laws. Such appropriation shall be distributed among the several cities as provided in this act."

AND, WHEREAS, by said law it is further provided that:

"Such appropriation shall be allocated to the cities as follows: The sum of two hundred fifty thousand dollars ($250,000) shall be withdrawn from such appropriation each year and set up in a separate account to be administered by the State Highway Commission. Such account shall be spent each year by such Commission upon streets not a part of the state highway system within cities which are receiving excessive wear through sudden increases in population in the area or heavy and unusual industrial traffic. Such Commission shall determine the distribution of such expenditures after considering applications made to it therefor from the cities. The balance remaining in such appropriation after the withdrawal of said two hundred fifty thousand dollars ($250,000) shall be distributed to all of the cities. Each city shall receive such share of the balance as its population bears to the total population of the cities."

AND, WHEREAS, by section 3 of said act it is provided that:

"Funds accrued and payable to cities under this act shall be remitted semiannually by the Secretary of State to the financial officer of each city. The funds appropriated by this act shall be apportioned on a semiannual basis immediately following June 30 and December 31 of each year by the State Highway Commissio who shall certify such apportionment to the Secretary of State. Upon receipt of such certificate the Secretary of State shall issue his warrants therefor payable to the cities in the amounts set out."

(cont.)

EXHIBIT "K" (cont.)

AND, WHEREAS, the monies which have been credited to the state highway fund by the State Treasurer covering the period of July 1 to December 31, inclusive, of the year 1950, which funds have accrued from sources designated in said legislative act, amount to $23,651,760.91 and are derived from funds accruing from the following sources:

Section 115-135, O.C.L.A. (motor vehicle license fees)	$ 4,073,648.61
Section 15, Chapter 413, Oregon Laws 1945, as amended by Section 4, Chapter 114, Oregon Laws 1947 (gasoline tax)	16,376,914.89
Section 29, Chapter 467, Oregon Laws 1947 (motor carrier fees)	3,040,294.27
From fines and penalties collected for violations of the motor vehicle and transportation laws	160,903.14
	$23,651,760.91

AND, WHEREAS, the ten percent of the $23,651,760.91 which is available for distribution among the cities amounts to $2,365,176.09: and

WHEREAS, after withdrawing the sum of $125,000 (one-half of $250,000) as provided in said act, which sum is to be administered by the State Highway Commission within the meaning of Section 2 of said chapter 149, Oregon Laws 1949, there remains a balance of $2,240,176.09, which balance is, in response to the command of said statute, to be distributed amond the cities of the state, each city being entitled to receive such share of said balance as its population bears to the total population of the cities;

WHEREAS, by applying the factors of allocation or distribution provided for in said Chapter 149, Oregon Laws 1949, the State Highway Commission has determined upon an apportionment of said balance among the cities the state as shown in the tabulation given below;

NOW, THEREFORE BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, two members being present and affirmatively voting, as follows:

(cont.)

EXHIBIT "K" (cont.)

1. That the Commission does hereby find and declare that the funds made available for distribution among the cities of the state pursuant to said law should be and are allocated and apportioned to the cities named below in the amounts set opposite the names of the respective cities:

I. Cities of Populations 1,000 or More

Minutes of January 23 and 24, 1951

RESOLUTION

WHEREAS, the Siuslaw Highway, extending from a junction with the Oregon Coast Highway north of Florence, easterly via Mapleton and Blachly to a junction with the Pacific Highway south of Junction City, is a primary state highway under the jurisdiction and control of the State Highway Commission, and

WHEREAS, The Pacific Telephone and Telegraph Company, a California corporation, authorized to do business in the State of Oregon, has made application to this Commission for authority to construct, maintain, and operate a telephone line, with appropriate wires and fixtures, on and along the right of way of the said Siuslaw Highway between mile point 50.84, at or near the crossing of the Long Tom River, and mile point 65.50, at or near the crossing of Dorsey Lane, approximately two (2) miles westerly from the intersection of the Siuslaw Highway and the Pacific Highway, and

WHEREAS, the northerly side of the said section of the said Siuslaw Highway is now occupied by a single line of telephone poles, wires, and fixtures under permits heretofore issued to Low Pass Telephone Company and Blachly-Deadwood Telephone Company, and

WHEREAS, the southerly side of the said section of the said Siuslaw Highway is now occupied by a single line of power poles, wires, and fixtures for the purpose of conveying electric power or electricity under permits heretofore issued to Blachly-Lane County Cooperative Electric Association, and

WHEREAS, the matter has been considered and it is the opinion of this Commission that the public interest, safety, and convenience will be best served by requiring that poles, wires, and fixtures, for the purpose of conveying electric power and electricity, be located on and along the southerly side of the said section of the said Siuslaw Highway and wires and fixtures, for the purpose of telephone service and communication, be located on and along the northerly side of the said section of the said Siuslaw Highway, and that the said telephone wires and fixtures be constructed, located, and situated on a single line of poles, and

WHEREAS, this Commission has been advised and informed that The Pacific Telephone and Telegraph Company, the Low Pass Telephone Company and Blachly-Deadwood Telephone Company have been unable to agree on the terms and conditions of joint occupancy of a single line of poles on the said northerly side of the said section of the said Siuslaw Highway, and

(cont.)

WHEREAS, this Commission is of the opinion that the application of the said The Pacific Telephone and Telegraph Company is meritorious and should be granted.

NOW, THEREFORE, BE IT RESOLVED by this Commission:

1. That the application of the said The Pacific Telephone and Telegraph Company for authority to construct, maintain, and operate a telephone line, with appropriate wires and fixtures, on and along the right of way of the said Siuslaw Highway between Mile point 50.84, at or near the crossing of the Long Tom River, and mile point 65.50, at or near the crossing of Dorsey Lane, approximately two (2) miles westerly from the intersection of the Siuslaw Highway and the Pacific Highway, is meritorious and should be granted.

2. That the said wires and fixtures of The Pacific Telephone and Telegraph Company and the wires and fixtures of the Low Pass Telephone Company and Blachly-Deadwood Telephone Company should be constructed, located, and situated on a single line of poles on the northerly side of the said Siuslaw Highway between the mile points hereinabove stated.

3. That copies of this resolution, duly certified by the Secretary of this Commission, be mailed to The Pacific Telephone and Telegraph Company, Low Pass Telephone Company, and Blachly-Deadwood Telephone Company, at their respective mail addresses, and in the event that the said Companies, or any of them are unable to agree on the terms and conditions of joint occupancy of a single line of poles, on the northerly side of said highway, within thirty (30) days of the date of the mailing of such copies of this resolution, or fail to advise the Chief Counsel of this Commission, within such time, that such an agreement has been reached, the Chief Counsel of this Commission is hereby authorized and directed to request the Commissioner of Public Utilities to determine the practicability of such joint occupancy and the effect thereof upon adequate and safe service by the proposed joint occupanc the location of the line of poles to be used, and, if found to be practicable, to fix an prescribe the terms and conditions pursuant to which such joint occupancy shall be accomplished.

EXHIBIT "M"

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Pacific Highway

Highway number: 1 Route number: US99

(cont.)

EXHIBIT "M" (cont.)

Location of Termini			Established Speed
M. P. 288.39 (approx. 0.25 of a mile northwesterly from the approach to the new Rogue River Bridge at the town of Rogue River)	to	M. P. 288.89 (approx. 0.25 of a mile southeasterly from the approach to the new Rogue River Bridge at the town of Rogue River)	40 miles per hour.

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

BE IT FURTHER ORDERED that this resolution be entered in the minutes and records of the Oregon State Highway Commission as of the 23rd day of January, 1951.

Portland, Oregon
February 26, 1951

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
C. H. Armstrong, State Parks Superintendent
M. H. Hawke, Auditor
H. B. Glaisyer, Secretary

Commissioner M. K. McIver was excused from attending this meeting.

The State Parks Superintendent reported on the following state parks matters:

1. Inspection of state parks in the state of Washington, with particular reference to overnight camping: The Parks Superintendent submitted a written report on this subject dated February 13, 1951 (see copy of report in general files for details). The report covers, briefly, inspection of nine parks in the western part of the state of Washington and reveals that development of overnight camping facilities in these parks has not as yet progressed to any great extent. However, it was learned that the Washington plan is very similar to the plan proposed for the state of Oregon. The report also discloses that 75¢ per night, including fuel and electricity, is to be charged for the use of these facilities, regardless of the number of people that will be accommodated. The Commission took no action on the report.

2. Sale of timber on Wilson River Highway: The Parks Superintendent advised that pursuant to authority previously granted by the Commission, the sale of certain timber along this highway was advertised for bids to be received in Salem on February 5, and that five bids were received in response thereto, that of Leonard Fowles of Hillsboro being the high one, at $12.80 per thousand. He recommended acceptance of this offer. The Commission adopted the recommendation.

3. Request of James E. Quigley, Sixes, Oregon, to purchase standing dead timber and down timber on state-owned property in the NW 1/4 of the SE 1/4 of Section 33, Township 31 South, Range 15 West, three miles north of Sixes River, Curry County: The Parks Superintendent advised that the timber referred to is mostly Port Orford cedar with some fir, all of which has been killed by fire and is of no value to this wayside area. He recommended sale of the timber as the result of competitive bidding therefor. The Commission approved the recommendation.

4. Sale of "danger" trees on the Crater Lake Highway and at Mile Point 10 on the Salmon River Highway: The Parks Superintendent advised that there are two trees on the Crater Lake Highway and one on the Salmon River Highway that constitute a hazard to highway traffic and should be removed. He requested authority to negotiate the private sale of these trees. The Commission approved the request.

5. Gift of Louis W. Hill, Jr. of 180 acres of land for park purposes at Netarts Bay: The Parks Superintendent advised that Mr. Hill is the administrator of the estate of his father, Louis W. Hill, son of Jim Hill, the railroad magnate, and that he has offered to present this property to the state as a gift for park purposes on the condition that the state will stabilize some sand blows on the property, will construct about one-quarter mile of fence to restrain his stock, will prohibit automobiles from going on the beach, and will erect a marker naming the park the "Louis W. Hill State Park". He also advised that the area is a wonderful camping place, with a good beach frontage, and that it adjoins the present Cape Lookout State Park. He estimated the cost to stabilize the sand blows, which consist of about twelve acres of land, at $4,800, and the fencing and marker at $1200, making a total of $6,000. He pointed out, however, that one of the sand blow areas is on the Hill property and that Mr. Hill will reimburse the state for stabilizing that particular area. The Parks Superintendent also mentioned that there is no roadway leading into the area at the present time, so at some future time it will perhaps be necessary to extend the existing county road about two miles, but there is no obligation on the part of the state to do that now. He recommended acceptance of the gift. The Commission approved the recommendation unanimously, and authorized the expenditure to stabilize the sand blow areas. The Parks Superintendent was instructed to notify Mr. Hill of the action taken by appropriate letter of thanks.

6. Proposal of Ken-Nard Timber Company for exchange of timberland in Lincoln and Tillamook counties: The Parks Superintendent advised that the Highway Department owns a tract of land in the SW 1/4 of the NE 1/4 of Section 20, Township 11 South, Range 11 West, W. M., Lincoln County, south of Yaquina Bay, and that the Ken-Nard Timber Company wants to ac-

quire the timber located thereon and as consideration has offered to deed to the state a tract, owned by one of the members of their firm, that is in the SW 1/4 of Section 30, Township 2 South, Range 10 West, at the south end of Netarts Bay in Tillamook County, adjoining the tract that is being given to the state by Mr. Louis W. Hill, Jr. A cruise of the timber on the state's property, he said, reveals about 1,145,000 F. B. M., whereas the timber on the company property has been cruised at 261,000 F. B. M. The state's property, he said, is of no particular value for highway purposes, whereas the company land would make a fine addition to Cape Lookout State Park. He recommended, in view thereof, that he be authorized to negotiate with the company for an exchange of properties on the basis of actual value of each. The Commission authorized the negotiations on such basis and instructed the Parks Superintendent to report the results thereof.

7. Proposal of the Daughters of the American Revolution to construct and maintain a caretaker's cottage and tearoom in Champoeg State Park: The Parks Superintendent stated that according to Mrs. John Y. Richardson of Portland, Chairman of the Memorials Committee of the D. A. R., the State Board of Control in 1932 gave the D. A. R. a perpetual grant to land in this park on which to erect a museum to house pioneer relics, and that the Society did erect and now maintains a log building for this purpose which is currently estimated to have a value of $30,000. It appears, he said, that there is no place in the building to accommodate a caretaker, and the Society wants to erect a cottage in the park for the caretaker's use and to serve as a tearoom for the members of the Society and as an accommodation to other visitors to this place. He further said that the Society proposes to finance the building partially by a state appropriation of $15,000 and partially with funds derived from other sources, and they are now asking the State Highway Commission to endorse their project and their request for state funds which is now before the legislature. The Parks Superintendent advised that there would be no objections to the construction of the caretaker's cottage in the park if it were located near the present building, and he recommended approval of such project on the condition that it will not be necessary to contribute state highway funds to help finance it. Chairman Chandler stated his approval of the recommendation on such basis, as did also Commissioner Reynolds. The Commission ordered the matter covered by a written agreement between the State D. A. R. and the Commission, which agreement among other things, shall provide that no state highway funds whatsoever shall be used to finance the project.

8. Trespass by Gerald Johansen on state property on Sunset Highway: The Parks Superintendent advised that the Commission some time ago sold to Mr. F. C. Hathaway, as a result of competitive bidding, timber located on the Sunset Camp-Summit Section of the Sunset Highway, opposite Sunset Springs. Mr. Hathaway, he said, arranged with Mr. Gerald Johansen to remove the timber, and the limits of the project were pointed out to him, but it seems that Mr. Johansen did not clearly understand the limits; anyway, before he was stopped, he had cut timber located on land that the Commission heretofore agreed to deed to the State Forestry Department. He suggested, in view of the circumstances, that it might be advisable to turn the matter entirely over to the State Forestry Department to iron out, and to prosecute Mr. Johansen, if necessary. The Commission approved the recommendation unanimously.

9. Status report on proposed state park at McNary Dam: The State Parks Superintendent advised that the Right of Way Department, which has been negotiating with Mr Charles Kik, owner of the property that is needed for the park, is not having much success, Mr. Kik having demanded the sum of $12,000 for the 195-acre tract that he owns north of the present railroad, exclusive of a strip along the north edge that eventually will front on the shore of McNary Lake. Commissioner Reynolds stated that Mr. Kik was offered the sum of $5,000 for his property, which was considered very liberal, and he suggested, in view of the fact that it does not appear that the state can acquire the property without resorting to condemnation, that the matter be referred back to the Umatilla County Court to handle further negotiations with Mr. Kik, it being his thought that the County Court might be able to get a better deal, and that if the Court cannot get Mr. Kik to lower his price, then the state can still go ahead with the condemnation proceedings. Chairman Chandler stated his concurrence with the suggestion, and it was so ordered, with the understanding that if the County Court is able to obtain an option from Mr. Kik on the basis of the payment of $5,000, it will be accepted by the Commission.

10. Overnight camping development in state parks: Pursuant to instructions previously given him by the Commission, the State Parks Superintendent presented plans for proposed overnight camping areas in the state parks at Wallowa Lake and Silver Creek Falls, together with the estimated cost to provide such facilities in both places, and he explained details. He estimated the cost to provide the facilities in Wallowa Lake State Park at $40,800, and in Silver Falls State Park at $41,100. After considerable discussion the Commission approved both projects and authorized the Engineer to advertise them for bids to be received at the earliest possible time. In this connection the Commission also discussed the matter of providing similar facilities in Sunset Bay State Park, Coos County, but deferred definite

action thereon pending consummation of negotiations with Mr. George J. Landrith for the acquisition of additional land that is needed at this location.

11. Proposal of the U. S. Army Engineers that the State Highway Department participate in the management and maintenance of recreational development at Fern Ridge Reservoir, Lane County: The Parks Superintendent advised that he has received plans from the Army Engineers for a master recreational development at this place, particularly for the establishment of such facilities at Point Richardson and at the existing boat basin of the Eugene Yacht Club and the Boy Scouts of America, and that they wish to know whether the State Highway Commission is interested in participating in this recreational development under a cooperative plan with the Department of the Army. He was instructed by the Commission to investigate the matter and report his findings, at which time the decision will be reached.

12. Proposed sale of dead and down timber along Short Sand Creek in Clatsop County: The Parks Superintendent reported a request from Baty and Brown, Seaside, to purchase the dead and down timber in this district, including the "danger" trees. He estimated that there are about 75,000 to 100,000 feet of timber in this category and gave as his feeling that it would be a fine thing to get rid of it if possible. He requested authority to advertise for bids for the purchase of the timber. The Commission approved the request.

13. Proposed sale of timber on a quarry site in the vicinity of Waterloo adjacent to the South Santiam Highway in Linn County: The State Highway Engineer reported receipt of informal requests from two loggers to purchase the merchantable timber on this tract, which consists of 37.07 acres and which is situate on the southerly side of the Santiam Highway about four miles east of Lebanon. A cruise, he said, indicates approximately 85 M-FBM of timber, of which about 900 FBM is Ponderosa pine and the balance second growth Douglas fir, the value of which, as appraised by the State Forester, is between $8.00 and $10.00 per thousand. He requested authority to advertise for bids for the purchase of this timber. The Commission deferred a decision in the matter until its next meeting and instructed the Engineer in the meantime to ascertain what effect the cutting of the timber will have on the scenic aspect of the highway.

14. Results of receiving of bids in Salem on February 16 for the purchase of merchantable dead timber along the Salmon River Highway in Lincoln and Tillamook Counties: The Parks Superintendent advised

that pursuant to the Commission's instructions this timber was advertised for sale but no bids were received.

15. Proposed sale of salvageable snags and down logs on state-owned property adjacent to Necanicum Highway in Clatsop County: The State Highway Engineer reported receipt of requests from a number of people residing in the vicinity of Seaside to purchase salvageable snags and down logs on a 120-acre tract of state-owned land adjacent to the Necanicum Highway about one-half mile south of its junction with the Sunset Highway. The property in question, he said, was acquired by a former Highway Commission in 1937 as a site for a section maintenance headquarters, and the timber standing thereon has been cruised at 60,000 FBM spruce and 100,000 FBM Douglas fir. He also said that the State Forestry Department has appraised the timber at from $6.00 to $8.00 per thousand. He recommended that the timber be advertised for sale. The Commission approved the recommendation.

16. Proposed revision of plans for the caretaker's building in Yaquina Bay State Park: The Parks Superintendent recalled that the Commission at its meeting on January 23, 1951, awarded to T. J. Patzer, Salem, the contract for construction of this building, the plans for which included a basement. In excavating for the basement, he said, the contractor encountered quicksand, to drain which is estimated to cost an extra $1,000. To avoid this extra expense the building was redesigned without a basement, but with a utility room, and the contractor has agreed to construct the building in conformity with the new design at no extra cost. Moreover, he will waive any claim for reimbursement for expense already incurred in construction of the basement. The Parks Superintendent also said that were the Commission to re-advertise the project, it would be necessary to reimburse the contractor for his expense on the basement, which amounted to about $700. He recommended acceptance of the contractor's offer to construct a building without basement but with the utility room at no extra expense. The Engineer concurred. The Commission approved the recommendation unanimously and ordered the arrangement covered by a written agreement between contractor Patzer and the state.

The Right of Way Engineer presented for the Commission's consideration options that have been obtained for acquisition of real property that is needed for various highway improvements throughout the state, and he explained details. After careful consideration of the terms of the individual options the Commission authorized the Right of Way Engineer to close them at the amounts stated therein. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the unanimous vote of the members present.

The Assistant Counsel, Mr. C. W. Enfield, reported the need to condemn certain properties that are necessary as right of way for Unit No. 5 of the T. H. Banfield Expressway in Portland. He presented a list of the properties, together with the amounts of the proposed offers for them, as follows:

Unit #5, T. H. Banfield Expressway		Recommended Offer
R 16777 Harrison W. Jensen (Multnomah County) (Right of Way)		
0.232 acres at $2800 per acre	$ 649.60	$ 650.00
R 16863 Arthur R. L. Chase (Multnomah County) (Right of Way)		
2.4 acres of land	$1,875.00	
46 rods of fence at $5.00	230.00	
	$2,105.00	2,125.00
R 15533 Sylvester B. Hall (Multnomah County) (Right of Way)		
6.50 acres of land at $900	$5,850.00	
Fencing, 67 rods at $5.00	335.00	
	$6,185 00	6,200.00
R 15516 Ralph Garbarino (Multnomah County) (Right of Way)		
3.12 acres at $1,300	$4,056.00	4,075.00
R 15476 J. Bardell Purcell (Multnomah County) (Right of Way)		
Land: 7,350 sq. ft. at $0.20	$1,470.00	
House: 806 sq. ft. at $8.15	6,568.90	
	$8,038.90	8,050.00
R 15478 Ernest W. Buck (Multnomah County) (Right of Way)		
Land: 6,500 sq. ft. at $0.20	$1,300.00	
House: 806 sq. ft. at $8.50	6,851.00	
	8,151.00	8,175.00

After careful consideration the Commission approved the offers and authorized the Chief Counsel to proceed with the condemnation proceedings. The attached resolution relative thereto, marked EXHIBIT "K", which resolution by this reference is made a part hereof with like effect as though ex-

tended in full herein, was thereupon adopted by the Commission unanimously upon motion of Commissioner Reynolds.

In this connection, the Assistant Chief Counsel also mentioned the necessity to condemn property needed for wayside purposes along the Sunset Camp-Manning Section of the Sunset Highway in Washington County, particularly the holdings of Ray A. Thorensen. He recommended an offer of $15,500 in connection with the proceedings. The Commission deferred a decision in the matter pending study and ordered the records searched to ascertain whether or not the Commission is definitely committed to acquisition of the property. The Chief Counsel was instructed to report on the matter at the next meeting and to have on hand a map showing the location of the property.

The Engineer brought up for discussion the matter of acquiring additional right of way for a proposed improvement of the Columbia River Highway where it connects with the road that leads to the interstate bridge which is now under construction near the town of Seufert He said that the present right of way along this section is only 20 feet wide and will have to be widened when the highway is improved. The matter comes up now, he said, because the contractor for the bridge construction wants to build the roadway approach and he has agreed to construct the highway to state standards at his own expense if the state will procure right of way as may be needed. He pointed out that the property is owned by Seufert Brothers, who are demanding a high price for their land, and it appears likely that the right of way will have to be condemned. He also pointed out that additional property eventually will have to be acquired from the Seuferts and he suggested that if the Commission approves acquisition of the right of way, the additional land be included in the negotiations. He exhibited a map showing the proposed plan. The matter was discussed at some length but the Commission deferred a decision until its next meeting. The Engineer was instructed to render a complete report at that time.

The following sales of miscellaneous properties were reported by the Right of Way Engineer and confirmed by the Commission:

Item	Former Owner and Location	Purchaser	Sale Price
Old building	Olaf Ohlsen Necanicum Junction Oregon Coast Hwy.	G. Harms Hamlet Route Seaside, Oregon	$ 35.00
Building	Ralph K. Goodell Canyonville Section Pacific Hwy.	Roy L. Houck & Son Contractors Salem, Oregon	25.00

Item	Former Owner and Location	Purchaser	Sale Price
Building	S. G. Garriott Canyonville Section Pacific Highway	Roy L. Houck & Son Contractor Salem, Oregon	$ 85.00
Building	L. T. Boyle Canyonville Section Pacific Highway	Roy L. Houck & Son Contractor Salem, Oregon	$100.00
Building	Sisson Grocery Cascade Locks-Viento Section - Columbia River Highway	Ted Jennings & R. T. Cobia Route 4, Box 539 Hood River, Ore.	$126.00
Building	Sunnyvale Grocery Bay Park-Delmar Section, Oregon Coast Highway	Ernest Pemberton 210 Schroeder St. Coquille, Oregon	$150.90
2x6 wooden door	D. L. Sisson Cascade Lock-Viento Section - Columbia River Highway	R. W. Carpenter c/o Shops Salem, Oregon	$ 4.50
6-room house, and garage	Glenn Perry Matteson Judkins Point-Goshen Section - Pacific High- way	Lyle E. Lowman Route 4, Box 45 Eugene, Oregon	$661.00
6-room house	Rose Kehrli Front Avenue Section Pacific Highway West	L. A. Ware 7126 N. Amherst Portland, Oregon	$102.00

In this connection the Right of Way Engineer reported that as previously authorized by the Commission, bids were received in Salem on February 23, 1951, for the purchase of certain property in Portland described as the western 75 5 feet of Lot 5, Block 56, Caruthers Addition to the City of Portland, containing 3,777 square feet of land. This sale, he said, was advertised pursuant to the provisions of the statutes which require publication of the notice four weeks before the sale, and the specifying of a minimum

sum that will be considered for the property, such minimum sum in this instance being $2,500. Only one bid was received for this property, he said, being that of Sidney Wallace, Portland, at $2,650. He recommended acceptance of the offer The Commission approved the recommendation unanimously upon motion of Commissioner Reynolds that the property be conveyed to Mr. Wallace by bargain and sale deed because it no longer is needed, required or useful for highway purposes.

The Right of Way Engineer brought up for discussion the matter of quit-claiming to J. L. and Ada Stuart, Albany, certain property consisting of an abandoned street in Albany, which was vacated at the time the overpass was constructed at this place. He said that when the streets were vacated for the accommodation of the overpass, it was thought that one-half of the street in front of Lot 8, Block 9, Eastern Addition to Albany, would revert to the Stuarts, who were the abutting property owners, but through a technicality of the original platting, all of the street reverted to the state, and the Stuarts are now asking that they be given one-half of the street along their frontage on the north side of the center line. He recommended approval of the request. The Commission approved the recommendation on motion of Commissioner Reynolds. (A quitclaim deed conveying the property to the Stuarts was signed later in the session)

The Right of Way Engineer reported that when the right of way for the Pleasant Hill-Lost Creek Section of the Willamette Highway was acquired, the state also acquired a small triangular tract for the sole purpose of providing access to the Pleasant Hill Cemetery from the new highway. This small tract, he said, is still in the name of the state, but the Cemetery Association wants to acquire it and has offered to pay the sum of $400 for the same. He recommended acceptance of the offer. The Commission approved the recommendation on motion of Commissioner Reynolds that the property be conveyed by bargain and sale deed to the Cemetery Association because it is no longer needed, required, nor useful for highway purposes. (The deed conveying the property to the Association was signed later in the session.)

In the discussion of this matter the question arose whether or not conveyances of this kind must be approved by the Commission by formal resolution. The Chief Counsel advised that a formal resolution is not essential, that a short entry in the Commission's minutes is all that is required. In view of this information the Commission instructed the Secretary hereafter to cover such matters by minute entry only.

The Right of Way Engineer presented an offer from Mr. Dan F. Clare to purchase for the sum of $325. a small parcel of ground which was acquired by the state in connection with negotiations for the Glendale-Johns Section of the Pacific Highway He explained that the tract adjoins Mr. Clare's land --

in fact, it lies between his land and the highway, and Mr. Clare wants to acquire it in order to fill out his holdings. He recommended acceptance of the offer because the property is of no value for highway purposes. As a result of discussion, motion was made by Commissioner Reynolds that this property be conveyed by bargain and sale deed to Mr. Clare for the amount of his offer in view of the fact that it no longer is needed, required, or useful for highway purposes, with the understanding that right of access to the highway from the property shall be denied. The motion was seconded by Chairman Chandler and carried. (The deed conveying the property to Mr. Clare was signed later in the session.)

The Right of Way Engineer brought to the Commission's attention the claims of Kluver's Radio Store and Western Realty Company, Roseburg, for compensation for loss of business during the time that their building was being moved to accommodate highway construction. He said that at the time settlement was made with these people for right of way, they did not realize that they could not conduct their business in the usual manner, and they have now submitted claims for loss of business during the time that their building was being re-established. The original claims, he said, were quite severe, but as a result of negotiations, the amounts thereof have been reduced to $200 each, upon payment of which both parties will waive all claims for further damage. He gave as his feeling that the settlements are fair and that the state is morally obligated to pay the claims, and he so recommended. The Commission approved the recommendation upon motion of Commissioner Reynolds

The Right of Way Engineer also presented a claim from Edwin D. and Jennie V. Smith for the loss of a fruit tree on the Mehama-Mill City Section of the North Santiam Highway. He said that the tree was growing partly on the highway right of way and partly on the property of the Smiths, who were not allowed any compensation for it in the right of way settlement, but who now claim $35 damages because the tree was destroyed by the contractor in his clearing operations He recommended payment of the claim. The Commission approved the recommendation on motion of Commissioner Reynolds.

The Engineer reported that the state owns a quarry site along the Pacific Highway south of Roseburg, at a place known as Kelley's Corner, that has been used for some time past by employees of the E. K. Wood Lumber Company, which operates a mill nearby, as a parking place for their cars. He said that such use of the quarry is not objectionable, but in his estimation, these people should be required to pay for the privilege; moreover, they have agreed to do so. He suggested the payment of $75 per year, with the provision that the renters shall construct fencing so

cars cannot park nearer than fifteen feet from the highway pavement, and shall vacate the premises when the quarry is needed for state purposes. The Commission approved the suggestion unanimously. (A lease agreement covering the matter was signed by the Commission on the following day.)

The Right of Way Engineer presented a request from Orlie and Dorothy Lapping, North Bend, to lease certain state-owned property along the Oregon Coast Highway in the southern part of North Bend that they need to provide off-street parking for patrons of their grocery store. He said that the area is of variable width and that its nearest edge is 44 feet from the center of the highway, whereas the concrete curb has been constructed 32 feet from the center line of the highway, which leaves a strip 12 feet wide for sidewalk and for use by utilities. He gave as his opinion that such use of the property on a revocable basis would not be objectionable, and he recommended the granting of the lease on the condition that the Lappings will pay $125 annually for the use of the property and will construct a concrete curb along the 44-foot line to prohibit cars from parking nearer than that to the highway pavement. The Commission approved the arrangement unanimously. (A lease agreement covering the matter was signed by the Commission on the following day.)

The meeting recessed at 12:00 noon and reconvened at 2:00 p. m., the same persons being present and participating.

Bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, following which Commissioner Reynolds announced that awards of contracts would be made at 4:30 p. m.

CENTRAL OREGON HIGHWAY IN DESCHUTES COUNTY

HORSE RIDGE-HAMPTON ROCK PRODUCTION PROJECT

Barney B. Helser, Vale	$ 49,275.00
N. A. Toole Construction Company, Ontario	52,312.50
E. H. Itschner, Molalla	54,000.00
Rogers Construction Company, Portland	59,512.00
C. E. Leseberg, Nyssa	72,000.00
E. C. Hall Company, Portland	75,937.50

Guy F. Atkinson Company, Portland	846,930.00

The Engineer reported that information has been received from the contractors who are grading and paving the Ontario-Nyssa Section of the Old Oregon Trail that the supply of material in the gravel pit they have been using is exhauste and unless they are allowed to move back to the source of materials originally contemplated, on an island in the Snake River, they will have to close down their operation. He recalled that the island site is a matter of controversy with Mr. F J. Strasbaugh, and he requested instructions. The Chief Counsel gave as his fee ing that the Commission has nothing to fear by letting the contractor resume operations on this island because, in the first place, evidence that he has gathered points to the state's ownership of the site from which the gravel was taken, and, in the second place, engineers who have examined the premises state that no material whatsoever was taken from the location described in Mr. Strasbaugh's complaint; however, he cautioned that if the contractor is allowed to resume operations on the island, he should be told to stay strictly off the property belonging to Mr. Strasbaugh. The Engineer advised that "by no concept of the imagination' can it be said that materials have been taken from Mr. Strasbaugh's land. This fact, he said, has been determined not only by engineers and experts of the State Highway Department, but it has been substantiated by another engineer, who conducts a private practice and is associated with the County Engineer of Malheu County, and who was hired to make a survey of the land that Mr. Strasbaugh own In fact, the material to be taken from now on will be from a point farther remove from the Strasbaugh property than the original location. This matter was discus at some length, and in view of the statements of the Engineer and Chief Counsel, the Commission unanimously authorized the Engineer to allow the contractor to resume operations at the island site.

The Commission had under discussion a letter from the City of Springfield requesting clarification of its agreement with the State Highway Commissio with respect to the acquisition of right of way for the proposed South "A" Street

project in that city. In the City's letter, which was signed by the Mayor and four councilmen, it is alleged that the City in reaching its agreement with the Commission, was of the understanding that the arrangement covered acquisition of right of way not only for along South "A" Street but also right of way that is needed for the connecting streets, and that this is contrary to information recently received by the City from the State Highway Engineer which indicates that the right of way for the connecting streets was not included in the arrangement and that the City must acquire it as a separate proposition The letter referred to a resolution adopted by the City Council on or about the second day of February, 1950. The Engineer advised that the resolution referred to by the city contains provision that the state shall construct certain connecting streets but does not provide that the state shall acquire the right of way for such streets. Moreover, the estimates for construction of the South "A" Street project do not include expense for right of way on the connecting streets, which will cost about $40,000. The Commission decided unanimously to proceed with the improvement on the basis of the original arrangement, which, in the Commission's estimation does not include acquisition of right of way for the connecting streets,and ordered that the city be so informed.

The Engineer brought up for discussion a request from Mr. Andrew Stambuck, former operator of the Enegren Ferry, through his attorney, Mr. George Neuner, Roseburg, to acquire a section of the Pacific Highway (old route) on the south side of Turkey Hill, Douglas County. He said that the highway has been reconstructed on revised alignment at this location, but the Highway Commission has never abandoned the old road -- in fact, it has consistently refused to release the old right of way because portions of it are suitable for roadside picnic area development, other portions are valuable as stockpile sites, and still other portions can be used to advantage as a hauling road to a state-owned quarry. He exhibited a map showing the old highway section, and questioned the advisability of relinquishing any portion of the old road at this time. The Commission deferred a decision in the matter pending a further report from the Engineer, who was instructed to discuss it with Mr. Neuner and report his findings at the next meeting.

The Commission discussed briefly a written report from the Chief Counsel dated February 9, 1951, concerning the claim of Mrs. William Fairweather of Burbank, California, for injuries which she alleges she suffered while visiting in Silver Falls State Park. Mrs. Fairweather alleges, through her attorney, Mr. Wende of Glendale, California, that while she was bending over one of the sinks in the kitchen section of this park, a large board at least two feet wide, which covered a hot water tank, fell, hitting her on the spine between the shoulders, causing injuries which prevented her return to California for two months. Mrs. Fairweather asks for reimbursement in the amount of $14 for physician's services. The Chief Counsel advised

that he cannot point to a definite piece of law that would justify payment of this claim by the state, and that such justification, if any, could be by implication only. The claim, he said, is small, but it might be that Mrs. Fairweather intends to use it as a foundation for a greater claim. Because of the uncertainty, he suggested that it would be advisable to deny the claim. The Commission concurred in the viewpoint of the Chief Counsel and ordered that nothing further be done about the case unless and until Mrs. Fairweather brings suit.

The Chief Counsel reported complaints from the State Land Board that certain parties are taking large quantities of sand from the ocean beach in Lincoln County without paying for it, and without even reporting it to the Board. Such matter, he said, has been discussed by Highway Commission on numerous occasions in the past but no definite policy has as yet been formulated because of the uncertainty as to who has jurisdiction over the beach area He pointed out that there is now pending in the legislature a bill which provides that the State Land Board shall have jurisdiction over the taking of sand from the ocean shore, and he suggested in view thereof that, if he can obtain from the Land Board the names of the parties who are removing the sand, these parties be notified to take no more material from such source until the legislature has taken final action on the bill. The Commission approved the suggestion.

The Chief Counsel requested instructions whether or not to ask the legislature to enact legislation to impose a heavier motor vehicle fuel tax on Diesel-powered equipment than is imposed on gasoline-driven vehicles. He was informed that such matter had been taken care of in another bill that is now before the legislative assembly.

The Chief Counsel brought up for discussion a controversy with Mr. Salway, from whom several years ago the Commission secured an option to acquire some right of way that was needed for improvement on the Corvallis-Newport Highway. He said that the option was obtained in good faith and was accepted by the Commission. Moreover, the highway has been constructed across the property, but Mr. Salway refuses to complete the arrangement for the right of way and to sign the deed. He requested instructions, suggesting, however, that there are two things that can be done: condemn the property, or sue for specific performance of the terms of the option. He gave as his opinion that it would be unwise to proceed along either of these lines at the present time because of the increased value of the property since the road has been built. The Commission decided unanimously that it would be best to let the matter rest until Mr. Salway takes action of some sort.

The Commission had under discussion the claim of Mr. and Mrs. Clifford Price, Weston, Oregon, for damage to several pieces of their farm machinery resulting from a grass and weed fire which originated on the right of way

of the Oregon-Washington Highway about two miles north of Weston. The Engineer explained that a highway section crew under Foreman W. F. Teague was engaged in the forenoon on Saturday, September 16, 1950, in the burning of weeds both on and off the highway right of way adjacent to the Price farm, and every precaution was taken to keep the fire from spreading. When the crew left the job at 11:30 a.m., he said, there was no evidence of live fire and each member of the crew was of the firm belief that the fire had been extinguished, but it appears that sufficient sparks remained to re-kindle the fire later, and despite the efforts of several people, including members of the State Police, the fire got beyond control and damaged Mr. Price's equipment to the extent of $1,045, which sum he is now requesting though his attorney, Mr. Fred E. Abraham of Athena. The Engineer stated further that the matter has been investigated very thoroughly and it has been determined that the state is liable and is obligated to pay the full amount of the claim. He so recommended. The Chief Counsel concurred. The Commission approved the recommendation on motion by Commissioner Reynolds and so ordered.

The Chief Counsel reported briefly on the claim of Mr. H. L. Alger for damages to his car which he alleges occurred by reason of a defect in the Sandy River Bridge on the old route of the Columbia River Highway near Troutdale. He said that according to the complaint, Mr. Alger was driving his car across this bridge and ran into a railing that had come loose and was sticking out into the roadway. The matter has been investigated, he said, and up to the present time no evidence has been presented to indicate that the state is liable. In the consideration of this matter the Commission had the benefit of a written report from the Engineer dated February 5, 1951, in which the Engineer states that investigation reveals that it would have been impossible for the accident to have occurred as alleged, and that indications are that the railing was loosened by the impact of the car against the end post to which it was spiked. He recommended that the claim be denied. The Commission deferred a decision in the matter pending discussion with Mr. Alger's attorneys on the following day. (See general files for copy of Engineer's report.)

The Chief Counsel reported about $25,000 damage incurred by reason of a fire in the building that was acquired from Margaret F. Spencer near the east end of the Steel Bridge in Portland. He recalled that this building, known locally as the Mack Truck Building, was leased to C. J. Montag, contractor for highway work in this vicinity. The contractor, he said, carried insurance on the structure, and inquiry reveals that he has turned the matter over to the insurance company, which is going to call for bids for necessary repairs. He estimated the value of the building at about $50,000 and pointed out that it had been the intention to sell the structure because it is of no particular value for state highway

purposes. In the discussion of this matter the question arose of whether it would be advisable to have the repair work done and then sell the building, or to collect in cash the amount that it would cost to repair it and sell the building as is. As a result of the discussion the Commission decided unanimously to accept cash in the amount of the estimated cost of the repairs and to sell the building in its present damaged condition.

The Chief Counsel also reported the status of settlement with the Central Heating Company, Eugene, for damaging the Dodge Bridge over the Rogue River on the Sams Valley Secondary Highway, Jackson County. He said that the company has turned the state's claim over to its insurance company, with whose representatives he was to have a conference within the next day or two. In the discussion of this matter it was pointed out that the Commission is about ready to construct a new bridge at this location so it is not essential that the old bridge be repaired. Accordingly, the Commission decided to collect from the Central Heating Company the depreciated value of the old structure, which amounts to $6,600, and not to make the repairs.

Chairman Chandler inquired as to the status of the Commission's claim against State Construction Company arising out of the company's refusal to accept the contract for construction of piers for the Marion Street Bridge in Salem. The Chief Counsel advised that he has been endeavoring to settle this matter out of court and expects to confer with company officials again immediately.

The Commission had under discussion the question whether or not to allow White Brothers, contractors, of Walla Walla, Washington, to bid on future highway work in Oregon in view of the company's refusal to accept award of the contract for the Oneonta Slide Project on the Upper Columbia River Highway in May, 1946. It was the feeling of the Commission that this contractor should be disqualified, and that hereafter the company should be refused bidding blanks when it requests them. Accordingly the Secretary was instructed to so inform the White Brothers the next time they request bidding plans for Oregon highway work.

The Engineer reported the results of the taking of bids in Salem on February 15, 1951 for the purchase of used equipment stored at Salem, consisting of an assortment of used cars, dump trucks, mowers, compressors and patrol graders. He presented a tabulation of the high bids received for the various items and pointed out that the aggregate amount of the bids is $26,264.63 as compared with the estimated value of $14,175.00. He recommended acceptance of the high bid in each instance. The Commission approved the recommendation unanimously upon motion of Commissioner Reynolds. (For list of equipment and the high bids received, see copy of tabulation in general files.)

The Commission had under discussion the feasibility of constructing the Antelope-Clarno Section of the Shaniko-Fossil State Secondary Highway in Wasco County, provision for which previously was made in the 1950 1951 Construction Program. In this connection the Commission had the benefit of two written reports from the Engineer, one dated February 12, 1951, the other February 22, 1951, in both of which the justification of the improvement is analyzed. After careful consideration of the facts involved, motion was made by Commissioner Reynolds that, because of the international situation now existing, construction of this project be deferred pending further study by the Commission. Chairman Chandler approved the motion and declared it carried.

In this connection the Commission also discussed the advisability of proceeding with further improvements on the Klamath Lake State Secondary Highway northwest of Klamath Falls, particularly the improvement heretofore contemplated between Rocky Creek and Wocus Marsh. Motion was made by Commissioner Reynolds that further improvement of this highway also be deferred for further study because of the international situation. Chairman Chandler expressed his concurrence and declared the motion carried. (For further details see copy of both reports of the Engineer in the general files.)

Pursuant to previous instructions from the Commission the Engineer reported on traffic volume at the east end of the old Sandy River Bridge at Troutdale, where a number of people have applied for permits to conduct concessions, including the renting of dip nets and the sale of food and light drinks, during the time that smelt are running in the Sandy River. He said that a count by the Traffic Engineer reveals an average daily traffic volume during 1950 of 950 vehicles. The right of way at this location, he said, is rather narrow and he advised that because of the hazards that would be created, he could not recommend that a permit be granted for the use of any portion of the state's property other than for the movement of vehicles and the occasional parking of cars on the highway shoulders. He mentioned receipt of a communication from Mr. S. H. Boardman, State Parks Consultant, who, he said, is very strongly opposed to the granting of any concession such as has been requested, and he also stated that the State Parks Superintendent, Mr. C. H. Armstrong, is opposed to the granting of any concessions at this place. He recommended that the applications be denied. The Commission approved the recommendation unanimously.

The Commission discussed briefly and ordered filed a written report from the Engineer dated February 15, 1951, clarifying the Auditor's financial statement of December 31, 1950, wherein it is indicated that two construction projects have cost more than the amount that was originally

authorized for them. One of these projects was signal installation in the city of Grants Pass and the other was a rock production project on the Dad's Creek-Dixie Summit Section of the John Day Highway. The facts disclosed in the Engineer's report indicate that the signal installation contract actually was completed at a cost of $3,198.98 under the amount authorized for it. As to the rock production project, the report reveals that this is a matter of an agreement between the Highway Commission and the Bureau of Public Roads whereby the state was to pay a flat sum of $18,000. Such agreement was authorized by the Commission and was not exceeded.

The Commission also discussed and ordered filed a written report from the Engineer dated February 20, 1951, relative to the difficulties he is experiencing in maintaining adequate engineering personnel. (See copy of report in general files.)

The Commission also discussed briefly and ordered filed a written report from the Engineer dated February 20, 1951, giving a comparison of the maintenance cost per mile and the maintenance cost per million-ton-mile in each of the five divisions of the state for the year 1949. (For details see copy of report in general files.)

The Engineer presented a tabulation showing the status of construction of Special City Allotment Projects heretofore authorized for 1948, 1949 and 1950 funds. He pointed out that the 1948 and 1949 programs were closed out at exactly $250,000 each, and that balances were carried over to the following year. He also pointed out that the total estimated cost to the state for the 1950 program is $279,552.82. However, he said, the program for that year will be closed out at exactly $250,000 and the excess carried over and charged to the 1951 fund accoun The Commission approved the report.

The Engineer presented for the Commission's consideration applications of cities and towns of under 5,000 population for city street improvement projects in the 1951 Special State Tax Street Fund Program. He recommended approval of the applications of the following cities and towns for the funds available and in the amounts shown:

Application No.	City	Div.	Estimated Cost		
			State	City	Total
No Previous Projects					
7	Halsey	II	$14,000	$ --	$14,000
10	Mill City	II	15,000	3,000	18,000
15	Stanfield	V	15,000	3,500	18,500
16	Madras	IV	14,800	--	14,800
19	Wallowa	V	15,000	1,900	16,900

Applications for Special State Tax Street Fund Program (cont.)

Application No.	City	Div.	Estimated Cost State	City	Total
No Previous Projects (cont.)					
25	Umatilla	V	$ 12,500	$ --	$ 12,500
26	Turner	II	15,000	--	15,000
42	Bay City	II	15,000	950	15,950
	Total		$ 116,300	$ 9,350	$ 125,650
One Previous Project					
2	Oakridge	III	$ 15,000	$ 3,500	$ 18,500
4	Prairie City	V	15,000	--	15,000
5	Dufur	IV	13,400	--	13,400
14	Rogue River	III	15,000	300	15,300
20	Reedsport	III	15,000	3,200	18,200

	Total		$ 87,900	$ 7,000	$ 94,900
Two Previous Projects					
6	Sweet Home	II	$ 15,000	$12,500	$ 27,500
18	Dallas	II	14,400	--	14,400
38	Brownsville	II	15,000	600	15,600
	Total		$ 44,400	$13,100	$ 57,500
Total Recommended for Approval			$ 248,600	$ 29,450	$ 278,050
Est. Carry-over from 1950 Fund Program . .			30,000		
Est. Total 1951 Fund			$ 278,600 *		

* After actual costs have been determined, all state costs in excess of $250,000 will be transferred against the 1952 fund.

The Engineer pointed out that the work involved in this program is estimated to cost a total of $278,600 including an estimated carry-over from the 1950 Program of $30,000; however, he said, when the actual costs have been determined, any amount in excess of $250,000 will be charged against the 1952 fund. After careful consideration the Commission unanimously approved the projects as recommended by the Engineer, with the understanding that no city or town shall be allocated more than $15,000 and should a project cost

more than such amount, then the excess shall be paid by the city with city funds. (For full details with respect to this matter see copy of Engineer's report filed in the office of the Secretary under the heading of "Special State Tax Street Funds

The Engineer reported that the survey for the ultimate location of the Pacific Highway between Goshen and a point about two miles southerly therefrom has been completed. He exhibited a map showing the proposed location and explained details in connection therewith. He asked the Commission to approve the survey and to authorize the Right of Way Department to negotiate for needed right of way After careful consideration the Commission approved the request and by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein. The Chief Counsel was authorized to proceed with the right of way negotiations along this section.

The Commission had under discussion the distribution to the cities and towns of the state the 10% of highway revenues that accrued to them during the last half of the year 1950, by virtue of the provisions of Chapter 149, Oregon Laws 1949, amounting to $2,365,176.09. It was recalled that the Commission at its previous meeting approved distribution of the funds on the basis of the 1940 federal census. However, since then and prior to the actual distribution of the funds by the Secretary of State, the 1951 Legislature enacted into law House Bill No. 156 which provides that the distribution shall be based on the temporary totals of the census taken by the Federal Government in 1950, in view of which it now is necessary to adopt another resolution revising the amount to be distributed so as to conform with the 1950 census. The Chief Counsel explained details and read aloud a form of resolution to effect the distribution in that manner. This matter was discussed at some length and as a result thereof the Commission unanimously adopted the new resolution as prepared, a copy of which is attached hereto, marked EXHIBIT "C", and by this reference is made a part hereof with like effect as though extended in full herein. Motion was made by Commissioner Reynolds that this resolution as prepared and adopted by the Commission, distributing the funds to the cities in accordance with the 1950 census and House Bill No. 156 as enacted by the 1951 Legislature, be submitted to the Secretary of State, in addition to the previous resolution based on the 1940 census, which was adopted by the Commission at its meeting on January 24, 1950. Chairman Chandler seconded the motion and declared it carried

The Engineer reported that the town of Scio, Linn County, has fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds which accrued to it during the last half of the year 1949, and that the plans for the projects proposed to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "D", which

resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following seven cities likewise have fulfilled the legal requirements with respect to expenditure of State Tax Street Funds that accrued to them during the first half of 1950, and that the plans of the projects proposed to be financed with such sums have been examined and found satisfactory.

Banks	Jordan Valley
Canyonville	Scappoose
Cascade Locks	Scio
Columbia City	

He recommended approval of the plans by the Commission. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from the City of Albany requesting state aid in the proposed improvement of 6th Avenue between Geary and Burkhart Streets in that city insofar as it fronts on State Highway Department property at such location. The Engineer advised that the property owners along that street have petitioned the city for a full width pavement for which the highway department's share, 376 feet frontage, is estimated to cost $804.00. He recommended approval of the expenditure as being in conformity with the Commission's past practice. The Commission approved the recommendation unanimously.

The Commission discussed briefly but deferred action until its next meeting, the proposal of the Engineer to substitute a maintenance headquarters building in Huntington for the proposed building at Harper, for which an amount of $15,000 was provided in the 1951 Budget. It was understood that Commissioner Reynolds and the Engineer will inspect the Huntington site in the meantime.

The Engineer presented a plan drawn up by the Landscape Engineer for the landscaping of a triangular plot of land owned by the Highway Department immediately adjacent to the Secretary of State's field office in Oregon City. He estimated the cost of the work involved at $1,800, such work to consist of leveling off the property to proper grade, planting grass and a hedge, constructing curbs and a graveled footpath, and installing a simple water system so that the planted area can be properly maintained. The Commission disapproved the plan as presented, but instructed the

Engineer to give the project further thought and report at the next meeting with a plan that would be less costly.

The Engineer reported the need to increase the project authorization for the Big Creek Section of the Oregon Coast Highway between Agate Beach and Newport from $214,000 to $264,000, an increase of 23% which, he said, was caused principally by the rise in prices. He also reported a need to increase the authorization for the Cascade Locks-Herman Road Section of Columbia River Highway from $350,000 to $537,000. He said that this very material increase in cost is partially due to rise in prices, and partially to an error in the original computation for this project. He requested approval of both increases. The Commission approved the request unanimously upon motion of Commissioner Reynolds.

The Engineer requested confirmation of the oral approval previously given him by the Commission to expend about $13,500 to raise the grade of the Oregon Coast Highway for a distance of about 1,500 feet near Riverton, six miles south of Coquille. He explained that this section is subject to high water and flash floods, and during certain times of the year traffic is held up at this point even after other sections of the highway between Coquille and Bandon are passable. He suggested that the work be done as a minor betterment project and that it be financed with funds from the 1951 Minor Betterment Reserve Account. The Commission approved the project unanimously upon motion of Commissioner Reynolds.

The Commission had under discussion a request from the Engineer for an additional appropriation of $10,000 to finance improvements at the Bybee Boulevard approach to McLoughlin Boulevard (Pacific Highway East) in Portland. The Engineer recalled that several months ago the Commission, at the urgent request of delegations from both East Moreland and West Moreland, and from the Sellwood District, authorized an expenditure of $20,000 of state highway funds in conjunction with a like contribution by the city of Portland to eliminate the hazard at this intersection. Since then, he said, the city officials of Portland have expressed a preference for a partial cloverleaf traffic interchange, which matter was discussed recently at a meeting at which were present the following: W. C. Williams, Assistant State Highway Engineer, City Commissioners William A. Bowes and Ormond R. Bean, City Engineer L. G. Apperson, Fred Fowler, Traffic Engineer of the City of Portland, and a representative of the Portland Planning Commission. All present, he said, expressed a preference for the modified clover leaf design in lieu of the channelization at grade heretofore proposed, notwithstanding that it is more costly than the original plan. He pointed out that the revised plan requires acquisition of right of way from the Southern Pacific Company, which the City of Portland will attempt to get if the state will share half of the estimated total cost of $60,000, including the cost of the right of way. The Engineer gave as his feeling that the revised plan without

question is the best answer to this traffic problem and he recommended its approval by the Commission and that an expenditure of state highway funds equal to 50% of the actual cost of the construction, up to a maximum of $30,000, be authorized to help pay for the work, on the condition that the city is able to obtain the right of way and will agree to pay all remaining costs. As a result of discussion the Commission unanimously approved the recommendation, it being understood that the state's share shall be not more than 50% of the actual cost of the work, with a maximum of $30,000. The Commission's action was taken upon motion by Commissioner Reynolds, seconded by Chairman Chandler. The Commission ordered the arrangement covered by written agreement between the city and the state.

The Engineer reported a hazardous condition existing on the Pacific Highway West just west of the railroad crossing in the town of Tigard. He said that when the new highway was constructed at this place, the connection with the old highway, which passes through the business district of Tigard, was left at a very acute angle, which makes it quite difficult to turn onto or off of the new highway. Because of complaints about this condition, he said, investigations have been made and it has been determined that the condition can be corrected by construction of a new connection between the old and new highways, augmented by installation of two mercury vapor luminaire units. He estimated the cost of the work involved at $2,000, and recommended approval of the expenditure in the interests of safety. The Commission approved the recommendation unanimously upon motion of Commissioner Reynolds. In this connection the Engineer reported a request from the Tigard School Board for permission to utilize the small area of state-owned land situate between the new and old highways near the high school in Tigard for off-street parking of cars. He recommended approval of the request, and that the matter be covered by a revocable permit. The Commission approved the recommendation.

The Commission discussed a request from the city of Warrenton for the elimination of two dangerous sections of the Oregon Coast Highway, one of which is located near the Astoria Golf Course where there a number of second-growth spruce trees, and the other being a curve about half way between the intersections of Secondary Highways Nos. 104 and 105 with the Oregon Coast Highway. The Engineer advised that the first-mentioned section is one and one-half miles in length and is located twelve miles south of Astoria, where there are sixty spruce trees from 12" to 30" in diameter that are in a badly decayed condition. Twenty of the trees, he said, are located on the highway right of way and forty are on private property. He recommended that the twenty trees on the highway right of way be removed, at an estimated cost of $30 each, or a total of $600, and that the owners of the private property on which the remaining trees stand be notified that the

trees are defective and a traffic hazard. The Commission approved the recommendation. As to the other condition, the Engineer advised that the curve referred to is a 20° curve located five blocks southerly from the junction of the Warrenton Secondary Highway with the Oregon Coast Highway, about eight and one-half miles south of Astoria. The highway at this point, he said, is paved with asphaltic concrete pavement 25 feet wide with a very good non-skid topping. He also said that the curve is well signed, but some additional safety can be provided by installation of thirty sight posts at 20-foot intervals, each of which would be equipped with reflector buttons, and by placing a 12" drainage pipe on the inside of the curve so as to allow a small amount of widening within the present roadbed to provide a four-foot shoulder. He estimated the cost to provide such safety factors at $700, and he recommended the expenditure. The Commission approved the recommendation unanimously.

The Commission discussed briefly and denied, because of lack of funds, and because the project is not feasible, a request from the Deschutes County Farm Bureau for construction of a new highway around Government Camp to eliminate present winter hazards caused by winter sports enthusiasts. The action of the Commission was taken upon motion by Commissioner Reynolds, seconded by Chairman Chandler.

The Commission had under consideration requests as follows for traffic signal installations:

1. Petition from residents of the town of Clackamas for installation of a traffic signal on Cascade Secondary Highway (82nd Street) at its intersection with Clackamas Avenue in the town of Clackamas. The Engineer advised that an investigation has been made of this intersection by the Traffic Engineer, who reports that the conditions existing are below the standard requirements for signal warrant at rural intersections, and who recommends that the request be denied. He stated his concurrence in the recommendation. The Commission unanimously approved the recommendation upon motion by Commissioner Reynolds.

2. Request of the City of Tillamook for installation of traffic signals at certain key intersections within the city. The city offered to pay 50% of the costs involved. The Engineer advised that this matter has been investigated by the Traffic Engineer, who points out that the "key" intersections referred to are highway intersections formed by the junction of the Oregon Coast Highway and the Wilson River Highway, one being on Third Avenue East, which is the designated route for northbound Coast Highway travel; and the other being on Second Avenue East, which is the route for southbound Coast Highway travel. Both of these intersections, he said, are in the business district and investigation reveals that conditions existing at both intersections warrant signalization. He recommended

approval of signals at both points, which he estimated to cost $6,000, on the condition that the city will pay one-half of the installation cost and 100% of the costs incident to maintenance and operation of the signals. The recommendation was approved by the Commission by unanimous vote upon motion by Commissioner Reynolds.

3. Request of E. A. Burke, Chairman, Governor's Regional Safety Committee, Tillamook, for signalization of the Southern Pacific Railroad's spur track crossing of US101 in Tillamook. The Engineer advised that this crossing has been investigated by the Traffic Engineer, who advises that the present system of lighting at the crossing is unsatisfactory, and who recommends the installation of two mercury vapor luminaire units at a cost of $250 each, or a total of $500. He stated his concurrence in the recommendation, subject to the condition that the city will agree to maintain the lights and to furnish electrical energy to operate them at no cost to the state. The Commission approved the recommendation upon motion of Commissioner Reynolds.

The Commission discussed a request from the County Court of Clatsop County for the widening, straightening and resurfacing of County Market Road No. 7 on the Lewis & Clark River, Clatsop County. The Engineer advised that this road is a Federal Aid Secondary Highway, being designated as Highway No. 608, and that it is tentatively scheduled for improvement in the third year of the presently proposed three-year secondary highway program, an amount of $46,000 having been set up therefor. The Commission took the request under advisement for consideration in a future highway program.

A letter was presented from the Depoe Bay Chamber of Commerce requesting construction of a footpath along both sides of a 700-foot section of US101 in the north part of Depoe Bay. The Engineer advised that a traffic count during a 16-hour period on a week-day in January reveals that about 120 pedestrians walk along this daily, a considerable number of them being school children, and he gave as his feeling that during the summer season, the pedestrian count would be higher. He recommended construction of a footpath on the westerly side of the highway only, at an estimated cost of $1,500. The Commission deferred a decision on the matter pending further study.

A letter was presented from the McMinnville Chamber of Commerce requesting that immediate steps be taken toward the elimination of what is alleged to be a highly dangerous condition existing on US99W at the south entrance to the town of Whiteson. The Engineer advised that the Commission some time ago authorized a survey of this section and when complete data has been obtained, he will render a special report on the subject. The Commission took no action on the request.

The Commission discussed a petition submitted by residents of Yachats requesting improvement of the Oregon Coast Highway through this town, particularly the elimination of two curves. The Engineer advised that the alignment of the highway through Yachats should be improved at some future time. He suggested that he be authorized to make a location survey of the project with the idea in mind that if a change is found desirable, the Commission might authorize the Right of Way Department to negotiate options for such right of way as may be required. He estimated the cost of such a survey, approximately one mile in length, at about $2,000. The Commission decided against a location survey, but authorized the Engineer to make a reconnaissance study of the situation at an estimated cost of $500.

A petition was presented signed by 71 members of the Douglas County Pomona Grange No. 13 requesting that immediate steps be taken to rebuild and surface in its entirety with macadam, State Secondary Highway No. 225 (Elkton-Sutherlin Secondary Highway). The Engineer advised that to complete this highway to a medium-type oil standard, including bridges, would cost about $1,335,00 He also said that the average daily volume of traffic over the road is slightly in ex cess of 100 vehicles, although this increases somewhat near the terminal points, Elkton and Sutherlin. He pointed out that the Commission has allocated no funds for this highway in the tentative 1952-1953 Program, mainly because it was neces sary to allocate such a large amount of secondary funds to the Umpqua Highway, which is in the same county. The matter was discussed at some length and as a result thereof, the Commission unanimously denied the request upon motion of Commissioner Reynolds. It was agreed to transmit such information to a delegation representing this district scheduled to appear before the Commission on the following day. (See Delegation ahead.)

The Commission discussed a request from the Umpqua Valley Farm Bur eau and Umpqua Valley Grange for improvement of the Elkton-Sutherlin Highway, and for the lifting of restrictions on pole-line construction on highways, such as tree-trimming, etc. The Secretary was instructed to inform the petitioners of the action just taken by the Commission with respect to the Elkton-Sutherlin High way, and to tell the petitioners that the Commission must have standard requirements with respect to pole-line construction which cannot be waived, and that they will be expected to comply with these requirements as do all others in the same business.

The Commission discussed a letter from Dr. R. C. Story, Molalla, forwarded by the Honorable E. J. Ireland, State Representative, in which request is made for the improvement of the Woodburn-Sandy State Secondary Highway between Springwater and Estacada to facilitate the truck-hauling of logs from the Estacada area to Molalla. The Engineer advised that a survey of this section has been made, but the improvement has not as yet been scheduled and no funds set up in the program to finance it. He estimated the cost to construct

the section to a suitable standard for carrying log truck traffic at about $250,000. The Commission denied the request for immediate undertaking, but instructed the Engineer to render a complete report on the project for the information of the Commission when funds can be spared to finance the work.

The Engineer reported that pursuant to authority heretofore given him by the Commission, he has awarded certain contracts, conditions of the awards having been satisfied. Upon motion by Commissioner Reynolds, the Commission unanimously approved the awards as follows:

Grading, surfacing and bituminous macadam on the Heppner (May Street-Heppner School) Section of the Heppner Highway in Morrow County. Bids received December 19, 1950, contract awarded January 24, 1951, to G. D. Dennis & Sons, low bidders.

Weston Rock Production Project on five state highways, Umatilla County. Bids received January 23, 1951, contract awarded January 25, 1951, to Oscar E. Joelson, low bidder.

Construction of a reinforced concrete and structural steel bridge over the Coos River on the Coos River Secondary Highway in Coos County. Bids received January 24, 1951, contract awarded February 9, 1951, to Mr. Tom Lillebo, low bidder.

Rock Production on The Dalles-California, East Diamond Lake Secondary, and Willamette Highways near Chemult in Klamath County. Bids received December 19, 1950, contract awarded February 21, 1951, to M. C. Lininger & Sons, low bidder.

Paving and bridge construction on Cedar Point-Coquille Section of US101. Bids received December 20, 1950, contract awarded February 23, 1951, to Coos Bay Dredging Co., low bidder.

The Engineer requested authority to advertise for bids for construction of maintenance buildings at the following locations:

1. Maintenance building in Clatskanie, estimated total cost $15,000.
2. Two foremen's cottages at town of Prospect, estimated total cost $28,600.
3. Maintenance building at Taft, estimated total cost $16,000.
4. Sign storage building at Salem, estimated total cost $11,500.

He advised that provision for all of these buildings was included in the 1951 budget as approved by the Commission in principle pending specific

authorization, which he is now requesting. This matter was discussed by the Commission at considerable length during which the Engineer explained details as to the type and necessity for the buildings. As a result of this discussion, motion was made by Commissioner Reynolds that the Engineer be authorized to proceed with the construction of the buildings as requested, using the new type design. The motion was seconded by Chairman Chandler and carried.

A letter was presented from Mrs. Victor Dory, Albany, requesting the construction of a sidewalk along US99E in front of the State Highway Department property in that city. Mrs. Dory bases her request on the following: 1) that cars, buses and trucks traveling down the highway have no regard for pedestrians seeking shelter from their proximity; 2) that the city of Albany refuses to provide mail service except by car, until a sidewalk has been constructed. The Engineer advised that this matter has been investigated by the Traffic Engineer, who reports that the shoulder along the pavement in front of the Highway Department's property is ten feet wide, is in very good condition, and is suitable and adequate for the small volume of pedestrian traffic that uses the highway at this point. An existing concrete sidewalk, he said, terminates at the westerly portion of the state highway property, but easterly from this point, there are no sidewalks and pedestrians use the graveled shoulder. He further stated that the records reveal that no accidents have occurred to pedestrians in this vicinity for the past five years, and he recommended in view of the findings, that the request be denied until such time as the property owners in the two blocks east of the highway construct sidewalks along their property frontage. The Commission unanimously approved the recommendation, it being understood, however, that the matter will be reconsidered when the sidewalks have been constructed on both sides of the Highway Department's property.

The Commission had under discussion a form of agreement with the U. S. Army Engineers covering the dredging of approximately 230,000 cubic yards of embankment material from the Willamette River to be used in construction of an embankment along the relocated line of the Salem-Dallas Highway in West Salem. The Engineer recalled that the Commission at its meeting on September 28 and 29, 1950, authorized such an agreement, it being estimated at the time that the dredging would cost about 25¢ per cubic yard, or a total of $57,500. The Army Engineers, he said, state that they will be ready to commence the work on or about the 15th of March, and they have now agreed to furnish a dredge free of rental so that the total cost to the state on such a basis will be reduced to $39,600. The form of agreement that is now before the Commission for approval, he said, was prepared by the Army Engineers and it provides that the state must deposit with the Army Engineers the sum of $39,600 and it also provides that should the work cost less than the estimated amount, the overpayment will be refunded, and should the work cost more than the estimated amount, the state must pay the additional cost. He stated that by this arrange-

ment the state will save an estimated amount of $70,000 over what the same embankment would have cost were the materials to be transported by truck from outside borrow pits. In this connection the Engineer also mentioned that the operations of the Army will not place the materials in final position, so it will be necessary for the state to provide equipment, such as bulldozers, for that purpose. He estimated the cost to rent such equipment at approximately 15¢ per cubic yard, or a total of $34,500, making a grand total cost of approximately $74,100 for the embankment in place. He recommended approval of the agreement as prepared by the War Department, and requested authority to rent the equipment that is necessary to place the materials properly. As a result of discussion, motion was made by Commissioner Reynolds that the project as outlined by the Engineer be approved and that the Engineer be authorized to rent the equipment as is needed to place the materials in the embankment. Chairman Chandler seconded the motion and declared it carried. (The agreement was signed by the Commission on the following day.)

The Commission also discussed and approved an agreement with the Bureau of Public Roads covering winter maintenance on a 3.55-mile section of the Pendleton-John Day Forest Highway Project No. 34-B4, C. The Engineer explained that this section is twelve miles north of the town of Mt. Vernon, and that the maintenance period is of five months duration only, covering the winter months when construction work has been closed down; further, that the Bureau of Public Roads will reimburse the state for the cost of the work up to an amount of $5,000. (The agreement was signed the following day.)

The Commission had under discussion the following requests for the extensions of time within which to complete highway contracts:

1. H. G. Carl, Contract No. 3332 for construction of the James Avenue Bridge in Silverton, Marion County, requested an extension of time of 154 days from December 31, 1950 to June 1, 1951, within which to complete this job. He stated that all work on the project, except certain painting, has been completed and that the painting work has been postponed as directed by the Engineer, until favorable weather obtains in the spring. The Engineer advised that all work on the project, except painting the structural steel, was completed by the contractor within the specified time limit, and because of adverse weather conditions, he directed the contractor to postpone such work until spring. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

2. R. H. Jones, Contract No. 3302 for construction of the Brogan Maintenance Building, Malheur County, requested an extension of time of twelve days, from August 31 to September 12, 1950, within which to complete this job. He attributed his failure to complete the project within the specified time limit to labor difficulties and to slow delivery of materials. The Engineer advised that the building was practically completed within the specified time limit but final inspection disclosed a few items that needed adjustment and it took the contractor twelve days' time to take care of these items. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

3. R & M Construction Company, Contract No. 3408 for widening the bridge over Union Creek at Mile Point 57.29 on the Crater Lake Highway, Jackson County, requested an extension of time of 150 days, from January 31 to June 30, 1951, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to extraordinarily heavy rains and shortage of steel. The Engineer advised that this project was placed under contract so late in the fall that the work could not be finished before inclement weather set in, it being impossible to get a good construction job during the winter months at such a high altitude, and for that reason, he directed the contractor to close down operations until spring. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

4. Rogers Construction Company, Contract No. 3335 for re-oiling and furnishing maintenance materials on the Forest Boundary-Jefferson County Line Section of the Warm Springs Highway, Wasco County, requested an extension of time of 61 days, from October 31 to December 31, 1950 within which to complete this job. They alleged that they overran the specified time limit because of the unavailability of the quarry which they were supposed to use as provided in the contract, it being necessary to secure rock aggregate from another source twenty miles distant. The Engineer advised that the oiling work was completed by the contractor within the specified time limit, but the stock-piling of maintenance materials was not completed for reasons stated by the contractor. The delay in completing the contract, he said, has not inconvenienced the public, neither has it caused the state any extra expense. He recommended in view of the circumstances that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. N. A. Toole Construction Company, Contract No. 3304 for grading and oil mat surfacing on the Garrison Corner Section of the Nyssa-Adrian Secondary Highway, Malheur County, requested an extension of time of fifteen days, from August 31 to September 15, 1950, within which to complete

this job. They alleged that their failure to complete the project within the specified time limit was due to their inability to re-install a side drainage pipe until the adjacent property owner shut off the water entering the drainage ditch. The Engineer advised that this project was underway during the irrigation season and it was necessary that the farmer who owns the adjacent land be given priority in the use of the water, so the contractor was unable to reinstall the side drainage pipe until the water was shut off. He also said that the delay has involved no inconvenience to the public, nor additional expense to the state. He recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

6. E. C. Swaggart, Contract No. 3207 for grading and oil mat surfacing on the Forest Boundary-Unity Junction Section of the John Day Highway, Baker County, requested an additional extension of time of seven days, from August 31 to September 7, 1950, within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to the unavailability of trucks for hauling when the materials were ready to go on the road. The Engineer advised that this is the second extension of time Mr. Swaggart has requested, the first one granted on July 11, 1950, subject to the condition that the contractor would be assessed engineering charges from July 31, 1950 to the date of actual completion of the work. He recommended that this additional extension of time be granted on the same basis. The Commission approved the recommendation.

7. Barney B. Helser, Contract No. 3256 for rock production on the Dixie Summit-Baker County Line Section of the John Day Highway, Grant County, requested an additional extension of time of seventeen days, from September 30 to October 17, 1950, within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to early rains and the necessity to wash the rock during the last few days the work was underway. The Engineer advised that the reason given by the contractor for overrunning the previously extended time limit is correct. He recommended that the additional extension of time as requested be granted without penalty. The Commission approved the recommendation.

8. Central Heating Company, Contract No. 3328 for grading and paving the Cascade Gorge-Prospect Section of the Crater Lake Highway, Jackson County, requested an additional extension of time of thirty days, from November 15 to December 13, 1950, within which to complete this job. They gave no reason for their failure to complete the project within the previously extended time limit. The En-

gineer advised that the quarry specified in this contract proved unsatisfactory and it was necessary to locate and secure another quarry; this was done, but the contractor's operations were delayed by the move to the new site and by the additional haul which was not anticipated when the contract was awarded. He recommended in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

9. M. L. & C. R. O'Neil, Contract No. 3240 for grading, surfacing and oiling the South Unit, Princeton-Follyfarm Section of the Rome-Princeton Highway, Malheur and Harney Counties, requested an extension of time of nineteen days, from August 31 to September 18, 1950, within which to complete this job. They gave no reason for overrunning the specified time limit. The Engineer advised that due to the large amount of work that is being handled by the subcontractor for the oiling work, the prime contractor was not able to move onto this job in sufficient time to complete it within the specified time limit. The traveling public, he said has not been inconvenienced by the delay, neither has the state incurred any extra expense because of the overrun. He recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

10. Sound Construction and Engineering Company, Contract No. 3250 for construction of the State Highway Office Building in Salem, requested an extension of time of 110 days, from February 8 to May 31, 1951, within which to complete this job. Their request was based on the following reasons: suspension of work for six weeks due to adverse weather conditions; and delays in delivery of metal products, bronze extrusions and hardware. The Engineer advised that the contract specified that the Highway Commission may extend the time limit for completion of this project on the condition that the contractor shall reimburse the state for all engineering costs incurred subsequent to the expiration of the specified time limit. He also said that the matter of reimbursement to the state for the cost of furnishing heat in the building after the expiration of the specified time limit has been discussed with the contractor who has agreed to assume payment of one-half of such expense. He recommended that the extension of time as requested be granted subject to these two conditions. The Commission approved the recommendation.

11 Valley Construction Company, Contract No. 3202 for construction of the Baker Undercrossing on the Baker-Unity Highway in the city of Baker, requested an extension of time of 22 days from November 30 to December 22, 1950, within which to complete this job. They said that

their failure to complete their contract within the specified time limit was due to adverse weather conditions. They point out, however, that the structure was open to traffic approximately on October 15, 1950. The Engineer advised that this project was essentially complete on the specified completion date and that the only work remaining to be done at that time was general clean-up of the site and some minor work in the finishing of concrete surfaces. Work on the project, he said, was far enough advanced that the structure was opened to traffic on November 8, 1950, at which time it was dedicated with appropriate ceremonies by the Baker Chamber of Commerce. He further stated that the state has incurred no additional expense for engineering because of the delay, and he recommended in view thereof that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 3202, 3207, 3234, 3239, 3240, 3256, 3302, 3304, 3335 and 3420 have been completed according to the requirements of the contracts or modifications thereof, and that said projects are now ready for acceptance. After due consideration the Commission by unanimous vote accepted said contracts by adoption of the attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed and upon recommendation of the Engineer approved an agreement with Hood River County and the City of Cascade Locks covering disposition of the old route of the Columbia River Highway between Cascade Locks and Herman Creek on completion of the new highway between these points. (The agreement was signed on the following day.)

The Commission also discussed and approved an agreement with the U. S. Forest Service providing for maintenance by the U. S. Forest Service of a section of the Enterprise-Lewiston Highway (old route) in Wallowa County, which section is needed by the Forest Service as a connecting road between the new highway and Starvation Creek Forest Road. (The agreement was signed the following day.)

The Engineer requested authority to purchase office equipment as follows for the Construction Engineer and the Right of Way Engineer totaling $4,810, all of which, he said, was anticipated and provided for in the 1951 Budget as approved by the Commission in principle. The Commission approved the expenditure.

Construction Engineer

1 - Electric Adding Machine	at $350	$ 350
6 - Small Hand Calculators	at $240 each . . .	1,440
3 - Small Electric Calculators	at $340 each . . .	1,020
6 - Steel Map Filing Cabinets, 3' x 2' x 6'6"	at $250 each . . .	1,500
	Subtotal	$ 4,310

Right of Way Engineer

3 - Portable Typewriters	at $100 each . . .	$ 300
1 - Noiseless Typewriter	at $200 each . . .	200
	Subtotal	500
	Total	$ 4,810

The Engineer also requested authority for an expenditure of $12,000 to purchase twelve transits and twelve levels as replacements for similar engineering equipment now on hand. He advised that this item also has been provided for in the 1951 Budget as approved by the Commission in principle. The Commission approved the request.

The Secretary requested and the Commission approved the purchase of the following equipment, totaling $1,735, for use in the Secretarial Department.

2 Steel Files, 5-drawer (Library)	$ 210
4 Steel Files, 5-drawer with lock	460
2 2-drawer file card cabinets	30
12 Transfer cases	120
2 Typewriters	280
1 Electric Typewriter	575
1 Mail-delivery Cart	60
Total	$ 1,735

The Engineer brought up for discussion the purchase of furniture for the new Highway Department office building. He estimated the cost of furniture as previously discussed by the Commission at approximately $25,000, and he advised that practically all of the furniture that is to be replaced will be utilized by filling present demands, so there will be little, if any, surplus. The

question arose as to the kind of furniture which would best harmonize with the interior finish of the building. The Engineer was instructed to obtain suggestions from competent interior decorators in Salem and report them to the Commission at its next meeting, when further instructions will be given.

A letter was presented from Mr. William J. Minkiewitz, former employee of the Right of Way Department, in which inquiry is made as to possibilities of his securing a concession to operate a cigar stand and lunch counter in the new Highway Department Office Building The Commission deferred a decision in this matter until the building is completed.

The Engineer reported that on February 8 he authorized the posting of the Weston-Elgin Secondary Highway for reduced weight loads, and that on February 19 he authorized the posting of the Warner Secondary Highway in Lake County for reduced weight loads, in both instances the loads were reduced to a maximum of 11,000 pounds gross on any single axle, 20,000 pounds gross on any pair of tandem axles, and 36,000 pounds maximum gross load. These postings, he said, were required in order to preserve the highway surfaces when the frost is leaving the ground. He asked the Commission to confirm the postings. Upon motion by Commissioner Reynolds, the Commission approved the request unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that on February 6 he ordered the posting of the Rome-Princeton Highway between Princeton and Follyfarm for a maximum gross load of 36,000 pounds. This posting, he said, remained in effect for eleven days until February 17, at which time, because of improved conditions, the signs were taken down. The Commission unanimously approved the Engineer's action in this matter.

The Commission discussed briefly and ordered filed a resolution from the La Grande Chamber of Commerce endorsing the bill that is now before the Legislature allowing the Highway Commission to sell bonds for construction and reconstruction of state highways.

The Secretary reported receipt of a check in the amount of $8,000 from the County Court of Wasco County in repayment of the Highway Commission's advance of state highway funds to help finance preliminary studies in connection with the interstate bridge that is now under construction across the Columbia River near The Dalles. The Commission accepted the payment with thanks.

The Commission discussed a request from the Albany Timber Carnival Association for permission again to use Waverly Lake and Waverly Park in Albany in connection with its Timber Carnival which is to be held this year during July 2, 3, and 4. The Engineer recommended approval of the request subject to certain conditions and requirements. (For a list of the conditions and requirements, see copy of Engineer's letter directed to the Highway Commission dated February 16, 1951, in general files.) The Commission approved the recommendation unanimously.

A letter was presented from The Exchange Club of Ontario, Oregon, advising that as one of its projects for this year it has undertaken a safety program on highways, in connection with which they propose to paint a large white circle, eight feet in diameter with a white cross inscribed, on the highway pavement at each place where a death has occurred by reason of an automobile accident. The Club asks permission to paint such circles on highway surfaces in Malheur County. The Commission approved the request unanimously on the condition that the locations are checked and approved by the Engineering Department, and that the signs are painted in a neat manner.

The Commission had under discussion a letter from Mr. David Travis, Eugene, and a petition signed by 84 residents of Eugene and vicinity requesting approval of an approach road on the east side of the Judkins Point-Goshen Section of the Pacific Highway (new route) south of Eugene, particularly starting at a point just south of the overhead structure on the present highway about three-quarters of a mile south of Springfield Junction, and extending northwesterly to a connection with the new highway. The Engineer recommended that the request be denied. He pointed out that access rights along this section of highway are now being acquired by the Right of Way Department and that negotiations are underway to provide complete restriction of access to a trailer court that is owned by Mr. Travis. Were the Commission to grant Mr. Travis' request, he said, it would not only give him access to the highway but would also permit large scale development along the proposed road, and would give direct access without restriction to the new highway. The Commission approved the recommendation.

The Engineer reported that a dangerous condition exists along US99W south of Corvallis where there is an auction market on the east side of the highway and a cafe on the west side. The patrons of these two establishments, he said, park their cars on the highway shoulders, and as a result traffic congestion is created and hazards introduced. The average daily traffic along this section in 1949, he said, was 3,246 vehicles. He recommended in the interests of safety that the parking of vehicles on the highway shoulders be prohibited between Mile Point 87.11 and Mile Point 87.56. The Commission approved the recommendation. The attached resolution relative thereto, marked EXHIBIT "H", which resolution by this reference is made a part hereof with like

effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote on the motion of Commissioner Reynolds.

A resolution was presented from Sumner Grange No. 865, Sumner, Oregon, requesting the establishment of a reduced speed zone on the Oregon Coast Highway between its junction with Sumner Road and the south city limits of Coos Bay. The Engineer advised that this matter has been investigated by the Traffic Engineer, whose report on the subject indicates that a reduced speed zone would be in order here were it not for the fact that the Bunker Hill-Delmar Section is to be contracted for reconstruction in the near future and that the application of the speed restriction would not be applicable or practicable when construction is under way. He recommended, in view thereof, that the request be denied. The Commission approved the recommendation.

A letter was presented from the Honorable Robert Y. Thornton, State Representative from Tillamook County, requesting the designation of a restricted speed zone along Wilson River Highway just east of the city limits of Tillamook. The Engineer advised that this matter has been investigated by the Traffic Engineer, whose report indicates a definite need for speed control along the two-mile section of this highway extending east from the city limits of Tillamook to a connection with the Trask River County Road. He recommended the designation of a 35-mile per hour speed zone from the city limits (Mile Point 0.48) to Evergreen Drive (Mile Point 0.77), and the designation of a 45-mile per hour speed zone between Evergreen Drive and Trask River Road Junction (Mile Point 2.52). The Commission approved the recommendation unanimously upon motion of Commissioner Reynolds, by adoption of the attached resolution relative thereto marked EXHIBIT "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Consideration was given by the Commission to a request from the "Barbur Boulevard Boosters" for designation of a 40-mile per hour speed zone along Barbur Boulevard (US99W) from 19th Street, Portland, to the Multnomah-Washington County line, a distance of about three and one-half miles. The Engineer advised that an investigation by the Traffic Engineer reveals that there is warrant for speed control along this section; however, he pointed out that the Highway Commission has jurisdiction only outside the Portland city limits. He recommended in view thereof the designation of a 45-mile per hour speed zone between the southwest city limits of Portland, (Mile Point 5.34,) and a point about a mile westerly thereof (Mile Point 6.45). The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "J", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed and approved out-of-state travel authorizations as follows:

1. G. S. Paxson, Bridge Engineer, to attend a meeting of the Federal Government's Committee on Steel Priorities, in Washington, D. C., January 12-15, at the request of T. H. McDonald, Commissioner of Public Roads the federal government to reimburse the state for expense involved, estimated at $317.40.

2. F. B. Crandall, Traffic Engineer, to attend a meeting of the Institute of Traffic Engineers in Kansas City during the first week in April, 1951, estimated cost $260.

3. Carl W. Jordan, Travel Department, to represent Oregon at the California Sports & Travel Show in San Francisco during March 2-11, inclusive, 1951, estimated cost $230.

4. Malcolm H. Hawke, Auditor, to go to Denver March 4-11, 1951, to assist the Colorado Highway Department in setting up an accounting system similar to the system in use by the Oregon Highway Department. Colorado Highway Department to reimburse for expense involved.

5 Forrest Cooper, Right of Way Engineer, to go to Denver, March 4-1 1951, to consult with Right of Way Department of Colorado Highway Department regarding methods, etc. Estimated cost $199.50.

6 J. M. Devers, Chief Counsel, and Lester Farnum, chauffeur, to go to Olympia, Washington, February 23, 1951, at the request of the Oregon Executive Department to attend meeting of Oregon Legislative Committee with Washington Legislative Committee, re Longview Bridge tax controversy

The Commission discussed with the Engineer the bids received earlier in the day for highway construction, and at 4:30 p.m. Commissioner Reynolds announced the Commission's decision with respect to each project as follows, the Commission's action in each instance being by unanimous vote:

"Horse Ridge-Hampton Rock Production Project on the Central Oregon Highway between Bend and Burns, Deschutes County. The Commission received six bids for this project, the low one being that of Barney B. Helser, Vale, at $49,275 The contract has been awarded to Mr. Helser at his bid price.

"Goshen Overcrossing on the Pacific Highway over Southern Pacific Company's tracks in Lane County. Hamilton and Thoms, Eugene, submitted the low bid for this job at $136,502.50. They offered to reduce

their bid in the amount of $1,000 if also awarded the contract for the construction of the Riverview Street Viaduct Project. There were six higher bids.

"Riverview Street Viaduct Project on the Pacific Highway in Eugene, Lane County. Hamilton and Thoms submitted the low bid for this job at $20,540. There were nine higher bids. The Commission has referred the bids for both projects to the Engineer with authority to award both contracts to the low bidder, Hamilton and Thoms at their bid prices, less $1,000 for being awarded both contracts, when certain conditions have been satisfied.

"Hebo Rock Production Project on the Oregon Coast and Three Rivers Highways in Tillamook County. The Commission received two bids for this project, both of which have been rejected as being too high.

"Re-oiling and furnishing crushed rock in stockpiles on the Clear Creek-White School Section of the Wapinitia Highway in Wasco County. Asphalt Paving Company, Klamath Falls, was the low bidder of eight for this job at $53,910. The Commission has awarded the contract to the Asphalt Paving Company at its bid price.

"Rock fill embankment involving 0.33 mile roadbed construction on the East Unit, Hood River-Mosier Section of the Columbia River Highway in Wasco and Hood River Counties. Kuckenberg Construction Company, Portland, submitted the low bid for this job at $661,190. There were seven higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to Kuckenberg Company at its bid price when certain conditions have been satisfied."

The Commission discussed briefly matters to be presented by delegations on the following day but took no particular action thereon.

The meeting adjourned at 5:00 p.m., to reconvene the following morning at 9:00 a.m. in the same room.

Portland, Oregon
February 27, 1951

The meeting of the Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel, the same persons being present and participating.

Bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, following which Chairman Chandler announced that the award of contracts would be made at 3:00 p. m.

COOS BAY-ROSEBURG AND POWERS SECONDARY HIGHWAYS IN COOS COUNTY --- MYRTLE POINT ROCK PRODUCTION PROJECT

Barney B. Helser, Vale	$53,462.50
Coos Bay Dredging Company, Coos Bay	56,588.00
Rogers and Kuni, Coos Bay	60,042.50

COLUMBIA RIVER HIGHWAY IN HOOD RIVER COUNTY CASCADE LOCKS-HERMAN CREEK ROAD SECTION

Rogers Construction Co., and Babler Bros., Portland	$434,505.00
R. A. Heintz Construction Company, Portland	444,504.60
Berke Brothers, Portland	446,989.00
Peter Kiewit Sons' Company, Longview, Washington	448,740.90
Parker-Schram Company, Portland	457,589.50
McNutt Brothers, Eugene	459,281.35
Kuckenberg Construction Company, Portland	516,774.00
J. N. Conley, Portland	538,549.00

KLAMATH FALLS-LAKEVIEW HIGHWAY BLY SECTION

Jack R. Robinson, Bend	$ 17,997.00
Asphalt Paving Company, Klamath Falls	20,853.50

PACIFIC HIGHWAY IN LANE COUNTY JUDKINS POINT-GOSHEN SECTION

McNutt Brothers, Eugene	$493,914.40
Guy F. Atkinson Company, Portland	514,342.50
Peter Kiewit Sons' Company, Longview, Washington	521,777.00
M. L. and C. R. O'Neil, Creswell	544,814.50
E. C. Hall Company and Leonard and Slate, Oregon Ltd., Portland	554,023.50
R. A. Heintz Construction Company, Portland	596,906.50
Kuckenberg Construction Company, Portland	604,304.50
K L. Goulter Company, Seattle, Washington	668,853.00

OREGON COAST HIGHWAY IN LINCOLN COUNTY
BIG CREEK(AGATE BEACH-NEWPORT)SECTION

Durbin Brothers, Eugene	$240,932.20
M. L. and C. R. O'Neil, Creswell	242,974.20
R. A. Heintz, Portland	244,061.20
K. F. Jacobsen and Company, Inc., Portland	252,556.70
J. M. Arenz, Portland	252,990.70
Kuckenberg Construction Company, Portland	258,209.00
McNutt Brothers, Eugene	262,474.70
Stevenson Construction Company, Salem	264,948.20
Heavy Hauling Company and C. H. Grimstad and T. Vanderveldt, Astoria	282,177.20
John Havlik, Jr., Scappoose	284,532.20
C. J. Eldon, Portland	298,514.00
T. W. Thomas, Portland	321,647.50

I. O. N. HIGHWAY IN MALHEUR COUNTY
ROCK CREEK-McDERMITT ROCK PRODUCTION PROJECT

C. E. Leseberg, Nyssa	$ 59,080.40
Rush Construction Company, Enterprise	62,423.80
E. C. Hall Company, Portland	63,894.00
Barney B. Helser, Vale	76,758.00

OLD OREGON TRAIL HIGHWAY IN UMATILLA COUNTY
HERMISTON(RAILROAD TO HURLBURT AVENUE)SECTION

Morrison and Fisher, Walla Walla, Washington	5,400.00
Leslie Harris, Pendleton	6,469.00

THREE MILE LANE SECDY. HWY. IN YAMHILL COUNTY
W. UNIT, S. YAMHILL RIVER-DAYTON SECTION

O. C. Yocom Company and J. C. Compton Co., McMinnville	$ 98,745.00
Porter W. Yett, Portland	106,062 00
K. F. Jacobsen and Company, Portland	112,479.00
Warren Northwest Inc., Portland	114,356.00

Mr. Oliver Lewis, representing the U. S. Army Engineers, Walla Walla, Washington, came before the Commission regarding the lowering of the floor of the bridge over Catherine Creek in the town of Union, Union County. He said that the government has a $40,000 project underway at this place which involves lowering the channel of Catherine Creek, and in the course of the work they find that the footings of the highway bridge are somewhat higher than the new bed of the stream. He further stated that they at first planned to lower the bridge floor themselves but later ascertained that they did not have legal authority to do so, so they are now asking the state to do it. He pointed out that their project is sponsored by the City of Union, which will be responsible for any deficiency; also, there is considerable likelihood that the bridge will be damaged by flood water if something is not done soon to correct the situation. He estimated the cost of the work at about $4,000. The State Highway Engineer gave as his opinion that there is urgent need to do the work at once in order to avoid damage to the bridge structure, and he recommended approval of the project by the Commission, the work to be done by state forces. The Commission approved the recommendation.

The Commission discussed a letter from Mr. Claude H. Giles, attorney, Coos Bay, in behalf of clients who are demanding substitution of tidegates for a bridge in the plans of the Commission for the improvement of the Oregon Coast Highway at Shinglehouse Slough, south of the city of Coos Bay. Mr. Giles alleges that his clients were at one time promised tidegates, and he urges the Commission to do what is necessary to fulfill that obligation. The Engineer reported that advices have been received from the Army Engineers to the effect that Shinglehouse Slough is definitely a navigable body of water and such being the case a permit authorizing construction of a bridge over it must be secured from them, although it was very doubtful if they would grant such a permit for dike and tidegate construction. As a result of discussion the Commission decided unanimously to proceed on the basis of present plans for a bridge at this point rather than tidegates. Motion to that effect was offered by Commissioner Reynolds and seconded by Chairman Chandler, who declared it carried. The Secretary was instructed to inform Mr. Giles of the action taken.

The Chief Counsel reported receipt from the Union Pacific Railroad Company of a tentative draft of an agreement covering encroachment of the Columbia River Highway on railroad company property between Herman Creek Road and Corton Creek, in Hood River County. He recalled that the Commission at its meeting on January 24 received a satisfactory bid from Vernie Jarl, Gresham for construction of this project, but held up the award of the contract pending conclusion of arrangements with the railroad company with respect to the encroachment. Approval of the form of agreement submitted, he said, will allow the Commission to award the contract and will permit the contractor to occupy the railroad company property; however, he pointed out that the agreement as prepared, contains a number of provisions that neither he nor the Engi-

neer can recommend. He recited the provisions to which he referred and suggested that he be authorized to tell the company that the Commission will execute a form of agreement with certain changes. The Commission approved the suggestion and so ordered.

The Chief Counsel reported the results of a joint meeting of committees representing members of the Oregon Legislature and the Washington Legislature in Olympia, Washington, on February 23, for the purpose of attempting a solution of the tax problem involving the interstate bridge between Rainier, Oregon, and Longview, Washington. He said that during the discussion it was proposed that the State of Washington pay $75,000 to apply on the $118,000 taxes that have been levied by Columbia County, Oregon, but which have not been paid, and it was understood that the payment of any sum by the State of Washington was to be on the condition that the Oregon law by which the taxes are now assessed, levied and imposed would be repealed. It was also proposed that some relief in the way of toll charges would be worked out by the Toll Bridge Authority for the accommodation of people who live on the Oregon side of the river and work in Washington, and for the people who live on the Washington side of the river and work in Oregon. Before the meeting adjourned, he said, Governor Langlie suggested that the members of the Oregon committee return to Salem and submit an offer of settlement in writing, with the understanding that if the offer were fair, they would promptly pay it, and if it were too severe they would endeavor to pay it even though they might feel they were being unfairly treated. The Commission took no particular action on this report.

The County Court of Clackamas County, represented by County Judge Wallace Telford and Commissioners Robert Jones and Stan Skoko, was present and urged the Commission to designate and construct as a state secondary highway, the county road which extends northerly from a connection with the Clackamas State Secondary Highway No. 171, near a place known as Barton, to the town of Boring, to facilitate the transportation of logs from the Estacada district to the loading terminals of the railroad at Boring. Judge Telford advised that this road is used extensively by log and lumber haulers, but recently on account of the winter freeze and thaw, it was closed to such use, by the County Court, and the operators now are required to take a round-about route either through Carver or Sandy to get to their destination. He said that this road, which is heavily traveled, now is in fairly good conditions, but will not stand up under the pounding of logging and lumber trucks. He urged the Commission to take it over as a state secondary highway because the county does not have the funds necessary to maintain it. Chairman Chandler advised that it is contrary to the Commission's present policy to add any more roads to the state highway system until improvement of the roads now on that system is further advanced; however, the Commission occasionally makes substitutions and in the present instance will con-

sider such an exchange if the County Court is agreeable. Judge Telford stated his approval of such an exchange of roads, as did also Commissioners Jones and Skoko, whereupon the Commission instructed the Engineer to discuss the matter with the County Court on such basis and report back his recommendation.

A delegation consisting of Messrs. Robert J. Wilhelm and Monroe A. Jubitz, representing the Rudy Wilhelm Warehouse Company; Clarence D. Phillips, Attorney, and C. J. Scoville, representing the Portland General Electric Company, all of Portland, came before the Commission regarding the securing of permits allowing movements over state highways of loads which weigh considerably in excess of the weight limits specified by statute, particularly with reference to loads that cannot be dismantled, such as transformers. Mr. Wilhelm, who was principal speaker, stated that in the past his company has been able to secure permits for loads weighing 80,000 pounds gross weight, but occasionally they are called upon to move things of greater gross weight, and to take care of these movements, they have purchased a 16-wheel trailer which they believe can be used successfully without damaging highway surfaces. He explained their problem in considerable detail and asked the Commission to modify its requirements so as to permit use of this equipment on state highways. He presented a brief in support of his oral report. Chairman Chandler advised that the Highway Commission appreciates the problem, but does not have funds at its disposal to pay for construction of roads that will stand up under unlimited weights; however, the Commission will have the Engineer make a study of the equipment referred to by Mr. Wilhelm, for the purpose of determining just how heavy a load can be transported by it without damaging highway surfaces. Mr. Phillips mentioned that in 1947 the Portland General Electric Company moved a heavy transformer from Woodburn to its substation at St. Louis. The transformer, he said, has now burned out and the company wishes to send it back to the factory but is unable to obtain a permit to move it over the highway. He said the route over which they wish to take it has no bridges, and it is the only possible way to get it to the railroad. He asked the Commission to authorize the movement. The Commission indicated its approval subject to check by the Engineer. As a result of further discussion the Commission referred the entire matter to the Engineer for a thorough study.

The County Court of Tillamook County, represented by County Judge O. E. Effenberger, and Commissioners August Schollmeyer and Wesley Shulmerich, was present. They asked the Commission to construct two bridges, one across the Trask River on Federal Aid Secondary Highway No. 620 (locally known as the Wilson River Loop County Road), and the other across Dougherty Slough on what is known locally as the Brickyard Loop County Road. They said that the County has no money with which to finance either of these structures, its funds being available only for oiling purposes; hence they are asking the State's help. They alleged that the Brickyard Loop Road was at one time on

the Federal Aid Secondary System but was deleted therefrom when the present system was developed. In order that federal funds may be used for construction of the Dougherty Slough Bridge, they proposed an exchange of roads in the Federal Aid Secondary Highway System as follows: Elimination of that portion of Federal Aid Secondary Highway No. 620 southerly from its junction with Federal Aid Secondary Highway No. 619, and substitution therefor of the so-called Brickyard Loop Road. The Commission agreed to give the matter consideration and referred it to the Engineer for investigation and report at the next meeting.

Mr. John Epping, Western Vice President of the association known as the "Outdoors Writers of America," and Vice President of the Oregon Coast Association for Tillamook County, offered the following suggestion for installation of culverts through state highway embankments: That when the Highway Commission constructs new highways, particularly in the dry portion of the state, culverts be installed near the top of the embankments rather than at the bottom so as to impound water that could be used for irrigation or for recreational purposes. He said that such a system is being used in some of the eastern states, particularly in Pennsylvania, with good results because it conserves water in localities where the water table is being lowered. The Commission took the matter under advisement.

A delegation from Sheridan and McMinnville, consisting of the following, appeared before the Commission and urged improvement of the Salmon River Highway easterly from the city limits of Sheridan a distance of about two miles, to a place known locally as Turner Hill: Leland Sackett, Wayne Flynn, Otto Heider, George Mowery, Beryl Swails, all representing the Sheridan Chamber of Commerce; and R. I. Merryfield, O. C. Yocom, James Stannard, Gail Vinton, Phil Bladine, all representing the McMinnville Chamber of Commerce. Mr. Sackett headed the group. He urged the Commission to give favorable consideration to their request, alleging that this section of highway is about the oldest in the state, that it is narrow, rough, weak and not adequate for the heavy travel that it receives. He asked that it be improved at the earliest possible time. The Engineer advised that a survey of the section, which is about 2.3 miles long, has already been made and a cost estimate prepared, which indicates that to improve the section as requested will cost about $200,000, including pavement 24 feet wide with a six-foot shoulder on each side. Chairman Chandler advised that the Commission's present policy is to spend some money on this highway each year so that eventually it will be brought up to modern standards throughout. He mentioned that the Commission has in mind as its next project an improvement in the vicinity of St. Joe Underpass; and he indicated to the group that they may expect an expenditure of some money on this highway this year.

The following persons composed a delegation from the city of Corvallis which consulted the Commission regarding a proposed plan to re-route the Pacific Highway West (US99W) along First Street in this city: James O. Conville, City Manager, Jay Reynolds and Vance Taylor, representing the Chamber of Commerce, Sandy McHugh and Professor Glen Holcomb, representing the City Council. Mr. Conville headed the group. He requested clarification of the Commission's plan for the First Street route, because of the city's plans for sewer construction along this street this year, and the city's desire to start acquisition of right of way that may be needed. He stated that they appreciate the fact that the proposed improvement of the highway just north of the city has priority status, but they are very anxious to secure the Commission's approval of the First Street project so they can plan accordingly. Chairman Chandler advised that the Commission has this project in mind but cannot make a decision until it has received a report from the Engineer on his further study of the project. The Engineer was thereupon instructed to render such report at the next meeting of the Commission. In conclusion, Mr. Conville stated that his group will appear before the Commission again at such meeting for its answer.

The Commission discussed items of unfinished business as listed on the Secretary's summary dated January 24, 1951. Action as follows was taken thereon:

1. Matters to be presented to the 1951 Legislature: The Commission ordered this item retained on the list.

2. Request of Baker County Chamber of Commerce for improvement of the Haines-Anthony Lakes Secondary Highway: Commissioner Reynolds and the Engineer are to consult with the Baker County Court with respect to this project on the occasion of the Engineer's next trip into Eastern Oregon.

3. Collection of the amount of bid bond furnished by the State Construction Company in connection with its proposal to construct piers for the Marion Street Bridge in Salem. The Chief Counsel advised that he is working on this matter on a compromise basis with a view in mind to securing a settlement out of court.

4. Proposed acquisition of additional area for overnight camping purposes in Wallowa Lake State Park: The Right of Way Engineer reported that he is still working on this project and hopes to have a report for the Commission soon.

5. Request of the City of Nyssa for construction of full width pavement and curbs on US20 within the city: Action on this matter was deferred pending inspection of the project by Commissioner Reynolds and the Engine

on the Engineer's next trip into Eastern Oregon.

6. Request of the City of Corvallis for re-routing of US99W on First Street in Corvallis: Previously discussed with delegation. The Engineer was instructed to report on this matter at the next meeting of the Commission.

7. Proposed state park in Ladd Canyon, Union County: Action on this matter was deferred pending inspection of the site by Commissioner Reynolds and the Engineer.

8. Disposal of claim of Mrs. William Fairweather, Burbank, California, who alleges injuries received while visiting in Silver Falls State Park: This matter was reported by the Chief Counsel earlier in the session, at which time the Commission decided to let the matter rest until Mrs. Fairweather takes action of some sort.

9. Request of Tillamook County Court for construction of two bridges on the county market road system: This matter was discussed previously with members of the County Court, at which time the Engineer was instructed to investigate a proposed exchange of roads in the Federal Aid Secondary Highway System in Tillamook County, and to report his findings at the next meeting of the Commission.

10. Truck-hauling of logs during hours of darkness: The Chief Counsel advised that there is no particular statute covering this subject but it is left with the Public Utilities Commissioner to prescribe rules and regulations upon recommendation of the State Highway Commission. The Engineer was instructed to send a copy of the regulations to each member of the Commission for study.

11. Proposed change in form of real estate options: The Commission deferred action in this matter pending the return of Commissioner M. K. McIver from his trip to London.

12. Acquisition of property for off-street parking in Salem: The Chief Counsel advised that the Commission is without legal authority to spend highway money for such purposes. In view thereof, the Commission instructed the Engineer to proceed strictly in accordance with the provisions of the Commission's agreement with the City of Salem.

13. Request for elimination of the rough condition of the Central Oregon Highway between Juntura and Harper: The Engineer advised that he will report on this matter at the next meeting.

14. Proposed development of park area at McNary Dam site: The matter was discussed earlier in the session, at which time it was agreed to ask the County Court of Umatilla County to negotiate with the property owner. The Commission approved payment of $5,000 for property owned by Mr. Kik.

15. Request for concession privileges at Sandy River Bridge at Troutdale during the smelt run in the Sandy River: This matter was previously disposed of earlier in the session, at which time the Commission decided not to grant the concession.

16. Report on weighing activities on a sixteen-hour basis: The Engineer advised that there is nothing new to report, and he suggested that the item be deleted from the list. The Commission so ordered.

17. Furnishing building and grounds services for the new Highway Department office building in Salem: The Engineer advised that he met with the Ways and Means Committee of the State Legislature relative to rental to be charged on state office buildings and ascertained that it is the view of the Committee that ten cents per square foot per month should be charged for amortization of buildings and five cents per square foot per month for operation and maintenance of buildings, a total of fifteen cents per square foot per month; also, that with reference to the State Highway Building, the five-cent charge for operation and maintenance of the building should be paid by the Highway Department into the General Fund of the State, and the work should be done by the Secretary of State under agreement with the Highway Commission. The Commission deferred any action with reference to an agreement with the Secretary of State until the Ways and Means Committee makes its final decision with respect to the rental rates to be charged.

18. Adoption of Federal Aid Secondary Highway Program for the years 1952, 1953, and 1954: Projects for first year construction were selected by the Commission on January 23; selection of projects for second and third year undertaking was deferred until later.

19. Adoption of a program for 1951 Special State Tax Street Fund: The selection of projects was made by the Commission earlier in the session.

20. Claim of Crawford W. Smith for damages to his property at Port Orford due to highway improvement: The Right of Way Engineer advised that he has not had time yet to consult Mr. Smith but will do so in the near future.

21. Legislative bill allowing contractors to develop county roads for log hauling as recommended by Mr. J. C. Bedingfield, attorney, Coos Bay: The Commission ordered this item deleted from the list.

22. Report on economic study of proposed relocation of Tualatin Valley Highway along Baseline east of Hillsboro. It was pointed out that the Engineer's report on this matter was presented to the Commission at its January meeting. The Commission ordered the item deleted from the list.

23. Request of Union County Court for improvement of the "Valley" Section of the Alicel-Lower Cove Road (Federal Aid Secondary Highway No. 479): Action in this matter was deferred pending discussion of the matter with the County Court by Commissioner Reynolds and the Engineer.

24. Proposed improvement of US99 at Portland Stockyards: The Engineer advised that his report on this subject is not yet ready but he will render it at the next meeting of the Commission.

25. Request of Cascade Highway Association for designation and improvement, as a state secondary highway, of the county road between Scio and Stayton, Linn County: The Engineer advised that his report on this subject has not as yet been prepared.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m., with the same persons present and participating.

The following persons composed a group from the City of Hood River which appeared before the Commission and urged construction of a direct connection into their city along Second Street, from the new Columbia River Highway which is to be constructed north of the Union Pacific Railroad tracks through this city: Hon. Vernon Garrabrant, Mayor, and Carl Andresen, City Engineer, representing the City Council; Herbert Struck, County Commissioner, representing the County Court; Harold S. Keir, Commissioner, representing the Port of Hood River Commission; P. F. Buckl n, Chairman of the Highway Committee, and R. E. Steele, Secretary, representing the Hood River Chamber of Commerce; Charles T. Howe, representing the Lions Club; and J. L. Breckenridge, representing the Hood River Rotary Club. Commissioner Bucklin headed the group. He exhibited a map showing the proposed highway and the desired connection, and he presented a letter, signed by each of the organizations represented by the group, supporting in detail their request for such connection. This matter was discussed at considerable length, during which the Engineer stated that present plans provide access to the city on both east and west sides but no provision has been made for an entrance at Second Street, which involves a cloverleaf grade separation structure. As a result of the discussion the Commission agreed to give the matter careful study and to discuss it with the Engineer.

(For details of the City's request see copy of letter presented by Mr. Bucklin dated February 26, 1951, in general files.)

Following discussion of this matter, County Commissioner Struck inquired as to the Commission's plans for construction of a bridge over Hood River in the town of Dee. He was informed by Chairman Chandler that the Commission has tentatively approved the allocation of Federal Aid Secondary Highway funds to finance such project, and it is quite likely that the work will be done during the 1951 construction season.

The Right of Way Engineer reported a revised settlement with Mr. Arthur J. McCall for land that is needed as right of way across his property in Ladd Canyon, particularly at a location about two miles southeast of LaGrande. He said that the original settlement provided for construction of a cattle pass at an estimated cost of about $3,200, but since the option was secured, Mr. McCall acquired some additional land to which he plans to move all of his buildings so they all will be on the same side of the highway. Such arrangement, he said, will obviate the necessity for the cattle pass and Mr. McCall has agreed to release the state from construction of the same, if the state will pay for moving his buildings, which is estimated at about $2,722.82. He recommended approval of the arrangement. The Commission approved the recommendation unanimously on the condition that payment to Mr. McCall shall not be made until he has signed and delivered to the Commission a statement releasing the state from further obligation with respect to the cattle pass.

A delegation from Douglas County consisting of Hon. Tom Lillebo, Mayor of Reedsport, H. R. Morris, representing the Port of Umpqua Chamber of Commerce and the Umpqua River Navigation Company, Reedsport, Mr. and Mrs. L. M. Gulloch, farmer, Oakland, Mr. and Mrs. Howard Cracroft, rancher, Oakland, and Ross Hutchinson, ex-County Commissioner of Douglas County, appeared before the Commission and urged improvements to the Elkton-Sutherlin State Secondary Highway. They alleged that this highway throughout its entire length, except for a short section heretofore improved, is narrow, crooked, rough and a dangerous road to travel, particularly because of the large volume of heavy traffic, such as logging and lumber trucks, that uses it. They presented a map showing the location of saw mills and logging companies in Douglas County, and pointed out that there are 26 mills and 59 logging operations betweek Elkton and Sutherlin, and they declared that the present road is entirely inadequate to serve these industries. Speaking in behalf of their request were Messrs. Lillebo, Cracroft and Morris. They urged the improvement from the standpoint of safety, convenience, and the building up of their community and the lumber-shipping facilities at Reedsport. They said that they are not asking for the improvement of the entire highway at this time but would like to have the Sutherlin end improved first and a program arranged for an orderly improvement of the balance.

Chairman Chandler advised that the Commission in its allocation of available funds must be fair to all communities and must distribute the funds on an equitable basis; and, because the funds are insufficient to finance all of the improvements that are requested, the Commission must use its judgment in allocating them where they will do the most good for the largest number of people. He also said that because of the fact that Douglas County has received so much money recently, and because additional funds have been earmarked for expenditure in this district, the Commission cannot in fairness to other communities do what the group is asking. There are no monies available for the Elkton-Sutherlin Road now, he said, and the Commission is not in a position to make any definite promises as to the future, but it will give this highway fair consideration at the proper time. In replying to an inquiry from Mr. Cracoft as to what prospect there is for improvement of this road next year, Chairman Chandler advised that the Commission does not want to make a prediction that might result in a disappointment. Mr. Cracoft left with the Commission letters and petitions from numerous organizations and individuals urgently requesting the improvement of this highway.

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3:00 p.m. Commissioner Reynolds publicly announced the Commission's decision with respect to each project as follows, the Commission's decision being by unanimous vote:

"Myrtle Point Rock Production Project on the Coos Bay-Roseburg and Powers Secondary Highways in Coos County. Barney B. Helser, Vale, submitted the low bid for this project at $53,462.50. There were two higher bids. The contract has been awarded to Mr Helser at his bid price.

"Cascade Locks-Herman Creek Road Section of the Columbia River Highway in Hood River County, grading, paving and bridge construction. The Commission received eight bids for this job, the low one being the joint bid of Rogers Construction Company and Babler Brothers, Portland, at $434,505.00. The bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading and oil mat surfacing on the Bly Section of the Klamath Falls-Lakeview Highway in Klamath County. Two bids for this work were received, the low one being that of Jack C. Robinson, Bend, at $17,997. The bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading and construction of reinforced concrete box culverts on the Judkins Point-Goshen Section of the Pacific Highway south of Eugene, Lane County. McNutt Brothers, Eugene, were the low bidders for this work at $493,914.40. There were seven higher bids. The bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading and bituminous macadam construction on the Big Creek (Agate Beach-Newport) Section of the Oregon Coast Highway in Lincoln County. Twelve bids were submitted for this work, that of Durbin Brothers, Eugene, being low at $240,932.20. The bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Rock Creek-McDermitt Rock Production Project on the I. O. N. Highway, Malheur County. The low bidder for this work was C. E. Leseberg, Nyssa, at $59,080.40. There were three higher bids. The Commission has awarded the contract to the low bidder at his bid price.

"Grading and oil mat surfacing on the Hermiston (Railroad to Hurlburt Avenue) Section of the Old Oregon Trail in Umatilla County. Morrison and Fisher, Walla Walla, Washington, with its bid of $5,100.00, was the low bidder of two on this work. The Commission has awarded the contract to Morrison and Fisher at its bid price.

"Grading and paving the West Unit of the South Yamhill River-Dayton Section of the Three Mile Lane Secondary Highway in Yamhill County. The joint bid submitted by O. C. Yocom Company and J. C. Compton Company, McMinnville, at $98,745.00 was the low bid of four for this work. The Commission has awarded the contract to this contractor at its bid price.

Messrs. Al Loucks and John Franzen, Mayor and City Manager respectively, of the City of Salem, were present and discussed with the Commission the matter of the state's providing off-street parking areas for cars in North Salem, in lieu of certain widening work on North Capitol Street heretofore proposed and provided for in the city's agreement with the State Highway Commission covering highway improvements within the city. They exhibited a map showing the sections of North Capitol Street which, according to present plans, are to be widened to facilitate the parking of cars along the curbline, and also outlining the areas that they have in mind for the state to acquire as parking areas in lieu of such widening work. They alleged that if the Commission will approve the plan they propose, a saving of several thousands of dollars will be realized. Moreover, in their estimation it will provide for a better highway improvement. They were informed by Chairman Chandler that according to an opinion given by the Commission's Chief Counsel, Mr. J.M. Dever

the Commission does not have legal authority to acquire land for off-street parking of cars, in view of which the Commission is precluded from doing what what they ask, and has ordered adherence to the original arrangement, notwithstanding that it may cost somewhat more than the proposed alternative. Mr. Franzen inquired whether or not the Commission will object to having the law amended to permit the Commission to acquire areas for the off-street parking of cars. Chairman Chandler replied that the Commission feels that it would be contrary to the state's best interests to embark upon such a program, because were such areas provided in one locality they would also have to be furnished in other localities throughout the state, which would result in the expenditure of highway funds to do something that was not originally intended, and in an amount which the Commission cannot afford; however, if the legislature should see fit to so amend the law, then the Commission will respond, although it considers that it would be bad practice to do so. This concluded the conference.

Messrs. J. L. McCulloch, Chairman of the Roads Committee of the Burns Chamber of Commerce, C. W. Craddock, County Judge of Harney County, and M E Cady, Manager of the Bend Chamber of Commerce, composed a delegation which appeared before the Commission and urged immediate construction of the remaining 22-mile section of the Rome-Princeton State Secondary Highway between Princeton and Follyfarm. Mr. McCulloch recited the history of this highway and urged early completion of this section as an entirely new port of entry into the state of Oregon. He also said that they prefer this project to the reconstruction of the Sage Hen Hill Section of the Central Oregon Highway, which he understood the Commission has in mind. Judge Craddock stated that if the Commission cannot see its way clear to improve the entire section this year, they will be satisfied with a portion of it, and he suggested improvement of the Princeton end. Chairman Chandler advised that the Commission realizes the State has a considerable investment in this road, and, that the Commission wants to complete it as soon as it can in order to realize on this investment, but cannot spend its primary highway monies on secondary roads, as this one is classed. He also said that the Commission will give the matter further study and see what can be done, if anything, to hurry the job along. Commissioner Reynolds pointed out that the original estimate of cost to build this 22-mile section was $520,000, and that with prices now about 20% higher than at that time, the estimate must be revised to about $600,000, which, he said is quite a sum for one section of secondary highway. He agreed with Chairman Chandler that the matter will be given further study.

Thomas M. Gatch, Attorney, Portland, was present in behalf of his client, Mr. E. S. Alger, also of Portland, regarding Mr Alger's claim against the state for damage which he alleges occurred to his car by reason of a faulty railing on the Sandy River Bridge on the Columbia River Highway

(old route) near Troutdale. Mr. Alger was also present. Mr. Gatch stated that the accident happened in the early morning hours on August 17, 1950, when the car, which was being driven by Mr. Alger's son, approached the bridge from the east at a speed of about 20 to 25 miles per hour. The approach, he said, is on a curve, the bridge narrow, and the car was driven into the end of a temporary railing at the bridge end which protruded into the roadway. This plank, he said, hit the extreme right edge of the windshield, impaled the car and came out on the right side of the rear, resulting in damage which cost $450 to repair. He asked the Commission to pay such sum and to allow rebate on Mr. Alger's car license. Chairman Chandler advised that this matter has been checked very thoroughly by the State Highway Engineer and the Commission's Chief Counsel, and their reports on the subject are to the effect that the state is in no way legally liable, wherefore the Commission definitely denies the claim.

Mr. Henry Hartje, attorney, Portland, was present in behalf of his clients, Hal Alger and Murrel Hibbard, who were involved in the same accident, Hal Alger being the driver of the car, Murrel Hibbard a passenger. Both of these men were also present. Mr. Hartje requested on behalf of Mr Hal Alger payment of $500 for personal injuries and doctor bills. He also said that Mr. Hibbard has accepted payment of his claim from his insurance company, so there is a question in view thereof whether or not he still has a claim against the state. He was informed by Chairman Chandler that the Commission definitely denies the claims for the same reason that it denied the claim of Mr. E. S. Alger.

Mr. Elmer Bankus, Brookings, Oregon, was present. He alleged that when the State Highway Commission acquired from him several years ago land that was needed as right of way for the Oregon Coast Highway north of the town of Brookings, it was understood that the land that was not actually needed for right of way purposes would be deeded back to him. He said that up to the present time the state has not deeded to him any excess property and that he would like to have that done soon because he plans to develop adjacent land which he owns but cannot do so except by encroachment upon state land which is low and will have to be filled in. Chairman Chandler advised that this matter was presented to the Highway Commission at the previous meeting, and from the evidence submitted at that time the Commission decided that it is not obligated to deed any of this property to Mr. Bankus. Moreover, according to the Engineer all of the property is needed for future highway purposes. Mr. Bankus repeated that he was given to understand by the Commission's Chief Counsel that the property that is not actually needed for highway purposes would be deeded back to him. The Chief Counsel advised that the understanding is substantially correct; however, it appears that the property is all needed for highway purposes so there is no excess to convey Mr. Bankus then explained that he merely wants a proper approach

to his property and that he is not asking for an additional access to the highway. He suggested, if the Commission feels that it cannot deed the property back to him, that the State fill in the low points to a level with the highway He will then fill in his property to a corresponding level so as to eliminate any low area between the highway and his property The Commission took the matter under advisement.

Mr. Bankus then brought up for discussion a proposed exchange of properties in the south part of the town of Brookings. He gave as his understanding that the state needs a strip of his land, 208 feet long, for widening the present highway, and he stated his willingness to deed such strip to the state if the state will deed to him a small area that it owns in the town of Brookings, which he understand the state does not need. The Commission referred this matter to the Engineer for investigation and report.

A delegation representing the Oregon Roadside Council and the Oregon Federation of Garden Clubs was present and urged the Commission to support Senate Bill No. 94, now before the state legislature, which bill provides for the creation of protective roadside strips where advertising signs may be permitted, regulated or prohibited. The group was headed by Mr Thornton T. Munger, Chairman, Roadside Protective Committee of the Oregon Roadside Council, and included the following: Mrs. Daniel Heffner, Portland, representing the National Council of State Garden Clubs, Mrs. C. R. Bushman, Scappoose, and from Portland, Mrs. H. C Ritter, Miss Julia Hobday, Mrs. W. H Hemphill, Mrs. C. C. Menefee, Mrs. Floyd Hallock Mr. Aubray R. Watzek, Admiral Tom Gatch, Messrs. George Ruby, C. B. Sherer, Ed Birkenbeul and C. P. Keiser, Mrs. Walter Gerke, representing the Oregon Society of Landscape Artists, and Don Parks, of the Oregon Chapter of the American Institute of Architects. In opening the discussion Mr. Munger stated that their bill was introduced in the legislature and was referred to the Committee on Roads and Highways, where it is being held up because of statements made by someone whom they understand represented the State Highway Commission He urged the Commission to reconsider its decision in the matter and to state its objections, so that they can provide amendments that will meet those objections. Others speaking in behalf of the bill were Mr Watsek, who stated that the members of the Oregon Roadside Council which appeared before the legislative committee represented a large portion of the population of the state which wants the billboards outlawed; Admiral Gatch, who said he understood "that the State of Oregon had reached a stage of civilization to dislike roadside signs"; Mrs Heffner, who stated that she represents 8,000 garden club members covering the entire state who believe that people who drive cars have a right to an unobstructed view of the scenery along highways; and Mr. Ruby, who stated that their cause is hopeless unless the Highway Commission will assume the responsibility for the things mentioned in the bill.

Chairman Chandler advised that the Highway Commission is in sympathy with the objectives of the bill, but is of the belief that the administration of the act should be under an independent agency, and if that can be arranged, the Highway Commission will endorse the bill and help secure its passage. He predicted that the administration of the act would involve much litigation and he pointed out that it is the duty and purpose of the Highway Commission to build and maintain highways. He assured the group that the Highway Commission will "back" them 100% in their endeavors if some other agency than the Highway Commission is designated to administer the act. At the request of Mr. Munger, the Secretary read aloud a prepared statement that was delivered to the Roads and Highways Committee when this bill was discussed. In conclusion, Mr. Ruby stated that it appears that the Committee does not clearly understand the position of the Highway Commission in this matter and he asked the Commission to do what is necessary to straighten it out. He suggested that the bill be rewritten by the Commission's Chief Counsel in a manner that would be acceptable to the Commission. Chairman Chandler advised that the only change necessary is to give the administration of the act to some agency other than the State Highway Commission.

The Commission discussed a request from the City of Beaverton that heavy truck traffic, particularly logging trucks, be removed from Broadway Street (Beaverton-Hillsdale Highway) and rerouted by way of the Tualatin Valley Highway, thence south to Broadway at the edge of Beaverton. In connection with this matter the Commission also discussed a request from the city of Vale for rerouting of truck traffic along Washington Street in Vale, between Main and Glenn Streets, so as to take such traffic off their main business street. Also discussed was a similar situation in the city of La Grande. The Chief Counsel advised that the only way that truck traffic can be rerouted legally is by mutual agreement between city and state to eliminate a hazard or a nuisance. If a city wants to reroute heavy truck traffic off a street that is a designated highway route, he said, that can be done if the Highway Commission concurs by entering into a mutual agreement with the city. But the simple fact that the city adopts an ordinance prohibiting trucks from using certain streets does not make it legal. The Commission took no definite action on either of the requests.

The Commission discussed the date for its next regular meeting, and decided to hold such meeting in Portland on Thursday and Friday, April 12 and 13, 1951. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

The Commission approved and signed agreements, etc. as follows:

Agreement with City of Eugene covering installation of traffic signal at intersection of Broadway and Mill Streets.

Agreements etc. (cont.)

Bargain and Sale Deed conveying to Johanna Enegren Parcel of land lying in Lot 7 of Section 27, Township 25 South, Range 12 West, W. M., Coos County, Oregon

Bargain and Sale Deed conveying to Herbert E. and Mabel Laib a strip of land containing approximately 325 sq. feet lying in Lot 27, Block 3, Woodland Park Addition to City of Portland.

Agreement with F. C. Hathaway covering sale of timber on the Sunset Highway about a mile west of Sunset Camp, Washington County.

Second Modification of Cooperative Agreement for maintenance on the John Day Burns National Forest Highway.

Deed conveying to Dan F. Clare a small tract abutting the Glendale-Johns Section of US99.

Deed conveying to Pleasant Hill Cemetery Association a small tract abutting Willamette Highway, Lane County.

Agreement with Bureau of Public Roads providing for state maintenance of Pendleton-John Day Forest Highway Project during winter season at federal expense.

Agreement with Hood River County and city of Cascade Locks covering disposition of Cascade Locks-Herman Creek Section of Columbia River Highway. (Old route)

Agreement with U. S. Forest Service re maintenance of section of old route of Enterprise-Lewiston Highway as a forest road connection

Lease Agreement conveying to Arlie Lapping and Dorothy Lapping a parcel of land lying in Block 33, Coos Bay Plat "B" Addition to North Bend, Coos Bay and a parcel of land lying in Lot 27, Block 33, Coos Bay Plat "B" Addition to North Bend.

Quitclaim Deed to J. L. and Ada Stuart for a parcel of land lying in Thomas Monteith D. L. C. No. 64, T. 11 South, R. 3 W., W. M., Linn County, Oregon.

Agreements etc. (cont.)

Lease for Land agreement with E. K. Wood Lumber Company for tract of land lying in W. R. Foster D. L. C. #45 Sec. 11, T. 28S, R. 6W, W. M. Douglas County, Oregon (Quarry floor for parking)

Agreement with Coastal Lumber Company covering sale of down and dead timber on property owned by State along the Salmon River Highway in Tillamook Co., known as Van Duzer Corridor.

Oregon Forest Highway Program for Fiscal Year 1952. (Approved January 23, 1951)

Agreement with U. S. Army Engineers covering dredging materials to be used on Salem-Dallas Highway in West Salem.

The meeting adjourned at 5:20 p. m.

EXHIBIT "A"

Minutes of February 26 and 27, 1951

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FOOTNOTE:

** With reference to items 16982 and 16983 appearing in the above resolution, being options negotiated with David A Loop and Floyd A. Sanders, for property to be conveyed to Richfield Oil Company in exchange for oil company property that is needed for the North Corvallis Section of the Pacific Highway West, the Commission approved the amounts shown in the options, viz. $550.00 and $1,000.00 respectively, but instructed the Right of Way Engineer not to close the options until the Richfield Oil Company states in writing that it will accept these properties as consideration for oil company property that the State needs.

EXHIBIT "B"

Minutes of February 26 and 27, 1951

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

> PACIFIC HIGHWAY between its junction with the Willamette Highway east of Goshen, and a point approximately 2.18 miles southerly thereof, in Lane County

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said maps, reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members being present and voting affirmatively as follows:

1. That the survey of the above-described section of state highway, particularly between Engineer's Station 0+00 at a junction with the Willamette Highway, and Engineer's Station 115+24, a distance of approximately 2.18 miles southerly thereof, in Section 35, Township 18 South, Range 3 West, W.M., Lane County, together with the map, which for identification purposes bears Map File Numbers 5B-35-9 and 7B-6-4, field notes and other engineering data submitted by the Engineer, hereby is approved and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon; and

2. It is further ordered that the said route and the survey of the same hereby are adopted as the route and location of the PACIFIC HIGHWAY between the above-described points.

(cont.)

EXHIBIT "B" (cont.)

3. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

4. That this resolution be entered in the minutes and records of the Commission as of the 26th day of February, 1951.

EXHIBIT "C"

Minutes of February 26 and 27, 1951

RESOLUTION

WHEREAS, by the enactment of Chapter 149, Oregon Laws 1949, it is provided as follows:

"Beginning with the year 1949 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 10 percent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O. C. L. A.; section 15, chapter 413, Oregon Laws 1945, as amended by section 4, chapter 114, Oregon Laws 1947; and section 29, chapter 467, Oregon Laws 1947; and from fines and penalties collected for violations of the motor vehicle and transportation laws. Such appropriation shall be distributed among the several cities as provided in this act."

AND, WHEREAS, by said law it is further provided that:

"Such appropriation shall be allocated to the cities as follows: The sum of two hundred fifty thousand dollars ($250,000) shall be withdrawn from such appropriation each year and set up in a separate account to be administered by the state highway commission. Such account shall be spent each year by such commission upon streets not a part of the state highway system within cities which are receiving excessive wear through sudden increases in population in the area or heavy and unusual industrial traffic. Such commission shall determine the distribution of such expenditures after considering applications made to it therefor from the cities. The balance remaining in such appropriation after the withdrawal of said two hundred fifty thousand dollars ($250,000) shall be distributed to all of the cities. Each city shall receive such share of the balance as its population bears to the total population of the cities."

AND, WHEREAS, by section 3 of said act it is provided that:

"Funds accrued and payable to cities under this act shall be remitted semiannually by the Secretary of State to the financial officer of each city. The funds appropriated by this act shall be apportioned on a semi-annual basis immediately following June 30 and December 31 of each year by the state highway commission who shall certify such apportionment to

(cont.)

the Secretary of State. Upon receipt of such certificate the Secretary of State shall issue his warrants therefor payable to the cities in the amounts set out."

AND, WHEREAS, pursuant to the foregoing statutes, the Highway Commission while in regular session January 23rd and 24th in Portland, Oregon, provided by formal resolution for the allocation and distribution of said funds on the basis of the 1940 census -- the 1950 census at that time not being available to the Highway Commission by legislative act; and,

WHEREAS, subsequent to January 25, 1951, the legislature in regular session enacted House Bill No. 156 which, when signed by the Governor on February 5, 1951, became effective by reason of the fact that said act had an emergency clause; and,

WHEREAS, pursuant to the 1950 census, which census has been adopted by the legislature and made applicable to the allocation and distribution of funds for the year 1950 provided for in said laws, the Highway Commission, in response to a request by the Secretary of State, hereby makes a new allocation and distribution of said highway revenue funds, which allocation and distribution are in conformity with said 1950 census; and,

WHEREAS, the moneys which have been credited to the state highway funds by the State Treasurer covering the period of July 1 to December 31, inclusive, of the year 1950, which funds have accrued from sources designated in said legislative act, amount to $23,651,760.91 and are derived from funds accruing from the following sources:

Section 115-135, O.C.L.A. (motor vehicle license fees)	$ 4,073,648.61
Section 15, Chapter 413, Oregon Laws 1945, as amended by Section 4, Chapter 114, Oregon Laws 1947 (gasoline tax)	16,376,914.89
Section 29, Chapter 467, Oregon Laws 1947 (Motor carrier fees)	3,040,294.27
From fines and penalties collected for violations of the motor vehicles and transportation laws	160,903.14
	$ 23,651,760.91

AND, WHEREAS, the ten percent of the $23,651,760.91 which is available for distribution among the cities amounts to $2,365,176.09; and

WHEREAS, after withdrawing the sum of $125,000 (one-half of $250,000) as provided in said act, which sum is to be administered by the State Highway Commission within the meaning of section 2 of said chapter 149, Oregon Laws 1949, there remains a balance of $2,240,176.09 which balance is, in response to the command of said statute, to be distributed among the cities of the state, each city being entitled to receive such share of said balance as its population bears to the total population of the cities; and

WHEREAS, by applying the factors of allocation or distribution provided for in said Chapter 149, Oregon Laws, 1949, and as adopted by the 1951 legislative session in House Bill No. 156, the State Highway Commission has determined upon an apportionment of said balance among the cities of the state as shown in the tabulation given below;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, two members being present and affirmatively voting, as follows:

1. That the Commission does hereby find and declare that the funds made available for distribution among the cities of the state pursuant to said law should be and are allocated and apportioned to the cities named below in the amounts set opposite the names of the respective cities:

I. Cities of Populations 1,000 or more

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3207 with E. C. Swaggart for grading and oil mat surfacing on the Forest Boundary-Unit Junction Section of the John Day Highway in Baker County, completed September 7, 1950.

Contract No. 3240 with M. L. and C. R. O'Neil for grading and oil mat surfacing on the S. Unit, Princeton-Follyfarm Section of the Rome-Princeton Highway in Malheur and Harney Counties, completed September 18, 1950.

Contract No. 3256 with Barney B. Helser for rock production on the Dixie Summit-Baker County Line Section on the John Day Highway in Grant County, completed October 17, 1950.

Contract No. 3304 with N. A. Toole Construction Co. for grading and oil mat surfacing on the Garrison Corner Section of the Nyssa-Adrian Highway in Malheur County, completed September 15, 1950.

Contract No. 3335 with Rogers Construction Co. for reoiling on the Forest Boundary-Jefferson County Line Section on the Warm Springs Highway in Wasco County, completed December 22, 1950.

Contract No. 3234 with C. J. Eldon for construction of Tanner Creek Bridge on the Columbia River Highway in Multnomah County, completed December 30, 1950.

Contract No 3302 with R. H. Jones for constructing a maintenance building at Brogan in Malheur County, completed September 12, 1950.

Contract No. 3420 with Foothills Construction Co. for constructing the Estacada Maintenance Building in Clackamas County, completed January 30, 1951.

(cont.)

EXHIBIT "F" (cont.)

Contract No. 3202 with Valley Construction Co. for constructing the Dewey Avenue Grade Separation on the Baker-Unity Highway in Baker County, completed December 22, 1950.

Contract No. 3239 with Lindstrom Bros., Inc., for widening of McCord Creek Bridge on the Columbia River Highway in Multnomah County, completed February 14, 1951.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Minutes of February 26 and 27, 1951

ORDER REDUCING MAXIMUM LOAD LIMITS ON CERTAIN STATE HIGHWAYS

WHEREAS, the highways and sections of highways hereinafter set forth or described have been duly designated and declared to be and are state highways and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

WESTON-ELGIN (State Secondary Highway No. 330)

WARNER (State Secondary Highway No. 431)

AND WHEREAS, said highways and sections of highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highways and sections of highways during the present period of freezing and thawing, and in order to protect said highways and sections of highways against such damage and injury it is deeme and is the judgment of the Highway Commission, and said Highway Commission finds that it will be for the best interests of said highways that the maximum weights permitted and authorized by law be reduced during such period; and

WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon said highways and sections of highways during said period shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said highways and sections of highways were not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highways and sections of highways that the maximum total weight of load and vehicle which shall be permitted upon said highways and sections of highways during the said period, commencing on the dates hereinafter specified, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicles or combination of vehicles which shall be permitted upon the follow-

(cont.)

EXHIBIT "G" (cont.)

ing described highways or sections of highways shall not exceed 11,000 pounds gross on any single axle nor 20,000 pounds gross on any pair of tandem axles nor a maximum of 36,000 pounds gross on all axles of the vehicle or combination of vehicles:

Name of Highway and No.		County	Section Restricted	Date Effective 1951
Weston-Elgin	330	Umatilla & Union	Entire Length	Feb. 8
Warner	431	Lake	Fremont Hwy. Jct. (M. P. 0.00) to Drakes Creek (M. P. 21.35)	Feb. 19

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394, O. C. L. A., shall be in full force and effect from the effective date hereinabove specified until modified, annulled, or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of each of the above highways and/or sections of highways and at the important crossroads on said highways so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 26th day of February, 1951.

OREGON STATE HIGHWAY COMMISSION

By: Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner

R. H. Baldock
State Highway Engineer

ATTEST:
H. B. Glaisyer

EXHIBIT "H"

Minutes of February 26 and 27, 1951

RESOLUTION

WHEREAS, the Pacific Highway West, extending from a junction with the Pacific Highway East in Portland, southerly to a junction with the Pacific Highway East at Junction City, is a state highway and as such is under the jurisdiction and control of the State Highway Commission, and said highway is identified in the Commission's records as State Highway No. 1-W; and

WHEREAS, it appears that on a section of said highway situate approximately one mile south of the south city limits of Corvallis in Benton County, there is located on property adjacent to the said highway an auction market on the east side of the highway and a cafe on the west side of the highway, and that patrons of said establishments park their cars within the right of way limit of said highway at such location and leave said cars so parked for extended periods of time; and

WHEREAS, the parking of cars along and upon the shoulders of said highway south of the city limits of Corvallis between Mile Point 87.11 (Engineer's Station 851+00 and Mile Point 87.56 (Engineer's Station 837+00) creates a traffic hazard, which in the opinion of the Commission, should be prohibited; and

WHEREAS, the width of the highway shoulders at said location is not sufficient to permit the parking of vehicles and to provide the safety which the Commission feels is necessary for the traveling public; and

WHEREAS, the maneuvering of vehicles within the traveled portion of said highway in connection with the parking and unparking of said vehicles upon the shoulders thereof restricts and impairs the use of said traveled portion of said highway, and thereby creates a hazard to through traffic moving upon said highway, and to parked vehicles and occupants thereof; and

WHEREAS, the Commission, based upon the report of its Traffic Engineer and the recommendations of the State Highway Engineer, is of the opinion that for safety and convenience of traffic, all parking upon the shoulders of said highway within said area should be prohibited;

NOW, THEREFORE, this Commission, two members thereof being present and voting affirmatively, does hereby order:

EXHIBIT "H" (cont.)

1. That based upon the facts and recommendations placed before this Commission, the Commission does hereby find and declare that the parking of motore vehicles upon and along the shoulders of the Pacific Highway West (US99W) between Mile Point 87.11 (Engineer's Station 851+00) and Mile Point 87.56 (Engineer's Station 837+00), a distance of approximately 1,400 feet, south of the south city limits of the City of Corvallis, creates a hazard to traffic on said highway and to parked vehicles and the occupants thereof, which hazard, in the opinion of this Commission, should be removed.

2. That for the purpose of protecting the general public, and especially the motoring public using said highway in said vicinity, it is hereby ordered that parking of vehicles upon and along the shoulders of said highway south of the south city limits of Corvallis, between Mile Point 87.11 (Engineer's Station 851+00) and Mile Point 87.56 (Engineer's Station 837+00), is prohibited.

3. The State Highway Engineer hereby is directed to erect and thereafter maintain upon and along said highway at the termini of said area, and at such points between said termini as in his judgment may be necessary to properly inform and advise the public, suitable and adequate signs containing the words "No Parking on Highway Shoulders."

4. That a certified copy of this resolution be delivered to the Superintendent of State Police and like copies to the Sheriff of Benton County and to the owners of said auction market and said cafe.

5. That this resolution be entered in the minutes and records of the Highway Commission as of the 26th day of February, 1951.

EXHIBIT "I"

Minutes of February 26 and 27, 1951

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Wilson River Highway

Highway number: 37 Route number: Oregon Route No. 6

EXHIBIT "K"

Minutes of February 26 and 27, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the T. H. Banfield Expressway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation by motor vehicles promoted, highway travel in general safeguarded, and public welfare promoted, it is the judgment of the Commission that the real property hereinafter described is necessary and that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, two members thereof being present and voting affirmatively, as follows:

(cont.)

EXHIBIT "K" (cont.)

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the T. H. Banfield Expressway, for the purpose of establishing, constructing and maintaining a throughway, the following-described parcels of real property, to-wit:

Parcel No. 1
Owner: Harrison W. Jensen
File No. 16777

A parcel of land lying in Lot 6, Block 1, Parkrose Heights, situated in Section 27, Township 1 North, Range 2 East, W. M., Multnomah County, Oregon. The said parcel being that portion of said Lot 6 lying between the southerly right of way line of the O. W. R. & N. Co. and a line parallel to and 70 feet southerly of the center line of the T. H. Banfield Expressway as said highway has been located, which center line is described as follows:

Beginning at Engineer's center line Station 350+64.13, said Station being 1088.33 feet South 7° 51' 47" West of the northwest corner of said Section 27; thence on a 2083.48 foot radius curve right (the long chord of which bears North 62° 35' 24" East 2105.36 feet) a distance of 2207.15 feet; thence on a spiral curve right (the long chord of which bears South 83° 23' 42" East 399.84 feet) a distance of 400 feet to Station 376+71.28, the southerly line of said parcel crossing the west and east lines of Lot 6 approximately opposite Stations 373+12 and 374+12, respectively, containing 0.24 acre.

Parcel No. 2
Owner: Arthur R. L. Chase
File No. 16863

A parcel of land lying in Section 27, Township 1 North, Range 3 East, W. M., Multnomah County, Oregon, and being a portion of that property conveyed by that deed to Arthur R. L. Chase and Nellie A. Chase, recorded in Book 1137, Page 125, of Multnomah County Records of Deeds; the said parcel being that portion of said property included in a strip of land of variable width, lying on the northerly side of the center line of the T. H. Banfield Expressway as said highway has been located, which center line is described as follows:

(cont.)

Beginning at Engineer's center line Station 688+00, said Station being approximately 815 feet east and 25 feet south of the southwest corner of the Charles Fezette D. L. C. of Township 1 North, Range 3 East, W. M.; thence South 71° 03' 57" East 1000 feet to Station 698+00; except that portion of said strip of land lying within that tract of land conveyed to Landor Penne by deed recorded in Book 416, Page 96 of Multnomah County Deed Records; said center line crossing the easterly line of said Penne property and the easterly line of said Chase property approximately at Stations 688+78 and 696+27 respectively.

Also that portion of said property described in said deed recorded in Book 1137, Page 125 of the Deed Records of Multnomah County, lying southerly of said center line and easterly of said Penne property.

The widths in feet of the strip of land above referred to are as follows:

Station to Station		Width on Northerly Side of Center Line
Easterly line of Penne property	690+60	120
690+60	698+00	80

The parcel of land to which this description applies contains 2.40 acres.

Parcel No. 3
Owner: Sylvester B. Hall
File No. 15533

A parcel of land lying in Section 29, Township 1 North, Range 3 East, W. M., Multnomah County, Oregon, and being a portion of the following-described property: That tract of land known as Tax Lot 6 which was conveyed by that certain deed to Sylvester B. Hall and Edna Hall recorded in Book 859, Page 170 of Multnomah County Record of Deeds; the said parcel being all that portion of the foregoing property lying south of a line parallel to and 130 feet northerly of the center line of the T. H. Banfield Expressway as said highway has been located over and across said property; the location of the said parcel being determined by the said center line, which center line is described as follows:

(cont.)

EXHIBIT "K" (cont.)

Beginning at a point which is Engineer's center line Station 565+76.05; said point being 277.34 feet North 59° 37' 56" West of the west quarter corner of Section 29, Township 1 North, Range 3 East, W.M.; thence South 85° 03' East a distance of 2247.31 feet to Engineer's Station 588+23.36; thence on a spiral curve to the right (the long chord of which bears South 84° 50' 30" East) a distance of 250 feet; thence on a 11459.16 foot radius curve right (the long chord of which bears South 81° 47' 50" East) a distance of 1051.11 feet; thence on a spiral curve to the right (the long chord of which bears South 78° 45' 10" East, 250.00 feet) a distance of 250.00 feet to Engineer's Station 603+74.47, the northerly line of said parcel crossing the west and east lines of said property approximately opposite Stations 585+33 and 596+46, respectively.

The parcel of land to which this description applies contains 6.50 acres.

Parcel No. 4
Owner: Ralph Garbarino
File No. 15516

A parcel of land lying in Section 25, Township 1 North, Range 2 East, W.M., Multnomah County, Oregon, and being a portion of the following-described property: That tract of land known as Tax Lot 6 which was conveyed by that certain deed to Ralph Garbarino and Gulio Garbarino recorded in Book 1174, Page 359 of Multnomah County Record of Deeds; the said parcel being all that portion of said property lying northerly of a line parallel to and 100 feet southerly of the center line of the T. H. Banfield Expressway as said highway has been located over and across the said property; the location of the said parcel being determined by the said center line, which center line is described as follows:

Beginning at a point which is Engineer's center line Station 497+80; said point being 1929.17 feet North 73° 58' 33" West of the east quarter corner of Section 25, Township 1 North, Range 2 East, W.M.; thence South 89° 37' 17" East a distance of 1220 feet to Engineer's Station 510+00, the southerly line of said parcel crossing the west and east lines of said property approximately opposite Stations 498+50 and 507+58 respectively.

(cont.)

The parcel of land to which this description applies contains 3.12 acres.

Parcel No. 5
Owner: J. Bardell Purcell
File No. 15476

All of Lot 34, Block 3, Woodland Park Addition to the City of Portland situated in Section 28, Township 1 North, Range 2 East, W. M., Multnomah County, Oregon.

The parcel of land to which this description applies contains 7,350 square feet.

Parcel No. 6
Owner: Ernest W. Buck
File No. 15478

All of Lot 32, Block 3, Woodland Park Addition to the City of Portland situated in Section 28, Township 1 North, Range 2 East, W. M., Multnomah County, Oregon.

The parcel of land to which this description applies contains 6,500 square feet.

2. That in addition to acquisition of fee simple title to the aforesaid-described real property designated as Parcels Nos. 1, 2, 3, 4, 5 and 6, it is necessary that there be acquired or extinguished such interests or rights, if any there be, by which rights of access or any rights in the nature of rights of access may accrue by reason of the adjacency of the T. H. Banfield Expressway, when constructed upon the aforesaid-described real property designated as Parcels Nos. 1, 2, 3, and 4, to the remaining abutting lands of the larger tracts, of which said larger tracts the aforesaid-described property designated as Parcels Nos. 1, 2, 3, and 4 are parts, and that all access, ingress, egress and regress to, from and between the aforesaid-described property designated as Parcels Nos. 1, 2, 3, and 4, including any highway to be constructed thereon, and said remaining abutting properties be prohibited.

3. That the highway facility for which the aforesaid real property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcels of property as to the compensation to be paid for the taking, including the damages, if any, and, in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcels of real property.

5. That upon the trial of any suit or action instituted to acquire the said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-sixth day of February, 1951.

Portland, Oregon
April 12, 1951

The State Highway Commission convened in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
Milo K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
Forrest Cooper, Right of Way Engineer
C. W. Enfield, Assistant Counsel
Fred A. Miller, Assistant Counsel
C. H. Armstrong, Parks Superintendent
Malcolm H. Hawke, Auditor
H. B. Glaisyer, Secretary

The Highway Commission's Chief Counsel was absent on account of illness.

Chairman Chandler introduced the following members of the Idaho State Highway Commission, recently appointed by Governor Len B. Jordan of the State of Idaho pursuant to the Highway Act of that State enacted by the 1951 Idaho Legislature: Rosco C. Rich, Burley, Idaho; Leonard Floane, Orphina, Idaho; and Fisher Ellsworth, Idaho Falls.

Bids as follows for highway construction were then opened and read aloud by the Secretary pursuant to previously published notice, and Chairman Chandler announced that awards of contracts would be made at 4:00 p.m.

ALSEA HIGHWAY IN BENTON COUNTY
ALDER CREEK-PHILOMATH SECTION

Warren Northwest, Inc., Portland	$173,030.00
J. C. Compton Co., McMinnville	178,880.00
Parker-Schram Co., Portland	191,590.00

Acme Constr. Co., Eugene	42,446.00

The Commission approved the minutes of the meeting of the Commission held on February 26 and 27, 1951.

The State Parks Superintendent, Mr. C. H. Armstrong, reported on the following park matters:

1. Report on results of receiving bids in Salem on April 4 for purchase of timber at Short Sand Creek, Tillamook County: The Parks Superintendent advised that only one bid was received, being that of F. S. Baty and C. E. Brown of Seaside, at $1,252.50, and he recommended acceptance of the offer, which, he said, is more than double the appraised value of the timber. The Commission approved the recommendation unanimously upon motion of Commissioner Reynolds.

2. Proposed sale of timber on a Port Orford cedar tract north of Sixes in Curry County: The Parks Superintendent advised that this timber also was advertised for sale, bids to be received on April 4, but no bids were submitted.

3. Report on results of taking bids in Salem on April 4 for the purchase of timber on a state-owned tract of land near Necanicum Junction, Clatsop County: The State Highway Engineer reported on this sale. He stated that three bids were received for this timber, that of Carl K. Stephen Company, Gearhart, being high at $2,800. He recommended acceptance of this offer, which he said is more than double the appraised value of the timber. The Commission approved the recommendation unanimously upon motion of Commissioner Reynolds.

4. Report on request of U. S. Corps of Engineers that the State take over jurisdiction of the Fern Ridge Dam Recreation area: The Parks Superintendent explained details with respect to his written report to the Commission on this subject, dated April 5, 1951. He pointed

out that the area is located about ten miles west of Eugene on the Richardson-Eugene Secondary State Highway and that certain areas have been developed by the Army Engineers, particularly a point called Perkins Peninsula, at the south end of the lake, Richardson Point at the northwest portion of the lake, and Orchard Point on the northeast. Two other suitable areas, he said, are wholly undeveloped. He advised that the area at Peninsula Point is reasonably well developed with a road and parking area, boat dock, launching ramp, picnic tables, water supply, etc., and that a similar development has been made at Richardson Point which is a low, lightly timbered area that slopes gently toward the lake. He pointed out that an organization known as the Eugene Yacht Club has been given a lease to a portion of this property and has constructed for the use of its members, moorings capable of accommodating about fifty boats. He estimated the annual cost to maintain the areas at Richardson Point and at Perkins Peninsula at $4,700, and he recommended that these two areas be maintained by the state inasmuch as funds available to the Corps of Engineers for maintenance have been curtailed. After considerable discussion the Commission approved the recommendation unanimously and ordered the matter covered by appropriate written agreement. (For details see copy of Parks Superintendent's report in general files).

5. Request of J. W. Long to use a logging road across Humbug Mountain State Park, Curry County: The Parks Superintendent explained that the logging road now exists across a narrow portion of this park, and all that Mr. Long wants is permission to operate over it as has been done in the past. He recommended approval of the request. The Commission approved the recommendation. (An agreement covering the matter was signed by the Commission later in the session.)

6. Proposed gift by the Leadbetter Estate of a small addition to Devil's Punch Bowl State Park, Lincoln County: The Parks Superintendent advised that the State Highway Department has received some criticism in the past for not providing a suitable trail to the beach in this park, the present trail being usable only during periods of low tide. The Leadbetter Estate, he said, owns property immediately east of the present park and has indicated that it will donate enough of this property to provide a trail to the beach that could be used during all periods of the tide. He recommended acceptance of the tract if it develops that the Leadbetter Estate is going to donate it. The Commission approved the recommendation.

7. Offer of Mrs. R. P. Richardson and Paul Baird, Toledo, Oregon, to sell to the state for park purposes a parcel of land consisting of three small lots situate on the south side of Depoe Bay and on the west side of the Oregon Coast Highway. The Parks Superintendent advised that the

lots are in a splendid location affording a wonderful view of the entrance to the bay. However, the price that the owners are asking for the property, $8,195, is exorbitant. He requested instructions. The Commission decided against purchase of the property.

8. Question of providing greater safety for visitors to Lava Caves State Park south of Bend: The Parks Superintendent advised that these Caves are now served by a trail that is quite dangerous, especially near the entrance, and in his estimation something should be done to safeguard the people who visit the Caves, of whom there were about 65,000 last year. He suggested the employment of a guide. The State Highway Engineer concurred in the suggestion and also recommended maintenance of appropriate signs. As a result of discussion the Commission unanimously approved the employment of a guide this year, and ordered the erection of warning signs as recommended by the Engineer.

9. Request for authority to contract construction of latrines at Benson and Champoeg State Parks; also, to construct a small concrete pumphouse and garage, and a floor in the south wing of the old CCC mess hall at Emigrant Springs State Park: The Parks Superintendent advised that all of this construction was contemplated when the 1951 budget was adopted by the Commission in principle, and he is simply asking for definite approval at this time so the work can proceed. The Commission approved the request unanimously and ordered the work done by contract.

10. Proposal of Superintendent of Boys' Training School, Woodburn, for employment of boys from this school in developing and maintaining park areas: The Parks Superintendent presented a letter from Mr. James Lamb, Superintendent of the Boys' School, concerning the employment of boys from the school to do maintenance and construction work in state parks, and suggesting as an initial project, the assignment of a group of 18 to 25 boys ranging in age from sixteen to eighteen. Mr. Lamb states that the school will be responsible for equipping the camp and for supervision and operation of the camp program except during working hours, when the boys would be under complete supervision of the State Parks representative. The Parks Superintendent advised there is lots of work that can be done by these boys and he suggested, if the Commission approves the project, that the boys be compensated at the rate of $1.00 per day each. He questioned the advisability, however, of employing the boys during the months of June, July and August when the parks are patronized by youth groups and other visitors. Chairman Chandler expressed the feeling that the Commission wants to help the boys as much as possible, but he pointed out that the project as proposed is a departure from standard practice

and probably should not be approved by the Commission until the attitude of other groups who use the park areas has been ascertained, because it might be that some people would dislike to have their children in such close proximity with boys from the training school. The plan might work all right, he added, where the parks are located in isolated districts and are not much used by the public, especially by the younger people, but he questioned the advisability of starting the program in other locations. Commissioner McIver expressed his approval of the program in undeveloped park areas. The Commission discussed this matter at considerable length, but deferred its decision pending consultation with Mr. Lamb, Superintendent of the Boys School, on the following day. (See ahead for delegation and action.)

The Right of Way Engineer presented for the Commission's consideration a list of options, obtained for real property that is needed for right of way and other purposes. As a result of very careful consideration of the individual items contained in the list the Commission by unanimous vote authorized the closing of the options at the prices contained therein. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote on motion by Commissioner Reynolds, duly seconded by Commissioner McIver.

In connection with its consideration of the real property options, and particularly those concerning the acquisition of right of way for the Judkins-Point-Goshen Section of the Pacific Highway, inquiry was made by the Commission as to the status of acquiring "right of access" from Mr. Travis along this section. The Commission was informed that Mr. Travis is still very anxious to have public access to the highway from his motor court and contemplates bringing a delegation to the Commission at its next meeting in furtherance of his desires. It was recalled that the Commission previously refused Mr. Travis' request. The Commission confirmed its previous decision in this matter and instructed the Right of Way Engineer to negotiate further with Mr. Travis and others along this section for acquisition of their access rights. The Assistant Counsel, Mr. Enfield, advised that the Commission cannot legally acquire these access rights because none exist at the present time inasmuch as the highway has not yet been constructed. He suggested the construction of a fence along the right of way line in front of the Travis property and other property where future access rights cannot be obtained. The Commission approved the suggestion and instructed the Engineer to construct such fences immediately.

In order to expedite consideration of the options as presented by the Right of Way Engineer at each of its meetings, the Commission ordered that hereafter a list of the options, containing details, be forwarded to each member

of the Commission two or three days in advance of each meeting along with the advance copy of the agenda as prepared by the Secretary.

The Assistant Counsel, Mr. Enfield, requested authority to condemn certain parcels of real property that cannot be acquired by negotiation. He presented a list of such properties, together with the offer that he recommended for each parcel in condemnation as follows:

			Recommended Offer
Lana Ave. - Academy St. Section of the Pacific Highway East			
R 16695	Charles G. Denison (Right of Way)	(Marion County)	
	510 sq. ft. at $1.00	$ 510.00	
	Lawn 500 sq. ft. at $0.05	25.00	
	Damages by reason of the new property line being set back 10 feet from adjoining property to the south	100.00	
		$ 635.00	$ 650.00
Ramsey Canyon-Crater Lake Section of Sams Valley Highway			
R 14086	Alicia Ruhl Right of Way	(Jackson County)	
	0.76 acre at $700.00	$ 532.00	$ 550.00
North Fork Siuslaw River Section of the Siuslaw Highway			
R 15362	Nick K. Hatch, et al. Right of Way	(Lane County)	
	0.77 acres of tidelands - $150.00	$ 150.00	$ 150.00
Bay Park-Delmar Section of the Oregon Coast Highway			
R 14947	Nellie M. Ross, deceased (not probated) Right of Way	(Coos County)	
	4.23 acres of land	$ $ 825.00	
	House	2,160.00	
	Damage to property	3,325.00	
		$6,310.00	$ 6,350.00
R 14957	Elsie Lee Burrows Right of Way	(Coos County)	
	0.74 acre of land	$ 2,800.00	$ 2,800.00

			Recommended Offer
Ladd Canyon Section of Old Oregon Trail			
R 16096	J. F. Gilkison, deceased (Union County)		
	Right of Way		
	0.05 acre of land	$ 25.00	$ 50.00
	Reestablish 6 rods of fence		
Unit #2 Section of the T. H. Banfield Expressway			
R 15871	J. A. Lyons, deceased (Multnomah County)		
	Right of Way		
	Land 53,560 sq. ft. at $0.60	$26,136.00	
	Office building 554 sq. ft. at $2.50	1,385.00	
	Coal sacking shed 1677 sq. ft. at $1.50	2,515.50	
	Scale house and scales-moving allowance	400.00	
	Gas pump and tank - moving allowance	75.00	
	Spur trackage, approx. 489' at $10.	4,890.00	
	Black top paved area, 8,000 sq. ft. at $0.10	800.00	
	Coal shed 8,960 sq. ft. at $1.	8,960.00	
	Severance damages, 10% of present value of remainder or $65,000.	6,500.00	
		$51,661.50	$52,000.00
Unit #5 Section of the T. H. Banfield Expressway			
R 14889-A-R	A. Hoffman (Multnomah County)		
	Right of Way		
	0.32 acre at $1,200 per acre	$ 384.00	
	Severance, 10% of total valuation of $2,600	260.00	
	Allowance for privy and animal hutches	25.00	
		$ 669.00	$ 675.00
Hood River-Mosier Section of the Columbia River Highway			
R 17064	Oregon Lumber Company (Hood River County)		
	Right of Way		
	4.71 acres		$ 9,000.00

After careful consideration of each item, the Commission approved the request and the recommended offer, and thereupon by unanimous vote, on motion of Commissioner Reynolds, duly seconded by Commissioner McIver, adopted the attached resolutions relative thereto, marked EXHIBITS "J-1", "J-2", "J-3", "J-4", "J-5", "J-6", "J-7" and "J-8", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

In this connection, the Commission discussed a general procedure to be followed hereafter in order to expedite condemnation cases. It appears that there is a large accumulation of cases pending and indications are that it will be necessary to augment the legal staff to dispose of them and to avoid delays in contracting the work for which the property is required. Accordingly, the Commission ordered that, hereafter, when it authorizes condemnation of a parcel of land, the case shall be briefed at once in the office of the Chief Counsel. If deemed necessary to expedite the case, then the Chief Counsel is instructed and authorized to secure the services of a good trial lawyer in the county wherein the property is situate to assist him in trying the case. Such procedure was approved by the Commission unanimously and the Legal Department was instructed to govern its actions accordingly.

The Commission discussed a resolution adopted by the Salem City Council on April 9, 1951 being City Resolution No. 6038, in which the Mayor and the City Administrator are authorized to negotiate with the State Highway Commission for a modification of the City's agreement with the Commission to eliminate the provision contained therein which requires the widening of Portland Road (Pacific Highway East) on the east side thereof between Beach Street and Lana Avenue. The Engineer advised that a private parking area has already been provided by the adjacent property owner on the east side of the highway at this location, and were the highway to be widened at this point it would seriously affect such parking space; moreover, if the contemplated widening work were deleted from the plan, a saving of approximately $15,000 of state funds would be realized. He recommended approval of the modification requested by the City. The Commission approved the recommendation unanimously and ordered the matter covered by appropriate agreement with the City.

The Right of Way Engineer presented a list of miscellaneous properties that he has sold since the last meeting of the Commission as follows, and he asked the Commission to confirm the sales:

Item	Former Owner and Location	Purchaser	Sale Price
House	Swend Johansen Coquille-Cedar Point Sec. Oregon Coast Highway	McNair Wrecking Co. Coquille, Oregon	$550.00
House	Mae M. Sibold Coquille-Cedar Point Sec. Oregon Coast Highway	Mike Fults. Coquille, Oregon	$161.50
House	R. E. Folsom Coquille-Cedar Point Sec. Oregon Coast Highway	Walter J. Enlund Coquille, Oregon	$315.00
House	Otis T. Bartels Bay Park-Delmar Sec. Oregon Coast Highway	Otis T. Bartels 3497 Highway Coos Bay, Oregon	$400.00
Garage	T. Brudos Coquille-Cedar Point Sec. Oregon Coast Highway	Walter J. Enlund Coquille, Oregon	$ 40.00
Scrap Iron	R. V. Turnbull Cascade Locks-Viento Sec. Columbia River Highway	Ray P. Bennett 7011 SE 77th St. Portland, Oregon	$ 20.00
House	Charles W. White North of Bend Section The Dalles-California Hwy.)	D. R. Perrin 440 Division Bend, Oregon	$300.00
House	Alonzo B. Miller Bay Park-Delmar Section Oregon Coast Highway	Dewey F. Whatley 2303 Highway Coos Bay, Oregon	$102.00
3 gas pumps hydraulic lift air compressor	Roy D. Martin Bay Park-Delmar Section Oregon Coast Highway	Dewey F. Whatley 2303 Highway Coos Bay, Oregon	$256.00
Residence	Walter W. Moore North Roseburg Section Pacific Highway	Roy Anderson 446 Garden Valley Rd. Roseburg, Oregon	$365.00

Item	Former Owner and Location	Purchaser	Sale Price
Duplex House Garage & Shed	J. W. Chaney Bay Park-Delmar Section Oregon Coast Highway	Stanley J. Stevens Route 2, Box 202 North Bend, Oregon	$607.97
4-room House	J. W. Chaney Bay Park-Delmar Section Oregon Coast Highway	Harve Chaffin 335 West Mill St. Coos Bay, Oregon	$165.00

As a result of discussion , motion was made by Commissioner Reynolds that the Commission confirm the sales as reported, it appearing that the properties no longer are needed, required or useful for right of way purposes. Motion was seconded by Commissioner McIver and carried unanimously.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

The Commission unanimously confirmed authority previously given for the expenditure of $16,200 for construction of right of way fences along the Ladd Canyon project in Union County.

The Right of Way Engineer reported that, in connection with the reestablishment of a building owned by Mr. Ed Thomas in Sweet Home, to accommodate highway improvement at that place, it has been found necessary to raise the building about one and one-half feet, which was not contemplated when bids were received for the moving of the building. He also said that the All-State Construction Company which did the moving, was put to $1,601.17 extra expense because of the additional work which included extra concrete for foundations, certain filling in, and construction of a retaining wall, and the company is now asking reimbursement for such expense. He recommended approval of the claim. The Commission approved the recommendation unanimously.

The Right of Way Engineer reported that when the Highway Commission acquired the Weyerhaeuser Timber Company property on South Sixth Street in Klamath Falls, it was discovered that the company had an agreement with the Southern Pacific Company to maintain a culvert and drain ditch on the railroad company's property, the purpose of which was to drain a low area on the property that the State acquired. It is to the State's advantage, he said, to continue with that agreement, so an arrange-

ment was made with the Southern Pacific Company for permission to maintain the facilities on the railroad property. He asked the Commission to approve the arrangement. The State Highway Engineer concurred. The Commission approved the request unanimously. (An agreement covering the matter was signed by the Commission on the following day.)

The Commission discussed, and upon the recommendation of the Engineer and the Chief Counsel, approved certain changes in access points on the North Santiam Highway near Detroit to serve property owned by Mr. Brazier C. Small, Salem, and his associates, which changes, it appears, are equally advantageous to the highway. (The Commission on the following day executed the "Indenture of Access".)

The Right of Way Engineer reported on the claim of Mr. Crawford Smith, Port Orford, who alleges damage to his property by reason of the improvement of the Oregon Coast Highway at this place. He advised that he discussed the matter thoroughly with Mr. Smith and, as a result thereof, Mr. Smith has agreed to accept the sum of $3,300 as settlement in full. Moreover, he will give the State a waiver of all claims. He pointed out that the highway encroached upon Mr. Smith's property and that according to reports previously rendered to the Commission on the subject, the State is under obligation to Mr Smith. He recommended disposal of the case by payment of the sum mentioned. Chairman Chandler gave as his feeling that the settlement is fair and reasonable. The Commission approved the settlement unanimously.

The Right of Way Engineer brought up for discussion a request from the Union Oil Company to lease a parcel of state-owned land in Astoria. He explained that the property consists of portions of two city lots which lie outside of the standard width highway right of way and adjoin land owned by the company, upon which the company maintains a service station. The property, he said, consists of only 950 square feet of land and the company has offered to pay $48.00 per year for its use. He recommended acceptance of the offer on a 10-year basis, the lease to contain a 6-months cancellation clause. The Commission approved the recommendation. (An agreement covering the matter was signed by the Commission on the following day.)

The Right of Way Engineer reported on the proposed exchange of properties with Mr. Elmer Bankus in the town of Brookings, heretofore discussed by the Commission. He explained that Mr. Bankus owns certain property which the State needs but has been unable to acquire by negotiation, so it was necessary to condemn it. Mr. Bankus, he said, desires to acquire a small parcel of state-owned land nearby, which the State does not particularly need because it lies outside of the standard width right of way, and he is now offering to give the State title to his property if the State will stop the condemnation

action, and deed to him the property that he wants. He said that an appraisal of both properties reveals that they are approximately of equal value and, accordingly, he recommended approval of the exchange. The Commission approved the recommendation.

The Right of Way Engineer also recommended deeding to Mr. Fred W. Weldin, Ontario, a small parcel of state-owned land in Malheur County, in exchange for which Mr. Weldin offers to deed to the State a small parcel of land of equal value adjoining a quarry site. He explained that Mr. Weldin owns the land abutting the State's quarry and the exchange of properties is simply to "square up" the property lines as an accommodation to Mr. Weldin, who has already delivered his deed to the State. The Commission approved the exchange unanimously. (The Commission executed a bargain and sale deed on the following day.)

The Commission had under discussion the adoption of a resolution formally relinquishing unto the Union Pacific Railroad Company the State's interest in certain company property along the Dodson-Bonneville Section of the Columbia River Highway, Multnomah County. It was explained that the original Columbia River Highway was constructed on railroad company property which was leased for the purpose, and that by the terms of the lease, the State's rights are to terminate upon discontinuance of use of the property for public highway purposes; also, that the property no longer is required for highway purposes in view of the fact that a new highway has been built, so it now is in order to terminate the arrangement. The Commission unanimously approved termination of the lease by adoption of the attached resolution relative thereto marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Assistant Counsel, Mr. Enfield, presented for the Commissioners' consideration, deeds, permits and easements prepared in conformity with action previously taken by the Commission in the case of the State Highway Commission vs. Paul Martin et ux concerning a right of way settlement on the Columbia River Highway, near Troutdale, Multnomah County. He expalined that this matter is a court case which was settled by trial several months ago, but, due to the absence from the state of the defendants and because of other delays, the instruments now before the Commission were not executed and returned to the Highway Department's offices until March 20, 1951. He assured the Commission that they are prepared in conformity with instructions heretofore issued by the Commission and in conformity with the court's action. In view of this explanation, the Commission approved all of the instruments as presented. (The instruments referred to consisted of two bargain and sale deeds, three permit agreements and one easement agreement, which were signed by the Commission on the following day.)

The Engineer brought up for discussion a matter of acquiring right of way for a proposed improvement of the Columbia River Highway at its intersection with the planned roadway approach to the bridge that is now under construction across the Columbia River east of The Dalles. He exhibited a map showing the proposed highway improvement at this location and also showing property ownerships, and he pointed out the desirability of acquiring now four tracts of land that are needed as right of way in order to eliminate any possibility of these properties being commercialized before the highway improvement is undertaken. He recalled the offer of Wasco County to reconstruct the highway at this point at county expense, if the State will furnish the right of way, so as to facilitate construction of the bridge approach road. The Right of Way Engineer advised that the four tracts mentioned by the Engineer are owned, one, by Mr. Gustave E. Bansch, two by Mr. F. Leo Burk, and one by Seufert Bros. He estimated that it would cost about $24,000 to acquire the three tracts belonging to Messrs. Burk and Bansch, but he made no estimate of the cost to acquire the tract owned by Seufert Bros., although he said that they probably will ask an exorbitant amount. The Commission discussed the matter at considerable length but deferred its decision until the following day when a delegation from Wasco County is to be present to confer with the Commission on the subject. (See ahead for additional paragraphs covering the conference and the Commission's decision whereby the Right of Way Engineer is authorized to negotiate options for the three parcels to be acquired from Messrs. Bansch and Burk and to condemn the properties in the event he cannot reach satisfactory settlements otherwise.)

The Engineer reported that the State Highway shop and storage site property on East State Street, Salem, Oregon is becoming congested with buildings and parking areas, leaving very little room for expansion. He requested authority to negotiate with the State Forestry Department for the acquisition of property owned by that department immediately south of and adjoining the Highway premises. The tract, he said, is made up of three parcels, one of which, containing about five acres, has been leased to the U. S. Army until June 30, 1962, but on which there are no developments. The second parcel on the east side of the tract, fronting on the airport-county road, is also under lease to the Army, and an Armory has been constructed thereon, but the third tract, which lies between the other two and contains 5.98 acres, is clear and is now available for acquisition by the Highway Department. This latter tract, he said, has been appraised by the Right of Way Department at $3,000.00. He requested authority to negotiate purchase of the same, and to purchase the other two tracts if and when they become available. The Commission approved the recommendation unanimously.

Assistant Counsel, Mr. C. W. Enfield, reported the status of the Commission's condemnation action against Mr. T. E. Davis involving acquisition of right of way that is needed for an improvement of the Umpqua

Highway across Mr. Davis' land near Scottsburg, Douglas County. The defendant, he said, owns considerable property at this location, some of which is well developed, including a motor court, and the State at this time is taking only that part of his property which it needs for the present improvement, but Mr. Davis wants the State to purchase at this time all of the land it will eventually need from him when the highway improvement is extended to the Umpqua River Bridge at Scottsburg, which will amount to a considerable sum because of the improvements. Assistant Counsel further stated that the State's original offer to Mr. Davis for land needed for the present highway improvement was $3,500, which he refused because he wants the State to purchase the right of way clear across his holdings. Mr. Davis, he said, is asking an additional sum of $6,500 plus $15,000 for buildings located on the property, although he agrees to buy back the buildings from the State for $1,500, if the State wants to sell them. In the discussion of this matter, it was brought out that the present highway from the end of the improved section to the bridge at Scottsburg is now in good condition and will not need improvement for many years, so there does not appear to be any justification for the expense of acquiring additional right of way from Mr. Davis now that will not be needed for a long time in the future. In view thereof, the Commission decided unanimously to limit its purchase from Mr. Davis to the land that is immediately required.

Assistant Counsel, Mr. Enfield, requested instructions as to the action, if any, that should be taken to collect the sum of $7.20 from a Mr. Kenney, Tillamook, Oregon, and $14.40 from a Mr. Collins, Brownsville, Oregon, for traffic signs that were furnished them by the Highway Department. He said that these two men are engaged in log hauling and some time ago ordered the signs which were delivered, but which they now refuse to pay for. The Commission decided not to take court action against these two men because of the expense involved, but confirmed the order previously made that no more signs shall be furnished anyone unless they are paid for in advance.

The Commission had under discussion the matter of compensating Professor Leslie Clayton, Oregon State College, in the amount of $397.52 for special services rendered by him in connection with the claim of Karel Tomasek against the State in the amount of $35,000 resulting from construction of a bridge over the Santiam River on the Pacific Highway near Jefferson, Oregon. The Assistant Counsel stated it is the recommendation of the Chief Counsel that the bill be paid. The Commission unanimously approved the recommendation.

Assistant Counsel, Mr. Enfield, rendered a brief status report on the tax problem involving the interstate bridge between Rainier, Oregon and Longview, Washington. He said that presently the settlement of this

controversy contemplates payment by the State of Washington to Columbia County the sum of $70,000; contribution by legislative act out of the General Fund of the State of Oregon the sum of $33,000; and a contribution by the State Highway Commission to apply on county road construction in the amount of $15,000. He also said that there is now pending in the legislature a bill for exemption from taxation bridges and their approaches constructed over bodies of water which form interstate boundaries, which will dispose of future tax matters;and, according to the Chief Counsel, all that remains for the Highway Commission to do is to authorize the expenditure of $15,000 for the improvement of the county road. The Commission took no action on the matter, deferring the same until the following day, when a delegation is scheduled to be present with regard thereto. (See ahead for additional paragraph).

The Commission discussed a request from Public Utility District No 2, Pacific County, Washington for concurrence in an easement granted to the District by Pacific County, Washington, covering erection, operation and maintenance of an electric power line over and across a portion of the property which the Commission heretofore leased from Pacific County, Washington, for a ferry terminal at Megler, Washington. The Engineer advised that this matter has been investigated and it has been determined that only one pole will involve property that the Commission has under lease, and that this single pole will not interfere in any manner with the operation of the property as a ferry terminal. He recommended concurrence in the easement. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a claim submitted by Mr. and Mrs. Scott Haddix for injuries received by their five-year old daughter, consisting principally of a broken leg, which resulted when she tripped over a survey reference stake, placed on their property by State Highway employees in connection with the construction of the Cedar Point-Coquille Section of the Oregon Coast Highway. The Engineer stated that the stake was placed on the property as a means of preserving the location of a curve point on the center line of the highway, and were it not for such reference points it would be very difficult to reestablish a curve point. He said that never before has any trouble arisen from these stakes but, in this particular instance, it appears that the State is liable for damages and he suggested that a settlement be negotiated with the parents As a result of the discussion, the Commission approved the recommendation and referred the matter to the Chief Counsel to handle details, it being understood that negotiations shall be based on payment of medical bills and doctor services only

The Commission discussed a written report from the Engineer dated March 23, 1951, on the results of an engineering and economic analysis of the Corvallis Section of the Pacific Highway West (U. S. 99W), particularly covering the suggestion of the City of Corvallis that this highway be routed permanently along First Street. In support of his written report, the Engineer stated that the First Street location would be the ideal route for the highway were it not for the Corvallis Lumber Company's mill at the south end of this street. He exhibited a map showing the First Street route and also showing proposed connections to Third Street and Fourth Street. He stated that he concurrs with the city's contention that First Street is the logical route for the highway were it not for the mill problem and he suggested, pending closing down of the mill, that the highway be temporarily routed on connections with Third Street and Fourth Street, bypassing the mill property. He also stated that the city wants the Commission to purchase right of way along First Street routing northerly from the intersection of First and Tyler Streets to a connection with Third Street and Fourth Street extended, which right of way is estimated to cost $47,000. He estimated the cost to construct the Third Street and Fourth Street extensions at $615,000, including the cost of right of way, and he recommended approval of such project. He also recommended purchase of the right of way along the First Street route north from Tyler Street to a junction with Third and Fourth Streets. The matter was discussed by the Commission at considerable length but the decision was deferred pending discussion of the matter with a delegation from Corvallis which was scheduled to appear the following day. (For details of the Engineer's report, see copy of report in General Files.) (See ahead for additional paragraph).

Mr. Frank Balfour, Chief Right of Way Engineer of the State Highway Department of California, was present as an interested listener. He was introduced to the members of the Commission by Forrest Cooper, Right of Way Engineer.

The Commission discussed with the Engineer the bids received during the morning session for highway construction, and, in this connection, special consideration was given to the construction of the Hood River-Mosier Section of the Columbia River Highway involving construction of 6.96 miles of hydraulic-placed embankment. It was pointed out that a satisfactory bid was received for this work, but difficulties have been encountered in acquiring right of way from the city of Hood River, Hood River County, and the Apple Growers Association of Hood River. It appears that these organizations are unwilling to convey to the State right of way across their holdings unless the State Highway Commission will agree definitely to construct an approach to the city from Second Street, involving a crossing of the Union Pacific railroad tracks, as was requested by a delegation at the previous meeting. The Engineer stated that since the delegation

appeared before the Commission, he has personally inspected the proposed Second Street connnection and it has been determined that a traffic interchange structure can be built for about $300,000 and, if actually built, the cost to construct the other connections to the city very likely could be reduced by about $50,000. In other words, providing the Second Street connection would involve an extra expenditure of about $250,000 for this project. He gave as his feeling that the connection is necessary in order to give proper service to the people of Hood River and to provide direct access to the docks in the Columbia River. He recommended approval of the project. This matter was given very careful consideration by the Commission and as a result thereof the Commission unanimously approved the recommendation. The Engineer was instructed to notify the city by telephone of the decision and to state further that it is the plan of the Highway Commission to construct the Second Street connection along with and at the same time as the other connections now planned at the east and west sides of the city are constructed. The Right of Way Engineer was instructed to proceed with negotiations for right of way options if the city's answer is favorable. (The Engineer reported later in the session that he had contacted the city officials by telephone as instructed, and was informed that the Commission's action meets their approval; also that the city will take necessary steps to deed to the State the right of way it needs if the Highway Commission will confirm its proposal in writing. The Commission instructed the Secretary to convey such information to the city by letter.)

The Commission discussed and by unanimous vote approved an agreement with the Union Pacific Railroad Company whereby the State is granted "right of entry" on railroad company property between Hood River and Mosier as is necessary in connection with the construction of the Hood River-Mosier project. The Commission's action was taken upon the recommendation of the Engineer and Counsel. (The agreement was signed on the following day.)

The Engineer reported that pursuant to instructions from the Commission, he has made further studies of State Highway routing through the city of Forest Grove with the view in mind to eliminate traffic congestion in the business district which has reached an acute stage, without utilizing residential streets He recalled that congestion is caused largely by logging trucks which pass through the business district and in doing so are required to make several right angle turns, resulting in congestion and numerous accidents. He also recalled his original plan to relieve the situation by designation of a one-way street system including construction of some additional street connections, at an estimated cost of $75,000. Certain people of Forest Grove, he said, objected strenuously to this plan so additional studies were made and a plan devised that meets with the approval of all concerned. According to the new plan, he said, Wilson River Highway traffic will be routed along Pacific Avenue as in the past, to a point about one block west of the west city limits, at which point it will be routed north to a connection with the present route on the Gales

Creek Road at the northwesterly city limits. Southbound traffic, he said, will turn off Pacific Avenue at "B" Street and will connect with the present route at Sixteenth Avenue near the southwesterly city limits. He pointed out that such routing will provide for the elimination of State maintenance of a number of streets over which state highway traffic is presently routed, and to a large extent will remove log hauling traffic from the business section. He estimated the cost of such improvement at $172,300, including right of way expense, a portion of which ($7,000) the city has agreed to pay. He recommended approval of the revised project and requested that authority be given to proceed with necessary detailed surveys, acquisition of necessary right of way, and the entering into of an agreement with the city of Forest Grove. He assured the Commission that there are funds available to finance the State's share of the improvement. The Commission approved the recommendation unanimously and ordered the matter covered by appropriate agreement between the city and the state, which agreement shall provide that the city shall assume and be responsible for future maintenance of the city streets over which highway traffic has been routed in the past, but which will be abandoned as state highway routes when the improvement is completed. (For further details, see copy of Engineer's written report to the Highway Commission dated March 15, 1951 in General Files.)

The Commission discussed briefly and ordered filed for future consideration a written report from the Engineer, dated March 23, 1951, on reconnaissance studies for the reconstruction of The Old Oregon Trail between Pendleton and La Grande, including the by-passing of both of these cities in conformity with interstate highway standards.

The Engineer reported receipt of a communication from Rogers Construction Company, contractors, for the construction of the Troutdale-Dodson Section of the Columbia River Highway, Contract No. 3082, in which claim is made for extra compensation in the amount of $32,330.95 for work performed in connection with this job. He said that arrangements have been made for discussion of this matter with the contractor on Tuesday, April 17, 1951, and that he will report the results of that conference to the Commission at its next meeting. He added, however, that the claim has been given careful study and from the evidence at hand is without foundation, and that it will be his recommendation that the claim be denied. The Commission took no action.

The Engineer asked the Commission to confirm the oral authority previously given him to purchase new office furniture for administrative personnel who will meet the public when the Highway Department moves into its new building. He presented a list of the furniture required, the cost of which he estimated at $34,071, and he advised that it had been decided, after consulting with specialists from some of the furniture stores

in Salem, that the type of furniture should be wooden. and the color should be regular walnut to best harmonize with the interior decorations. The Commission confirmed the purchase of the furniture unanimously and authorized the Engineer to submit requisitions to the Board of Control for the purchase of the same.

The Commission discussed its proposed agreement with the Secretary of State covering maintenance, upkeep, etc. of the new Highway Office Building and grounds in Salem, when the building is completed. There was presented for the Commission's approval a form of agreement covering the matter as prepared by the Chief Counsel. As a result of careful study of its provisions the Commission approved the form of agreement unanimously and ordered it presented to the Secretary of State for his approval and execution. The Commission deferred signing the agreement until the Secretary of State has had an opportunity to express his feeling to the provisions thereof.

At 4:00 p.m., Chairman Chandler announced the Commission'd decision with respect to the bids received at the morning session for highway construction projects as follows, the Commission's decision in each instance being by unanimous vote.

"Alder Creek-Philomath Section of the Alsea Highway, Benton County, 10.7 miles of paving and resurfacing. The low bidder for this work was Warren Northwest, Inc., Portland, at $173,030. There were six higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Warren Northwest, Inc., at its bid price when certain conditions have been satisfied.

"Grading and paving the Philomath ("F" Street-"H" Street) Section of the Corvallis-Newport Highway in the City of Philomath, Benton County. The low bid for this work was also submitted by Warren Northwest, Inc., at $15,914. There were five higher bids. The Commission has awarded the contract to the low bidder, Warren Northwest, at its bid price.

"Bunker Hill-Delmar Section of the Oregon Coast Highway, Coos County, 6.5 miles of grading and paving, including construction of two bridges. The low bidder for this work was Porter W. Yett, Portland, at $1,286,424. There were three higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Porter W. Yett, at his bid price when certain conditions have been satisfied.

"Painting "McCullough" Bridge over Coos Bay, North Bend, Coos County. The Commission received four bids for this work, the low one being that of Larson Bros., Tacoma, Washington, at $54,000. The Commission has accepted this bid and has awarded the contract to Larson Bros. at their bid price.

"Construction of a reinforced concrete bridge over Deschutes River on the McKenzie-Bend Highway near Tumalo, in Deschutes County. VaDare Construction Co., Portland, submitted the low bid of nine submitted for this work, being in the amount of $34,099.50. The Commission has awarded the contract to this bidder at its bid price.

"Construction of 6.96 miles of hydraulic-placed embankment on the Hood River-Mosier Section of the Columbia River Highway in Hood River and Wasco Counties. General Construction Co., Portland was the low bidder of three for this work at $1,074,350. The Commission has referred the bid to the Engineer with authority to award the contract to the General Construction Co. at its bid price when certain conditions have been satisfied.

"Construction of the "Dodge" Bridge Section of the Sams Valley State Secondary Highway in Jackson County, including 400-foot concrete and steel bridge and surfacing of 0.80 mile of highway road bed. The low bid for this work was submitted by Tom Lillebo, Reedsport, at $195,736. There were two higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder at his bid price when certain conditions have been satisfied.

"Grading and surfacing the Siletz-Logsden Section of the Siletz-Logsden County Road, Lincoln County. The low bidder for this work was Floyd Grahm Construction Co., Lebanon, at $77,233. There were four higher bids. The contract has been awarded to the low bidder, Floyd Grahm Construction Co., at its bid price.

"Construction of a masonry storage shed, 36' x 129' in dimension, on the premises of the Highway Department shops in Salem, Marion County. Mills Construction Co., Salem, submitted the low bid for this work at $10,977. There were four higher bids. The contract has been awarded to Mills Construction Co. at its bid price.

"Furnish and install semi-actuated traffic signals at two intersections on US30 and at one intersection on US99E near Portland, in Multnomah and Yamhill Counties. City Electric Co., Inc., Salem, submitted the low bid for this work at $12,626.19. There were three higher bids. The contract has been awarded to City Electric Co., Inc., at its bid price.

"Grade widening and paving the Parkrose (99th Avenue-122d Avenue) Section of the Columbia River Highway, Multnomah County. The Commission received three bids for this work, the low one being that of Warren Northwest Inc., Portland, at $67,873.50. The Commission has accepted this offer and has awarded the contract to Warren Northwest, Inc. at such figure.

"Hebo Rock Production Project on the Oregon Coast and Three Rivers Highways near Hebo, in Tillamook County, requiring the furnishing of approximately 10,000 cubic yards of crushed rock or gravel in stockpiles. A. H. Saxton and Sons, Seaside, submitted the only bid for this work at $32,600. The bid is acceptable and the contract has been awarded to this bidder at its bid price.

" 27.07 miles of re-oiling work on the Boardman Junction-Echo and Echo Junction-Rieth Sections of the Hermiston and Stanfield-Pendleton State Secondary Highways, in Umatilla County. The Commission has awarded this contract to Babler Bros., Portland, at $42,407, this bid being the low of six that the Commission received for this work.

"Construction of a masonry block extension to an existing maintenance building on Highway Department property at Meacham in Umatilla County. The low bid for this work was submitted by Bechtel Bros., Elgin, at $5,418. There were two higher bids. The contract has been awarded to the low bidder, Bechtel Bros. at their bid price.

"Construction of a masonry block maintenance building on State Highway property at Flora, Wallowa County. Bechtel Bros., Elgin, also submitted the low bid for this work at $9,992. There were two higher bids. The Commission has awarded the contract to Bechtel Bros. at their bid price.

"7.63 miles of re-oiling on the Wallowa-Lostine Section of the Wallowa Lake Highway, in Wallowa County. Babler Bros., Portland, submitted the low bid for this work at $9,786. There were four higher bids. The Commission has awarded the contract to Babler Bros. at their bid price.

"Division No. 1, District A, re-oiling project on the Sunset and Hillsboro-Silverton Highways near Manning, North Plains, Hillsboro, and Newberg, in Washington and Yamhill Counties. The low bid for this work was made by Harr & Horton, Portland, at $28,718.10. There were 5 higher bids. The contract has been awarded to the low bidder, Harr & Horton, at their bid price."

The Commission had under discussion the proposed lease to the U. S. Bureau of Public Roads of office space in the new Highway Building in Salem. As a result of discussion, the Commission decided unanimously to rent space to the Bureau of Public Roads as long as it wants it, at the same rate that the State Highway Department is required to pay the Secretary of State for maintaining the building and grounds plus ten cents per square foot per month for amortization purposes,or a total of fifteen cents per month for each square foot of space used. Mr. W. H. Lynch, Division Engineer, and Mr. C. G. Polk, District Engineer, of the Bureau of Public Roads, who were present, expressed approval of such arrangement.

The Commission discussed briefly the question of revising its recommendations to the Public Utilities Commissioner with respect to the truck-hauling of logs over State Highways, but deferred action on the matter until later.

The Commission had under discussion a request from the Siuslaw Soil Conservation District, Florence, Oregon, that the Highway Department act as a co-sponsor along with the district, the Soil Conservation Service of the U. S. Department of Agriculture and the U. S. Forest Service in an effort to prevail upon the Congress to appropriate funds as are necessary to finance the control and stabilization of coastal sand dunes lying between the ocean and the Oregon Coast Highway in the vicinity of Florence, particularly within the area bounded on the north by Siltcoos Lake and on the south by the outlet of Tahkenitch Lake, consisting of approximately 4,800 acres. The Engineer advised that this matter has been investigated by Mr. W. W. Stiffler, Asst. Engineer, who reports that the coastal dunes are subject to shift and at three or four locations within the limits of the proposed project have reached a stage approximating an emergency, which will require attention, perhaps within the next year, to prevent encroachment upon the highway. The stabilization of these dunes and the reclamation of the forest land affected, he said, can be accomplished in about fifteen years through scientific planting, developed by the Soil Conservation Service, at an estimated total cost of approximately $1,270,000, all of which will be paid by Federal funds if the project is approved by the Congress. He recommended that the Commission join with the other agencies as co-sponsors of the project in order to provide for the elimination of the potential hazards of the shifting sand, not only to protect the highway but also to protect Jessie M. Honeyman Park and the Siltcoos and Tahkenitch Lakes, which are two of Oregon's largest coastal lakes. Chairman Chandler expressed himself heartily in favor of the project as outlined by the Engineer and suggested approval of the recommendation. Commissioners Reynolds and McIver concurred, making the decision unanimous.

The Engineer reported on the request of the Tillamook County Court, presented at the January meeting of the Commission, for the construction of two bridges on the county's market road system. He recalled that the Commission referred the matter to him to investigate a proposed exchange of roads in the Federal Aid Secondary Highway System of Tillamook County, which investigation has been made and the following facts ascertained:

1. That the County desires utilization of Federal Aid funds in the construction of two bridges, one of which is a bridge over the Trask River on a county road that has been designated a Federal Aid Secondary Highway; the other being across what is known as Dougherty Slough on a section of county road that is not on the Federal Aid Secondary System. To replace the Trask River Bridge, he said, will cost about $100,000 and to rebuild the other bridge will cost about $50,000. In addition, it will be necessary to place this county road on the Federal Aid Secondary System and will eventually necessitate construction of an undercrossing structure under the Southern Pacific Railroad Company's tracks, which would probably cost another $100,000. He advised that the County Court wants the county road, 3.25 miles in length including the bridge, designated a Federal Aid Secondary Highway as a substitute for a 2.65-mile section of another county road that is now on this system. He suggested, if the County Court will agree, designation as a Federal Aid Secondary Highway of a 1.47-mile section of the road on which the Dougherty Slough bridge is located, such section to include the Dougherty Slough bridge, and elimination from the Federal Aid Secondary Highway System of a 2.65-mile section of the road that is now on the Federal Aid Secondary System, which would leave to the county the responsibility to provide for the railroad underpass. He exhibited a map on which was shown in color the proposed plan, and advised that the cost to the State over a period of time will not be any more than were the change not made. The Commission discussed the matter carefully and as a result thereof unanimously approved the recommendation, upon motion of Commissioner Reynolds and seconded by Commissioner McIver. The Commission ordered the matter covered by appropriate resolution. (For further details, see copy of Engineer's report in General Files, dated April 2, 1951.)

The Commission discussed a written report from the Engineer dated April 5, 1951 on the request of the Cascade Highway Association for designation as a State Secondary Highway of the county road which extends from Scio, Linn County, to Stayton, Marion County. The report covered a reconnaissance survey heretofore conducted by the Engineer pursuant to instructions from the Commission It appears that the road is 7.08 miles in length and follows generally an existing road, although a portion of it, 2.46 miles in length, must be reconstructed in order to obtain adequate alignment and grades, the present road containing some eight right angle turns, and grades, in some cases as high as 12%. The Engineer estimated the cost to reconstruct the existing high-

way to modern standards at $350,000 and the cost to construct a new bridge over the North Santiam River, which would be necessary, at approximately $700,000, a total expenditure of $1,050,000 for the complete modernization of the road. Due to the fact that the estimated cost of the project is greatly in excess of that anticipated by the Commission and because of the lack of available funds to finance the work particularly the bridge structure, the Commission decided unanimously against the improvement and ordered that the sponsors of the project be so informed.

The Engineer reported on a request from Mr. J. O. Chastain, Tygh Valley, Oregon for repairs to his irrigation flume which is located adjacent to The Dalles-California Highway approximately one-half mile south of Tygh Valley. Mr. Chastain asks either the rebuilding of the flume or a cash settlement with the owners so they can rebuild it themselves. The Engineer recalled that this matter is quite long standing and he recited the history of the case, which dates back to 1924, when the Tygh Valley Section of The Dalles-California Highway was constructed. At that time, he said it was necessary to rebuild a portion of the ditch because of highway interference. That was done and nothing further was performed until 1943 when the Highway Commission agreed to pay one-third of the cost to repair the flume on the condition that it would complete the State's obligation; the balance to be paid one-half by the owners of the ditch and one-half by Wasco County. It was mutually agreed he said, that the County Court would contact the owners of the ditch to ascertain whether or not the arrangement was satisfactory, but apparently nothing was done until the subject was revived at a meeting of the Commission on February 17, 1944 when, as a result of discussion, the Commission authorized an expenditure of $200 to repair the flume, subject to the condition that the State would assume no further obligation whatsoever with respect to it. Subsequently, he said, Mr. Chastain made further complaint and he was tendered another offer as settlement in full, which he refused. The Engineer gave as his opinion that the State has entirely fulfilled any obligation which it might have incurred in connection with this matter and he recommended that Mr. Chastain's request for further work in the nature of maintenance or reconstruction be denied. The Commission approved the recommendation unanimously.

Pursuant to instructions of the Commission at the previous meeting, the Engineer presented a revised plan for the landscaping of a small parcel of state-owned land situate adjacent to the Secretary of State's field office building in Oregon City. He recalled that the estimated cost of the original plan was $1,800 which the Commission disapproved and ordered a less expensive type of improvement. He presented a revised plan which he estimated would cost about $600 and explained details. The Commission unanimously approved the project as revised and an expenditure of $600 to finance the work.

The Commission discussed a written report from the Engineer, dated April 2, 1951 on the request of the Clackamas County Court for the designation as a Federal Aid Secondary Highway, of a section of county road 3.56 miles in length, which extends between Barton and Boring and is known as the Aemisigger Hill Road. In his report, the Engineer advises that the County Court was contacted with respect to a substitution of roads in the Federal Aid Secondary Highway System but the Court stated its unwillingness to approve the removal of any road from that system, so if the road is to be improved by the State, it would have to be on the basis of adding it to the system with no eliminations. According to the report, the present road, which has an oiled surface, is eight feet wide and is in "fair to good" condition, but was not constructed to a sufficient standard to withstand log-hauling traffic to which it is subjected, which is the reason that the Court posted it for reduced weight loads. The Engineer estimated the cost to rebuild the road to a satisfactory standard at about $95,000. He pointed out that the road crosses a stream known as Deep Creek and that the bridge will need replacing at some future date. He estimated the cost of such replacement structure at about $40,000. He recommended that the County's request for the placement of this road on the Federal Aid Secondary System be denied and that the $150,000 of Federal Aid Secondary funds heretofore allocated by the Commission for the replacement of two bridges on the present system in Clackamas County be applied for the purpose originally intended. The Commission approved the recommendation unanimously.

The Commission discussed briefly and ordered filed a tabulation presented by the Engineer revealing the identity and the location of all buildings owned by the State Highway Department, which are under the jurisdiction of Maintenance and Parks Departments. In the discussion, it was pointed out that the report is a condensed summary of a more complete inventory prepared by Mr. C. W. Parker, Property Manager, and reflects considerable detail work on his part. The Commission instructed the Secretary to thank Mr. Parker for an assignment well done, and to inform him also that the Commission appreciates his efforts in securing a reduction in the premium cost of insurance covering the buildings.

The Secretary presented a letter from Mr. J. S. Middleton, Attorney, Portland, urging early completion of the proposed highway leading into Portland via Wilsonville from the junction with the Pacific Highway (US99E) just south of Aurora to a connection with Barbour Boulevard. Mr. Middleton compliments the Commission on the improvement of the present highway between New Era and Portland but he urges the other project nevertheless, because of its natural advantages. The Commission took no action on the matter except to indicate that the project would be given consideration in the event that the State Legislature, which now is in session, authorizes the Commission to sell bonds for highway construction.

The Engineer reported the desirability of making some slight revisions in the project now being constructed between Cherry Street and the Steel Bridge as a part of the Harbor Drive development in Portland, inasmuch as the Commission has included in the over-all plan for this project a connection between Sullivan Gulch and the Steel Bridge. He explained that under the existing plan it will be necessary for truck traffic south bound from Interstate Avenue, to cross Broadway at grade elevation at the east end of the Broadway Bridge, which is undesirable because the intersection is a very congested one, whereas by an expenditure of approximately $9,000, the plans can be changed so that traffic destined for points on the east side of the river south of the Steel Bridge would continue on Harbor Drive and pass beneath the Broadway Bridge and then east across Harbor Drive by means of the Hassalo Street undercrossing. He exhibited a map showing the proposed plan in detail and recommended approval of the revision, and of the additional $9,000 expenditure. As a result of careful consideration of this matter, the Commission approved the recommendation unanimously.

The Engineer also requested authority for an expenditure of $5,500 of minor betterment funds for some slight revisions in the channelizing of traffic at Ross Island Bridge, Portland. He explained that since the opening to traffic of the Sheridan Street-Bancroft Street Section of Harbor Drive, including the ramps leading to the Bridge, conditions have arisen which indicate the desirability of making certain revisions in the interests of traffic safety and to facilitate traffic movements, particularly at three points, as follows:

1. On the ramp leading to Ross Island Bridge for south bound traffic on Harbor Drive and from the south bound Arthur Street ramp. The conditions at this point, he said, are such that traffic attempting to merge into opposite lanes in order to get in proper position either to turn right toward Oswego or to travel directly across Ross Island Bridge, must perform such merging action by sharp curvature leading into and through the underpass. This condition, he said, can be corrected by channelization so as to permit the merging of traffic on the straight-of-way before reaching the curve leading to the underpass, the cost of which would be about $3,000.

2. At the intersection of Harbor Drive and Barbour Boulevard. At this point, he said, traffic merging south bound from Harbor Drive and Barbour Boulevard has considerable difficulty, which is complicated by a left turn movement onto a side street at the approximate point of convergence. He recommended construction of a traffic island to correct this situation at an estimated cost of $2,200.

3. The third case, he said, involves north bound traffic on Harbor Drive, which turns eastward on the ramp to the Ross Island Bridge and approaches the bridge end in two lanes. He recommended channelization so as to merge this traffic into one line before entering the bridge approach, which he estimated would cost about $300. He exhibited maps showing the plan he has in mind at each location and advised that the plans have the approval of both the Traffic Engineer of the State Highway Department and the Traffic Engineer of the City of Portland.

He asked the Commission to approve the revised plans in order to facilitate traffic movements and as a traffic safeguard, and to authorize necessary expenditure which he estimated would cost a total of $5,500. The Commission unanimously approved the project.

The Commission discussed briefly the four-party agreement among the State of Oregon, the State of Washington, Umatilla County, Oregon and Benton County, Washington with respect to the financing of advanced engineering in connection with a proposed bridge over the Columbia River between Umatilla County, Oregon, and Benton County, Washington. It was explained to the Commission that investigations now are under way and that Umatilla County, which is the principal sponsor of the project, has requested informally that the State Highway Commission remit the $8,000 that it has offered to contribute toward the cost of the work. The Commission decided unanimously to adhere strictly to the provisions of the agreement in that respect.

A letter was presented from George W. Kaseberg, The Dalles, alleging that the Highway Commission in the fall of 1949 promised to surface and oil the Cottonwood Canyon Section of the Wasco-Heppner State Secondary Highway and urging that the work be done this spring. The Engineer advised that the records have been checked and nothing contained therein indicates that the Commission ever made such a promise, although the Commission did, on December 19, 1950, award a contract for grading and surfacing of the ten-mile section of this highway between Cottonwood Canyon and York Ranch, under contract authorization of $83,888. He also mentioned additional improvements that have been performed on this highway since 1947. The Commission deferred action in the matter pending discussion of the subject with members of a delegation on the following day. (See ahead for additional paragraph.)

The Engineer requested authority to advertise for bids for construction of two 14' storage bays as an addition to the equipment storage building at Santiam Junction. He estimated the total cost of the project at $11,000 and advised that provision was made for the expenditure in the 1951 budget for Capital Improvements. The Commission approved the request.

The Commission discussed and approved two agreements with Marion County and the Southern Pacific Company providing for encroachment of the Salem-Silverton County Road (FAS Highway 214) upon Southern Pacific Company right of way. One of the agreements contains provisions in conformity with Order No. 25485 issued by the Public Utilities Commissioner and the other is an agreement whereby the railroad company makes demand upon the State's contractor for certain public liability and property damage insurance. (Both agreements were signed by the Commission on the following day.)

The Commission had under discussion the following requests for traffic signal installations.

1. Request of the City of Sublimity for installation of a flashing beacon on the North Santiam Highway at its intersection with Center Street in Sublimity. The Engineer advised that the conditions at this intersection have been investigated by the Traffic Engineer, who reports that they do not warrant the installation of a signal, but as a corrective measure, a "PREPARE TO STOP" sign should be placed at the northerly approach to this intersection and the existing "STOP" sign at that point should be moved nearer to the intersection, which will be done. He recommended that the request be denied. The Commission approved the recommendation.

2. Request of the City of Empire for installation of a traffic signal at the intersection of Newark Avenue (Cape Arago Secondary Highway) and Commercial Street in Empire. The Engineer advised that this is a second request for a signal at this intersection, the first, presented on February 6, 1950, having been denied because the conditions existing at that time did not warrant the expense. A resurvey made recently, he said, reveals that the conditions have not changed. In view thereof, he recommended that the request be denied. The Commission approved the recommendation.

3. Request of the City of Albany for installation of a traffic control signal at the intersection of Elm Street and Queen Avenue (Corvallis-East Side Secondary Highway). The Engineer advised that this intersection has been investigated by the Traffic Engineer, who reports that existing conditions do not warrant the installation of a signal at this point, but who suggests in lieu thereof that the City Council adopt necessary ordinances to prohibit the parking of vehicles on both sides of Queen Avenue for a distance of 30' west of the property line of Elm Street, and to provide a more strict enforcement of the 25-mile-per-hour speed limit that has been established along this section. The Engineer recommended action by the Commission in conformity with the suggestion. The Commission decided unanimously not to install the signal and so ordered.

A resolution was presented from Vale Grange No. 696, Vale, Oregon, urging the State Highway Commission to investigate and to cooperate with the Union Pacific Railroad Co. in signalizing a railroad grade crossing on Graham Boulevard in the western part of the City of Vale. The Engineer advised that the railroad crossing referred to is a Union Pacific crossing of the Vale-West State Secondary Highway; that no accidents have been reported at this crossing during the period of January 1, 1946 to December 31, 1950, and that the average daily traffic at this location in 1949 was only 800 vehicles. He pointed out that the protection now offered to the public at this crossing consists of one cross buck sign and two standard advance warning signs, and he also said that this crossing is No. 125 in the list of 165 unsignalized railroad crossings on the State Highway System. He recommended that the request be denied insofar as the State Highway Department is concerned. The Commission approved the recommendation.

The Commission discussed a communication from Mr. Guy W. Talbott, Portland, requesting illumination of Riverside Drive (Oswego Highway) at its intersection with Riverwood Road, South Portland, to alleviate the hazardous traffic condition which he alleges exists at this point, particularly at night time. The Engineer advised that the intersection referred to is a three-way intersection south of the Sellwood Bridge where there is considerable sight restriction by reason of highway curvature and a cut bank. The traffic volume on this section of highway, he said, is approximately 10,000 vehicles daily, and a number of accidents have occurred, 75% of which occurred during hours of darkness. He recommended installation of one overhead mercury vapor luminaire unit at this point, which, he said would cost about $225. The Commission approved the recommendation.

The Commission discussed a communication from the Community Improvement League of Milwaukie, Oregon in which request is made for the alleviation of two allegedly hazardous intersections on McLoughlin Boulevard (US99E), one of which is at Park Avenue and the other at Naef Road. The Engineer advised that both of these intersections have been the subject of investigation by the Traffic Engineer, who reports that there is sufficient justification for the illumination of the Park Avenue intersection, but not at the other. He explained details and recommended installation of two modern type mercury luminaire units at the Park Avenue intersection, which he estimated will cost $800, and that the request for the light at Naef Avenue be denied. The Commission approved the recommendation.

In this connection, the Engineer requested authority to replace fifteen existing sodium vapor light units on this highway between Milwaukie and Oregon City, with modern type mercury luminaire units. He explained that the sodium vapor lights, which have been in use since 1934, do not provide very good illumination, although they were the best that could be provided at

that time; moreover, they diffuse a yellow light, which is confusing with the amber portion of the "STOP" and "GO" traffic signals that are installed in the immediate vicinity. He estimated the cost of replacement at $2,000, and recommended approval of the project. The Commission approved the recommendation unanimously.

The Commission discussed a letter from Leonard Givens, Chief of Police of the City of Oswego, forwarded by the Hon. Jack Bain, State Senator, requesting that the City of Oswego be relieved from the payment of its share of the cost of installing a traffic signal at the intersection of "A" Avenue and State Street in Oswego, amounting to the sum of $2,250. The Engineer recalled that the city requested two signals, one of which the Commission authorized on the condition that the city would pay 50% of the cost of the installation, which was estimated at $4,500, such arrangement being in conformity with the Commission's long established policy. Were the City of Oswego relieved of paying its share of the cost of installing the signal, he said, it would be necessary to relieve other cities from payment of similar expense, which eventually would run into a large sum of money. In this connection, a letter was presented from Jesse L. Preston City Recorder of the City of Oswego, advising that the city has no funds with which to pay its share of the cost of this installation. The Commission decided unanimously to adhere to its standard policy and ordered that the city be informed that the signal would be installed when the city is financially able to pay its proportionate share of the cost.

A letter was presented from the City Recorder of the City of McMinnville requesting on behalf of the City Council that the Highway Commission authorize a traffic survey to determine the advisability of creating a one-way traffic system on Baker Street and on Adams Street through this city. The Engineer advised that Baker Street is the present route of Pacific Highway West (US99W). He recommended a reconnaissance study, which would cost about $500, to determine the cost and advisability of creating the one-way traffic plan. The Commission approved the recommendation.

The Commission discussed a request from the City of LaGrande for a survey to determine a permanent location or relocation of the Old Oregon Trail (US30) through the City of LaGrande, and a traffic survey to determine the advisability and cost of installing traffic lights along Adams Avenue. The city advises in its letter that it has funds available to pay 50% of the cost of installing the signals. The Engineer recommended approval of both requests, which, he said, can be undertaken simultaneously and will cost about $6,000. The Commission approved the recommendation.

The Engineer reported receipt of a communication from the City of Baker requesting a traffic survey to determine the probable future development of state highways through this city. He said that in order to obtain additional data on which to arrive at a sound solution of the city's problem, it would be necessary to make an origin-destination traffic survey similar to investigations that are now being made in Klamath Falls and The Dalles, which will cost about $6,000. He recommended that authority be given him to make such a study. The Commission approved the recommendation unanimously.

A letter was presented from Mr. Vern H. Russell, Roadmaster, Wallowa County, requesting improvement of the Wallowa Lake Highway in the vicinity of its crossing of the Wallowa River, about one mile northwest of the town of Lostine. Mr. Russell included in his letter a communication from Father Kennedy of St. Mary's Rectory, Enterprise, Oregon, in which Father Kennedy gives an account of an accident that he experienced at this location, and asks that something be done to correct the condition of the highway at this point. The Engineer advised that conditions at the location referred to are hazardous in that the bridge is only 16'9" wide between felloe guards and is located between two reverse curves. He pointed out that there are many such structures on the highway system, which are being eliminated as rapidly as possible, and he gave as his opinion that, in this particular instance, the Commission should consider the early replacement of the bridge. He recommended, therefore, that the Commission authorize him to make a survey to determine a permanent location of the highway at this point. After due consideration, the Commission approved the Engineer's recommendation unanimously.

A letter was presented from Mr. J. L. Getchell, Chairman of the Cloverdale Farm Bureau Center, Creswell, Oregon, requesting the early improvement of the Springfield-Creswell Secondary State Highway from its junction with the Willamette Highway, southerly, to the Coast Fork Willamette River Bridge, about one mile east of Creswell. The Commission denied the request because of lack of funds with which to finance the work.

A communication was presented from the County Court of Union County requesting that Federal Aid Secondary Highway No. 479 be extended to include the "Foothills" Section of the Alicel-Cove Market Road, and that the road be improved because of its importance as a mail, school bus and milk route. The Commission referred the matter to the Engineer for investigation and report.

A letter was presented from the Hon. H. S. Morlan, Mayor of the City of Monmouth, requesting the widening of East Main Street, route of the Monmouth-Independence State Secondary Highway, from East Street to the easterly city limits of Monmouth. The Engineer advised that this matter has

been investigated and it has been found that a considerable hazard does exist on this street due to insufficient room to park vehicles without impairing the traveled way. The street, he said, is only 30' wide between curbs and the pavement width is only 20', which leaves only a 5' shoulder on each side for parking purposes. He also said that the section is 1175' long and that the cost to increase the width to 40' between curbs with full pavement is estimated at $15,000. He recommended that the project be given consideration by the Commission in an early State construction program. The Commission approved the recommendation.

The Engineer requested authority to spend approximately $4,000 for riprapping along the newly constructed section of the Hilgard Junction-Red Bridge Section of the Starkey Secondary Highway as a protection against erosion during periods of excessive run-off in the Grande Ronde River, such as occurred during the high water period in February. He explained the project would require approximately 2,000 cubic yards of rock riprap and a small amount of channel clearing. He also said that the project is not included in the 1951 budget so will have to be financed with reserve funds set up in the budget for "Projects to be Selected." The Commission approved the expenditure unanimously.

The Engineer reported that the cities of Barlow, Delake and Wheeler have fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds that accrued to them during the second six-month period of 1950; also, that the cities of Sisters, Cave Junction, Chiloquin, Drain, Hines, Oakridge and Paisley have fulfilled the requirement with respect to the expenditure of State Tax Street Funds accrued to them during the first six-month period of 1950, and that the City of Drain has fulfilled the requirements with respect to the expenditure of State Tax Street Funds accrued to it during the second six-month period of 1949. He also said that plans for the improvements contemplated by each of these cities to be financed with the funds available, have been examined and found satisfactory and he recommended approval of the plans by the Commission. The Commission approved the recommendation unanimously by the adoption of the attached resolutions relative thereto marked EXHIBITS "D-1", "D-2", and "D-3", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Commission had under discussion the question whether or not to proceed with the proposed improvement of the Antelope-Clarno Section of the Shaniko-Fossil State Secondary Highway as originally contemplated when an amount of $250,000 was provided in the construction program as approved by the Commission on September 21, 1949. This matter was discussed at some length during which the records of the Commission were reviewed, and as a result thereof, the Commission determined that it is

definitely obligated to proceed with the proposed improvement. Accordingly, the Engineer was instructed to advertise the project for bids to be received at the next meeting of the Commission, if possible. The Right of Way Engineer was instructed to commence immediately with negotiations to acquire rights of way as may be needed. (See ahead for additional paragraph under Delegation.)

The Engineer reported that the survey for the ultimate location of the Columbia River Highway (new route) between Mosier and The Dalles in Wasco County, and the survey for the ultimate location of the Pacific Highway East (Salem Bypass route) from Hayesville School to East State Street, Salem, extended easterly, have been completed. He exhibited maps showing the proposed location of each of these highways and explained details. He asked the Commission to approve the surveys and to authorize the Right of Way Department to negotiate options for rights of way as may be necessary. After careful consideration, the Commission approved both surveys unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein. The Chief Counsel was authorized to proceed with negotiations for the right of way options along both sections.

In this connection, and in order to clarify any previous misunderstandings by the Right of Way Department, the Commission declared that when it approves and adopts a survey for the permanent location of any highway, such approval and adoption carries with it automatic authority for the Right of Way Department to proceed with negotiations to acquire land as may be needed for right of way purposes.

The meeting adjourned at 5:00 p.m. to reconvene the following morning in the same room.

Portland, Oregon
April 13, 1951

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel, the same persons present and participating. At 9:00 a.m., bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, following which Chairman Chandler announced that awards of contracts would be made at 4:00 p.m.

A delegation headed by Mr. Paul M. Dunn, Dean of the School of Forestry, Oregon State College, member of the State Board of Forestry, appeared before the Commission in regard to the designation of certain roadside picnic areas along the Wilson River Highway as living memorials to several men who were outstanding in their efforts in behalf of the State Forestry program, such as Mr. D. T. Allen, who was instrumental in framing early forestry laws; Mr. George Gerlinger, who was a member of the first Oregon State Board of Forestry; and Mr. Nels Rogers, former State Forester, who was prominent in the establishment of the present State forest rehabilitation program in Oregon. Others in the delegation were Messrs. Dwight Phipps, State Forester, and S. L. Miller, Land Acquisition Agent for the State Forestry Department. Mr. Dunn stated that the State Board of Forestry wishes to recognize and to acknowledge the contribution made by each of these men by the establishment of living memorials: that they first considered designating some of the larger timbered areas that are owned by the State but decided against such tracts because they are largely in isolated districts, off main highways, and to make them accessible to the public would necessitate considerable development.

The thought then occurred, he said, to establish memorial waysides along existing highways, and in that connection they have selected three locations on the Sunset Highway where there are trees and a possibility of a water supply, and where the right of way is wide enough to accommodate picnic groups. The Board of Forestry, he said, will if possible construct and maintain the areas in cooperation with the State Highway Department. He suggested, if necessary to carry out their proposed program, that it might be possible to effect a change of properties between the State Highway Department and the Forestry Department, but he emphasized the fact that the memorials must be located where they can easily be reached by the public, otherwise they will have no value for the purpose intended.

Chairman Chandler advised that the proposed plan is divergent from the Commission's present policy. He explained that the Highway Commission in the past has named park areas and park strips only in honor of the donors of the property and has also erected appropriate markers, but in all other cases where no gift is involved, it has been the policy of the Commission to call upon the Memorial Committee of the Oregon Historical Society for a recommendation, which recommendation the Commission usually adopts. He gave as his feeling that because of the fact that the request now under discussion is a departure from such policy of the Commission, the members of the Commission would like to discuss it thoroughly among themselves before making a decision. He advised that the State Board of Forestry will be informed as soon as the Commission has made up its mind.

A delegation from Corvallis was present regarding the proposed routing of the Pacific Highway West along First Street in this city. Mr. J. O. Convill, City Manager, headed the group, which included Messrs. Bob Ingalls, Editor of the Gazette Times and member of Chamber of Commerce; Jay Reynolds, member of the Chamber of Commerce; Vance Taylor, member of the Chamber of Commerce; Glenn Holton, Councilman; and Sandy McHugh, Councilman. Mr. Convill recalled the group's appearance before the Commission at the previous meeting when they were informed that the Engineer's report on the subject had not yet been rendered so the Commission was not in a position to pass on the matter. He gave as his understanding that the Commission now has the report, and, if so, they would like to know the Commission's decision with regard to it, because of its effect on the city's plans to spend city funds on this street. At the request of the Commission, the Engineer summarized his report as previously rendered to the Commission at this meeting and a general discussion followed. (For details, see copy of Engineer's report in General Files. Also, see back for minute entry.) Mr. Convill stated that the city is of the understanding that the improvement of Third Street and Fourth Street as proposed, is only a temporary expedient to take care of traffic until the First Street Route can be constructed. He pointed out that the railroad tracks on the

west side of First Street have been eliminated and that arrangements have been made for the removal of the tracks on the east side of the street. He also said that the city is prepared to acquire right of way along First Street, and it has plans to construct a sewer along this street, but they feel that it is unwise to spend city funds for such purposes until they know definitely that the highway is to be routed on that street. He declared the First Street routing a necessity. This matter was discussed at considerable length, and as a result thereof, the Commission agreed (1) to purchase right of way, which is estimated to cost $47,000, along the First Street route from Tyler Street intersection to a connection with Third and Fourth Streets; (2) that when the next highway construction program is formulated, to give careful consideration to the selection of the north connection, more particularly extensions to North Third Street and to North Fourth Street from Harrison Street to a connection with the present highway about two miles north of the city limits; (3) that First Street appears to be the most feasible location for US99W through Corvallis, but construction along such route shall not be considered until the right of way for a satisfactory location can be obtained through the mill property south of Washington Street; (4) the Commission will not build a temporary connection between First Street and Third and Fourth Streets, and the city will not request that that be done because the Commission does not think that any portion of the First Street route should be constructed until arrangements have been made to construct the entire route, including the portion through the mill property. The members of the delegation asserted their approval of such an arrangement. The Secretary was instructed to confirm the arrangement in writing.

County Judge, C. W. Craddock, of Harney County, and Mr. A. A. Bardwell, Chairman of the Highway Committee of the Burns Chamber of Commerce, were present in the interests of the Rome-Princeton Secondary Highway, particularly the completion of the 22-mile section north of Folly Farm. Judge Craddock alleged that this section is impassable at certain times of the year and he urged the Commission to advance construction of the section as much as it can. He was informed that the Commission is doing its best with the funds available, but is now investigating the possibilities of Federal Public Land money; also that there is a question if the improvement can be undertaken this year because of war-time conditions and the fact that projects have to be approved by the Federal Defense Authorities, who will not approve a project unless it will help considerably in the war effort. In the discussion, it was also pointed out that the Commission contemplates improvement to the Central Oregon Highway between Gap Ranch and Brothers, 32 miles, and between Burns and Buchanan, about 20 miles. Judge Craddock stated that the people of his district prefer the improvement of the Central Oregon Highway to the improvement of the Rome-Princeton Highway. He also inquired concerning the completion of the Poison Creek Section of the John Day-Burns Highway, and was informed that this is a forest highway project under the

supervision of the U. S. Bureau of Public Roads and cannot go forward until the Bureau gets additional funds to finance it. It was stated that this project and two or three others in the same category had to be deferred in the current program because of the lack of forest highway funds, but they are to be given the first priority for new funds that become available.

Mr. Edward J. Murnen, Consulting Forester, Sutherlin, Oregon, and Mr. John Buchanan, Sutherlin, came before the Commission in the interests of a new short feeder road extending easterly and southerly from a connection with the Pacific Highway at Sutherlin, to a connection with the North Umpqua Highway three miles east of Glide. They stated that they represent the North Douglas-North Umpqua Short-Route Committee of the Sutherlin Lions Club. Mr. Murnen presented a petition signed by 18 timber operators, urging the construction of this road and he submitted a brief, including four large maps in support of oral arguments. He urged the Highway Commission to survey and locate the road, which, he said, Douglas County will build and he advised that their idea, ultimately, is to have the State take over the road as a State Secondary Highway, for which reason they want it located in the proper place. Chairman Chandler advised that the Highway Commission simply does not have funds available to finance such a road in view of its many other obligations which the Commission considers of more importance, so it will be useless to think about dedicating it as a State Secondary Highway. He pointed out that the Highway Department is short of engineers at the present time and is having difficulty in employing engineers to carry on regular assignments. As to the survey, he stated that the Commission sometimes authorizes reconnaissance surveys for roads of this nature if the county concerned will pay for them, but the requests for such surveys must come from the County Court. He concluded the discussion by stating that the road under discussion is definitely and primarily a logging road and that it is out of the question for the State to take it over.

The meeting recessed for luncheon at 12:00 o'clock noon and reconvened at 1:30 p.m., the same persons being present and participating.

The Engineer reported that pursuant to authority heretofore given him by the Commission, he has awarded certain contracts for highway construction for which the Commission received bids at its meeting held on January 23 and 24, 1951 and on February 26 and 27, 1951, the conditions of the awards having been satisfied. The Commission unanimously approved the awards as follows:

"Grading, bituminous macadam surfacing, and two reinforced concrete box culverts on the Big Creek Section of the Oregon Coast Highway; bids received February 27, contract awarded March 12 to Durbin Brothers, Eugene, the low bidder.

"Grading and construction of five reinforced concrete box culverts on the Judkins Point-Goshen Section of the Pacific Highway; bids received February 27, contract awarded March 12 to McNutt Brothers, Eugene, the low bidder.

"Grading and oil mat surfacing on the Bly Section of the Klamath Falls-Lakeview Highway; bids received February 27, contract awarded March 15 to Jack R. Robinson, Bend, the low bidder.

"Grading, paving, oil mat surfacing, and construction of one reinforced concrete bridge and two reinforced concrete box culverts on the Cascade Locks-Herman Creek Road Section of the Columbia River Highway; bids received February 27, contract awarded March 16 to Babler Bros. & Rogers Construction Co., the low bidder.

"Construction of the Goshen Overcrossing of the Southern Pacific Railroad on the Pacific Highway at Goshen; bids received February 26, 1951, contract awarded March 9, 1951 to Hamilton and Thoms, the low bidder.

"Construction of the Riverview Street Viaduct, on the Pacific Highway, in Eugene; bids received Feburary 26, contract awarded March 9 to Hamilton and Thoms, Eugene, the low bidder.

"Grading and oil mat surfacing on detour roads, 3.7 miles grading and paving, and construction of one reinforced concrete box culvert on the Herman Creek-Gorton Creek Section of the Columbia River Highway; bids received January 24, contract awarded March 15 to Vernie Jarl, Gresham, the low bidder."

The Commission had under consideration the following requests for extensions of time within which to complete highway construction.

1. Lindstrom Bros., Inc., Contract No. 3356 for construction of a bridge over the Necanicum River on 12th Avenue in the City of Seaside, requested an extension of time of 31 days from February 28 to March 31, 1951 within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions which delayed the concrete finishing work. The Engineer advised that the structure was completed with the exception of a small

amount of finishing work on the concrete surfaces within the specified time and that such finishing work cannot be done until weather conditions are favorable. He further stated that the bridge was opened to traffic prior to the expiration of the specified completion date and in view thereof, he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

2. Barney B. Helser, Contract No. 3307 for the Vale Rock Production Project on the Central Oregon and Vale-West Secondary State Highways, Malheur County, requested an extension of time of 176 days from August 31, 1950 to February 23, 1951 within which to complete this job. He attributed his failure to complete the project within the specified time limit to an unavoidable delay in completing another State contract, which resulted in carrying the present project into bad weather. The Engineer advised that this contractor was awarded several State projects during the construction season and because of unexpected delays in connection therewith was unable to complete the present job until bad weather had set in. The delay, he said, has not inconvenienced the State, because the rock will not be needed until the spring of 1951. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

3. City Electric, Inc., Contract No. 3389 for installation of traffic signals on the route of the Pacific Highway West in the City of Corvallis, requesting an extension of time of 210 days from February 28 to September 30, 1951 within which to complete this job. They alleged that they were unable to complete the job within the specified time limit due to the inability of the suppliers to furnish materials as scheduled. The Engineer advised that the contractor experienced considerable difficulty in obtaining materials and it was through no fault on his part that delivery of the materials was not made when expected. He recommended in view of the circumstances that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

4. Tom Lillebo, Contract No. 3313 for construction of the North Dillard Bridge Section of the Pacific Highway, Douglas County, requested an extension of time of 122 days from March 31 to July 31, 1951 in which to complete this job. Mr. Lillebo gave no reason for his failure to complete the project within the specified time limit although he stated that it was necessary to wait for summer to complete the painting work, and to wait for low water in the river to complete removal of the old bridge piers. The Engineer advised that the contractor cooperated with the Highway Department very closely in

getting this bridge under traffic at an early date when the floods in the fall of 1950 damaged the old structure. He also said all work in connection with the project other than painting the steel, removal of the old structure and a small amount of work in connection with the paving of the approaches of the bridge, was completed within the alloted time. He recommended in view of the circumstances that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

5. Lee Hoffman, Contract No. 3348 for construction of piers for the Marion Street Bridge over the Willamette River on the Salem-Dallas Highway in the City of Salem, requested an additional extension of time of 19 days from March 1 to March 19, 1951 within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to adverse weather conditions and high water in the Willamette River. The Engineer advised that the contractor did everything possible to expedite the work but for reasons stated could not complete the job within the specified time. The piers are now complete, he said, and the State has been caused no inconvenience nor additional expense for engineering supervision. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation unanimously.

The action taken by the State Highway Commission upon the above listed requests for extensions of time within which to complete highway contracts was based upon the recommendations of the State Highway Engineer and his reports, which considered but did not necessarily adopt either or any of the reasons given by the contractors in their requests for such extensions of time.

The Engineer reported that Contracts No. 3307, 3328, 3348, 3433 and 3447 for construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission had under discussion the application of Mr. E. D. Barr, Lincoln Beach, Oregon for permission to operate a cleated tractor on the ocean beach north and south of Siletz Bay in connection with salvaging logs on the beach. The Engineer stated that, according to Mr. Barr's statement, he has secured permission from the owners of the property above mean high tide to take any logs that are on that area, and he has also obtained permission from the City of Taft to salvage logs from the shore of the bay. Moreover, he has contacted and

received permission from the owners of most of the branded logs to remove them. It is the prerogative of the Highway Commission, he said, to grant or deny the application, but he suggested if the request is approved that Mr. Barr be required to furnish public liability and property damage insurance in amounts not less than $10,000, $20,000 and $10,000 respectively. The Commission unanimously approved Mr. Barr's request subject to the Engineer's suggestion.

The Commission discussed a letter from the County Court of Lincoln County requesting that the roadway leading to the old ferry landing on the southerly shore of Yaquina Bay be conveyed to the County as a county road because of developments that are now taking place at that location. The Engineer exhibited a map showing the location of the roadway and advised that the road no longer is of any value for State Highway purposes. He recommended approval of the County's request. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "K", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer brought up for discussion the purchase of marine insurance covering liabilities of the State and the Astoria Navigation Co. in the operation of the Astoria-Megler Ferry. He said that the present insurance expires on June 1, 1951, and, if the Commission elects to advertise for bids for the furnishing of new insurance, it must do so soon that the insurance may become effective when the present insurance expires. He explained details with respect to the obligations of the State and of the contractors in furnishing this insurance. In the discussion of this matter, it was pointed out that the Commission's contract with the Astoria Navigation Company for operation of the ferry expires on June 1, 1952. Commissioner Reynolds suggested in view thereof that arrangements be made for renewal of the existing insurance until that time. The suggestion was approved by Chairman Chandler and Commissioner McIver, and it was so ordered. The Engineer was instructed to obtain, if possible, a reduction in the insurance premium based on the operating experience record during the past year.

In this connection, a letter was presented from Mrs. Dan C. Hall, Astoria, in which she complains of the service rendered on the Ferry, Tourist No. 3, on Sunday evening, March 4, 1951, when this ferry became stranded on a sand bar. The Engineer advised that action has been taken so that the conditions complained of by Mrs. Hall will not recur. The Commission ordered the communication filed. (For a detailed explanation of this matter, see copy of a report from W. W. Stiffler, Assistant Highway Engineer, to R. H. Baldock, State Highway Engineer, dated April 2, 1951, in General Files.)

The Engineer requested authority to file formal application with the District Engineer, U. S. War Department, for permits to construct or revise bridges over the following navigable streams:

1. Bridge over Hood River on the Columbia River Highway (new location) in the city of Hood River, Hood River County.

2. Bridge over Mosier Creek on the Columbia River Highway (new location) in the city of Mosier, Wasco County.

3. Revisions to existing bridge over the Willamette River on the Salem-Dallas Highway (Center Street) in the city of Salem, Marion County.

4. Bridge over Mill Creek on the Umpqua Highway about three miles west of Scottsburg, Douglas County.

He advised that these bridge projects are included in the approved construction program, but the work cannot go forward until the plans have been approved by the War Department. The Commission approved the Engineer's request unanimously.

The Engineer submitted for the Commission's consideration a tabulation listing employees of the State Highway Department, who are now, or soon will be, subject to retirement under the provisions of the Pension and Retirement Act. The tabulation showed: Group I, consisting of six employees who previously have been granted extensions by the Highway Commission and by the Pension and Retirement Board, and whose present extension period expire during the third quarter of 1951; Group II, consisting of seven employees, who will reach retirement age in the third quarter of 1951, and Group III, consisting of those employees, who previously were referred to the Commission for action on September 28, 1950. The Engineer recommended that the following employees be retained in the service of the State Highway Department for at least another year: Wm. E. Chandler, Division Engineer; Harry M. Teel, Resident Bridge Engineer; J. H. Scott, Resident Engineer; August Moser, Auto Mechanic; Harry Vernon, Pull-grader operator; Wm. J. Mespelt, Truck Driver; Sam S. Bunch, Section Foreman; Louis Langeliers, Truck Driver; Cecil Brown, Park Custodian; Geo. J. Witte, Park Custodian; Sanford Chilson, Park Custodian. The Commission unanimously approved the recommendation.

The Engineer reported that it has been necessary to post the following highway sections for reduced weight loads in order to avoid their breaking up during the present period of freezing and thawing, and he asked the Commission to confirm the postings.

(1) Diamond Valley Secondary Highway between Crane and junction with Rome-Princeton Highway, in Harney County.

(2) Rome-Princeton Secondary Highway throughout its entire length, in Harney County.

(3) Medical Springs Secondary Highway between Catherine Creek and Baker County line in Union County.

The Commission approved the postings unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "G-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In this connection, the Engineer also reported that for similar reasons he ordered the posting of the following highway sections for reduced weight loads, but the restrictions were lifted prior to this meeting of the Commission:

(1) Ochoco Highway between Mile Point 34.8 and Mile Point 56.8; posted March 16, 1951, restriction lifted April 9, 1951.

(2) Central Oregon Highway between Hampton and Lakeview-Burns Highway Junction; posted March 22, 1951, restriction lifted April 4, 1951.

(3) Fremont Highway between Junction with US97 and Silver Lake (Mile Point 47); posted March 23, 1951, restriction lifted April 4, 1951.

(4) Lakeview-Burns Highway between Suntex Junction and Alkali Lake; posted March 23, 1951, restriction lifted April 4, 1951.

The action of the Engineer in posting these highway sections for reduced weight loads was approved unanimously by the Commission.

The Engineer also reported that due to a collision at the Nehalem River Bridge on the Nehalem Secondary Highway about two and a half miles north of the town of Mist, it was necessary to post this bridge structure for 10-ton maximum gross weight loads on March 30, 1951. Repairs are under way, he said, and the restriction will be lifted as soon as possible. He anticipated that statutory weight loads will be permitted on the structure within two or three weeks. He asked the Commission to confirm his action.

The Commission approved the posting of this structure unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "G-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed the matter of reimbursing Mr.R. M. Smith, District Maintenance Superintendent, Astoria, for expense incurred in the repair of his private car which was damaged while being used in connection with highway business as an emergency proposition, such expense amounting to $87. The Engineer explained that Mr. Smith's State car was out of service for repairs and, pending the repairs, Mr. Smith used his private car to convoy traffic through a controlled zone, during which operation the damage occurred. Mr. Smith, he said, has made every effort to collect from the party that caused the damage, but without success because the party is a Federal employee whose salary cannot be attached, and he does not carry insurance. He recommended that Mr. Smith be reimbursed in full for the cost of the repairs. The Commission approved the recommendation unanimously.

The Commission had under discussion requests for reduced speed zone designations as follows:

(1) Request of residents of the Triangle Lake District, Lane County, for establishment of a 25-mile per hour speed zone on the Siuslaw Highway through the business district of this community. The Engineer advised that this matter has been investigated by the Traffic Engineer, who reports that the conditions obtaining warrant the establishment of a 35-mile per hour speed zone between Mile Point 40.50 west of Little Lake Creek and Mile Point 41.34, east of Triangle Lake resort. He recommended approval of the establishment of a 35-mile per hour speed zone between such points. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "H-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

(2) Request of the City of Portland for designation of a reduced speed zone along S. E. McLoughlin Boulevard (US99E) between the city limits of Portland and the city limits of Milwaukie. The Engineer advised that this matter has been investigated by the Traffic Engineer whose report discloses that speeds along the section should be restricted. He recommended the designation of speed zones as follows along this section: 35-miles per hour from Mile Point 4.57 (south city limits of Portland) to Mile Point 4.89, approximately 650 feet south of S. E. Ochoco Avenue; 45-miles per hour from Mile Point 4.89 to Mile Point 5.51 (approximately 450 feet north of Scott Street in Milwaukie); and 30 miles per hour from Mile Point 5.51 to Mile Point 5.61 (north city limits of Milwaukie). The

Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "H-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

(3) Request of the residents of Cheshire, Oregon for a 25-mile per hour speed zone designation on the Siuslaw Highway through their community. The Engineer advised that an investigation by the Traffic Engineer reveals that the conditions obtaining in this place do not meet the standard requirements for reduced speed zone designation, and that the matter can be taken care of by appropriate signing. He recommended that the request be denied. The Commission approved the recommendation unanimously.

(4) Request of the City of Independence for designation of a 35-mile per hour speed zone along the State Highway between Monmouth and Independence for the benefit and protection of high school students. The Engineer advised that the Traffic Engineer's investigation of this request reveals justification for a reduced speed zone along this section. He recommended the following: Designation of a 25-mile per hour speed zone between the city limits of Monmouth (M. P. 0. 23) and M. P. 0. 74, approximately 0. 17 miles west of Talmadge Road, east of Monmouth; and 40 miles per hour between M. P. 0. 74 and the west city limits of Independence (M. P. 1. 66). The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "H-3", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A communication was presented from Mr. W. M. Pearce, Plant Engineer of Kaiser Frazer Corporation, Portland, Oregon, calling attention to a hazardous traffic situation which he alleges exists on the Northeast Portland Secondary Highway at the driveway entrance to the corporation's plant, by reason of the parking of automobiles on the highway shoulders at this point. Mr. Pearce suggests the designation of a "NO PARKING" zone to relieve the condition. The Engineer advised that the Traffic Engineer, who made an investigation, recommends the establishment of a "NO PARKING ON HIGHWAY SHOULDERS" zone on both sides of this highway between N. E. Cully Boulevard and N. E. 82nd Avenue. He stated his concurrence in the recommendation. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "I-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that his attention has been called by Mr. Tom Edwards, Assistant Division Engineer, Roseburg, to a hazardous condition which exists by reason of parking of cars on the shoulders of the Pacific Highway in the vicinity of the City of Oakland, and to a similar condition that exists along this highway adjacent to the Town of Myrtle Creek. An investigation by the Traffic Engineer, he said, reveals that a hazard does exist at each of these places because people park their cars on both shoulders of the highway, which not only restricts the horizontal clearance but also restricts the sight distance along the highway. This condition, he said, can be remedied by the establishing of a "NO PARKING" zone at each location and he recommended the establishment of such zones on both sides of the highway at both places, as follows: In the City of Oakland from a point south of First Street (M. P. 183.26) to the south city limits of Oakland (M. P. 183.36), and from the south city limits of Oakland to M. P. 183.54; in the city of Myrtle Creek from M. P. 220.27 to the south city limits (M. P. 220.66). He pointed out that the zones lie partly within the city limits of both towns, so, in order to be effective, it is necessary that appropriate city ordinances be adopted, which, he said, has been done. The Commission approved the recommendation unanimously by adoption of the attached resolutions relative thereto marked EXHIBITS "I-2", "I-3" and "I-4", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Engineer recommended that the "NO PARKING ON HIGHWAY SHOULDERS" zone heretofore established by the Commission on January 23, 1951, along the Redwood Highway south of Grants Pass, be extended southerly a distance of about a quarter of a mile to include a drive-in theatre, which has been built immediately west of the previously established zone, creating a hazardous parking condition when the theatre is in operation. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "I-5", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A communication was presented from Mr. Ray M. Pendergast, Assistant Manager, Portland Gravel Company, in which he alleges that a very dangerous condition exists on the Pacific Highway East in the town of Milwaukie where it connects with a road that serves the gravel company and others along the water front. Mr. Pendergast advised that accidents frequently occur at this intersection due to the lack of appropriate markers and he suggests the designation of a "NO PARKING" area on each side of the intersection a sufficient distance to enable drivers to observe traffic approaching from all directions. The Engineer advised that the roadway referred to extends westerly from the highway to the river from a point a short distance south of Washington Street which leads to the city center, and that investigation by the Traffic Engineer indicates that the establishment of a "NO PARKING" regulation is in order. He further advised that the City of Milwaukie

has satisfied the legal requirements by adoption of an appropriate ordinance and he recommended the designation of a "NO PARKING AT ANY TIME" zone along the west side of the highway (US99E) from a point 771 feet south of the south property line of Washington Street, (north property line of a roadway leading to the water front) northerly a distance of 50 feet. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "I-6", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that a hazardous condition exists along US99 south of the City of Grants Pass due to the parking of automobiles on the shoulders of the highway near an auction mart at that location, which condition is aggravated by the fact that auctions are held at night time. Facts disclosed as a result of investigations by the Traffic Engineer, he said, indicate that a "NO PARKING ON HIGHWAY SHOULDERS" zone should be established on both sides of the highway between M. P. 280.07 and M. P. 280.43, and he recommended that that be done. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "I-7", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested authority to purchase engineering and maintenance equipment which is estimated to cost $16,350, as detailed in his written report to the Commission dated April 5, 1951. He advised that provision for purchase of this equipment is included in the 1951 budget heretofore approved by the Commission in principle. The Commission approved the request.

The Commission had under discussion a request from Mr. C. H. Lundell, Utilities Engineer for the City of Portland, for permission to use a well located on State highway property near the intersection of Denver and Union Avenues, in Portland, such use being in connection with irrigation in a new city park at this place. The Engineer advised that the well formerly supplied the Peninsula Golf Course and is located on land that was acquired for widening the highway. The well, he said, is 69 feet from the center of the leg of Denver Avenue that leads to Swift Boulevard and he questioned that any highway improvement will interfere with the use of the well. He also said that use of the well for the purpose intended by the City will not adversely affect the highway. He recommended, in view, thereof, that the City of Portland be given a revocable permit for the use of the well. The Commission approved the recommendation unanimously and so ordered.

The Commission had under discussion a request from the Puget Timber Company of Oregon for permission to truck-haul poles and piling,

involving loads 65 feet over-all in length, over and upon the Columbia River Highway from Hood River to the company's treating plant at The Dalles. The Engineer advised that the company plans to deliver to its plant 25,000 to 30,000 poles and piling, all of which will be truck-hauled over the Columbia River Highway from Hood River; also, that test runs conducted with a typical load indicate that loads of the desired length transported on regular pole hauling equipment can be moved over this section of highway with safety. He recommended approval of the company's request for loads not exceeding 65 feet over-all in length. The Commission questioned the advisability of granting the company this privilege because of the nature of the highway and the large volume of traffic that uses it; however it was decided to issue a permit on a trial basis to see how the operation affects other traffic. The Engineer was instructed to caution the company not to engage in a long-term operation unless and until it is advised by the Commission, as a result of the trial operation, that it is satisfactory to do so.

The Engineer brought up for discussion the advisability of joining with the Union Pacific Railroad Company and the Hood River County Court in petitioning the Public Utilities Commissioner for an order vacating two Union Pacific Railroad grade crossings east of the City of Hood River. The Engineer advised that one of the crossings is the Coburg Beach Road about two miles east of Hood River and the other, a minor crossing serving Indian land farther east. He gave as his opinion that the crossings should be closed in order to avoid a hazardous condition such as now exists at Corbett. The railroad company, he said, is desirous of having the crossings abandoned and a communication has been received from Hood River County Court that it will approve and sign documents to effect the abandonment of both crossings. He recommended that the Commission join with these agencies in petitioning the Public Utilities Commissioner for an order vacating the crossings. The Commission approved the recommendation.

The Commission discussed a letter from the Days Creek Garden Club, Canyonville, Oregon, inquiring as to the plans of the State Highway Commission with respect to the erection of a monument or marker of some sort to mark the place where the Pioneer Bridge was recently destroyed on US99 about six and one-half miles south of Canyonville to accommodate the new highway. They allege that the bridge was dedicated to the pioneers of Southern Oregon, and they gave as their feeling that some sort of marker should be erected near the site of the old bridge. The Engineer advised that the old bridge was built many years ago and was dedicated to the Pioneers of Southern Oregon. In fact, a plaque was placed on the structure containing an inscription to that effect. The old bridge, he said, has been completely destroyed, and the question arises whether the marker should be placed in that particular location where there is no convenient place for cars to park. The Commission indicated a desire to accommodate the Club and, accord-

ingly, authorized the Engineer to erect a marker at a suitable location that meets with the approval of the Garden Club.

The Commission considered, and by unanimous vote approved, out-of-state travel authorizations as follows:

(1) R. H. Baldock, State Highway Engineer to attend a meeting of the executive committee of the American Association of State Highway Officials in Charlottesville, Virginia, during June 6-10, 1951; also, to attend a meeting of the President's Highway Safety Council in Washington, D. C., during June 11-15, 1951. Estimated total expense, $403.40.

(2) W. C. Williams, Assistant Engineer, to attend a meeting of the Engineers of Western Association of State Highway Officials in Salt Lake City, Utah, during April 3 and 4, 1951, for discussion of a proposed test road in the western part of the United States; and to consult with prospective engineering employees. Estimated total cost, $111.30.

(3) Frank I. Towle to go to Boise, Idaho, in connection with case of Fred Strasbaugh vs State of Oregon. Estimated cost $76.25.

(4) Persons to represent the Oregon State Highway Department at the annual meeting of the Western Association of Highway Officers, which is to be held in San Francisco, California, during June 25-28, 1951. The Commission by unanimous vote designated the following persons to represent Oregon on this occasion: R. H. Baldock, State Highway Engineer; W. C. Williams, Assistant State Highway Engineer; G. S. Paxson, Bridge Engineer, J. M. Devers, Chief Counsel, Forrest Cooper, Right of Way Engineer, and H. B. Glaisyer, Secretary of the Commission.

The Commission discussed a suggestion proposed by Commissioner Reynolds that a sign be placed at each end of every reconstruction job, containing information that the work being performed is State Highway work that is being undertaken by the Oregon State Highway Commission for the benefit and convenience of the people of this State and of its visitors. The Engineer offered two suggestions for such a sign, which the Commission discussed carefully. Due to the fact that the wording was not exactly in accordance with the Commission's ideas on the subject, the matter was referred back to the Engineer to obtain ideas from the Director of the Travel and Information Department relative thereto.

The Commission had under discussion the matter of approving an increase in the amount of the Highway Department's revolving fund pursuant to authority granted by Chapter 200, Oregon Laws, 1951. It was explained that at the present time, the revolving fund is limited to $700,000 which amount is insufficient to carry on properly the function of the De-

partment, and that the 1951 Legislature has authorized increasing the amount to $1,000,000. The Engineer suggested that he be given authority to ask the Secretary of State to provide for the increased amount. The Commission approved the request unanimously, and thereupon endorsed a letter directed to the Secretary of State requesting that provision be made for such an increase.

The Commission discussed a proposed agreement with Deschutes County providing for the disposition of certain portions of the McKenzie-Bend and the Redmond-Bend Highways (old routes) that will be rendered valueless from a State Highway point upon completion of the proposed improvement of the McKenzie-Bend Highway between Tumalo and Bend. The Engineer explained that this agreement provides that, as soon as the section of the McKenzie-Bend Highway between Tumalo and Bend has been constructed and made available for travel, certain portions of the old route shall be maintained by the county as county roads, and certain portions shall be maintained by the State as a part of the State's Secondary Highway System. He exhibited a map showing in color the sections of the old route to be so disposed of. This matter was given careful consideration by the Commission and, as a result thereof, the Commission unanimously approved the disposition of the old highway as provided in the agreement. (The agreement was signed by the Commission later in the session.)

The Commission considered briefly items of unfinished business appearing in the list of such matters prepared by the Secretary as of its last meeting on February 27, 1951, but, due to lack of time, deferred action on such matters until its next meeting.

The Commission had under discussion the setting of a date for its next regular meeting, and decided to hold such meeting in Portland on Thursday and Friday, May 24 and 25, 1951. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

The Right of Way Engineer brought to the Commission's attention a proposed compromise settlement with Mr. O. H. Hinsdale, Reedsport, concerning an obligation of the State to construct a fill on which to relocate a dairy barn belonging to Mr. Hinsdale, in connection with the improvement of the Umpqua Highway along Mr. Hinsdale's frontage of the Reedsport-Luder Creek Section. He explained that the original arrangement with Mr. Hinsdale provided for the State to construct the fill and to place a crushed rock surface thereon, but Mr. Hinsdale has agreed to relieve the State of this obligation upon being paid $2,100 in cash. He recommended settlement with Mr. Hinsdale on such basis. The Commission approved the recommendation.

The Assistant Counsel, Mr. Enfield, brought up for discussion acquisition of right of way for the widening of the Columbia River Highway through

Celilo Indian Village in Wasco County. He said that the property involved belongs to the Indians and that it is impossible to obtain title to the right of way without an act of Congress; however, the Bureau of Indian Affairs will grant the State a permit for the use of the property, subject to the rights of the people occupying the land, and to the clearing up of the premises, if the State will oil the sand dunes adjacent thereto in accordance with an agreement that was approved about a year ago. The Engineer advised that he is about ready to proceed with the improvement of the highway at this location and he recommended acceptance of the permit as being sufficient title to the right of way and the oiling of the sand dunes. The Commission approved the recommendation and reauthorized the expenditure of $3,000 for the oiling work.

The Commission considered briefly an opinion from the Chief Counsel dated May 7, 1951, with respect to the routing of state highway traffic over city streets. Discussion of this matter was deferred by the Commission until its next meeting.

The Commission discussed a report from the Engineer on over-weight violations committed by Justin Harley Abbott, Stockton, California. It appears that Mr. Abbott, in order to outwit Highway Department weighmasters and to escape having his illegal loads weighed, has resorted to certain evasive tactics, including the transferring of a portion of his loads to an auxiliary truck just before reaching Highway Department's scales; then reloading his equipment after passing the scales. The first such offense observed by weighmasters occurred on July 12, 1950, when the over-weight was estimated at 4,340 pounds. The Engineer stated that Mr. Abbott was warned that the Highway Commission might cancel his over-weight permit if he repeated the offense, but, evidently, he did not pay much attention to the warning, because on March 22, 1951, he was again apprehended for the same kind of offense, this time, the over-weight being 2,700 pounds. He said that both offenses occurred on The Dalles-California Highway in the vicinity of Klamath Falls. He recommended that Mr. Abbott's Group I permit be cancelled, which would restrict his hauling to a maximum gross weight of 54,000 pounds under the present statutes. The Commission approved the recommendation unanimously and so ordered.

The Engineer asked the Commission to approve an additional project authorization in the amount of $15,089 for resurfacing the Cascade Gorge-Prospect Section of the Crater Lake Highway. He explained that the over-run was due to the fact that the quarry designated for this project did not contain sufficient material for the job, necessitating the moving of the contractor's plant, construction of a short section of hauling road, and payment of the cost of additional hauling of the surfacing mater-

ials. The Commission approved the request, and so ordered.

A petition was presented from the residents of Rowena, in Wasco County, offering objections to the proposed location of the Columbia River Highway, as revised through their community, and requesting consideration of the matter and adoption of the original survey. The Engineer advised that were the first survey adopted, it would require the moving of several houses, whereas, the revised survey merely takes vacant land; further that the reason the survey was revised was to avoid conflict with the existing highway and a repetition of the trouble that was experienced when Columbia River Highway traffic was allowed to use the old highway between Dodson and Bonneville, during construction of the new highway. He pointed out that the Commission, earlier in the session, adopted the revised location, and he recommended that the request of the petitioners be denied. The Commission approved the recommendation.

The Secretary presented a resolution adopted by the Common Council of the City of Springfield on April 9, 1951, in which the City Council goes on record in favor of the North "A" Street routing of the proposed highway improvement in this city, rather than the South "A" Street route. The Commission deferred action on this resolution pending agreement among the several factions in this city, including the City Council and Chamber of Commerce, some of whom endorse the North "A" Street route and others endorse the South "A" Street route. The Secretary was instructed to inform the City Council that the Commission is unwilling to proceed with construction of the project until the differences have been eliminated.

The County Court of Columbia County, represented by County Judge J. W. Hunt, County Commissioners Donald Parcher and Cylde Henderson, and County Engineer Clarence Wagoner, was present regarding the tax controversy with the State of Washington concerning the Columbia River bridge between Rainier, Oregon and Longview, Washington. Judge Hunt recalled that the county's claim is in the amount of $118,000, and he advised that the Washington Toll Bridge Authority has offered to pay the County $70,000 of such amount, and that there now is before the Oregon Legislature a bill which would provide for reimbursement of the County School Fund in the amount of $33,000, leaving a $15,000 balance which has not been provided for. He mentioned having received information from the Commission's Chief Counsel to the effect that the State Highway Department will assume payment of the $15,000 balance by spending such sum for improvement for one of the county roads. He expressed satisfaction with the entire settlement on such basis and suggested improvement of the Rainier Apiary Road, which extends from Rainier into the Nehalem Valley. He suggested a larger project than can be financed with the $15,000 State money and advised that the county will contribute county funds to pay costs in excess of $15,000 if the Commission has no objection to the bigger job.

Chairman Chandler stated that the Commission appreciates the County's position and is willing to contribute $15,000 of State Highway funds to assist in disposition of the matter. Moreover, the Commission has no objections to the larger project, subject to the condition that the State's contribution shall not exceed $15,000. However, before deciding on any particular project, the Commission prefers to have an investigation made by its Engineering Department, and will instruct the Engineer to contact the County Court shortly with respect thereto, so his recommendation will be available to the Commission at its next meeting. Commissioners Reynolds and McIver indicated their approval of Chairman Chandler's statements, as did the members of the County Court. The Engineer was thereupon instructed to make such investigation and report. Judge Hunt inquired how the Commission will spend its money, by contract or by force account, and was informed that the law requires the contracting of any project that is estimated to cost $5,000 or more. Commissioner Parcher inquired if it will be possible for the Commission to perform the work this year, and was assured that is what the Commission has in mind.

A delegation from Gilliam County, consisting of Messrs. G. W. Kaseburg, J. S. Burris and Charles Kenney, appeared before the Commission in the interests of the Cottonwood Canyon Section of the Wasco State Secondary Highway. Mr. Kenney headed the group. He alleged that the Commission in 1949 promised to construct an oil surface on this road and he urged the improvement this year. Mr. Burris read aloud a petition requesting such improvement, and he declared that he could obtain 1,000 signers if necessary. He also stated that the only people who do not wish this road improved are those residing in Arlington and the members of the State Highway Commission. The condition of the road at the present time, he said, is keeping the traveling public off it, and he urged the Commission to approve the project, the expense of which, he asserted, is fully justified as one-third of the taxes received by the County come from land bordering this highway. The delegation was informed by Chairman Chandler that the Commission will review this project and determine what, if anything, can be done to improve the section. (See back for additional paragraphs on this subject.)

A group representing the Grants Pass Chamber of Commerce, the Jackson County Chamber of Commerce, Josephine County Chamber of Commerce and Cave Junction Chamber of Commerce, was present regarding a number of highway projects in the vicinity of Grants Pass. The group was composed of Mr. Paul D. Rynning, Medford, County Engineer of Jackson County; John Dillard, Cave Junction, President of Illinois Valley Chamber of Commerce; and Charles H. McLean, Grants Pass, Director of the Highway Committee of the Grants Pass Chamber of Commerce. Mr. Rynning stated that the group represents both Josephine and Jackson Counties and what they have in mind is to renew their previous requests for certain highway improvements. He particularly mentioned improvement of the Pacific Highway between Central Point and Ashland, concerning which Chairman Chandler advised that a location survey is now being made and, as soon as the survey is adopted, the Commission will start buying right of way.

Mr. Dillard stated that the group that he represents still is in accord with the program of highway improvements that they presented to the Commission last year. He mentioned improvement of the Redwood Highway from the top of Hayes Hill to Cave Junction, the replacement of the bridge over Applegate River, which is their second choice project, and the widening of the Ashland-Central Point Section, which, he said, should have first priority over all projects in their district. Mr. McLean stated that the program agreement mentioned by Mr. Dillard is still in harmony with their present feeling. He mentioned the need for improvement of the Hayes Hill Section of the Redwood Highway, and replacement of the Applegate River bridge. Mr. McLean also inquired concerning the widening of North Sixth Street, and the widening of Caveman Bridge for four lanes of traffic, both projects being on the Pacific Highway in Grants Pass. The people of Grants Pass, he said, are anxious to know what the Commission is going to do about these improvements, particularly the North Sixth Street widening. Chairman Chandler advised that the Commission is not in a position at the present time to make a definite statement concerning any of the projects, but it realizes the Applegate Bridge is in bad condition, and that the Hayes Hill section needs improvement. The survey for the Hayes Hill Section, he added, has been completed and right of way negotiations will be commenced when the descriptions have been prepared. However, he pointed out that this project is on the forest highway system and is to be financed with forest highway funds, so cannot go forward until the Congress provides the money. He further stated that the Commission has in mind the North Sixth Street widening project in Grants Pass, and also the widening between Central Point and Ashland, but of all the projects mentioned, the Commission feels that the Caveman Bridge widening is the least important. This concluded the conference.

The following persons composed a delegation from Gilliam and Wheeler Counties, which appeared before the Commission in the interests of the John Day Highway: E R. Fatland, representing the Condon Commercial Club; Hon. E Howell, Circuit Judge, John Day ; Robert Misener and J. P. Steiwer, both members of the Fossil Community Club. Mr. Misener headed the group. He advised they are asking the Commission to improve the John Day Highway between the towns of Fossil and Spray, particularly mentioning two sections, one above Alder Creek and the other below Spray where the highway is very narrow and barely wide enough for two-way traffic. He stressed the improvement of the section over Butte Creek Summit south of Fossil Judge Howell endorsed Mr Misener's remarks. He declared that the places mentioned by Mr. Misener are so dangerously narrow that it is difficult for two trucks to pass and he urged the improvement of this mountain section. He also asked the Commission to give favorable consideration to the further improvement of the Wasco-Condon State Secondary Highway. Mr. Fatland endorsed the remarks of the other speakers and he also spoke in behalf of the Cottonwood Canyon Section of the State Secondary Highway. Mr. Steiwer also spoke in behalf of the John Day Highway improvement Chairman Chandler advised that the Commission is not in a posi-

tion today to make any commitment of funds for the projects requested but will refer the entire matter to the Engineer for investigation and report. The Engineer was thereupon instructed to make such a report.

A delegation from The Dalles, consisting of County Judge Ward R. Webber; Donald E. Heisler, District Attorney; Ralph A. Tudor, San Francisco, President, Tudor Engineering Company in charge of construction of the Columbia River Bridge at The Dalles; and Mr. Chris P. Fauerso, The Dalles, local representative of the Tudor Co. was present. Mr. Tudor headed the group. He said that they are appearing before the Commission with regard to acquisition by the State of right of way that is needed for the proposed improvement of the Columbia River Highway at its junction with the road approach to the new Columbia River bridge that is now under construction. To make the proper connection between the approach road and the highway, he said, will require the reconstruction of a section of the highway about 900 feet long, which work cannot be done until the right of way has been obtained. He estimated the cost to improve the highway at this location at about $75,000. He pointed out that the present right of way is only 40 feet wide and he advised that Wasco County will construct the highway section if the State will furnish the right of way for it. The State Highway Engineer exhibited a map showing property ownerships and he pointed out that only three parcels of land are needed at this time. He recommended acquisiton of these three parcels now so as to avoid delay in the construction of the approach road, and he suggested that the properties be condemned if the Right of Way Department is not able to acquire them by negotiation. The Right of Way Engineer explained further details with respect to the properties that are needed now and which will be needed later when a major highway improvement is undertaken. This matter was discussed at some length, and as a result thereof, the Commission unanimously authorized negotiations for the purchase of the three tracts under discussion, two of which are owned by a Mr. Burk, and one by a Mr. Bansch. The Commission also authorized condemnation of these properties, if necessary.

Mr. J. C. Minson, County Commissioner, Crook County, was present regarding the proposed improvement of the Combs Flat Section of the Paulina State Secondary Highway. He alleged that the Commission at its February meeting promised this improvement and he advised that the people of his district are anxious to know when the Commission intends to advertise the project for bids. Moreover, they want an oil surface put on the road rather than just the plain rock. He was informed by the Engineer that it is planned to advertise this project for bids to be received at the meeting of the Commission scheduled for May 24, and that provision has been made only for the rock work because it would be too costly to construct an oil mat surfacing that would stand up under the heavy logging and lumbering traffic that the road carries. Mr. Minson then asked for

the elimination of two curves on the Ochoco Highway between Redmond and Prineville, particularly at the county line, where, he said, numerous accidents have occurred and where, last year, five people were killed. He also mentioned elimination of another curve about two miles west of the county line. The Commission instructed the Engineer to investigate these points and report his findings.

Mr. Joseph M. Devers, Jr., City Attorney, Stayton, was present regarding the improvement of 4th Street in Stayton, as a special state street fund project. He said that their application for funds to finance the improvement of this street was denied by the State Highway Department but they feel they are entitled to the improvement becasue State-owned truck operations were largely responsible for its present condition. He also mentioned traffic from Detroit Dam. The City, he said, has placed signs on some of the streets prohibiting truck traffic from the Dam from using a short cut route which passes their public school, but it cannot control the passenger traffic. He asked for the improvement of this street and widening of the turn where it connects with the highway so as to accommodate turning movements by logging trucks, which now create a dangerous condition. The Commission instructed the Engineer to make another investigation of the matter and to report his findings. Mr. Devers also inquired as to the ultimate location of the North Santiam Highway through Stayton. He explained that the city has started on a campaign to raise funds to match Federal funds with which to finance a hospital and has already acquired an 8-acre tract for the site of the proposed hospital, which is estimated to cost $200,000; however, they must know where the highway is going before they can locate the hospital building. He requested such information at the earliest possible time so as not to delay their project. The Engineer was instructed by the Commission to give Mr. Devers as much information on this subject as possible.

Mr. Arthur A. Goldsmith, Attorney, Portland, came before the Commission in behalf of Mrs. Nancy M. Finke, regarding a right of way matter at the intersection of Union Avenue and Columbia Boulevard in North Portland. He recited the history of this case, which goes back to March, 1949, when negotiations were commenced resulting in execution by Mrs. Finke of an option agreement, dated October 24, 1949, whereby she agreed to sell her land for $10,000, whereas the State's offer was $8,950. A compromise arrangement was made, he said, whereby the State agreed to pay $9,500 without restriction of access to the highway, but it appears the Highway Commission did not approve this settlement so negotiations were resumed which resulted in a new proposition whereby the State would pay Mrs. Finke the sum of $12,700. This plan, he said, provided for a roadway at the back of the property and did away with all direct access to the highway. Finally, he said, plans were again changed so as not to take any of Mrs. Finke's property, and he was so informed by letter on April 9, 1951. He gave as his feeling that

Mrs. Finke is entitled to better treatment and that it is only fair that the State should purchase from her a portion of her property which she is willing to sell for $7,500. He requested an early decision by the Commission. The Commission took the matter under advisement and instructed the Right of Way Engineer to render a detailed written report on the subject.

Mr. Arthur C. Lofts, Hood River, was present regarding the location of the new Columbia River Highway by his property in the eastern part of the city of Hood River. He was accompanied by his attorney, Mr. Kenneth Abraham, his son, Mr. A. W. Lofts, who is associated with him in his gravel business, and by his plant foreman, Mr. W. R. Beachman. Mr. Lofts briefly outlined his problem. Chairman Chandler advised that the Commission is somewhat familiar with the case, and, due to the fact that the Commission did not wish to disturb Mr. Lofts' gravel business, approved a revision in the alignment of the highway that will miss entirely his property, so is no longer interested in acquiring property from him. Mr. Abraham recited the history of the negotiations. He pointed out that the State has purchased property adjoining Mr. Lofts' property, which is fundamental for his business, particularly land that he has under lease from a Mr. Morrison, and indications are that it is going to put Mr. Lofts out of business. He gave as his feeling that the Highway Commission is morally obligated to Mr. Lofts because of the Commission's failure to fulfill certain promises made to him by the Commission's agents. He said that Mr. Lofts has been in business at this location since 1906 and has an investment valued at $54,000, which he is now asking the State to pay him for his property. The matter was discussed at considerable length, and in conclusion Chairman Chandler advised that the Commission is not sufficiently familiar with the details on the matter at this time but will take it under advisement and will take action when furnished with additional facts.

At 4:00 p. m. Chairman Chandler publicly announced awards of contracts, bids for which were received by the Commission at the morning session as follows, the Commission's action in each instance being by unanimous vote:

"Grading and surfacing the Summit-Lobster Valley Section of the Alsea-Deadwood Secondary Highway in Benton County. C. R. O'Neil, Creswell, submitted the low bid for this work, at $117,101.00. The next low and only other bid was that of G. D. Dennis & Sons, Portland, at $152,404.00. The contract has been awarded to the low bidder, C. R. O'Neil, at his bid price.

"Division No. 1, District B., Re-oiling Project on the Mt. Hood Highway near Gresham and Sandy, in Clackamas and Multnomah Counties. The low bidder for this work was J. C. Compton Co.,

McMinnville, at $23,746.00. The Commission has awarded the contract to this company at its bid price.

"Construction of a masonry block maintenance building on State-owned property at Clatskanie, Columbia County. The Commission has awarded this contract to Robt. C. Wilson, Corvallis, at his bid price of $9,810.00, this bid being the lowest one of three submitted.

"Myrtle Point (Reedsford Road) Paving Project in the City of Myrtle Point, Coos County. The only bid received for this work was that of Porter W. Yett, Portland, $11,160.00. The bid is acceptable and the Commission has awarded the contract to Mr. Yett at his bid price.

"Grading and Paving the Tumalo-Bend Section of the McKenzie-Bend Highway, Deschutes County. Babler & Rogers, Portland, submitted the low bid for this work at $457,409.00. The Commission has awarded the contract to this bidder at the price quoted.

"Construction of two frame dwellings with garages attached, on State-owned property at Prospect adjacent to the Crater Lake Highway, Jackson County. C. E. Blakely, Klamath Falls, submitted the low bid of four submitted for this work, being in the amount of $24,210.00. The Commission has awarded the contract to Mr. Blakely at his bid price.

"Grading, widening and paving, and furnishing rock in stockpiles on the Prospect-Union Creek Junction and Union Creek Junction-Lost Creek Sections of the Crater Lake and West Diamond Lake Highways, north of Prospect, in Jackson and Douglas Counties. J. C. Compton Co., McMinnville, submitted the low bid for this work at $452,454.00. There were four higher bids. The Commission has awarded the contract to J. C. Compton Co. at its bid price.

"Grading and paving the Florence Section of the Oregon Coast Highway at Florence, Lane County. Rex C. Ayers Construction Co., Portland, submitted the low bid for this work at $134,408.00. There were four higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Widening and paving the Water Street-Commercial Street Unit of the Marion Street Bridge Section of the Salem-Dallas Highway in Salem, Marion County. Warren Northwest, Inc., Portland, was the only bidder for this job, at $34,688.00. This bid is acceptable and the Commission has awarded the contract to this company at its bid price.

"Widening and paving the Salem (Lana Avenue-Academy Street) Section of the Pacific Highway East in Salem, Marion County. The only bid received by the Commission for this work was that submitted by Warren Northwest, Inc., Portland, at $20,720.00. The Commission has referred the bid to the Engineer with authority to award the contract to this company at its bid price when certain conditions have been satisfied.

"Fencing along the Willow Creek-Boardman Section of the Columbia River Highway near Boardman in Morrow and Gilliam Counties. Geo. E. Berry, Beaverton, was the low bidder of four at $23,148.00 for this work. The Commission has awarded the contract to Mr. Berry at his bid price.

"Landscaping along the Lombard-Killingsworth (33d Avenue-42d Avenue) Section of the Northeast Portland Secondary Highway in Portland, Multnomah County. The Commission received three bids for this work, the low one being that of Portland Construction Co., Portland, at $10,148.00. The Commission has awarded the contract to this company at its bid price.

"Painting the Interstate Bridge over the Columbia River on the Pacific Highway East in North Portland, Multnomah County. Larsen Bros. Paint Co., Tacoma, Washington, submitted the low bid for this work at $21,000.00. There were two higher bids. The Commission rejected all bids for this work and has ordered the project re-advertised.

"Widening the Columbia Slough Bridge on the Pacific Highway East in North Portland, Multnomah County. General Construction Co., Portland, submitted the low bid for this work at $148,066.00 based on the use of wooden piling. They submitted no bid based on the use of composite piling. Two higher bids were received. The Commission has referred the bids to the Engineer with authority to award the contract to the General Construction Co. when certain conditions have been satisfied.

"Furnish and install traffic signals at two street intersections in the City of Tillamook, Tillamook County. City Electric Co., Salem, was low bidder for this work at $4,878.73. There were three higher bids. The contract has been awarded to City Electric at its bid price.

"Weston re-oiling project on the Oregon-Washington and Weston-Elgin Highway, Umatilla County. The low bid submitted for this work

was that of Standard Asphalt Paving Co., Inc., Spokane, Washington, at $21,135.60. There were seven higher bids. The Commission has awarded the contract to the low bidder, Standard Asphalt Paving Co., Inc. at its bid price.

"Construction of two bridges over the Grande Ronde River with approaches thereto on the Starkey Secondary Highway, Union County. Valley Construction Co., Portland, submitted the low bid for this work at $81,856.50. The bid is acceptable and the Commission has awarded the contract to Valley Construction Co. at the price offered.

"Construction of a masonry block maintenance building on State-owned property at the junction of the Warm Springs and Wapinitia Highways in Wasco County. Robert C. Wilson, Corvallis, submitted the low bid for this project at $13,300.00. There were two higher bids. The Commission has awarded the contract to Mr. Wilson at his bid price.

"Grading and paving the Rays Ranch-West Union Section of the Hillsboro-Cornelius Pass County Road in Washington County. The Commission received four bids for this work, the low one being that of Porter W. Yett, Portland, at $165,991.00. This contract has been awarded to Mr. Yett at his bid price."

Mr. James Lamb, Superintendent, Woodburn Boys School, and his Administrative Assistant, Mr. Vernon Merrick, were present concerning the possibility of employing a group of boys from the school to perform maintenance and construction work in State parks as a means of helping the boys become useful citizens. Mr. Lamb was spokesman. He described the plan they have in mind, which, briefly, includes the employment of 18 to 25 boys, ranging in age from 16 to 18 years, to do such work, and he mentioned, as an initial project, to try out the plan, such work in the Silver Falls State Park Area. He suggested the old CCC Camp location near the north falls where water and wood would be available, probably without charge to the School, in exchange for work which would be performed by the boys. The School, he said, would assume the responsibility for equipping the camp beyond the equipment that might already be on hand, and would be responsible for the entire supervision and operation of the camp program, except during working hours when the boys would be under the complete supervision of the State Parks Department, and would do such work as the Park Supervisor might direct. He mentioned that the State Board of Control is very much interested in the plan and has requested details for its consideration. Moreover, the caretaker in the Park, who was contacted, has indicated considerable enthusiasm. Chairman Chandler advised that the members of the State Highway Commission also are very much interested and would like to help the boys as much as is possible; but, the Commission must be very careful in deciding because of the use

of the State Park areas by other youth groups. The Commission, he said, has given some thought to the subject and is of the feeling that the plan would not work very well in park areas where other youth groups congregate, but might work out satisfactorily in other locations. He further stated that the Commission will discuss the matter seriously among themselves and will select a park area where the project might be tried out if the reaction is favorable. Commissioners Reynolds and McIver expressed their approval of Chairman Chandler's statements. Mr. Lamb was told to keep in contact with Mr. C. H. Armstrong, State Park Superintendent, for further information.

A delegation from Wasco and Wheeler Counties, consisting of Messrs. John Silvertooth, merchant, Antelope; Robert Nill, Clarno, representing Clarno Grange; J. R. Wood, Fossil, representing the Fossil District; and County Judge Ward R. Webber of Wasco County, was present in the interests of the Shaniko-Fossil State Secondary Highway No. 291. Mr. Silvertooth was spokesman. He gave as his understanding that the Highway Commission has decided to defer the improvement of this road, for which an amount of $250,000 previously had been provided, and he urged the Commission to reconsider the matter. He recited the history of the road since it was designated a State Secondary Highway, and he gave statistics to indicate how important it is to the people of this community, and to the public generally as a defense highway. He alleged that a former Highway Commission, some 10 or 11 years ago at a meeting in the Clarno Grange Hall, promised to improve the road and he asked that that be done now. Chairman Chandler advised that this project still is in the construction program, but the Commission had not, up to the present, authorized the Engineer to contract the work pending further study; however, the Commission at this meeting definitely decided to proceed with the improvement and instructed the Engineer to advertise for bids as soon as the plans and specifications can be prepared. He added that present indications are that the project will be included in the contract letting in May. Mr. Silvertooth expressed appreciation for the Commission's action. He then asked the Commission to investigate the possibilities of eliminating a sharp point on this highway at Pine Creek, between Fossil and the John Day River. He gave as his feeling that this would not be a very big job and he offered to furnish blasting powder as may be required if the Commission will authorize the improvement. The Commission referred the matter to the Engineer for investigation and report.

The Engineer requested authority to file with the District Engineer, U. S. War Department, an application for a permit to construct a bridge over the Kilchis River on the proposed relocation of the Oregon Coast Highway between Tillamook and Bay City in Tillamook County. The Commission approved the request unanimously.

The Right of Way Engineer brought up for discussion a settlement proposed by C. J. Montag & Co., contractors, of the State's loss by reason of the burning of the Mack Truck Building at the east end of the Steel Bridge in Portland, which was being occupied by this contractor in connection with a highway improvement at that location. He said that Mr. Montag carries $55,000.00 insurance on the building, which is only 50% of its true value, and that his insurance company has offered to settle with the Commission for 50% of the amount that they estimate the repairs will cost, or for an amount of $18,671.75. He recommended that the offer be declined and that the full amount of the State's claim be collected. As a result of discussion, the Commission decided not to release Mr. Montag from his obligation to pay the full amount of the State's loss. The Right of Way Engineer was instructed to convey such information to Mr. Montag and to the company that wrote the insurance coverage on the building.

Commissioner Reynolds brought up for discussion the matter of providing insurance coverage on the new Highway Department Building in Salem. He mentioned that a bill is now before the State Legislature, which, if it passes, authorizes the use of State Restoration Funds to pay the premium expense for insurance on State property. He also stated that he has asked for a rate for insurance on this building. The Commission took no action.

The Commission discussed briefly the matter of constructing a new ferry terminal at Astoria, but deferred action thereon pending a detailed report from the Engineer which he was instructed to render at the next meeting of the Commission.

The Commission discussed the question of reviving the Wocus Marsh-Rocky Point project on the Klamath Lake State Secondary Highway, Klamath County, provision for which previously was made in the 1950-1951 Federal Aid Secondary Highway program. The Commission decided to proceed with this project as originally scheduled and instructed the Right of Way Engineer to complete the acquisition of needed right of way.

The Commission considered and signed agreements as follows:

Agreement with Southern Pacific Company for maintenance of a culvert and drain ditch on railroad property in Klamath Falls.

"Indenture of Access" granting Brazier C. Small et al change in access points to North Santiam Highway near Detroit.

Agreement with Union Oil Company covering lease to the Company of land in Astoria.

Agreements etc. (cont.)

Deed for small parcel of land exchanged with Fred W. Weldin, in Malheur County, for stockpile site.

Deeds, permits, easements (nine instruments) in case of Highway Commission versus Paul Martin et ux for right of way settlement on Columbia River Highway near Troutdale.

Two Agreements with Southern Pacific Company concerning highway encroachments on railroad company property between Salem and Silverton.

Agreement with Deschutes County for disposition of portions of McKenzie-Bend and Redmond-Bend Highways when proposed revision is constructed.

Agreement with U. P. R. R. covering encroachment on the Herman Creek-Gorton Creek Section, Columbia River Highway, in Hood River County.

Letter to Menasha Woodenware Company expressing appreciation for gift of 112 acres of land in Douglas County for recreational purposes.

Agreement with Mr. and Mrs. Martin Cavan covering acquisition of right of way in the town of Bly, Klamath County. (Authorized February 26, 1951).

Agreement with the City of Tillamook covering installation of traffic signals at the intersection of Second Avenue East and Third Street, and at Third Avenue East and Third Street in the City of Tillamook. (Authorized February 26, 1951).

Agreement with Weyerhaueser Timber Company pertaining to easement for construction of Southern Pacific Company's tracks at North Bend. (Authorized February 6, 1951.)

Agreement with the City of Gladstone covering installation of traffic signals at intersection of US99E and Arlington Street, in Gladstone. (Authorized December 19, 1950. Page 17462 of minutes.

Agreement with City of Gladstone covering widening of River Road in Gladstone north from intersection with US99E. (Authorized December 19, 1950. Page 17462 of minutes).

Agreements etc. (cont.)

Agreement with City of Oregon City covering installation of illuminated crosswalk sign at intersection of Molalla and Division Streets in Oregon City. (Authorized January 23, 1951. Page 17583 of minutes.)

Agreement with City of Mill City covering improvement of First Street as a special city allotment fund project. (Authorized February 26, 1951. Page 17728 of minutes.)

Letter to Secretary of State requesting warrant in the sum of $300,000 to increase Revolving Fund from $700,000 to $1,000,000, pursuant to Chapter 200, Oregon Laws 1951.

Agreements with following cities and towns covering proposed special state tax street fund projects: Island City, Nyssa, Oak Ridge, Prairie City.

Agreement with J. W. Long granting permit to construct, maintain and use logging road on State property, known as Humbug Mountain State Park in Curry County.

Three Agreements with O. W. R. & N. Co., Union Pacific covering easement for crossing of railroad line under U. S. Highway 395-730, Umatilla County, Oregon, U. S. Highway No. 30 and U. S. Highway No. 395.

Agreement with O. W. R. & N. Co. & Union Pacific R. R. whereby right of entry is granted the State on railroad property along the Hood River-Mosier Section of the Columbia River Highway in Hood River and Wasco Counties.

Agreement with City of Wallowa covering proposed special state tax street fund project. (Authorized February 26, 1951. Page 17729 of minutes.)

Deeds, Permits, Easements, as follows, in case of Highway Commission versus Paul Martin et ux for right of way settlement on Columbia River Highway:

Bargain and Sale Deed to Paul and Verla Martin for a parcel of land lying in $SE\frac{1}{4}$ of $NW\frac{1}{4}$ of Section 25, Township 1 North, Range 3 East, W. M., Multnomah County. This parcel contains 12.4 acres, more or less.

Agreements etc. (cont.)

Highway Commission versus Paul Martin et ux (cont.)

Bargain and Sale Deed to Paul and Verla Martin for a parcel of land lying in Government Lot 1, Section 25, Township 1 North, Range 3 East, W. M., Multnomah County. This parcel contains 20.8 acres. Also a parcel of land in Section 25 containg 2.9 acres.

Permit (License) Agreement to Paul and Verla Martin to use and fence all of real property which state owns on relocated Columbia River Highway extending from Engineer's Station 519+20 on the west to 651+60 on the east.

Permit (License) Agreement to Paul and Verla Martin to remove noxious weeds and brush from property owned by State on relocated Columbia River Highway.

Permit (License) Agreement to Paul and Verla Martin to construct fence along property owned by State on relocated Columbia River Highway to prevent cattle from wandering upon state or other owned property. This strip of land extends from railroad right of way of O. W. R. & N. Co. on south to a line northerly of the present relocated Columbia River Highway bridge which crosses the Sandy River.

Easement Agreement to Paul and Verla Martin providing access to their property situate in Government Lots 7 and 8 of Section 25, Township 1 North, Range 3 East, W. M., Multnomah County.

The meeting adjourned at 5:30 p. m.

Chairman

State Highway Engineer

Commissioner

EXHIBITS "A" THROUGH "K"

Minutes of April 12 and 13, 1951

EXHIBIT "A"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other materials sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

UNIT #4 - T. H. BANFIELD EXPRESSWAY

EXHIBIT "B"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, the Columbia River Highway as originally constructed between Dodson and Bonneville (Highway Engineer's Stations 1565 plus 00 to 1723 plus 00) in Multnomah County, Oregon (hereinafter called "original highway") was located in part upon property owned by Oregon-Washington Railroad & Navigation Company, under easement granted to the State by that company; and

WHEREAS, the original highway between the said points has been relocated, realigned and reconstructed in another location (hereinafter called "relocated highway") and now is located in part upon property of said Oregon-Washington Railroad & Navigation Company under another easement granted by said company; and

WHEREAS, because of the relocation, realignment and reconstruction of said section of Columbia River Highway there has been eliminated from the original route of said highway that portion thereof located on property of said railroad company, except the portion thereof included in the easement for said relocated highway; and the portions eliminated are parts or fragments of the original highway right of way which are no longer needed for highway right-of-way purposes and should be abandoned by the State and allowed to revert to and revest in said railroad company;

NOW, THEREFORE, IT IS HEREBY UNANIMOUSLY

RESOLVED that the State of Oregon, acting by and through its State Highway Commission, does hereby abandon the use for highway purposes of all that portion of the original Columbia River Highway between Dodson and Bonneville in Multnomah County, Oregon (Highway Engineer's Stations 1565 plus 00 to 1723 plus 00) lying within the property of Oregon-Washington Railroad & Navigation Company, except those portions thereof, if any, included in the easement granted by said railroad company to the State for the relocated highway; and the State does hereby relinquish, release, quitclaim and surrender to said Oregon-Washington Railroad & Navigation Company, its successors and assigns, any and all easements heretofore granted with respect to that portion of the original highway abandoned as aforesaid.

FURTHER RESOLVED that this resolution, together with a map of those portions of the original highway abandoned as aforesaid, be entered in the minutes and records of Oregon State Highway Commission, and that a copy thereof, duly certified by the Secretary of the Commission, be delivered to said Oregon-Washington Railroad & Navigation Company.

EXHIBIT "C"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, Pacific County, Washington, heretofore executed and delivered to the State Highway Commission a lease dated the 6th day of July, 1950, which lease covered certain property in said County and State,

WHEREAS, it now appears that said County has, by an instrument dated March 5, 1951, granted, bargained, sold and conveyed to the Public Utility District No. 2 of Pacific County, Washington, a perpetual easement for right to enter, erect, operate and maintain an electric power line over and across the following described parcel of land, to wit:

> Over and across Tax Lot 1 and the Oregon-Washington Railroad and Navigation Company's Right-of-way across Government Lot 3 all of Section 24, Township 9 North, Range 10 West, W. M. as the said line is staked out and will be constructed.

AND, WHEREAS, the instrument by which said easement is created contains and is conditioned as follows:

> "This easement is subject to the approval of the Oregon State Highway Commission."

AND, WHEREAS, upon information and advice given by the State Highway Engineer, it appears to this Commission that poles and other facilities to be constructed, installed and maintained by said permittee on the property above described within the scope and meaning of said easement, will in no wise conflict with or impair the use of said property now used and occupied by the State under the provisions and privileges of the lease and easement given by Pacific County to the State.

THEREFORE, based upon the foregoing statements and representations, and with the understanding and on the condition that the use or improvement of the property described in said easement shall in no manner and at no time interfere with the activities of the State under the agreement between the State and said Pacific County, the State hereby consents to and approves of said easement as set forth in said permit, a copy of which is attached hereto and made a part hereof.

April 12, 1951

ELECTRIC POWER LINE EASEMENT

The Grantor, herein so styled whether one or more County of Pacific for and in consideration of the sum of One Dollar ($1.00), and/or other valuable considerations, in hand paid by the Public Utility District No. 2 of Pacific County, Washington, herein called the District, hereby grants, bargains, sells and conveys to the District and its assigns, a perpetual easement and right to enter, erect, operate and maintain an electric power line over and across the following described parcel of land, to-wit:

> Over and across Tax Lot 1 and the Oregon-Washington Railroad and Navigation Company's Right-of-way across Government Lot 3 all of Section 24, Township 9 North, Range 10 West, W. M. as the said line is staked out and will be constructed.
>
> This easement is subject to the approval of the Oregon State Highway Commission.

together with the right to cut, remove and destroy such trees as may be necessary in constructing, maintaining and protecting such lines from damage.

DATED this 5th day of March 19 51.

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws, 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the second six-month period of 1950 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Barlow	$ 230.38
Delake	1,950.59
Wheeler	884.68

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 12th day of April, 1951.

EXHIBIT "E"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of each of the following sections of State highways, to wit:

MOSIER-THE DALLES SECTION OF THE COLUMBIA RIVER HIGHWAY IN WASCO COUNTY.

SALEM BY-PASS SECTION OF THE PACIFIC HIGHWAY EAST IN MARION COUNTY.

and in connection therewith to prepare maps showing the route and location of each of said highway sections and to file said maps, reports, and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the Mosier-The Dalles Section of the Columbia River Highway, particularly between a point approximately one mile west of Mosier (Engineer's Station 1500+00) and a point approximately 370 feet west of the west city limits of The Dalles (Engineer's Station 2277+77.4) together with the map which for identification purposes bears Map File No. 7B-7-4, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon. and

1-a. That the action heretofore taken by the Commission on June 16, 1947, in adopting the survey of the Cascade Locks-Mosier Section of the Columbia River Highway in Hood River and Wasco Counties, as disclosed on

page 13994, Part 1, Volume 32 of the minute book, hereby is rescinded and annulled insofar as it pertains to that portion of the said survey between Engineer's Station 1500+00 and Engineer's Station 1586+43.08, but in all other respects remains in full force and effect.

2. That the survey of the Salem By-Pass Section of the Pacific Highway East, particularly between a point on the Pacific Highway East north of Salem near Ward Drive (Engineer's Station 45+25.38) to an intersection with State Street, Salem, extended easterly, (Engineer's Station 252+47.79), together with the map, which for identification purposes bears Map File No. 7B-6-13, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission in Salem, Oregon; and

3. It is further ordered that the said routes and the surveys of the same hereby are adopted as the routes and locations of the COLUMBIA RIVER HIGHWAY and the PACIFIC HIGHWAY EAST between the above-described points.

4. That when said sections of said highways are permanently constructed, the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

5. That this resolution be entered in the minutes and records of the Commission as of the 12th day of April, 1951.

Footnote:

** The maps mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, said resolution being File No. 55, under the heading "Resolutions Adopting Surveys" and said maps by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "F"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3328 with The Central Heating Company for grading and paving on the Cascade Gorge-Prospect Section of the Crater Lake Highway in Jackson County, completed December 13, 1950.

Contract No. 3433 with Newport Construction Company for furnishing crushed material in stockpiles on the Newport Section of the Oregon Coast and Corvallis-Newport Highways in Lincoln County, completed February 14, 1951.

Contract No. 3447 with Rogers Construction Company for furnishing crushed material in stockpiles on the Mitchell-John Day River Section of the Ochoco Highway in Wheeler and Grant Counties, completed February 16, 1951.

Contract No. 3348 with Lee Hoffman for construction of Marion Street Bridge piers on the Salem-Dallas Highway in Marion and Polk Counties, completed March 19, 1951.

Contract No. 3307 with Barney B. Helser for furnishing crushed materials in stockpile on the Vale Section of the Central Oregon and Vale-West Highways in Malheur County, completed February 23, 1951.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "G-1"

Minutes of April 12 and 13, 1951

ORDER REDUCING MAXIMUM LOAD LIMIT ON NEHALEM RIVER BRIDGE NORTH OF MIST

WHEREAS, the roads or highways hereinafter named have been designated and declared to be and are state highways and have been improved and are being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon as state highways:

NEHALEM SECONDARY HIGHWAY No. 102.

AND WHEREAS, on each of the said state highways there are located certain bridge structures which, in the judgment of the State Highway Commission, are incapable of safely carrying the traffic to which they are being subjected, and in order to protect said bridge structures against damage and injury and in order to safeguard traffic over said bridge structures it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interest of the said bridge structures and each of them and of the traffic which uses the said bridge structures that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found and it is the judgment of the Commission that the maximum gross loads which shall be permitted upon any single span of any of the said structures at any time shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission having as a result of due investigation found that the bridge structures above referred to and hereinafter designated are incapable of safely sustaining or supporting a total gross load in excess of that specified in the table given hereinbelow:

IT IS HEREBY ORDERED that the total gross weight of combined load and vehicle, or the maximum gross weight of any combination of vehicles and load which at any one time shall be permitted upon any single or individual span of the bridge structures hereinafter described shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers

(cont.)

attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to-wit:

NEHALEM SECONDARY HIGHWAY No. 102.

At M. P. 42.40	Bridge No. 3140 crossing Nehalem River 2½ miles north of Mist.	10 tons (20,000 lbs.)

Effective date - March 30, 1951.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394, O. C. L. A., shall be in full force and effect until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that R. H. Baldock, as State Highway Engineer, be and he hereby is instructed to post a notice in a conspicuous place and manner at each end of the above-named bridge structures, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the County Court of each county in which any of said highways are located, and that a certified copy of said order be furnished the Superintendent of the Department of State Police for his information.

Dated this 13th day of April, 1951.

EXHIBIT "G-2"

Minutes of April 12 and 13, 1951

ORDER REDUCING MAXIMUM LOAD LIMITS ON CERTAIN STATE HIGHWAYS

WHEREAS, the highways and sections of highways hereinafter set forth or described have been duly designated and declared to be and are state highways and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

MEDICAL SPRINGS Secondary Highway No. 340
DIAMOND VALLEY Secondary Highway No. 441
ROME-PRINCETON Secondary Highway No. 442

AND WHEREAS, said highways and sections of highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highways and sections of highways during the present period of freezing and thawing, and in order to protect said highways and sections of highways agains such damage and injury it is deemed and is the judgment of the Highway Commission, and said Highway Commission finds that it will be for the best interests of said highways tnat the maximum weights permitted and authorized by law be reduced during such period; and

WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon said highways and sections of highways during said period shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said highways and sections of highways were not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highways and sections of highways that the maximum total weight of load and vehicle which shall be permitted upon said highways and sections of highways during the said period, commencing on the dates hereinafter specified, shall be reduced so as to conform to the requirements fixed in this order.

(cont.)

EXHIBIT "G-2" (cont.)

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle or combination of vehicles which shall be permitted upon the following described highways or sections of highways shall not exceed 11,000 pounds gross on any single axle nor 20,000 pounds gross on any pair of tandem axles nor a maximum of 36,000 pounds gross on all axles of the vehicle or combination of vehicles:

Name of Highway and No.		County	Section Restricted	Date Effective 1951
Medical Springs	340	Union	Catherine Creek (M. P. 9.57) to Baker County Line (M. P. 22.90).	Mar. 30
Diamond Valley	441	Harney	Crane (M. P. 0.00) to Jct. Rome-Princeton Hwy. (M. P. 11.15).	Mar. 12
Rome-Princeton	442	Harney & Malheur	Entire Length	Mar. 12

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394, O. C. L. A., shall be in full force and effect from the effective date hereinabove specified until modified, annulled, or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and placed at each end of each of the above highways and/or sections of highways and at the important crossroads on said highways so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 13th day of April, 1951.

EXHIBIT "H-1"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

EXHIBIT "I-1"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS the Northeast Portland Highway which extends easterly a distance of 5.1 miles from its junction with the Pacific Highway East in North Portland, to its junction with the Columbia River Highway (Sandy Boulevard), is a state secondary highway, under the jurisdiction and control of the State Highway Commission, being identified in the Commission's records as the Northeast Portland Secondary Highway No. 123; and

WHEREAS, it appears that on a section of said highway situate between Northeast Cully Boulevard and Northeast 82nd Avenue in Multnomah County, there is located on property adjacent to the said highway an assembly plant of the Kaiser-Frazer Corporation and other industrial and business establishments, and that patrons of said establishments and others park their vehicles within the right of way limits of said highway at such location and leave said vehicles so parked for extended periods of time; and

WHEREAS, because said highway throughout its entire length carries a large volume of traffic, the parking of vehicles along and upon the shoulders of said highway between Northeast Cully Boulevard and Northeast 82nd Avenue creates a traffic hazard, which in the opinion of the Commission should be prohibited; and

WHEREAS, the width of the highway shoulders at said location is not sufficient to permit the parking of vehicles and to provide the safety which the Commission feels is necessary for the traveling public; and

WHEREAS, the maneuvering of vehicles within the traveled portion of said highway in connection with the parking and unparking of said vehicles upon the shoulders thereof restricts and impairs the use of said traveled portion of said highway, and thereby creates a hazard to through traffic moving upon said highway, and to parked vehicles and occupants thereof; and

WHEREAS, the Commission, based upon the report of its Traffic Engineer and the recommendations of the State Highway Engineer, is of the opinion that for safety and convenience of traffic, all parking of vehicles upon the shoulders on both sides of said highway within said area should be prohibited;

(cont.)

NOW, THEREFORE, this Commission, all members being present and voting affirmatively, does hereby order:

1. That based upon the facts and recommendations placed before this Commission, the Commission does hereby find and declare that the parking of motor vehicles upon and along the north and south shoulders of the Northeast Portland State Secondary Highway No. 123 between Northeast Cully Boulevard (M. P. 3.46, Engineer's Station 183+00) and Northeast 82nd Avenue (M. P. 4.20, Engineer's Station 221+50), a distance of approximately 3,900 feet, creates a hazard to traffic on said highway and to parked vehicles and the occupants thereof, which hazard in the opinion of this Commission should be removed.

2. That for the purpose of protecting the general public and especially the motoring public using the said highway in said vicinity, it is hereby ordered that the parking of vehicles upon and along the north shoulder and upon the south shoulder of said highway between Northeast Cully Boulevard (M. P. 3.46, Engineer's Station 183+00) and Northeast 82nd Avenue (M. P. 4.20, Engineer's Station 221+50) is prohibited.

3. The State Highway Engineer hereby is directed to erect and thereafter maintain upon and along said highway at the termini of said area, and at such points between said termini as in his judgment may be necessary to properly inform and advise the public, suitable and adequate signs containing the words "NO PARKING ON HIGHWAY SHOULDERS."

4. That a certified copy of this resolution be delivered to the Superintendent of the Department of State Police for his information and like copies to the sheriff of Multnomah County and to the Kaiser-Frazer Corporation.

5. That this resolution be entered in the minutes and records of the Highway Commission as of the 13th day of April 1951.

EXHIBIT "I-2"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, Front Street in the city of Oakland, Douglas County, Oregon, is a street heretofore selected and designated as a street over which to route state highway traffic, particularly Pacific Highway traffic, within the corporate limits of Oakland; and

WHEREAS, it has been demonstrated that the parking of vehicles on both sides of said street from its intersection with Chestnut Street (M. P. 183.26, Engineer's Station 1718+76), southerly to the south city limits of Oakland (M. P. 183.36, Engineer's Station 1724+00) in said city constitutes and is a hazard to traffic and interferes with the safe and easy flow or movement of vehicles over said street; and

WHEREAS, it appears that the Common Council of the City of Oakland on the 9th day of February, 1951, adopted an ordinance by which the parking of vehicles on both sides of said Front Street between said termini is prohibited except during short periods when vehicles are actually being loaded or unloaded; and

WHEREAS, it is the judgment of this Commission that the State through its State Highway Commission should cooperate with the City of Oakland in the accomplishment of the purpose of said ordinance.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the Commission does hereby ratify and approve said ordinance as adopted February 9, 1951, by the Common Council of the City of Oakland and hereby offers the cooperation of the State Highway Department to the end that the full benefit of said ordinance may be accomplished and the convenience and safety of the traveling public thereby advanced.

2. That the State Highway Engineer be and he hereby is instructed to erect "NO PARKING ON HIGHWAY SHOULDERS" signs on both sides of the highway at said termini and at such points between said termini as in the judgment of said Engineer are necessary to accomplish

(cont.)

the purposes of said city ordinance and the action of the Highway Commission as herein declared.

3. That a certified copy of this resolution be sent to the Oakland City Council and like copies to the Superintendent of the Department of State Police and to the sheriff of Douglas County for their information and guidance.

4. That this resolution be entered in the minutes and records of the State Highway Commission as of the 13th day of April, 1951.

EXHIBIT "I-3"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, the Pacific Highway is one of the major state highways of the state, is likewise a part of the Federal Highway System and is under the jurisdiction and control of the State Highway Commission, being identified in the Commission's records as State Highway No. 1, and U. S. Highway No. 99; and

WHEREAS, it appears that on a section of said highway situate a short distance south of the city of Oakland in Douglas County, there is located on property adjacent to the said highway a sawmill known as Martin Bros. Mill, and that employees of said mill and others park their vehicles within the right of way limits of said highway at such location and leave said vehicles so parked for extended periods of time; and

WHEREAS, because said highway throughout its entire length carries a large volume of traffic, the parking of said vehicles on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission a hazard is created not only to through traffic but to the owners and occupants of said parked vehicles; and

WHEREAS, in the opinion of this Commission, public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of vehicles should be prohibited.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows.

1. The Commission does hereby find and declare, based upon investigation, report and recommendation made by and under supervision of the State Highway Engineer, that the parking of vehicles along both sides of the Pacific Highway (US99) between the south city limits of Oakland (M. P. 183.36, Engineer's Station 1724+00) and a point approximately 844 feet southerly therefrom (M. P. 183.54, Engineer's Station 1732+44), a distance of approximately 0.18 miles, creates a hazard not only to through traffic on said highway but also to persons owning or using said parked vehicles.

(cont.)

2. That in the opinion of this Commission the right of way of said highway at said location is not of sufficient width to permit the parking of vehicles thereon and at the same time to provide the degree of safety and convenience which in the opinion of this Commission should be provided the motoring public.

3. That this Commission does further find and declare that the parking of vehicles for long periods of time on the right of way of said highway between said Mile Post 183.36 and said Mile Post 183.54 should be and hereby is prohibited.

4. That the State Highway Engineer be and he hereby is instructed to erect "NO PARKING ON HIGHWAY SHOULDERS" signs on both sides of the highway at said termini and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

5. That a certified copy of this resolution be sent to the owner and operator of Martin Bros. Mill and that like copies be mailed to the Superintendent of the Department of State Police and to the Sheriff of Douglas County for their information and guidance.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the 13th day of April, 1951.

EXHIBIT "I-4"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, Main Street in the city of Myrtle Creek, Douglas County, is a street heretofore selected and designated by the Highway Commission as a street over which to route state highway traffic, particularly Pacific Highway traffic, within the corporate limits of Myrtle Creek; and

WHEREAS, it has been demonstrated that the parking of vehicles on both sides of said street from a point approximately 75 feet south of the bridge over Myrtle Creek (M. P. 220.27, Engineer's Station 485+00) to the south city limits of the city of Myrtle Creek (M. P. 220.66, Engineer's Station 491+80) in said city constitutes and is a hazard to traffic and interferes with the safe and easy flow or movement of vehicles over said street; and

WHEREAS, it appears that the Common Council of the City of Myrtle Creek on or prior to the 25th day of January, 1951, adopted Resolution No. 73 by which the parking of vehicles on both sides of said Main Street between said termini is prohibited; and

WHEREAS, it is the judgment of this Commission that the State of Oregon through its State Highway Commission should cooperate with the City of Myrtle Creek in the accomplishment and purpose of said city Resolution No. 73.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the Commission does hereby ratify and approve Resolution No. 73 adopted by the Common Council of the City of Myrtle Creek on or prior to the 25th day of January, 1951, and hereby offers the cooperation of the State Highway Department to the end that the full benefit of said resolution may be accomplished and the convenience and safety of the traveling public thereby advanced.

(cont.)

2. That the State Highway Engineer be and he hereby is instructed to erect "NO PARKING ON HIGHWAY SHOULDERS" signs on both sides of the highway at said termini and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of said city Resolution No. 73 and the action of the Highway Commission as herein declared.

3. That a certified copy of this resolution be sent to the Myrtle Creek City Council and like copies to the Superintendent of the Department of State Police and to the Sheriff of Douglas County for their information and guidance.

4. That this resolution be entered in the minutes and records of the State Highway Commission as of the 13th day of April, 1951.

EXHIBIT "I-5"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, the Redwood Highway is one of the major state highways of the state, is likewise a part of the Federal Highway System, and is under the jurisdiction and control of the State Highway Commission, being identified in the Commission's records as State Highway No. 25, and U. S. Highway No. 199; and

WHEREAS, it appears that on said highway, situate approximately 1.40 miles west of the city of Grants Pass in Josephine County, there is located on property adjacent to the said highway, a drive-in theater, which by reason of traffic entering and leaving said theater grounds and the parking of vehicles in the right of way of said highway, at times creates adverse shoulder parking conditions; and

WHEREAS, because said highway throughout its entire length carries a large volume of traffic, the parking of vehicles on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission a hazard is created not only to through traffic but to the owners and occupants of said parked vehicles; and

WHEREAS, in the opinion of this Commission, public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of vehicles should be prohibited.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendation made by and under the supervision of the State Highway Engineer, that the parking of vehicles along the Redwood Highway (US199) between Mile Point 41.25 (Engineer's Station 2252+50), approximately 0.27 mile west of Allen Creek, and Mile Point 41.02 (Engineer's Station 2240+00), approximately 0.50 mile west of Allen Creek, a distance of 0.23 mile in Josephine County, creates a hazard not only to through traffic on said highway but also to person owning and using said parked vehicles.

2. That in the opinion of this Commission the right of way of said highway at said location is not of sufficient width to permit the parking of vehicles thereon and at the same time to provide the degree of safety and convenience which in the opinion of this Commission should be provided the motoring public.

3. That this Commission does further find and declare that the parking of vehicles for long periods of time on the right of way of said highway between M. P. 41.25 and M. P. 41.02 should be and hereby is prohibited.

4. That the State Highway Engineer be and he hereby is instructed to erect "NO PARKING ON HIGHWAY SHOULDERS" signs at said termini and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

5. That a certified copy of this resolution be sent to the owner and operator of said Drive-In Theater and that like copies be mailed to the Superintendent of the Department of State Police and to the Sheriff of Josephine County for their information and guidance.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the 13th day of April, 1951.

EXHIBIT "I-6"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, Front Street (McLoughlin Boulevard) in the city of Milwaukie, Clackamas County, is a street heretofore selected and designated by the State Highway Commission as a street over which to route state highway traffic using the Pacific Highway East within the corporate limits of Milwaukie; and

WHEREAS, it has been demonstrated that the parking of vehicles on the westerly side of said street for a distance of 50 feet measured northerly from a point which is 771 feet south of the south property line of Washington Street, which point also is the north line of a roadway leading to the water front in said city, constitutes and is a hazard to traffic and interferes with the safe and easy flow and movement of vehicles over said street; and

WHEREAS, it appears that the Common Council of the City of Milwaukie on the 26th day of March, 1951, adopted Resolution No. 3 (1951) by which resolution the parking of vehicles on the westerly side of said Front Street between said termini is prohibited; and

WHEREAS, it is the judgment of this Commission that the State through its State Highway Commission should cooperate with the City of Milwaukie in the accomplishment of the purpose of said Resolution No. 3.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the Commission does hereby ratify and approve Resolution No. 3 (1951) adopted by the Common Council of the City of Milwaukie on the 26th day of March, 1951, and hereby offers the cooperation of the State Highway Department to the end that the full benefit of said resolution may be accomplished and the convenience and safety of the traveling public be advanced.

2. That the State Highway Engineer be and he hereby is instructed to erect "NO PARKING ON HIGHWAY SHOULDERS" signs at said termini and at such points between said termini as in the judgment of said

(cont.)

Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

3. That a certified copy of this resolution be sent to the Common Council of the City of Milwaukie and like copies to the Superintendent of the Department of State Police and to the Sheriff of Clackamas County for their information and guidance.

4. That this resolution be entered in the minutes and records of the Commission as of April 13, 1951.

EXHIBIT "I-7"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, the Pacific Highway is one of the major state highways of the state, is likewise a part of the Federal Highway System, and is under the jurisdiction and control of the State Highway Commission, being identified in the Commission's records as State Highway No. 1 and U. S. Highway No. 99; and

WHEREAS, it appears that on said highway situate approximately 1.14 miles south of Grants Pass in Josephine County, there is located on property adjacent to said highway an auction market and that the patrons of said auction market and others, park their vehicles within the right of way limit of said highway at said location and leave said vehicles so parked for extended periods of time; and

WHEREAS, because said highway throughout its entire length carries a large volume of traffic, the parking of said vehicles on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission a hazard is created not only to through traffic but to the owners and occupants of said parked vehicles; and

WHEREAS, in the opinion of this Commission, public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of vehicles should be prohibited.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendation made by and under the supervision of the State Highway Engineer, that the parking of motor vehicles along the Pacific Highway between a junction with a county road, approximately 0.96 mile south of Grants Pass (M. P. 280.07, Engineer's Station 45+00), and a point 0.36 mile south thereof (M. P. 280.43, Engineer's Station 64+00), in Josephine County, creates a hazard not only to through traffic on said highway but also to persons owning and using said parked vehicles.

(cont.)

2. That in the opinion of this Commission the right of way of said highway at said location is not of sufficient width to permit the parking of vehicles thereon and at the same time to provide the degree of safety and convenience which in the opinion of this Commission should be provided the motoring public.

3. That this Commission does further find and declare that the parking of vehicles for long periods of time on the right of way of said highway between said M. P. 280.07 and said M. P. 280.43 should be and hereby is prohibited.

4. That the State Highway Engineer be and he hereby is instructed to erect "NO PARKING ON HIGHWAY SHOULDERS" signs at said termini and at such points between said termini as in the judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as herein declared.

5. That a certified copy of this resolution be sent to the owner and operator of said auction mart and that a like copy be mailed to the Superintendent of the Department of State Police and to the Sheriff of Josephine County for their information and guidance.

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the 13th day of April, 1951.

EXHIBIT "J-1"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation or by the exercise of the power of eminent domain real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pacific Highway East is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen, construct, and improve the Lana Avenue-Academy Street Section of the Pacific Highway East within the city limits of the City of Salem, Oregon, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, construction, improvement, and maintenance of the Lana Avenue-Academy Street Section of the Pacific Highway East real property located in Marion County, Oregon, and described as follows:

A parcel of land lying in the northwest quarter ($NW\frac{1}{4}$) of Section 13, Township 7 South, Range 3 West, W. M., Marion County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Charles G. Denison and Mary L. Denison recorded in Book 374, Page 322, of Marion County Record of Deeds; the said parcel

(cont.)

being the easterly ten (10) feet of the foregoing described property parallel to and adjoining the westerly right of way line of the Pacific Highway East approximately between Engineer's Stations 52+72 and 53+23, the westerly line of said parcel being parallel to and 40 feet westerly of said highway center line.

The parcel of land to which this description applies contains 510 square feet.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twelfth day of April, 1951.

EXHIBIT "J-2"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property or any right of interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Sams Valley Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate in part, construct, improve and maintain the Ramsey Canyon-Crater Lake Section of the Sams Valley Highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation in part, construction, improvement, and maintenance of the Ramsey Canyon-Crater Lake Section of the Sams Valley Highway, including a portion of the Dodge Bridge and an approach thereto, real property located in Jackson County, Oregon, and described as follows, to wit:

A parcel of land lying in Government Lot 4 of Section 17, Township 35 South, Range 1 West, W. M., Jackson County, Oregon, and being a portion of the following-described property: that tract of land which was conveyed by that certain deed to Alicia Ann Ruhl recorded in Book 320, Page 127, of

(cont.)

Jackson County Record of Deeds; the said parcel being described as follows:

Beginning at the most southerly corner of the aforesaid property, which is the center of the westerly main pier of Dodge Bridge, said corner being 83.3 feet northerly from (when measured at right angles to) the relocated center line of the Sams Valley Highway at Engineer's Station 734+95.67, said corner also being 1991.41 feet north and 3633.70 feet east of the southwest corner of said Section 17; thence South 80° 52' West along the southerly line of aforesaid property a distance of 349.8 feet; thence North 44° 48' West, continuing along the southerly line of aforesaid property, a distance of 210.6 feet to a point which is 60 feet northerly from (when measured at right angles to) said relocated highway center line at Engineer's Station 729+94.5; thence North 82° 05' East a distance of 221.6 feet to a point which is 140 feet northerly from (when measured at right angles to) said relocated center line at Engineer's Station 732+00; thence South 76° 29' East parallel to said relocated center line a distance of 315 feet, more or less, to the west bank of the Rogue River; thence southerly along the meandering line of the west bank of the Rogue River a distance of 59.9 feet, more or less, to the point of beginning.

The parcel of land to which this description applies contains 1.30 acres, of which 0.54 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 0.76 acre lies outside of the existing right of way.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owner.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twelfth day of April, 1951.

EXHIBIT "J-3"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Coast Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate in part, widen, construct, improve and maintain the Bay Park-Delmar Section of the Oregon Coast Highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Oregon Coast Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation in part, widening, construction, improvement and maintenance of the Bay Park-Delmar Section of the Oregon Coast Highway real property located in Coos County, Oregon, and described as follows: to wit:

A parcel of land lying in Government Lot 6 of Section 34, Township 26 South, Range 13 West, W. M., Coos County, Oregon, and being a portion of the following described property: that tract of land

(cont.)

which was conveyed by that certain deed to Elsie Lee Burrows recorded in Book 150, Page 430, of Coos County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land variable feet in width, lying on each side of the center line of the relocated Oregon Coast Highway as said highway has been surveyed over and across or adjacent to the said property; the location of the said strip of land (insofar as it encroaches upon said property) being determined by the said center line from Station 402+78.42 to Station 407+27.5, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 402+78.42, said point being 2004.7 feet north and 431.9 feet east of the south quarter corner of Section 34, Township 26 South, Range 13 West, W.M.; thence on a 4583.66 foot radius curve right (the long chord of which bears South 9° 04' West 408.94 feet) a distance of 409.08 feet; thence on a spiral curve right (the long chord of which bears South 11° 52' West) a distance of 40 feet to Engineer's Station 407+27.5, said center line crossing the north and south lines of said property approximately at Stations 402+90 and 407+27 respectively.

The widths (in feet) of the strip of land above referred to are as follows:

Station to Station	Width on Easterly Side of Center Line	Width on Westerly Side of Center Line
402+78.4 to 407+27.5	To R. R. right of way	30

The parcel of land to which this description applies contains 1.14 acres, of which 0.40 acre lies within the existing right of way, title to which hereby is acknowledged to be in the public, and 0.74 acre lies outside of the existing right of way.

2. That in addition to acquisition of fee simple title to the aforesaid-described parcel of real property it is necessary that there be acquired all easements and rights of access and all rights of ingress, egress and regress to, from and between the remaining land of the larger tract of which the above-described property is a part and the above-described property and any highway now or hereafter constructed thereon, and that all

(cont.)

approaches or access from the Oregon Coast Highway to said remaining land and from said remaining land to the Oregon Coast Highway be prohibited, except that there shall be reserved unto the owners of said remaining property rights of access for two approaches from said remaining land to the Oregon Coast Highway as follows:

a. A right of access for an approach, not to exceed twenty-five feet in width, on the west side of the Oregon Coast Highway opposite Highway Engineer's Station 403+90;

b. A right of access for an approach, not to exceed twenty-five feet in width, on the west side of the Oregon Coast Highway opposite Highway Engineer's Station 404+80.

The State shall have the right, at its option, to build at any future time at its sole cost a frontage road upon right of way now owner or lands to be acquired by the State, and upon construction of such frontage road the rights of access for the said two approaches to the relocated and improved Oregon Coast Highway herein set forth to be reserved shall terminate and cease and the owners of said remaining property shall thereupon have access to the frontage road. Said frontage road shall be connected to the main highway only at such point or points as the State of Oregon may designate.

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his

absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twelfth day of April, 1951.

EXHIBIT "J-4"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Coast Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate in part, widen, construct, improve and maintain the Bay Park-Delmar Section of the Oregon Coast Highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Oregon Coast Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation in part, widening, construction, improvement and maintenance of the Bay Park-Delmar Section of the Oregon Coast Highway real property located in Coos County, Oregon, and described as follows, to wit:

(cont.)

EXHIBIT "J-4" (cont.)

A parcel of land lying in Government Lots 6 and 5 and the southeast quarter ($SE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 14, Township 26 South, Range 13 West, W. M., Coos County, Oregon; the said parcel being all that portion of said subdivisions of Section 14 included in a strip of land extending to the railroad right of way on the easterly side and variable in width on the westerly side of the center line of the Oregon Coast Highway as said highway has been relocated over and across said Section 14, which center line is described as follows:

Beginning at a point which is Engineer's center line Station 208+28.44, opposite and 43.0 feet distant from which point the easterly line of the said strip of land intersects the north line of said Lot 6, Section 14; said point being 2625.3 feet north and 728.6 feet east of the south quarter corner of Section 14, Township 26 South, Range 13 West, W. M.; thence on a spiral curve right (the long chord of which bears South 7° 53' 05" West) a distance of 188.06 feet; thence on an 8185.11 foot radius curve right (the long chord of which bears South 16° 17' 30" West 2240.56 feet) a distance of 2247.62 feet; thence on a spiral curve right (the long chord of which bears South 24° 58' 30" West) a distance of 350 feet; thence South 25° 23' West a distance of 16.0 feet to Engineer's Station 236+30.1, said center line crossing the south line of said Section 14 approximately at Station 235+85.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Width on Easterly Side of Center Line	Width on Westerly Side of Center Line
208+28.44	to 217+00	To R. R. right of way	60
217+00	to 223+00	To R. R. right of way	70
223+00	to 236+30	To R. R. right of way	50

The parcel of land to which this description applies contains 6.78 acres, of which 2.55 acres lie within the existing right of way, title to which hereby is acknowledged to be in the public, and 4.23 acres lie outside of the existing right of way.

(cont.)

2. That in addition to acquisition of fee simple title to the aforesaid described parcel of real property it is necessary that there be acquired all easements and rights of access and all rights of ingress, egress and regress to, from and between the remaining land of the larger tract of which the above-described property is a part and the above-described property and any highway now or hereafter constructed thereon, and that all approaches or access from the Oregon Coast Highway to said remaining land and from said remaining land to the Oregon Coast Highway be prohibited, except that there shall be reserved unto the owners of said remaining property rights of private access for eight approaches from said remaining land to the Oregon Coast Highway as follows:

a. A right of private access for an approach, not to exceed twenty-five feet in width, on the east side of the Oregon Coast Highway opposite Highway Engineer's Station 208+55;

b. A right of private access for an approach, not to exceed twenty-five feet in width, on the east side of the Oregon Coast Highway opposite Highway Engineer's Station 224+50;

c. A right of private access for an approach, not to exceed twenty-five feet in width, on the east side of the Oregon Coast Highway opposite Highway Engineer's Station 230+00;

d. A right of private access for an approach, not to exceed twenty-five feet in width, on the west side of the Oregon Coast Highway opposite Highway Engineer's Station 224+20;

e. A right of private access for an approach, not to exceed twenty-five feet in width, on the west side of the Oregon Coast Highway opposite Highway Engineer's Station 228+80;

f. A right of private access for an approach, not to exceed twenty-five feet in width, on the west side of the Oregon Coast Highway opposite Highway Engineer's Station 231+00;

g. A right of private access for an approach, not to exceed twenty-five feet in width, on the west side of the Oregon Coast Highway opposite Highway Engineer's Station 234+20;

h. A right of private access for an approach, not to exceed twenty-five feet in width, on the west side of the Oregon Coast Highway opposite Highway Engineer's Station 236+00.

(cont.)

Private access, as herein referred to, is defined as a right of access from and to land abutting a highway, said access to be for ordinary travel to and from the abutting land only and shall not be used in connection with any commercial institution or activity established or conducted on the adjoining property which, in any manner, caters to, invites, solicits from, or is dependent upon the users of the highway.

The State shall have the right, at its option, to build at any future time at its sole cost a frontage road upon right of way now owned or lands to be acquired by the State, and upon construction of such frontage road the rights of private access for the said eight approaches to the relocated and improved Oregon Coast Highway herein set forth to be reserved shall terminate and cease and the owners of said remaining property shall thereupon have access to the frontage road. Said frontage road shall be connected to the main highway only at such point or points as the State of Oregon may designate.

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twelfth day of April, 1951.

EXHIBIT "J-5"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes;and

WHEREAS, the Columbia River Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate, construct, and improve the Hood River-Mosier Section of the said Columbia River Highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Columbia River Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there are needed and required for right of way for use in connection with the relocation, construction, improvement, and maintenance of the Hood River-Mosier Section of the Columbia River Highway two parcels of real property located in Hood River County, Oregon, and described as follows, to wit:

(cont.)

EXHIBIT "J-5" (cont.)

Parcel No. 1

A parcel of land lying in the Nathan Benson D. L. C., also in the southeast quarter ($SE\frac{1}{4}$) of Section 25, Township 3 North, Range 10 East, W. M., Hood River County, Oregon; the said parcel being a strip of land 200 feet in width, 100 feet on each side of the center line of the Columbia River Highway as said highway has been relocated, said strip of land extending from the west line of said Benson D. L. C. to a line which is parallel to and 500 feet easterly from said west line of said Benson D. L. C.; said center line being described as follows:

Beginning at Engineer's center line Station 1204+56.55, said Station being 308.96 feet north and 565.98 feet west of the most westerly southwest corner of said Nathan Benson D. L. C.; thence North 89° 37' East 1143.45 feet to Station 1216+00; said center line crossing the west line of said Benson D. L. C. approximately at Station 1210+22.

Excepting therefrom those portions of said strip of land lying within the following tracts of land:

1. That tract conveyed to Arthur C. Lofts, Jr., and Hilma Lofts by deed recorded in Book 43, Page 273;

2. That tract conveyed to General Petroleum Corp. by deed recorded in Book 28, Page 503;

3. That tract conveyed to C. M. Sheppard by deed recorded in Book 31, Page 396;

4. That tract conveyed to Tum-A-Lum Lumber Co. by deed recorded in Book 22, Page 189;

5. That tract conveyed to Standard Oil Co. by deed recorded in Book 9, Page 322;

6. That tract conveyed to State of Oregon, by and through its State Highway Commission, by deed recorded in Book 33, Page 317.

All of the above deeds are recorded in the Hood River County Records of Deeds.

The parcel of land to which this description applies contains 1.40 acres

Parcel No. 2

A parcel of land lying in the Southeast quarter (SE¼) of Section 25, Township 3 North, Range 10 East, and in the Southwest quarter (SW¼) of Section 30, Township 3 North, Range 11 East, W. M., Hood River County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Oregon Lumber Company recorded in Book D, Page 534, of Hood River County Record of Deeds; the said parcel being described as follows:

Beginning at the intersection of the southerly line of said property with the center line of the Hood River-White Salmon Highway, said point being 510.7 feet north and 634.9 feet east of the most westerly southwest corner of the Nathan Benson D. L. C. No. 40; thence along the center of said highway North 61° 37' 40" East 169.17 feet; thence continuing along said highway center line on a 1909.86 foot radius curve left (the long chord of which bears North 52° 00' 10" East 638.38 feet) a distance of 641.39 feet; thence South 37° 54' 50" East 344.84 feet to the southerly line of said property; thence along said southerly line as follows: South 86° 05' 30" West 122.0 feet, South 66° 35 50" West 241.58 feet, South 60° 52' 50" West 240.33 feet, and North 86° 19' 20" West 311.09 feet to the point of beginning. EXCEPTING therefrom any portion lying within that tract conveyed to the Oregon-Washington Bridge Co. by deed recorded in Book 17, Page 580 of Hood River County Deed Records. Also excepting any portion lying within that tract conveyed to Hood River County by deed recorded in Book 18, Page 346 of Hood River County Deed Records.

The parcel of land to which this description applies contains 2.80 acres, of which 0.27 acre lies within the existing right of way, title to which hereby is acknowledged to be in the public, and 2.53 acres lie outside of the existing right of way.

2. That in addition to acquisition of fee simple title to the aforesaid-described parcels of real property it is necessary that there be acquired or extinguished such interest or rights, if any there be, by which rights of access or any rights in the nature of rights of access may accrue by reason of the adjacency of the relocated Columbia River Highway, when constructed upon said Parcel No. 1, to the remaining land of the larger tract of which the said

(cont.)

Parcel No. 1 is a part, and that all access to said Parcel No. 1 and the Columbia River Highway, to be constructed thereon, from the remaining land of the larger tract and all approach or access from said highway to said remaining land be prohibited, except that there shall be reserved unto the owner of the remaining larger tract of which said Parcel No. 1 is a part right of access to frontage roads to be constructed by the State of Oregon upon said Parcel No. 1 on both the southerly and northerly sides of the main highway, said frontage roads to be connected to the main highway only at such point or points as designated by the State of Oregon.

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owner.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twelfth day of April, 1951.

EXHIBIT "J-6"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation or by the exercise of the power of eminent domain real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Siuslaw Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate, construct, and improve the North Fork Siuslaw River Section of said Siuslaw Highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Siuslaw Highway is a major highway of the State, and as such carries large volumes of traffic, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation, construction, improvement, and maintenance of the North Fork Siuslaw River Section of the Siuslaw Highway real property located in Lane County, Oregon, and described as follows, to wit:

(cont.)

EXHIBIT "J-6" (cont.)

A parcel of land lying in Lot 2 of Section 25 and Lot 1 of Section 26, Township 18 South, Range 12 West, W. M., Lane County, Oregon, the said parcel being all that portion of said Lot 2, Section 25, and said Lot 1, Section 26, included in a strip of land 100 feet in width, 60 feet on the northerly and 40 feet on the southerly side of the center line of the Siuslaw Highway as said highway has been relocated over and across or adjacent to the said property, which center line is described as follows:

Beginning at the center of the North Fork of the Siuslaw River at a point which is Engineer's center line Station 975+00, said point being 5.0 feet north and 838.3 feet east of the west quarter corner of Section 25, Township 18 South, Range 12 West, W. M.; thence South 77° 53' West a distance of 510.2 feet; thence on a 2864.79 foot radius curve right (the long chord of which bears South 85° 05' 30" West 718.93 feet) a distance of 720.8 feet to Engineer's Station 987+31.0 back equals Engineer's Station 992+03.3 ahead, at which station the westerly end of said strip of land lies at right angles to said center line.

The parcel of land to which this description applies contains 1.33 acres, of which 0.56 acre lies within the existing right of way, title to which hereby is acknowledged to be in the public, and 0.77 acre lies outside of the existing right of way.

2. That in addition to acquisition of fee simple title to the aforesaid-described real property it is necessary that there be acquired all easements and rights of access and all rights of ingress, egress and regress from and to the remaining land of the larger tract of which the above-described property is a part and the above-described property and any highway now or hereafter constructed thereon, and that there be acquired or extinguished such interest or rights, if any there be, by which rights of access or any rights in the nature of rights of access may accrue by reason of the adjacency of the relocated Siuslaw Highway, when constructed upon the aforesaid-described property, to the remaining land of the larger tract of which the aforesaid-described property is a part, and that all access to the aforesaid-described property and the Siuslaw Highway, now or hereafter constructed thereon, from said remaining land of said larger tract and all approaches or access from said highway to said remaining land be

prohibited, except that there shall be reserved unto the owners of said remaining property right of private access for two approaches from said remaining property to the Siuslaw Highway as follows:

a. A right of private access for an approach, not to exceed twenty-five feet in width, on the north side of the Siuslaw Highway opposite Highway Engineer's Station 983+50;

b. A right of private access for an approach, not to exceed twenty-five feet in width, on the south side of the Siuslaw Highway opposite Highway Engineer's Station 983+50.

Private access as herein referred to is defined as a right of access from and to land abutting a highway, said access to be for ordinary travel to and from the abutting land only and shall not be used in connection with any commercial institution or activity established or conducted on the adjoining property which in any manner caters to, invites, solicits from, or is dependent upon the users of the highway.

The State shall have the right at its option to build at any future time at is sole cost a frontage road upon right of way now owned or lands to be acquired by the State, and upon construction of such frontage road the rights of access for the said two approaches to the relocated and improved Siuslaw Highway herein set forth to be reserved shall terminate and cease and the owners of said remaining property shall thereupon have access to the frontage road. Said frontage road shall be connected to the main highway only at such point or points as the State of Oregon may designate.

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twelfth day of April, 1951.

"EXHIBIT "J-7"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS the Oregon Legislature enacted Chapter 226, Oregon Laws 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out locate, relocate, adopt, establish, construct, designate and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the T. H. Banfield Expressway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing, and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation by motor vehicles promoted, highway travel in general safeguarded, and public welfare promoted, it is the judgment of the Commission that the real property hereinafter described is necessary and that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there are needed and required and are being appropriated for right of way of the T. H. Banfield Expressway, for the purpose of establishing, constructing , and maintaining a throughway, the following-described parcels of real property, to wit:

(cont.)

EXHIBIT "J-7" (cont.)

Parcel No. 1
Owner: J. A. Lyons heirs
File No. 15871

A parcel of land lying in the southeast quarter (SE¼) of Section 25, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to J. A. Lyons recorded in Book 900, Page 13, of Multnomah County Record of Deeds; the said parcel being all of said property except the following described tract: Beginning at the intersection of the south line of Section 25 and the east line of 33rd Avenue; thence North 1° 26' 21" East along the east line of 33rd Avenue 157.56 feet to a point which is 168 feet measured radially from the Oregon-Washington Railroad & Navigation Company railroad center line as of October 8, 1946; thence easterly along the arc of a 648.69 foot radius curve to the right (the long chord of which bears North 83° 06' 34" East 363.84 feet) said curve being parallel to and 168 feet from said railroad center line, to the east line of said property; thence South 1° 26' 21" West along the east line of said property 208.74 feet to the southeast corner of said property; thence North 88° 48' 17" West along the south line of said property, which is the south line of Section 25, 360 feet to the point of beginning.

The parcel of land to which this description applies contains 1.00 acre.

Parcel No. 2
Owners: R. A. Hoffman et al.
File No. 14889A

A parcel of land lying in the northwest quarter (NW¼) of the northwest quarter (NW¼) of Section 27, Township 1 North, Range 2 East, W. M., Multnomah County, Oregon, and being a portion of the following described property: the west 100 feet of the east 627 feet of that tract of land which was conveyed by that certain deed to R. A. Hoffman and Alma E. Hoffman recorded in Book 1280, Page 425, of Multnomah County Record of Deeds; the said parcel being all that portion of the foregoing described property lying between the southeasterly right of way line of the O. W. R. & N. Co. and a line parallel to and 70 feet southerly of the center

(cont.)

line of the T. H. Banfield Expressway as said highway has been located over and across the said property, which center line is described as follows:

Beginning at a point which is Engineer's center line Station 350+64.13, said point being 1088.33 feet South 7° 51' 47" West of the northwest corner of Section 27, Township 1 North, Range 2 East, W.M.; thence northwesterly on a 2083.48 foot radius curve to the right (the long chord of which bears North 62° 35' 24" East 2105.36 feet) a distance of 2207.15 feet to Engineer's Station 372+71.28; the southerly line of said parcel crossing the west and east lines of said property approximately opposite Station 361+53 and Station 362+71 respectively.

The parcel of land to which this description applies contains 0.32 acre.

2. That in addition to acquisition of fee simple title to the aforesaid-described real property designated as Parcels Nos. 1 and 2 it is necessary that there be acquired or extinguished such interests or rights, if any there be, by which rights of access or any rights in the nature of rights of access may accrue by reason of the adjacency of the T. H. Banfield Expressway, when constructed upon the aforesaid-described real property, to the remaining abutting lands of the larger tracts, of which said larger tracts the aforesaid-described property designated as Parcels Nos. 1 and 2 is a part, and that all access, ingress, egress and regress to, from and between the aforesaid-described property, including any highway to be constructed thereon, and said remaining abutting properties be prohibited.

3. That the highway facility for which the aforesaid real property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcels of property as to the compensation to be paid for the taking, including the damages, if any, and, in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said parcels of real property.

5. That upon the trial of any suit or action instituted to acquire the said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twelfth day of April, 1951.

EXHIBIT "J-8"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Old Oregon Trail Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to relocate, construct, and improve the Ladd Canyon Section of said Old Oregon Trail Highway, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Old Oregon Trail Highway is a major highway of the State, and as such carries large volumes of traffic both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the relocation, construction, improvement, and maintenance of the Ladd Canyon Section of the Old Oregon Trail Highway real property located in Union County, Oregon, described as follows:

(cont.)

EXHIBIT "J-8" (cont.)

A parcel of land lying in the northeast quarter ($NE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 22, Township 6 South, Range 39 East, W. M., Union County, Oregon, and being a portion of a triangular tract of land described as follows:

Beginning at the most southerly corner of Lot 8 in Block 35 of the Town of North Powder and running thence southwesterly on a direct line with the southeasterly line of said lot 198 feet, more or less, to the east line of the northwest quarter ($NW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 22; thence north along said quarter section line 304 feet, more or less, to the southwesterly line of the Town of North Powder; thence southeasterly along said Townsite line 230 feet, more or less, to the place of beginning.

The parcel of land sought to be acquired being described as follows: Beginning at the most southerly corner of the foregoing described tract; thence north 115 feet, more or less, along the east line of the northwest quarter ($NW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 22 to a line which is parallel to and 150 feet easterly of the relocated center line of the Old Oregon Trail Highway; thence parallel to said center line South 20° 24' East 95 feet, more or less, to the southeasterly line of said tract; thence southwesterly 43 feet, more or less, to the place of beginning.

The parcel of land to which this description applies contains 0.05 acre.

2. That in addition to acquisition of fee simple title to the aforesaid-described real property, it is necessary that there be acquired or extinguished such interest or rights, if any there be, by which rights of access, or any rights in the nature of rights of access, may accrue by reason of the adjacency of the relocated Old Oregon Trail Highway, when constructed upon the aforesaid-described real property, to the remaining land of the larger tract of which the aforesaid-described property is a part, and that all access to the aforesaid-described property and the Old Oregon Trail Highway, to be constructed thereon, from said remaining land of said larger tract and all approaches or access from said highway to said remaining land be prohibited.

(cont.)

3. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twelfth day of April, 1951.

EXHIBIT "K"

Minutes of April 12 and 13, 1951

RESOLUTION

WHEREAS, when in 1934 the Commission relocated a unit or section of the Oregon Coast Highway, State Highway No. 9, the termini of which said relocated section are Highway Engineers' Station 527+85=145+14.24 on the North and Highway Engineers' Station 259+97.1=668+38.5 on the South, the Commission released to Lincoln County, and the County accepted, jurisdiction thereover, the following section of the old route of said Highway No. 9, to-wit:

> Beginning at the south boundary of a tract of land described as Parcel 1 and deeded to the Port of Newport by the State Highway Commission by deed dated the 29th day of October, 1946, in the Southeast quarter of the Northeast quarter of Section 17, Township 11 South, Range 11 West, W.M.; thence southerly via the former route of the Oregon Coast Highway to State Highway Engineers' Station 259+97.1=668+42.4 of the relocated Oregon Coast Highway in the Southwest quarter of the Southeast quarter of Section 17, Township 11 South, Range 11 West, W.M.

AND, WHEREAS, thereafter, to-wit: On the 29th day of October, 1946, the State conveyed to the Port of Newport the real property which is described in a certain Bargain and Sale Deed executed on the 29th day of October, 1946, in which deed the State of Oregon, by and through its State Highway Commission, is the grantor and the Port of Newport is the grantee and which deed was recorded November 14, 1946, on page 598, book 114 of the Deed Records of Lincoln County, Oregon.

AND,WHEREAS, as a part of said conveyance and as a condition thereof, the State reserved for highway purposes across said real property the following tract or parcel of land:

> A parcel of land lying in Section 17, Township 11 South, Range 11 West, W.M., Lincoln County, Oregon. The said parcel being that certain 30 foot passageway which was reserved for the use and benefit of the general public in that deed from the State of Oregon, by and through its State Highway Commission, to the Port of Newport, dated October 29, 1946.

(cont.)

AND, WHEREAS, it now appears that said road or highway can be made of greater service and value to the public if control and jurisdiction thereover is vested in the County Court of Lincoln County,

AND, WHEREAS, said County, by and through its County Court, has requested that jurisdiction over said highway be transferred by the State Highway Commission to the County Court of said County,

NOW, THEREFORE, Be It and It Hereby Is Resolved by this Commission, all Members being present and voting affirmatively, as follows:

1. That the State, by and through its State Highway Commission, does hereby relinquish and does hereby transfer to the County Court of Lincoln County all jurisdiction and control for highway or other purposes the highway or road described as follows:

> A parcel of land lying in Section 17, Township 11 South, Range 11 West, W.M., Lincoln County, Oregon. The said parcel being that certain 30 foot passageway which was reserved for the use and benefit of the general public in that deed from the State of Oregon, by and through its State Highway Commission, to the Port of Newport, dated October 29, 1946.

which said transfer and relinquishment is upon the condition that the same shall be maintained by the County for public highway purposes.

2. That this transfer of authority and surrender of jurisdiction is made on the condition that the County Court of Lincoln County shall, in conformance with all statutory requirements, make and establish said road as a county road and shall maintain the same as such.

This resolution shall be entered in the minutes and records of the Commission as of the 13th day of April, 1951, and the Secretary is instructed to deliver to the County Court of Lincoln County a duly certified copy thereof and request from the County a duly certified copy of the record made by the County Court with respect to the assumption of jurisdiction and control over said state highway hereby released to the County Court.

Portland, Oregon

May 23, 1951

The State Highway Commission met in special session at 9:00 a.m. in Room 234 of the Imperial Hotel. Present were

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
Milo K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
H. B. Glaisyer, Secretary

This meeting was called by the Chairman for the purpose of discussing matters pertaining to the sale of bonds to finance highway construction as authorized by the 1951 Oregon Legislative assembly and to consider projects to be financed with monies derived from the sale of the bonds. Particular attention was given to certain provisions of the Bonding Act and it was pointed out that the law does not become effective until August 2, 1951, ninety days after adjournment of the Legislature. Also that the Commission is authorized to sell either short term or long term bonds. As a result of general discussion the Commission set no particular date for the sale of the bonds but indicated that the sale would be advertised for bids to be received about the middle of August, if clearance can be obtained from the Federal authorities.

The Commission also discussed the employment of special legal counsel to pass on the legal matters involved, and, as a result thereof, the Commission unanimously approved the employment of Mr. John P. Shuler of the firm Winfree, McCulloch, Shuler & Sayre, Portland, Oregon, Mr. Shuler being nationally known and recognized as one of the best bond attorneys in the United States. The Chief Counsel was authorized and instructed to arrange with Mr. Shuler to handle the bond matters for the Commission.

The Engineer presented a list of projects for consideration by the Commission in formulating a construction program for the monies derived from the sale of bonds. These were arranged according to proposed contract lettings in May, July, August, October and November, totalling $17,700,000 The list was carefully considered by the Commission. As a result thereof, the Commission unanimously authorized the taking of bids at its May meeting for grade widening and paving on the Hampton-Gap Ranch Section of the Central Oregon Highway, 28 miles in length at an estimated cost of $600,000 00; and the paving of 21.7 miles

on the Central Oregon Highway between Burns and Buchanan, at an estimated cost of $400,000.00. The Commission also authorized the taking of bids at its August meeting for construction of the Warren Creek-Viento Section of the Columbia River Highway, estimated cost $1,100,000.00; the Gorton Creek-Warren Creek Section of the Columbia River Highway, estimated cost $1,700,000.00; Wygant Park-Hood River Section of the Columbia River Highway, estimated cost $1,700,000.00; and the Forest Boundary-Mill Creek Section of the Warm Springs Highway, estimated cost $400,000.00, subject to the sale of the bonds and that these projects have been clarified as to right of way. Selection of the remaining projects to take up the balance of funds was deferred pending an inspection trip by the Commission to view personally the proposed projects.

The Commission decided unanimously to make this inspection trip during the week commencing June 18, 1951, and to confine its inspections to the Oregon Coast Highway and the Pacific Highway. The Engineer was instructed to prepare an itinerary with complete information, including maps, traffic counts, etc. for each of the projects to be viewed.

In view of the fact that some of the projects listed by the Engineer for the proposed program for bond monies are included in the Federal Aid construction program previously approved by the Commission, the Engineer was instructed to revise the latter mentioned program so as to retain the respective division allotments pursuant to the formula by which the original allotments were made.

The Commission discussed a report from the Engineer as to the status of surveys for the projects under contemplation and also discussed with the Right of Way Engineer the status of right of way negotiations for such projects. The Engineer was instructed to expedite the incompleted surveys and the Right of Way Engineer was instructed to speed completion of right of way negotiations. On motion of Commissioner Reynolds, duly seconded by Commissioner McIver, the Right of Way Engineer was also instructed unanimously to proceed with the acquisition of right of way and access rights thereto for a 4-mile section of the West Portland-Hubbard Highway extending northerly from a place commonly known as White School, about 2 miles south of the town of Aurora. Also, upon motion of Commissioner Reynolds, duly seconded by Commissioner McIver, the Engineer was authorized unanimously to proceed with surveys for the White School-Hayesville School section of the Pacific Highway, for the Gnat Creek-Bradley Park Section of the Lower Columbia River Highway, for the Bugby Loop Section of the Lower Columbia River Highway, for the Clatskanie Section of the Lower Columbia River Highway, and for the Elbow Lake-Gardner Section of the Oregon Coast Highway.

The Engineer requested approval of a number of projects heretofore tentatively selected for the 1952-54 Federal Aid Secondary Highway program. He recalled that the Commission on January 23, 1951, approved approximately 80% of the projects contemplated for construction during the first year but deferred selection of the remaining projects. He advised that it is expected that on or before the first of July the Bureau of Public Roads

will release the remaining 20% of the 1952 secondary funds. He submitted a list of the projects remaining unauthorized in the tentative first-year program as follows, and requested authority to proceed with the contracting of such projects as soon as the Federal monies are made available:

Division No. 1 -

Colton-Springwater Section, Woodburn-Estacada Hwy, 9.7 miles asphaltic concrete surfacing ---------- $170,000.00

Division No. 2 -

Polk Co. Line-Fir Grove Section, Federal-aid Secondary Highway No. 193 (county road), 1.1 miles grading, surfacing, and oiling ---------- 40,000.00

Banzer Bridge on the Nehalem Secondary State Hwy. ---- 80,000.00

Bridges over Trask River and Dougherty Slough on federal-aid secondary highways (county roads) in Tillamook County ---------- 140,000.00

Division No. 3 -

All projects in first year approved in January

Division No. 4 -

Gherking Corner-North, two sections of federal-aid secondary highway (county roads) in Deschutes Co. --- 75,000.00

Bridge over Hood River at Dee on Federal-aid Secondary Highway No. 306 (county road) ---------- 60,000.00

Dufur-Boyd Section, Federal-aid Secondary Highway No. 310 (county road) in Wasco County, 5 miles grading, surfacing, and oiling ---------- 100,000.00

Division No. 5 -

Austin Spur Section of the John Day Highway in Grant County, 2.6 miles grading, resurfacing, and oiling--- 75,000.00

The Commission unanimously approved the projects as listed, and authorized the Engineer to advertise them for bids when the Federal monies have been released.

The meeting adjourned at 12:00 noon.

Chairman

State Highway Engineer

Commissioner

ATTEST:

Commissioner

Secretary

May 23, 1951

Portland, Oregon
May 24, 1951

The State Highway Commission convened in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
Milo K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
Forrest Cooper, Right of Way Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Fred A. Miller, Assistant Counsel
C. H. Armstrong, Parks Superintendent
Malcolm H. Hawke, Auditor
H. B. Glaisyer, Secretary

Chairman Chandler made the following public announcement for the benefit of contractors present for the bid opening:

"Inasmuch as the Legislature has given us authority to sell bonds to finance highway constructions, we will start either at the July or August meeting to increase the contract lettings for the next three years. We are calling upon the continued cooperation of the contractors. There will be about $11,000,000.00 in extra contract letting this year."

Bids as follows for highway construction were opened and read aloud pursuant to the previously published notice, at the conclusion of which Chairman Chandler announced that the awards of contracts would be made at 4:00 p.m.

NEHALEM SECONDARY HIGHWAY IN WASHINGTON COUNTY
DAVIES-FOREST GROVE SECTION

Warren Northwest, Inc., Portland	$147,832.50
Porter W. Yett, Portland	160,722.50
J. C. Compton Co., McMinnville	161,030.00
Central Heating Co., Eugene *	163,415.00
Parker-Schram Co., Portland	175,642.00

* Bidder will not accept projects totaling over $765,000.00

The Commission by unanimous vote approved the minutes of the meeting held on April 12 and 13, 1951.

The State Parks Superintendent, Mr. C. H. Armstrong, reported on the following park matters:

1. Report on acquisition of McNary Dam Recreational Area: The Parks Superintendent advised that agreement has been reached with the owners of the property under consideration, Mr. Charles Kik and Mr. Merrill Potter, for the purchase of their property; the arrangements with Mr. Kik being payment of $28.57 per acre for 175 acres of land, total $5,000.00, and the arrangements with Mr. Potter being a lump sum of $1,050.00 for 0.16 acre of land. The Right of Way Department, he said, secured the options and will report later further details. (The Right of Way Engineer reported further on this matter later in the session, and verified the amounts mentioned by the Parks Superintendent. The Commission, at that time, approved the purchase of both properties at the prices mentioned.)

2. Status of acquisition of land to enlarge Wallowa Lake State Park: The Parks Superintendent advised that Mrs. Wiggins has been contacted relative to the purchase of her property, but she deferred giving an answer until she has consulted her two sons, who are away and were not expected to return until July, one of them being in the Army and the other attending school. The Commission took no action thereon. In this connection, the Parks Superintendent suggested that he be given authority to negotiate acquisition of about 100 acres of land belonging to the L. F. Anderson Estate, situate on the west side of Wallowa Lake. He advised that Mr. Anderson, before his death, indicated that he intended to present this property to the State as a gift, but the conveyance was never consummated and the heirs are now offering it for sale. He pointed out that the property has a frontage of 1½ miles on the lake and that it will make a fine addition to the present park. The Commission unanimously approved negotiations to acquire this property.

3. Request of Fred P. Rawson to remove cinders from Round Butte in the Cove State Park, Jefferson County, for commercial purposes: The Parks Superintendent recommended that the request be denied, it being contrary to the Commission's established policy. The Commission approved the recommendation unanimously and so informed Mr. Rawson who was present.

4. Request of City of Culver to take a limited quantity of cinders from Round Butte in the Cove State Park for improvement of city streets: The Parks Superintendent recommended approval of this request, which is in conformity with a policy established by the Commission a year or so ago, whereby the county and nearby cities are permitted to take limited quantities of this material for county road and city street improvements. The Commission approved the recommendation.

5. Request of Arthur E. Henderson, Florence, Oregon, for permission to construct and operate a roadway across Joaquin Miller State Park on the Oregon Coast Highway near Florence, Lane County: The Parks Superintendent advised that such use of this property will not adversely affect the park area, and he recommended approval of the request. The Commission approved the recommendation. (An agreement with Mr. Henderson covering this matter was signed on the following day.)

6. Proposed exchange or sale of isolated areas within the Silver Falls State Park and purchase of privately-owned property surrounded by the park: The Parks Superintendent advised that situate within this park area is considerable acreage of land that is isolated and of no particular value to the park. The park surrounds a desirable privately-owned tract containing 360 acres of land from which the owners are about to remove the standing timber. This privately-owned land, he said, should be acquired by the State to fill out the park, and he requested authority to negotiate with the owners for the acquisition of the property, either by exchanging it for some of the isolated State land or by payment of cash. He said that the State lands involved in the proposed sale or exchange are described as follows:

> NW$\frac{1}{4}$ of Section 8, 160 acres, W$\frac{1}{2}$ of Section 16, 320 acres, and the N$\frac{1}{2}$ of the NE$\frac{1}{4}$ of Section 17, containing 80 acres, all situate in T8S, R2E, W. M.

He described the privately owned areas which lie within the boundaries of the park as follows:

> W$\frac{1}{4}$, W$\frac{1}{2}$ of the SE$\frac{1}{4}$, W$\frac{1}{2}$ of the NE$\frac{1}{4}$, and the NE$\frac{1}{4}$ of the NE$\frac{1}{4}$, containing 360 acres, lying in Section 13, T8S, R1E, W. M.

The Commission unanimously approved the request.

7. Request of M. F. Mack & Bros. for permission to truck-haul logs over a 1-mile section of roadway lying within the Silver Creek Youth Camp area: The Parks Superintendent recommended against this request because the road was not built to stand such heavy hauling and because there is another roadway available for their use. The Commission approved the recommendation. However, the operator is to be allowed to use the other road, which also passes through the Youth Camp area.

8. Proposed sale of dead and down timber situate on State-owned property, described as the $N\frac{1}{2}$ of the $NW\frac{1}{4}$ of Section 29, T8S, R2E, W. M. Marion County: The Parks Superintendent advised that the E & N Logging Co. of Lebanon, are now removing snags and downed timber on adjoining property and have requested the privilege of extending its operations into the above described State property, which is a part of the Silver Creek Falls State Park area. He said that the company is doing a good job, and he gave as his feeling that it would be an advantage to have the park cleaned in this manner. He recommended approval of the request. The Commission approved the recommendation unanimously.

9. Request of Mr. King Sweet, Depoe Bay, for permission to maintain telescopes and binoculars in State parks along the Oregon Coast Highway: The Parks Superintendent recalled that the Commission in the past has denied this privilege and he recommended continuance of this policy. The Commission approved the recommendation.

10. Request of North Lincoln County Grange No. 861 that the State acquire and develop recreational areas along the Oregon Coast Highway at Foggarty Creek, Schooner Creek and "D" River, all in Lincoln County: The Parks Superintendent recommended against the acquisition of any of these properties because they will not fit in the State Parks picture. He pointed out the likelihood that the highway will be constructed across the area at Foggarty Creek, and, if that materializes, the area would be ruined for park purposes. The Schooner Creek area, he said, is located on the west side of the highway between Schooner Creek and Cutler City and is not needed for park purposes, nor as a means of access to the Siletz Bay because the people now have suitable access to the beach. As to the "D" River location, he said that the site is just north of the river and consists of two blocks of land, which the Grange wants the Commission to acquire in order to control the speeding of automobiles on the beach. The Commission decided unanimously not to purchase any of these properties.

11. Wording for informational sign to be maintained near the entrance to Lava Caves State Park: The Parks Superintendent presented wording for the sign as prepared by Lawrence C. Merriam, Jr., and advised that the idea of maintaining this sign meets with general approval of geologists who have been contacted relative thereto. He presented the wording as follows, and recommended that it be approved and that he be authorized to erect the sign:

" LAVA RIVER CAVE

"Thousands of years ago, basaltic lavas moving westerly over a sloping terrain destroyed forests and filled valleys in this area. The lava cooled on the outer edges but remained molten in the center where great pressures were exerted against the solidified portions. These pressures resulted in a break near the bottom of the flow, by means of which the white hot liquid lava drained.

"According to the late geologist Ira A. Williams, Lava River tunnel 'is the conduit through which, while the supply lasted, the molten stream continued to flow down the slope until it drained away, just where we do not know, though more than likely through some outlet at a lower level in the ancient canyon of the Deschutes River.'

"The ceilings and walls of the cave were marked and glazed by the molten stream, which lowered in intermittent stages. Eventually the supply was exhausted and portions of the lava stream hardened against the cave walls, solidified in pools in the channel bed and in places covered the bed with the ragged remnants of the flow.

"Volcanic sand, which exists in various depths on the floor of the tunnel and finally chokes the bore completely, may have been raised by earthquake tremors through crevices from beds known to exist below the lava or it may have filtered in through cracks from above. Quite smooth in some instances, the sand surface changes in other locations to one of varied relief (Sand Gardens) caused by the eroding action of water dripping from the ceiling during the wetter seasons of the year.

"The tunnel opening was produced by the collapse of a portion of the roof, possibly as the result of an earthquake. Lava River tunnel extends in two directions from this opening, the main tunnel extending northwestward on a gradual slope toward the Deschutes River and the other in an easterly direction. The east section is closed. The tunnel is from twenty to thirty five feet in width and about the same in height. Throughout the year the temperature inside the cave remains about 40 degrees F. and freezing seldom occurs beyond the 1200 foot mark."

May 24, 1951

The Commission approved the recommendation unanimously, subject to the wording being checked by some person who is qualified to pass on such matters.

12. Application of Douglas Electric Cooperative of Roseburg to maintain a power transmission pole line across Loon Lake State Park in Douglas County: The Parks Superintendent advised that the pole line will not be detrimental to the park and he recommended approval of the request. The Commission approved the recommendation.

13. Application of Coos-Curry Electric Cooperative, Coquille for permission to install a 250-watt receiving and transmitting station on Harris Butte in Harris Beach State Park, Curry County: The Parks Superintendent advised that the company alleges that this particular location is the only location in the vicinity suitable for its purposes. However, in his estimation, there is another site available about $1\frac{1}{2}$ miles north of Harris Butte, which, in his opinion, is satisfactory although it is off the highway. He recommended that the request be denied. The Commission approved the recommendation.

14. Request of IWA - CIO, Local 5-246, Springfield, Oregon for permission to operate a "pony ring" in Armitage State Park on June 24, 1951 during the progress of its annual picnic at this location: The Parks Superintendent advised that, in his estimation, there is no particular objection to the operation of the "pony ring" on this occasion except that it might establish an undesirable precedent and in the future might prove embarrassing in handling like matters. He recommended that the request be denied as a matter of policy. The Commission approved the recommendation.

Mr. W. H. Lynch, Division Engineer, U.S. Bureau of Public Roads, was present and discussed with the Commission the matter of financing additional work on the Marks Creek Section of the Ochoco Highway, particularly additional base stabilization along the 4-mile unit of this section. He said that the stabilization work must be done in order to provide a satisfactory base for pavement to be constructed thereon. He estimated the total cost of the additional work at approximately $85,000, of which, he said, the Bureau of Public Roads can furnish not more than $10,000 or $15,000 from its current funds, which would leave a deficit of from $70,000 to $75,000, which the State would have to furnish if the work is to be completed this year. He inquired whether or not it would be possible for the State to allocate such an amount. The State Highway Engineer pointed out that this is a very important section of the Ochoco Highway and, in his estimation, completion of the work should not be deferred. He recommended that the Commission authorize $75,000 of State funds to take up the deficiency mentioned by Mr. Lynch. As a result of discussion, motion was made by Commissioner Reynolds that State funds in the amount of $75,000 be appropriated for such purpose. The motion was duly seconded by Commissioner McIver and carried unanimously. (The following letter relative to the above subject was signed by the Commission on the following day:

" DEPARTMENT OF COMMERCE
BURE AU OF PUBLIC ROADS
Division Eight

486 Oregon General

May 25, 1951

Chief, Forest Service
Commissioner of Public Roads
Washington, D. C.

Dear Sirs:

"Since completing the placing of crushed rock surfacing on Oregon Forest Highway Project 27-A3, B4, and submitting it to traffic during the winter of 1950-51, the heavy traffic over the project has developed instability over a four mile section, which will require that additional surfacing material be placed and a bituminous surface constructed over the four mile section.

"Because of the magnitude of the necessary increase in the cost of Project 27-A3, B4 and adjustments involved to accomplish the work under that contract, it is proposed to eliminate the bituminous surfacing, within the four mile section, from Project 27-A3, B4 and to accomplish this and the additional stabilization under a new project and contract.

"Available forest highway cash funds are insufficient to finance the entire cost of the additional project and the State of Oregon has agreed to cooperate to the extent of $75,000 toward the total estimated cost of $90,000. Sufficient unprogrammed balance is available to finance the $15,000 of forest highway funds required.

"It is therefore recommended that the following project be approved:

Project No.	Route & Type of Work	Length	Estimated Cost	F. H. Funds	State Coop. Funds
27-A4, B5	Ochoco Hwy., Surf. & Bit. Surfacing	4 Mi.	$90,000	$15,000	$75,000

/s/ OK. W. C. Williams

Very truly yours,

/s/ W. H. Lynch

"

May 24, 1951

A general discussion followed concerning other Federal Aid projects, including the survey for the Starkey-Ukiah Road. As to this project, Mr. Lynch stated that he will try to have this survey made some time this coming summer, although he cannot promise that it will be done because of the shortage of engineers. Mr. Lynch also mentioned receipt of a telegram from Washington concerning the programming of remaining projects for the Federal Aid Secondary Highway system. He advised that the Census Bureau has not as yet certified the 1950 population of the states, so he is not in a position to authorize the programming of the remaining funds. He also pointed out that he has received information from Washington to the effect that approval cannot be given to awards of contracts involving more than 25 tons of steel. The Commission instructed the State Highway Engineer to check with the Oregon delegation in Congress as to the census and the steel situation.

The Commission had under consideration options for acquisition of various parcels of real property that are needed in connection with highway improvements, which were presented by the Right of Way Engineer. As a result of careful study of each item, the Commission authorized the Right of Way Department to close the options at the prices mentioned therein. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Chief Counsel reported on the condemnation action authorized by the Commission at the previous meeting against Oregon Lumber Co. for acquisition of right of way needed in connection with the improvement of the Hood River-Mosier Section of the Columbia River Highway Hood River County. He advised that, since the complaint was filed he has received from the company a communication stating its willingness to accept $12,000 for its property, and further stating that the company would allow the State to enter upon the property without being guilty of trespass. He pointed out that the high appraisal of the property was $8,000 and that the Commission previously authorized an offer of $9,000 in condemnation. He requested instructions, advising, however, that if the Commission is unwilling to pay $12,000 then it will be necessary to proceed with the condemnation action. It was the feeling of the Commission that $12,000 is entirely too much to pay for this land, which consists of 4.71 acres; whereupon the Commission instructed Chief Counsel to proceed with the condemnation and to adhere to the $9,000 offer heretofore authorized in connection therewith.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m., with the same persons present and participating.

[illegible]

The Chief Counsel requested authority to condemn certain parcels of real property that are needed for highway purposes and which cannot be acquired by negotiation. He presented a list of such properties, together with the offer that he recommended for each tract, as follows:

Unit #5 Section of the T. H. Banfield Expressway			Recommended Offer
R 15533	Sylvester B. Hall (Multnomah County) (Right of Way)		
	6.5 acres at $1250.00 per acre	$ 8,125.00	
	76 rods of fencing replacement at $5.00 per rod	380.00	
		$ 8,505.00	$ 8,525.00
R 16777	Harrison W. Jensen (Multnomah County) (Right of Way)		
	0.236 acre at $2800 per acre	$ 649.60	$ 650.00
R 16952	Clay C. Miller (Multnomah County) (Right of Way)		
	2.99 acres at $12.50 per acre	$ 3,737.50	
	44 rods of fence at $5.00	220.00	
	1.71 acres at $400	684.00	
	Severance: $400 per acre to remaining 2.29 of raspberries	916.00	
	Reduction of efficiency of irrigation system	300.00	
		$ 5,857.50	$ 5,875.00
R 17037	Lizzie Luscher (Multnomah County) (Right of Way)		
	7.5 acres at $1,250.00	$ 9,375.00	
	Damages	3,125.00	
	Cost of another water supply to replace spring	1,500.00	
		$14,000.00	
	If present water supply cannot be preserved		$14,000.00
	If present water supply can be preserved		12,500.00
R 16104	William F. Loser (Multnomah County) (Right of Way)		
	10.35 acres at $1250.	$12,937.50	
	4.89 acre at $1250. taking $6112.50		
	Damage to 5.46 acre remaining	682 50 6,795.00	
		6,142.50	$ 6,800.00

Sunset Bay State Park Sec. of Cape Arago Hwy.			**Recommended Offer**
R 16736	Ralph Barker (Coos County) (Park)		
	5.75 acres at $100	$ 575.00	$ 575.00
R 16735	D. H. Harding (Coos County) (Park)		
	0.82 acre	$11,500.00	$11,500.00
R 16734	George J. Landrith (Coos County) (Park)		
	Par.1 4.28 acres at $100	$ 428.00	
	Par.2 15.39 acres at $125	1,923.75	
		$ 2,351.75	$ 2,400.00
Salem-Hayesville School Sec. of the Pacific Highway East			
R 13870	Elling Halvorson (Marion County) (Right of Way)		
	Parcel No. 1 550 sq. ft. at $1.00	$ 550.00	
	Parcel No. 2 1,598 sq. ft. at $.75	1,198.50	
	Parcel No. 3 1,011 sq. ft. at $1.50	1,516.50	
		$ 3,265.00	
	Valuation of sign	1,500.00	
		$ 4,765.00	$ 4,800.00
Gold Beach-Brookings Section of the Oregon Coast Highway			
R 14748 R 14749	Harvey D. Crook (Curry) (Park)		
	Parcel 1:		
	13.76 acres at $200	$ 2,752.00	
	Severance damage, 120 acres at $100 per acre, 5% or 12,000	600.00	
	330 rods fence at $4	1,320.00	
		$ 4,672.00	
	Parcel 2:		
	82.87 acres at $200 per acre	16,574.00	
	Severance damage, 29.81 acres at $100, 15% or $2,981.00	447.15	
	Allowance for house	1,500.00	
	Allowance for cabins	4,000.00	
	Barn & outbuildings	600.00	
	Estimate on fence, 400 rods at $4	1,600.00	
		$24,721.15	
	Total	29,393.15	$ 29,400

May 24, 1951

Sylvan Section of the Sunset Highway

R 15139 R 15140 Helen M. Lovin

Resolution to be adopted for the purpose of correcting the property description.

Amount of offer to remain the same as that authorized by the Commission on December 19, 1950.

As a result of careful consideration, the Commission approved the request unanimously by adoption of the attached resolutions relative thereto, marked EXHIBIT "L-1", "L-2", "L-3", "L-4", and "L-5", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Right of Way Engineer reported the following sales of miscellaneous properties heretofore acquired by the Commission in connection with right of way acquisitions, and he asked the Commission to confirm them:

File No.	Location	Sales Price	Purchaser	Items & Remarks	
16897-	Cedar Point-Coquille Sec. Ore. Coast Highway	$ 62 00	Katherine Peart - 600 N. Taylor Coquille	2-5x4' windows, s. panes 2-2'10"x2'5" windows, s. panes 1-3'8"x2 8" window, small pane	$37.00
				2 lavatories	$25.00
				1 toilet	$15.00
16913-	Cedar Point-Coquille Sec. Ore. Coast Highway	$100 00	Kenneth M. Peterson Box 719 Coquille	House on stilts-This was a hurried sale to clear right of way-building had to be moved in 10 days-has to be wrecked	
16895-	Cedar Point-Coquille Sec. Ore. Coast Highway	$ 25.00	C. L. Mitchell P O. Box 523 Coquille	Bath-tub-removed from building. Bldg used by dept. as a constr. office	
15604-	Cascade Locks-Viento Sec. Columbia R. Hwy.	$ 5.00	John L. Keller 665 Evans Salem	Fuse box and switch	
17109 -	Salem Bi-Pass Sec. Pacific Highway	$500 00	The Church of Light 3615 Garden Rd. Salem	House about 40 yrs. old- Bid on the electric pump -$20 is rejected. Three bids received, lowest $40. 00	

(cont.)

File No.	Location	Sales Price	Purchaser	Items & Remarks
0734-	S. 6th Str. Sec. Klamath Falls-Lakeview Hwy.	$18.00	Crater Lake Machinery Co. Klamath Falls	36 feet of 6" pipe in ground at 50¢ per foot.
0931-	Cascade Locks-Viento Sec. Columbia River Hwy.	75.00	Sylvan Potts Box 177 Cascade Locks	Buildings sold by option agreement

The Commission approved the sales as reported, by unanimous vote.

The Right of Way Engineer brought up for discussion a proposed sale of a small parcel of land lying between the Old Oregon Trail and the Union Pacific Railroad near the west city limits of the City of Pendleton, which property Senator Rex Ellis desires to acquire and on which he plans to construct an office building for use by the Secretary of State. The Right of Way Engineer stated that he had the property appraised by three different appraisers, one of whom valued the property at $25,000, a second at $21,150 and the third at $20,000. He pointed out that the tract contains only 0.65 acre of land, and does not include the entire tract that Senator Ellis wished to acquire some time ago. Also that if the Commission sells the property, access to the highway for commercial purposes at two points would have to be granted. The matter was discussed by the Commission at considerable length and, as a result thereof, the Commission decided to advertise the property for sale at a minimum cost of $21,500. The attached resolution relative thereto marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Commission discussed a written report from the Right of Way Department dated May 1, 1951, covering a right of way controversy with Mrs. Nancy M. Finke and concerning acquisition of a small parcel of land needed in connection with the improvement of Union Avenue (US99E), Portland, at its intersection with Columbia Boulevard, North Portland. It was recalled that Mrs. Finke's attorney, Arthur Goldsmith, Portland, appeared before the Commission at its meeting in April concerning this matter, at which time the Commission took the matter under advisement. According to the report, original designs for the Union Avenue improvement at this point required acquisition of a narrow strip of land along Mrs. Finke's property frontage, being 0.84 feet wide at the northerly end, and 12 to 15 feet wide at the southerly end, and it was also proposed to acquire a small additional triangular tract at the intersection of Columbia Boulevard and Union Avenue to facilitate right turn traffic movements for south bound vehicles from Union Avenue. Negotiations were carried on with Mrs. Finke for a considerable length of time, during which she reduced her demands from $20,000 to $13,900,

but even that amount was considered excessive, so the plan for the highway improvement was revised to eliminate the taking of any land whatsoever from her, although the acquisition of 1400 square feet at the intersection would be desirable in order to facilitate traffic movements. The Right of Way Engineer recommended the purchase of such area at $2.00 per square foot, or a total of $2800, and that the Commission authorize an additional payment of $200 for attorney fees, making a grand total of $3,000. It appeared to the Commission that it has a minor obligation in the matter and in order to be fair with Mrs. Finke, the Commission decided unanimously to pay her $3,000 for the 1400 square feet of land as recommended by the Right of Way Engineer. In the event that Mrs. Finke will not accept such settlement, the entire matter is to be dropped.

The Right of Way Engineer reported that in connection with the construction of the Cedar Point-Coquille Section of the Oregon Coast Highway, Coos County, plans called for the construction of a retaining wall in front of property owned by a Mr. Stevens, which retaining wall was estimated to cost about $10,000. Subsequent to a preparation of the plan, he said, the property changed hands and a suggestion was offered by the new owner for the elimination of the retaining wall, his plan being for the State to grade his property down to an approximate level with the highway, he to assume the entire expense of readjusting his buildings. The Right of Way Engineer estimated the cost of the grading work at about $2,500, and he recommended approval of the plan as an economical proposition. The Commission approved the recommendation unanimously.

The Commission discussed the advisability of acquiring 4.95 acres of land in Umatilla County for stockpile site purposes. The property is located on the Oregon-Washington Highway north of the City of Milton-Freewater, and the purchase price is $750. The Commission approved the purchase of the property upon the recommendation of the Engineer and the Right of Way Engineer.

The Right of Way Engineer presented a request from Marin J. Fager et ux for relocation of his point of access to the Ladd Canyon Section of the Old Oregon Trail in Union County. He explained that approval of this request will eliminate one access point to the highway and construction of a possible culvert, which was estimated to cost $3,500. However, it will necessitate the construction of a frontal road in lieu thereof at an estimated cost of $1,000. He recommended approval of the request. The Commission approved the recommendation unanimously. (An "Indenture of Access" covering the matter was signed by the Commission on the following day).

The Engineer brought up for discussion the matter of conveying to the City of Eugene certain property lying adjacent to the Pacific Highway between Walnut Street and Judkins Point, known as the Byers' property. He recalled that the Commission two years ago acquired jointly with the City of Eugene considerable right of way along this section, including the Byers'

property for which the State paid $7,000 with the understanding that if the property were found to be of no value to the State, the City would take title to it and would reimburse the State in the amount of the purchase price. It has now developed, he said, that the property is needed to provide adequate storage facilities at the Highway Department headquarters in Eugene as well as to allow parking of cars at the Secretary of State's field office. He recommended therefore that the City of Eugene be relieved from its obligation to take over the property and that title to the property be retained by the State. This arrangement, he said, is satisfactory with the City of Eugene. The Commission approved the recommendation unanimously.

The Engineer reported a timber cutting encroachment on property that was purchased in 1937 from T. H. Banfield and wife as right of way for a proposed revision of the Oregon Coast Highway between Otter Crest and Otter Rock, Lincoln County. He advised that logging contractors named Gilbert J. Roles and Clive Stiltner, Waldport, Oregon, cut and felled about 55,000 F. B. M. spruce and hemlock timber before they were stopped by a highway maintenance superintendent, but they agreed not to remove this timber until such time as a satisfactory settlement was affected with the State Highway Commission. The State Forester's office, he said, has been consulted and a price of $6.00 per M for all grades was set as an average, although the suggestion was made that the operators be charged double that amount as a penalty. The Engineer stated his concurrence in such settlement and recommended that the operators be charged on the basis of $12 per M or $600 total. The Commission approved the recommendation.

The Chief Counsel reported on the settlement of lawsuits effected subsequent to the April meeting of the Commission. He advised he has reached a settlement in only one instance, being that of the State's case against Alicia Anne Ruhl, involving property needed for improvement of the Sam's Valley State Secondary Highway in Jackson County. He recalled that Miss Ruhl demanded $1,000 for her property, but the Commission had approved payment of only $500. However, agreement has now been reached on the basis of the State's paying Miss Ruhl the sum of $850. He recommended approval of this settlement in order to avoid court costs and payment of attorneys' fees. The Commission approved the recommendation.

The Chief Counsel reported settlement with the Enterprise Irrigation Co., Klamath Falls, of a tax lien on State property, acquired from George W. Welcher for right of way purposes. The claim, he said, is in the amount of $250 and is of quite long standing. However, as a result of negotiations, the District has agreed to accept $153 as payment in full. He recommended approval of such a settlement. The Commission approved the recommendation.

The Chief Counsel reported on the status of the claim of a family by the name of Haddix for reimbursement for expenses incurred by them for doctor bills, etc. resulting from injury to their child who, it is alleged, tripped over a survey stake near the Haddix home. He advised that the Haddixes are asking reimbursement in the sum of $900 which represents their hospital account, doctor bills and miscellaneous expenses. He pointed out that, according to the statutes, a limit of $500 has been set on claims of this nature. Due to the circumstances surrounding this case, he suggested that the Haddixes be paid the sum of $500 if they will release the State from further liability. The Commission approved the suggestion.

The Chief Counsel also reported the status of the State's claim against State Construction Co. for refusal to accept the contract awarded to them for construction of the Marion Street Bridge piers in Salem. He said that the company has offered to pay $3,500 as settlement in full of the claim and he recommended acceptance of the offer because there is doubt in his mind that the State can win the case if it goes to court. Chairman Chandler expressed himself against such settlement because it would not satisfy the principal involved, and he wished it determined if highway proposal bonds are of any value. Commissioner McIver gave as his feeling that the case should be tried in the courts. Commissioner Reynolds expressed himself similarly, whereupon the Chief Counsel was instructed to proceed with the suit as originally contemplated in order to make a test case out of it.

Brought to the attention of the Commission by the Chief Counsel was a controversy which prevails in the case of Walker vs. Mackey and the State Highway Commission concerning access to the Oregon Coast Highway near Pleasant Valley, Tillamook County. The Chief Counsel advised that Mr. Walker contracted to purchase a parcel of land from Mr. Mackey, but the contract agreement was not recorded in the county records, so was not available to the title company, which examined the records. It also appears that the State, in acquiring right of way from the Mackeys, granted private access at a certain location which was not opposite the Walker tract, so Mr. Walker is now asking for such access even though it might be of a temporary nature. The Chief Counsel recommended that the request be denied. The Commission approved the recommendation unanimously.

The Chief Counsel reported that his attempts to collect from Kuckenberg Construction Co. the cost to repair damage the company did to a bridge on the Pacific Highway south of Dillard, known as the Ford Bridge, have been unsuccessful. He requested authority to pursue the matter in court if further negotiation shows that to be necessary. The Commission approved the request unanimously.

The Chief Counsel reported a gift of land from Mr. and Mrs. Lon Christensen for park purposes, at Yachats. He gave as his feeling that the Commission should acknowledge the gift by appropriate letter and that the Commission should name the area "Christensen Parkway". The Commission approved the suggestion; however, decided that the area should be named

"Christensen Ocean Wayside" rather than "Parkway", and it was so ordered. In this connection, the Chief Counsel advised that Mr. Christensen is asking the Commission to grade an approach to a cemetery located nearby with the understanding that he would maintain the roadway if the State will build it. The Commission approved the project on such basis.

The Commission discussed a request from Justice Latourette with respect to the mooring of logs in the Willamette River at Oregon City. In the discussion of this matter, it was pointed out that there now exists a lease for the privileges desired by Mr. Latourette; in view thereof, the Commission decided not to grant additional privileges until this lease has expired.

The Chief Counsel reported a request from the State Board of Control for the loan of services from the Highway Department's legal counsel, in appraising properties that are to be acquired for the State Capitol group in Salem. He requested instructions. The Commission authorized the Chief Counsel to assist in this matter if the request for his services comes from the Attorney General.

The Commission had under discussion the advisability of selling to Senator Rex Ellis a small parcel of land situate adjacent to Three-Mile Lane Secondary Highway near McMinnville, being excess property that was acquired from C. E. Forrell in connection with a right of way settlement. The Chief Counsel advised that Senator Ellis wishes to acquire this tract as a site for a building to be constructed for use by the Secretary of State. The Right of Way Engineer exhibited a map showing the location of the property and pointed out that it is not needed for highway purposes and is not access controlled. The property, he said, is appraised at $3,700 and he recommended, if the Commission desires to sell it, that it be sold for the sum of $4,149.60. The Commission discussed this matter at considerable length and, as a result thereof, by unanimous vote, approved the sale of the property to Senator Ellis at the price mentioned by the Right of Way Engineer, without going through the formality of advertising the property for sale. (The Commission signed a bargain and sale deed later in the session for delivery to Senator Ellis upon receipt of the purchase price of the property).

The Chief Counsel brought up for discussion Oregon Law 156, 1951, enacted by the 1951 legislature, which authorized the Highway Commission to designate its Secretary or some other officer or deputy to approve voucher claims in connection with which the indebtedness or expense set forth therein previously has been authorized by the Commission. He suggested that the Commission exercise its authority under such law so as to relieve the Commission from such duty and to expedite the payment of claims. He expressed the feeling that the Commission's Secretary should be delegated to perform this function. As a result of discussion, motion was made by Commissioner Reynolds that the Secretary, H. B. Glaisyer, be delegated to act for the Commission in this respect. The motion was duly seconded by Commissioner McIver and carried by unanimous vote of the Commission. The attached

resolution relative thereto marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission unanimously.

The Commission discussed and approved an agreement with the Secretary of State providing for upkeep and operation of the new Highway Office Building in Salem. (Agreement was signed by the Commission later in the session)

The Commission discussed and, upon the recommendation of the Engineer and Chief Counsel, approved the vacation of Greenwood Avenue in the town of Reedsport as requested by citizens of that city. (A petition requesting such vacation was signed by the Commission later in the session.)

The Chief Counsel brought up for discussion the matter of the Commission taking formal action authorizing the Right of Way Department to negotiate options for right of way and other purposes. He explained that in the past such authority has been given by the Commission by minute entry in the Commission's records but, due to the fact that occasionally the Commission's procedure in this regard is challenged, in his estimation, the Commission should grant such authority by formal resolution and he so recommended. He presented a form of resolution covering the matter, which provides also for ratification of the informal action and authorization heretofore given by the Commission for acquisition of real property in connection with certain highway projects. As a result of discussion, the Commission approved the Chief Counsel's suggestion and thereupon by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "D-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein. In this connection, The Commission also adopted by unanimous vote the attached resolution marked EXHIBIT "D-1", outlining the procedure hereafter to be followed by the Engineer in furnishing right of way descriptions to the Right of Way Department, upon approval and adoption of a survey for any new highway project or for relocation of any existing highway. The resolution by this reference is made a part of this minute entry with like effect as though extended in full herein.

The Chief Counsel brought up for discussion the application of the provisions of a Salem city ordinance to certain property that the Commission is buying from a Mr. Taylor, Salem, in connection with improvement of the Pacific Highway in North Salem. It seems that a building on the property must be moved to an adjacent site, but it appears that it cannot be occupied in the new location unless it is fire-proofed in accordance with the ordinance requirements whereas, were the building left in its present location, such fire proofing, which is estimated to cost about $6,000, would not have to be done. The Chief Counsel advised that he has taken up the matter with the city officials, who state they do not wish to amend the ordinance to include this

exception and who suggest that the State pay for the fire proofing. He requested instructions, recommending, however, that the State do not pay for the fire proofing. The Commission referred the matter back to the Chief Counsel with instructions to make a further attempt to secure an amendment to the city ordinance that would not affect other cases of similar nature.

Pursuant to instructions from the Commission at the previous meeting the Engineer presented for the Commission's consideration a text, for signs to be erected at the ends of State Highway projects, as prepared by Mr. Manley Robison, Director of the Travel Department. The Commission deferred action on the matter until later.

The Chief Counsel brought up for discussion the matter of releasing balances of funds to Walter Berndt Construction Co. in connection with State Highway Contract No. 3115 for construction of the Snider Creek-Crater Lake Junction section of the Sams Valley Secondary Highway, Jackson County. He recalled that numerous claims aggregating a total much in excess of the monies due the contractor have been filed against this job and that the funds are being held pending settlement of the claims. He advised that he has filed in court an interpleader whereby all the claimants will be called into court to explain their claim and with the information thus gained the court will then decide who among the claimants are entitled to the funds, thus relieving the Highway Commission of such responsibility. He suggested that the warrant covering balances due the company be made payable to the Clerk of Multnomah County or to others as the court may direct and he requested authority for the auditor to prepare the warrant accordingly. The Commission approved the request unanimously.

The Chief Counsel also requested instructions with regard to the payment of final estimates due Denton Construction Co. in connection with State Highway Contracts No.'s 2899 and 2944. He said that there are a number of claims against these contracts, the principal one being that of the Internal Revenue Department which is not entirely valid because it involves work done by Mr. Denton that was entirely foreign to his State Highway work, and he recalled that the Commission previously authorized the release of the final warrants on the condition that the surety on the bond furnished by Denton Construction Co. in connection with these jobs would indemnify the State and furnish a supplemental bond guaranteeing that it would pay any claim that the courts might hold valid. The bonding company, he said, is anxious to close this Denton matter and agrees, if the Commission will pay to it the balances due on these two contracts totaling $9,322.06, to indemnify the state of Oregon in such sum from any loss which the State may sustain by reason of the claim of the Internal Revenue Department. He presented a form of agreement covering the matter and recommended its approval and execution. The Commission approved the recommendation unanimously. (The agreement was signed on the following day.)

The Chief Counsel requested salary increases of $50 a month each for Assistant Counsels, Clifton W. Enfield and Fred Miller. He explained that both of these men are assistants to the Attorney General who has signified his approval of such increases. The Commission unanimously approved such increases. Moreover, the Chief Counsel was informed that the Commission is willing to grant increases up to $600 per month for these men in the event that meets with the Attorney General's approval

The Engineer reported the results of investigations conducted in the City of Stayton at the city's request for improvement of certain streets which the city alleges were damaged by reason of State Highway traffic. He stated that inspection reveals that Fourth Street, the street that the city is most desirous of having improved, was damaged to a certain extent during the winter of 1949 and 1950 by reason of heavy traffic that developed thereon when the street was cleared of snow by State Highway forces. The snow removal operations, he said were conducted to provide a roadway to a garage which the State had rented on this street, and because the snow had not been removed from other streets very heavy traffic developed on Fourth Street. He estimated the cost to repair Fourth Street south of the Santiam Highway, by paving and reoiling, at $1,000, and recommended approval of the expenditure in the 1951 special state tax street fund program. The Commission approved the recommendation.

The Commission discussed a claim from Rogers Construction Co. in the amount of $32,330.95 for extra compensation in connection with its Contract No. 3082 for construction of the Troutdale Section of the Upper Columbia River Highway The Engineer advised that he has investigated this claim and has consulted with the contractors on two occasions relative thereto with a result that a compromise settlement in full payment of the claim has been reached in the sum of $6,505.44. He explained details and recommended approval of such settlement. The Commission approved payment of the sum of $6,505.44 in full settlement of the claim. (For details, see copy of Engineer's written report on the subject dated May 14, 1951.)

The Commission discussed a written report from the Engineer dated May 14, 1951 on the construction of a new ferry terminal at Astoria. The Engineer pointed out that the Commission in arranging its budget for 1951 approved in principle an amount of $200,000 to cover the estimated cost of constructing such new terminal but deferred final approval pending inspection of the premises and an additional report which he is now rendering. The Engineer also pointed out that the State is now paying $250 per month rental for the present terminal and that inspection reveals that considerable repair work will have to be done to the landing facilities in the early part of 1952 in the event that the new terminal is not provided before that time. He estimated that the cost of such repair work at $13,500 if done now. He recommended approval of the new terminal and that he be granted authority to advertise the work for bids to be received at the next meeting of the Commission. In the discussion of this matter, Chairman Chandler expressed himself against a new terminal at this time as did also Commissioners Reynolds and McIver. The Engineer was thereupon instructed to contact the owners of the termin that is now being used to ascertain if the present lease can be renewed on a two or

three year basis. A report on this subject was ordered for the July meeting of the Commission. It was also agreed that the premises would be inspected by the Commission on the occasion of its visit to Astoria in June.

The Commission discussed a report from the Engineer dated May 1, 1951 on the request of the Oregon State Board of Forestry for permission to construct three roadside picnic areas on the Sunset Highway as memorials to E. T. Allen, George Gerlinger and Nels Rogers, who were prominently identified with State forestry matters. In his report the Engineer pointed out that the present policy of the Commission is to develop waysides to be utilized by the motoring public as picnic areas or rest stops, not closer than 30 to 40 mile intervals. These areas he said, are not dedicated to any individual but are created and maintained as a public service for motorists, utilizing revenues obtained from highway users. The three areas desired by the Forestry Department, he said, are situate within a distance of three miles on the Sunset Highway, and information received from that department indicates that, even if it could finance construction of the three waysides, it has no funds for maintenance. He recommended that the request be denied as a matter of established policy. The Commission approved the recommendation.

The Engineer reported the results of a survey to determine the location of dangerous trees that are located on or adjacent to all highways on the State Highway system. In his written report on the subject, the Engineer advises that there are 15,254 such trees which are considered dangerous. The trees are 12" or larger in diameter and approximately 25% of them are located on public lands, although most of them are within the boundaries of the National forests. He estimated that 6,000 of the trees are located on State Highway right of way, and that it would cost between $90,000 and $120,000 to remove them. He recommended:

(1) that the Highway Commission cooperate as soon as possible with the State and Federal agencies having jurisdiction on and off the right of way in National forests and in the Indian Reservation, permitting those agencies to hire and contract the removal of dangerous trees on certain highways and during certain seasons of of the year by permitting those agencies and/or their contractors to load the felled trees or logs on the highway right of way with rubber-tired equipment;

(2) that, in addition to the $13,600 in the current budget, the Commission authorize an additional expenditure of $35,000 for the removal of dangerous trees on the highway right of way where the hazard is greatest, during the present calendar year;

(3) that the Commission include in its 1952 budget the sum of $40,000 for the removal of dangerous trees on highway rights of way; and

(4) adoption of the following policy relative to dangerous trees located beyond highway right of way limits: continuation of the felling and removal of a few of the most dangerous trees which present the greatest hazard to the traveling public, with the permission of the owners, and that notice be given in writing to the owners of private land on which dangerous trees exist, calling attention to their responsibility and the hazard that exists to highway users.

The Commission approved the recommendations unanimously and so ordered. (For details, see copy of Engineer's report dated May 1, 1951 in General Files).

The Engineer reported on a request from County Commissioner J. C. Minson, Crook County, for the elimination of two curves on US Highway No. 28 (Ochoco Highway) between Redmond and Prineville. He advised that investigation reveals three rather hazardous curves on this highway between Redmond and Powell Butte and several others on the same section which also should be eliminated because they are deficient in sight distance. To improve the sight distance at two of the curves mentioned by Commissioner Minson, he said, will cost approximately $6,500; however, he recommended that the work be postponed until the highway between Redmond and Powell Butte is reconstructed in its entirety, which work is contemplated in the Commission's 5-year program. The Commission approved the recommendation.

The Commission discussed and ordered filed a written report from the Engineer dated May 16, 1951 on the subject of insurance provided for the ferry across the Columbia River between Astoria, Oregon and Megler, Washington. (For details see copy of a report dated May 16, 1951 in General Files.)

A letter was presented from Mr. Herman R. Larson, Oakland, Oregon, requesting the oiling of a $1\frac{1}{4}$ - mile section of the Elkton-Sutherlin State Secondary Highway west from the town of Sutherlin, in order to alleviate the dust nuisance. The Engineer advised that the section of highway referred to lies west and south of Sutherlin and consists of an untreated gravel surface. The highway for a distance of one mile west of Sutherlin, he said, now has an oiled surface but the $\frac{1}{2}$-mile section immediately west thereof and a 1.7-mile section on the branch that leads south has never been constructed to modern standards. He further stated that in 1950 a section, about 1.3 miles long, was given a light oil treatment at a cost of $550, but continued heavy logging traffic on the road has ruined the surface. He gave as his opinion that the reoiling of this highway is not justified until the road has been properly constructed, and he recommended that the request for the oiling work be denied and that the road be maintained as in the past as an untreated macadam surface, using a sprinkling tank from time to time as deemed necessary to allay the dust. The Commission approved the recommendation unanimously and it was also decided to inspect the road on the ground during the progress of the Commission's inspection trip during the month of June.

The Engineer brought up for discussion a request from the City of Portland for additional match monies, amounting to $20,000 to finance channelization and signalization of McLoughlin Boulevard. The Engineer recalled that the Commission approved an item of $50,000 in its 1951 betterment budged for such work, of which amount $20,000 was to match money that the city had available during the first six months and $30,000 to match City funds which the City anticipated would become available in its new fiscal year beginning July 1, 1951. He also pointed out that the Commission allocated $30,000 State funds to match funds of the City for a grade separation at Bybee Boulevard. According to recent information received from the Portland Traffic Engineer, the city will have an additional $20,000 as of July 1, 1951 and request was made that the State match that sum to finance a continuation of the channelization and signalization project at S. E. Reedway and S. E. Insley Streets, which, the Engineer stated, is a very desirable improvement. He recommended that the additional $20,000, which was contained in the 1951 budget, be allocated to match City of Portland funds which will become available July 1, 1951 for this work. The Commission approved the recommendation unanimously.

The Commission discussed a proposed agreement with the Portland General Electric Company covering a revision of its power transmission pole line as necessitated by construction of the Marion Street bridge in Salem. The Engineer advised that the revision referred to consists of a transmission line tower at the west approach to the bridge, which is necessary to raise the transmission lines to allow proper clearances. He further stated that the company estimates that the work can be accomplished for $3,300 and he recommended approval of the agreement as prepared and that he be authorized to reimburse the power company for its work upon proper billing. The Commission approved the recommendation. (An agreement with the Portland General Electric Co. was signed by the Commission on the following day.)

The Engineer requested authority for an expenditure of approximately $5,000 for investigations of flared-inlet culverts. He said that this is a new design for small drainage structures, which theoretically increases their carrying capacity a considerable amount, and that the Bureau of Public Roads, which has requested the investigation, suggests that the cost should be charged to "Planning Funds" monies which were approved in the budget last fall. He also said that the first installation of this type of culvert was made in Oregon and it was for that reason that the Bureau of Public Roads felt that this state is better qualified than others to undertake the investigations. Moreover, Mr. W. H. Lynch, Division Engineer of the Bureau of Public Roads, recommends the project and has given his assurance of support. He added that the work would be done in the hydraulic labratory at Oregon State College and that about half of the expense would be made this year and the balance next year. The Commission approved the project unanimously and ordered the matter covered by appropriate agreement with the College.

The Commission discussed and ordered filed a resolution from the Enterprise Chamber of Commerce urging completion of the Enterprise-Lewiston Highway at the earliest possible time.

A petition was presented signed by 126 taxpayers and users of the North Powder River State Secondary Highway requesting "immediate and proper action to put this road in condition". The Engineer advised that the road referred to is the Haines - Anthony Lake State Secondary Highway; also that this road, which is 12.6 miles in length, is surfaced with intermittent sections of gravel or decomposed granite; that the road bed is not stable during the winter months and in the summer months becomes dusty and corrigated. To improve the road to a modern secondary standard, he said, with an oiled surface, will cost about $250,000. He recommended, rather than to go to such a large expenditure, an application of crushed rock, consisting of about 500 cubic yards per mile as a maintenance operation. The Commission approved the recommendation.

The Engineer brought to the Commission's attention a request from the University of Oregon for the landscaping of a triangular parcel of land bounded by Franklin Boulevard (Pacific Highway) on the north, Thirteenth Avenue on the south, Columbia Street on the west and Moss Street on the east, in Eugene. The University, he said, has acquired this property and will finance removal of existing buildings but is asking the Highway Department to landscape the area. He estimated the cost of such landscaping at $4,100 and recommended approval of the expenditure. The matter was given very careful consideration by the Commission, during which Chairman Chandler expressed himself as opposed to the expenditure of highway funds for beautification of property belonging to others. Commissioners Reynolds and McIver indicated concurrence therein, whereupon the Commission unanimously denied the request.

The Commission discussed briefly the Chief Auditor's monthly report on highway finances and inquired why final payment has not been made to certain contractors listed therein for work that has been completed for some time. The Engineer was instructed to render a report on this subject at the next meeting of the Commission. The Chief Auditor was instructed hereafter to state in his report the reason why such final payments have not been made.

The Commission discussed the bids received at the morning session for contract work and at 4:00 p.m. Chairman Chandler announced the Commission's decision with respect to each project as follows, the Commission's action being by unanimous vote:

> "Construction of Phoenix Bridge over Bear Creek on a county road in Jackson County. 8 bids were received by the Commission for this work, the low one being that of Eric Enquist, Troutdate at $41,900. The bids are all being referred to the County

Court of Jackson County for further handling in view of the fact that the project is a county project under county jurisdiction and control.

"Surfacing on the Metolius-Culver and North Unit, Culver-Juniper Butte County roads near the towns of Metolius and Culver, Jefferson County. 14 bids were received for this work, the low one being that of F. L. Somers, Klamath Falls at $109,603. The Commission has referred the bids to the Engineer, with authority to award the contract to F. L. Somers, the low bidder, at his bid price when certain conditions have been satisfied.

"Surfacing South Unit, Gateway-Agency Plains Section of the Gateway-Agency Plains County Road, about 4 miles northwest of Madras in Jefferson County. The Commission received 17 bids for this work, the low one being that of O & K Construction Co., Gresham, at $30,230.20. The bid is satisfactory and the contract has been awarded to the O & K Construction Co. at its bid price.

"Hampton-Gap Ranch Section of the Central Oregon Highway in Lake, Harney and Deschutes Counties, 28 miles of grade widening and paving. Babler & Rogers, Portland, submitted the low bid for this work at $591,811. There were 7 higher bids. The contract has been awarded to Babler & Rogers at their bid price.

"0.61 mile of paving on Hills and Beech Streets in the City of Oakridge, Lane County. Two bids were submitted for this work, the low one being that of Central Heating Co., Eugene, at $13,496.40. The contract has been awarded to this company at its bid price.

"Santiam River Bridge rail replacement on the North Santiam Highway in Linn County. The Commission received 3 bids for this work, all of which have been rejected as being too high.

"Construction of an extension to the Maintenance Building and construction of a sand storage shed at Santiam Junction in Linn County. The Commission received two bids for this work, both of which have been rejected as being too high.

"17.1 miles of paving on the Willow Creek-Boardman Section of the Columbia River Highway in Morrow and Gilliam Counties. Peter Kiewit Sons' Co., Longview, Washington, was the low bidder for this work at $419,825. There were 8 higher bids. The contract has been awarded to Peter Kiewit Sons' Co. at its bid price.

"Painting the Interstate Bridge over the Columbia River on Pacific Highway near Portland, Multnomah County. Tri-State Painting Co., Portland submitted the low bid for this work at $18,800. A. H. Barbour & Sons, Portland, submitted the next low and only other bid at $20,807. The Commission has awarded the contract to the Tri-State Painting Co. at its bid price.

"0.37 mile paving on Fourth Street in the City of Bay City, Tillamook County. The Commission received only one bid on this work, being that of the United Contracting Co., Portland, at $14,692. The bid is acceptable and the Commission has awarded the contract to this company at its bid price.

"0.23 mile of grading and paving on Miller Avenue in the City of Tillamook, Tillamook County. Two bids were submitted for this work, the low one being that of C. H. Grimstad & T. Vanderveldt, Astoria, at $34,353. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder at its bid price when certain conditions have been satisfied.

"Construction of overnight camping facilities in Wallowa Lake State Park, Wallowa County. The only bid submitted for this work was that of Howard Halvorson Co., Portland, at $69,614. The Commission has rejected the bid as being too high.

"Grading and paving the Davies-Forest Grove Section of the Nehalem Secondary Highway north from Forest Grove, in Washington County. Warren Northwest, Inc., Portland, submitted the low bid for this work at $147,832.50. There were four higher bids. The Commission has awarded the contract to the low bidder at its bid price."

The Chief Counsel brought up for discussion, matters pertaining to the construction of the Marion Street bridge in Salem, particularly the question whether or not the construction of the east bridge approach is considered a change in the grade of the city street. He said that from the best legal authority that he can find, he is convinced that a change is being made in the grade of the street and if the Commission approves, he will endeavor to have the City Council approve the change ne appropriate city ordinance. The property owners who are affected, he said, are waiting for a decision in the matter, and he requested authority to take up the matter with the City Council. The State Highway Engineer gave as his feeling that the grade of the street has not been changed, particularly in view of the fact that the city has accepted the plans and specifications of the project, so, in his opinion, it would be unnecessary to ask the city to take action as has been suggested by the Chief Counsel. The matter was discussed at some length but action thereon was deferred. The Engineer and Chief Counsel were instructed to meet together and submit another report on the subject.

A petition was presented from residents of Bates, Oregon, in which the Commission is requested to reconstruct the Austin-Spur Section of the John Day Highway and to provide an oiled surface thereon. It was pointed out that this project is included in the 20% Federal Aid program that the Commission adopted on the previous day. The Secretary was instructed to so inform the petitioners.

The Commission discussed a resolution received from Reed Creek Grange, Lincoln County, and a petition signed by 148 residents of that county in which the Highway Commission is requested to complete the hard surface on the Siletz State Secondary Highway between Skunk Creek, present terminus of the paved section, and the town of Siletz. The Engineer advised that this section is 18.3 miles in length and that the cost to grade, surface and oil it is estimated at $1,500,000. He pointed out that the average daily traffic on the road is less than 200, which, in his estimation, does not justify the expenditure of such a large sum of money. The Commission denied the request in view of the expense involved.

A resolution was also presented from the County Court of Morrow County requesting that the Rhea Creek County Road be designated a Federal Aid Secondary Highway as a substitute for Federal Aid Secondary Highway #444, known as the Ione-Morgan County Road. The Engineer advised that the existing Federal Aid Secondary Highway #444 is 9.3 miles in length, of which 8.5 miles have been completed to secondary highway standards with oiled surfacing, and the county has plans to improve the remaining portion. The Rhea Creek Road, he said, is 18 miles in length, and serves a large farming area, also, it extends along Rhea Creek where construction costs would be quite moderate. He further stated that Morrow County has no unnumbered county roads on the Federal Aid system. He gave as his opinion that it would be proper to add additional mileage to the system in that county, and he recommended, therefore, approval of the county's request that the Rhea Creek Road be placed on the Federal Aid Secondary Highway system. He also recommended that the existing Federal Aid Secondary Highway #444 be retained on the system. The Commission approved both recommendations unanimously subject to approval by the Bureau of Public Roads.

The Secretary presented two resolutions from the County Court of Deschutes County, in one of which the County Court urges the extension of Federal Aid Secondary Highway #329 (Gherking Road) to include the Innes Market Road, and the improvement thereof. The County offers to prepare the roadbed, provide permanent culverts, haul and place base, etc., according to specifications of the State Highway Department, provided the State will furnish and place asphalt, crushed rock and/or cinders this season. In the other resolution, the County Court requests that the Pringle Falls (Wickiup Reservoir) County Road be added to the Federal Aid Secondary Highway system as a substitute for other county roads previously requested, and that this road be given second priority for any funds that hereafter accrue to the county. The Engineer advised that the Innes Market Road is 3.5 miles in length. Deschutes County, he said, has a total of 35.48 miles on the Federal

Aid Secondary system, of which 31.73 miles have been improved to an oiled standard, county funds having been used to finance most of the work. Of the remaining 3.75 miles of unimproved road, he said, 2.5 miles are on the Gherking Road, which is planned for improvement this year. He gave as his feeling that, in view of the conditions, the mileage in Deschutes County should be increased and he recommended approval of the County Court's request in that regard. As to the Pringle Falls Road, the Engineer advised that there are no monies available to finance a high standard improvement now, which would be necessary to withstand log hauling traffic, in view of which, he recommended denial of the county's request for the designation of this road as a Federal Aid Secondary Highway. The matter was carefully considered by the Commission and, as a result thereof, the Commission unanimously approved both of the Engineer's recommendations.

The Engineer reported that for many years, difficulties have been experienced on the Sunset Highway immediately west of Sylvan because of slide conditions; in fact, last year, because of the condition, the Commission purchased from Mr. and Mrs. Wilfred Helmeke, additional right of way and a house that was being endangered by the slide. He further stated that, in order to stabilize the cut bank to eliminate the sliding movement, which becomes worse each year, it is desired to flatten the slope of the highway through the area purchased from the Helmekes. He estimated the cost of the work at $12,000 and requested approval of the expenditure. The Commission approved the request unanimously.

A petition was presented from Long Tom Grange No. 866, Lane County, requesting improvement of the Territorial State Secondary Highway between Cheshire and Benton County Line by placement of a rock surface thereon. The Engineer advised that the section referred to is approximately six miles long and is subject to heavy log hauling traffic. He estimated the cost to improve the section to a pavement standard at $350,000, and recommended that it be considered by the Commission in some future construction program because of its merit. The Commission denied the request for immediate undertaking; however, instructed the Engineer to bring the project to the Commission's attention at some future time.

The Engineer reported the need to improve and channelize S. W. Barbur Boulevard in Portland at its intersection with S. W. Bertha Boulevard and S. W. Tenth Avenue, in order to avoid a bad traffic situation which will exist by reason of the Fred Meyer Burlingame store at this location. He predicted that in the not too distant future, it will be necessary to construct a grade separation structure for the Bertha Boulevard connection at an estimated cost of $125,000, but pending such construction, he said, action should be taken to make the intersection at grade as safe as possible. He presented a plan evolved by the Traffic Engineers of the City of Portland and the State Highway Department, which involves the widening of Barbur Boulevard to six lanes for a distance of about 3,000 feet and the installation of traffic signals. He estimated the over-all cost of the plan at $21,000, of which amount he said $16,000 represents the cost to widen the pavement on Barbur Boulevard, a

permanent improvement, and $5,000 is the estimated cost for channelization work and installation of traffic signals. As to financing the work he said that the City of Portland has agreed to assume the entire cost of providing a connection with Bertha Boulevard, towards which Fred Meyer is making a voluntary contribution of between $3,000 and $4,000, but it is the feeling of the City that the state should pay for widening Barbur Boulevard. He recommended approval of the plan, including the widening, channelization and signalization at a total cost as stated of $21,000 on the basis that the city will contribute $2,500 toward the cost of signalization and the State the balance. He mentioned that the financing of the State's share has already been provided for in the 1951 betterment budget. The Commission unanimously approved the project as outlined by the Engineer. (For details, see copy of Engineer's written report dated May 18, 1951 to the Commission, in General Files.)

A letter was presented from the City of Pendleton requesting construction of an underpass on Emigrant Avenue in Pendleton in order to eliminate what the City alleges is a hazardous grade crossing of US395 and the Main Line tracks of the Union Pacific Railroad Co. The Engineer estimated the cost of an underpass 30 feet wide at $450,000 and a four lane structure at $650,000. He exhibited a map showing the location involved. The Commission decided against the project at the present time because of the cost involved. However, it was agreed to bear it in mind for future consideration.

The Commission had under discussion a proposed agreement with the Bureau of Public Roads covering the furnishing and application of hot mix bituminous surfacing material for maintenance of the North Santiam Forest Highway project #24-A5, B7, C5. The Engineer explained that the Bureau of Public Roads is not equipped to perform this kind of work, and has asked the State to do it with the understanding that the Government will reimburse the State for all costs incurred in connection therewith provided the total obligation does not exceed $10,000. He recommended approval of the agreement on such basis. The Commission approved the recommendation. (The agreement was signed by the Commission later in the session).

A resolution was presented from the Central Oregon Chamber of Commerce requesting "that the Highway Commission recognize the need for the earliest possible completion of Highways 78 and 395 and that the Commission request allocation of funds for this purpose." The resolution was discussed briefly and ordered filed.

The Engineer brought up for discussion a proposal for financing a test road located in the Western States to determine the effect of axle load concentrations. The proposed road, he said, will be about 2,700 feet long with varying thicknesses of foundation and pavement. He estimated the cost of the road at $275,000 and gave as his belief that approximately $95,000 will be contributed by truck manufacturers and oil companies, leaving about $180,000 to be financed by the states, the amount of contribution

of each state being dependent upon the number of states that enter the test. It was his opinion that the project is well worthwhile and that the State of Oregon should join in the test because of the information that will be gained. He further stated that this matter is to be discussed at the next meeting of the Western Association of State Highway Officials when he would like to be prepared to state definitely whether or not the State of Oregon will participate in the experiment on a basis of equal cost to each state concerned. He predicted that at least six states will participate, which would make the share of each about $30,000. The Commission unanimously approved the project in the maximum expenditure of $30,000.

The Commission discussed a letter from the County Court of Lane County concerning the making of an origin and destination survey of the Eugene and Springfield areas of Lane County, particularly inquiring as to how much the survey would cost and when the work could start. The Court advises that the involved areas will share the cost. The Engineer advised that a complete highway economic study, including origin and destination surveys, parking analysis, and final route analysis and report will cost about $25,000 which will be paid for: $13,000 by the City of Eugene for the parking study, $5,000 by the State, $3,000 by Lane County, $2,000 by the City of Springfield, and $2,000 additional by the City of Eugene. He gave as his belief that the survey should be made because the results thereof will be of very material benefit to the State, and he requested authority to discuss the matter with Lane County and the cities involved, and to work out an agreement if the Commission approves the sharing of the costs on the above basis. The Commission unanimously approved the making of the survey provided agreement can be reached with the agencies concerned for payment of costs as mentioned by the Engineer.

The Secretary presented a letter from Jas. O. Convill, City Manager, City of Corvallis, advising that the City Council confirms the understanding arrived between the Highway Commission and the Corvallis delegation on Friday, April 13, 1951 with respect to the proposed First Avenue improvement in Corvallis, as set forth in the Secretary's letter of April 24, 1951. The Commission accepted the letter and ordered it filed.

A letter was also presented from the following representatives of Oregon State legislature, representing counties affected by the proposed bridge being built across the Willamette River at Salem, wherein request was made for reconsideration of the plans for the approaches from Edgewater Street and Wallace Road: Carl H. Francis, Frank M. Farmer, Elliott V. Cummins, J. O. Johnson, Mark O. Hatfield, Lee Ohmart, and Earl E. Fisher. They gave as their understanding that the crossing as proposed will require traffic coming from Polk County to cross two open railroad tracks, which they contend will constitute an impediment to the free flow of traffic and will be an inconvenience and loss to farmers transporting produce, and to persons working in the city of Salem, who will be required to wait for trains at these points. The Engineer advised that the original Salem traffic plan includes a grade separation structure on the Salem-Dallas Highway at some future time and that the immediate plan is to make a connection with the present Salem-Dallas Road (Edgewater Street) near McNary Avenue and to defer

the grade separation structure. To construct the grade separation structure and to extend the road approaches thereto from McNary Avenue, he said, is estimated to cost about $750,000, and there appears to be no justification of that expenditure at the present time. To eliminate the crossing on the Wallace Road, he said will cost about $850,000, but such structure still will not eliminate a great amount of traffic that crosses the railroad at grade since traffic from Wallace Road, destined for West Salem would still have to cross the tracks at grade. He gave as his belief that the benefits to the public at the present time by the elimination of the grade crossings in West Salem will nowise be commensurate with the cost, and he recommended that construction of both structures be deferred until such time as other more critical separations are constructed and priorities of the West Salem crossings are much higher than they are now. The Commission approved the recommendation and ordered the communication filed.

The Commission discussed the following communications regarding proposed improvement of the McKenzie Highway in the City of Springfield.

(1) Resolution of the City Council confirming action previously taken in behalf of the North "A" Street route,

(2) Petition from the membership of Springfield Christian Church protesting the North "A" Street route,

(3) Petition from members of the Paramount Full Gospel Church protesting the North "A" Street route,

(4) Petition signed by 61 property owners along the North "A" Street route endorsing the North "A" Street route, and a connection with the McKenzie Highway at 26th Street rather than at 19th Street,

(5) Letter from R. L. Medill, Springfield, suggesting bypassing the City of Springfield with the new highway extending easterly from the new Ferry Street Bridge in Eugene to a connection with the McKenzie Highway near the Highway Department scales east of Springfield.

(6) Letter from W. B. Bartlett, City Manager, Springfield, dated May 19, 1951, containing a proposal from the City Council for disposal of the city's obligation with respect to the South "A" Street plan.

In the discussion of this matter, Chairman Chandler advised that the City's Civic Committee wants a definite committment by the Commission concerning this project before July 1, 1951. The Commission took no action on the communications, deferring same pending additional report from the Engineer who was instructed to render such report during the progress of the Commission's inspection trip in June. It was also decided to inspect the project on the ground during such inspection trip.

The Engineer requested authority to increase the project authorization set up by the Commission for the improvement of the Barclay Springs - Algoma Project of The Dalles - California Highway, Klamath County, Contract No. 3289, in the amount of $12,150, in order to reimburse the Southern Pacific Company for the cost of changing its railroad tracks, and for the cost of engineer inspectors, switchmen, flagmen and signal revisions. He pointed out that when the original authorization was approved, it was thought that the railroad company's expense would amount to $33,920; however the company now advises that the total cost of the work will be about $46,070 and it has requested authority to bill the State for such sum. He recommended approval of the company's request. The Commission approved the recommendation unanimously, and so ordered.

The Engineer brought up for discussion construction of a maintenance headquarters building at Shaniko, Oregon. He estimated the cost of a standard building at $15,000 and suggested the financing of the structure by transferring $15,000 heretofore approved by the Commission in the 1951 budget for construction of a like building at Bly, Oregon. He explained that since the budget was approved, the headquarters building at Shaniko which was being used on a rental basis blew down during a heavy snowstorm, making it essential to have a new building at this place, whereas it is not so important to have one at Bly. The new building, he said, if approved, will be constructed on a building site that the Commission now owns at Shaniko. The Commission approved the project unanimously.

The Commission discussed a resolution from the City of McMinnville, requesting that the Commission in its contract for construction of the South Yamhill River bridge on Three Mile Lane State Secondary Highway, provide for the construction of sidewalks on both sides of the highway from the bridge westerly to Kirby Street in the City of McMinnville, as a safety measure for pedestrians. The Engineer advised that all of the area proposed for the sidewalks lies within the city limits of McMinnville and he pointed out that it has been the policy of the Highway Commission for many years not to construct sidewalks or footpaths within the limits of an incorporated city or town. He recommended that the request be denied in conformity with that policy. The Commission approved the recommendation.

The Commission also discussed a request from Mrs. Leora Z. Stephens, Lyons, Oregon, for construction of a footwalk on the North Santiam River Bridge on State Secondary Highway No. 222 near Mehama. Mrs. Stephens alleges that the bridge is so narrow that it is difficult for two cars to pass with safety, and is hazardous for pedestrians. She also points out that the bridge is posted for one-way traffic for trucks. The Engineer estimated the cost to construct a sidewalk $3\frac{1}{2}$' wide on one side of this bridge at about $6,200. A sixteen-hour traffic count taken at this place on Thursday, April 17, 1951, he said, reveals 2009 motor vehicles crossing the bridge, and only 12 pedestrians. He further stated that during the 5-year period, 1946 to 1950, inclusive, there were 5 accidents on the bridge, all of which resulted in property damage only and no pedestrians were involved.

He gave as his opinion from the facts disclosed by the survey that the expense of constructing a sidewalk at this time is not justified and he recommended that the request be denied. The Commission approved the Recommendation.

The Engineer reported on a request from Vernon B. Mercier, Principal, Delake-Oceanlake Schools, for construction of a footpath along the Oregon Coast Highway from the end of the existing sidewalk at the north city limits of Oceanlake, northerly to the town of Wecoma Beach, for the benefit and safety of pedestrians, particularly school children, who will be obliged to walk along the highway from Wecoma Beach and other points north of Oceanlake to the new elementary school in Oceanlake. The Engineer advised that this matter has been investigated by the Traffic Engineer, who reports that the average daily motor vehicle traffic on this section of the highway is 2950 during the months that school is in session, and that the average pedestrian count during a 16-hour period revealed only 130 pedestrians in this area, although the school authorities estimate that with the opening of the new school 50 additional school children will walk along the highway. As to the accident record, he said, that during a 5-year period, 1946 to 1950, inclusive, only 51 accidents occurred in this section, 15 persons were injured, but there were no fatalities and no pedestrians were involved. He estimated the cost to construct a 4' oiled footpath from the north limits of Oceanlake past the Dorchester House to the town of Wecoma Beach, a distance of 0.76 mile, at approximately $5,050. He advised that the index of hazard and the relative warrant index are sufficiently high to justify the expense; nevertheless, he recommended that the request be denied for the present because of the possibilities of extending the existing 4-lane divided highway northerly from Oceanlake in the not too distant future. The Commission approved the recommendation.

A communication was presented from E. A. Hollinshead, Jr., Portland, requesting:

(1) "enlargement and lighting of the signs 'Troutdale Junction Ahead' at the east and west junctions of the Columbia River Highway at its connection with the road leading to Troutdale,

(2) "that the two signs reading 'Troutdale Junction' with pointing arrows be enlarged and lighted,

(3) "that the entrance to the roadway leading to the Troutdale underpass be widened and fanned to a greater width, and

(4) 'that lights be installed in the underpass."

Mr. Hollinshead requests these improvements in order to eliminate what he deems a bad traffic hazard at this location, and a detriment to the prosperity and growth of this fast growing community. The Engineer advised that Mr. Hollinshead's request has been investigated and it has been found that the signs

to which he refers have been installed in conformity with National Uniform Traffic Controlled Devices. The sign "Troutdale Junction Ahead", which Mr. Hollinshead considers too small, is 42" x 60" in size, being approximately twice the size of signs called for in the national standard, and the sign is placed 600' in advance of the turn-off. Moreover, the turn-off sign is 36" x 60" in size, with a 48" arrow painted thereon. The east-bound turn-off sign, he said, is 48" x 60" in size. As to the lighting of the underpass, the Engineer stated that the cost is not considered warranted in comparison with the low traffic volume; a two-hour traffic check made between the hours of 7 p.m. and 9 p.m. shows only 4 cars per hour had used the ramp. The underpass, he said, is on a straight-of-way and no traffic hazard exists. He recommended that Mr. Hollinshead's requests be denied. The Commission approved the recommendation.

The Engineer reported receipt of many requests for improvement of the existing grade crossing of the Wilson River Highway and the Southern Pacific Railroad tracks in Tillamook in order to avoid the many accidents that occur at this crossing. Some years ago, he said, flood lights were installed at the crossing but the accidents still continued. He pointed out that there are 3 railroad tracks at the crossing which is within the railroad freightyards, where there is considerable amount of switching. He also said that an informal hearing relative to the crossing was held by the Public Utilities Commissioner, with representatives of the railroad company, and the Highway Department present, and it was agreed to study the situation to see what could be done to reduce the hazards. The best plan devised so far, he said, is placement of signals at the crossing which would operate only at such times as trains are in the crossing area. He estimated the cost of such signalization at approximately $6,600 and he recommended approval of the installation on condition that the railroad company will agree to pay 50% of the installation expense and will maintain the signals after they have been installed. The Commission approved the recommendation unanimously.

A letter was presented from Mr. John D. Mosser, attorney, Portland, requesting, in behalf of Cedar Mill Community Club, installation of a traffic signal on the Sunset Highway at its intersection with Murray Road, a short distance west of Portland, for the benefit and safety of pedestrians, particularly small school children, who have to cross the Sunset Highway at this location. The Engineer advised that this request has been investigated and it has been determined that there is no justification for the signal on the basis of present traffic and the accident record. A traffic count, he said, shows a total volume of traffic entering the intersection of approximately 4,692 vehicles during a 24-hour period, and as to the accidents, only two have been reported since the highway was opened to traffic on October 1, 1948. The pedestrian traffic, he said, averages 148 daily. He recommended that the request for the signal be denied and that a suggestion be offered the school board to institute a proper type of school patrol to operate at the time school children cross the highway. The Commission approved the recommendation.

The Commission discussed a letter from Mr. Leland P. Linn, Superintendent of the Ashland Public Schools, in behalf of its Safety Committee, in which Mr. Linn requests installation of a traffic signal and lights at the intersection of Tolman Road with the Pacific Highway and a similar installation at the intersection of Walker Avenue with Highway 66 (Green Springs Highway). The Engineer advised that investigation reveals that the Tolman Road intersection is on a straight section of the highway at the foot of Siskiyou grade and that the average daily traffic is 2200 vehicles. During a 5-year period from 1946 to 1950, he said, only six accidents occurred at this point, which is a very low accident record. He pointed out that a school patrol is operating here satisfactorily and he recommended on the basis of the investigation that the request for the signal be denied. As to the Walker Avenue intersection, the Engineer advised that the traffic volume at this point is 2,077. Also, there have been only two accidents at this point during the past 5-year period. Moreover, the intersection has been posted for a 25-mile per hour speed limit. He recommended that this request also be denied. The Commission approved both recommendations.

The Commission discussed a request from the City of Aurora for installation of a caution blinker light on Pacific Highway East (US99E) at Main Street, in Aurora. The Engineer advised that investigation of this intersection has been made by the Traffic Engineer, who reports that a flashing beacon is not warranted because the intersection is within the limits of a posted 35-mile per hour speed zone, and is well lighted with two overhead luminare units; moreover, the accident rate is extremely favorable, being only 1.58 accidents per million vehicle miles. He recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed a proposed agreement with the Union Pacific Railroad Co. covering a crossing of the Columbia River Highway over the railroad company's tracks at Oregon Trunk Railroad junction, also covering the rearrangement of crossing signals at this point, in Wasco County. The Commission approved the agreement unanimously upon the recommendations of the Engineer and Chief Counsel. (The agreement was signed on the following day.)

Consideration was given by the Commission to a petition signed by 30 property owners and residents of the Savage Creek Area, Jackson County, urgently requesting improvement of Pacific Highway at its intersection with the Savage Creek Road. The petitioners state they have contributed $500 toward the grading and oiling of a two-mile section of the Savage Creek Road, starting at the highway, which work is to be done by Jackson County, and their request to the Highway Commission is for the improvement of the road within the limits of the highway right of way. The Engineer advised that the highway at this location is surfaced with asphaltic concrete pavement that is in good condition, but the Savage Creek County Road has an untreated macadam surface, which is rough. He estimated the cost to repair that portion of the county road which lies within the highway boundaries, including oiling, at $50 and he recommended approval of the expenditure as a maintenance operation. The Commission approved the recommendation.

The Engineer reported that in conformity with authority previously given him by the Commission, he has awarded contracts as follows, the conditions of the awards having been satisfied:

Construction of east unit of Hood River-Mosier Section of Columbia River Highway in Wasco and Hood River Counties. Bids received February 26, 1951. Contract awarded April 19, 1951 to Kuckenberg Construction Co., low bidder.

Alder Creek-Philomath Section of Alsea Highway, Benton County. Bids received April 12, 1951. Contract awarded April 17, 1951 to Warren Northwest, Inc., low bidder.

Dodge Bridge Section of the Sams Valley Secondary Highway, Jackson County. Bids received April 12, 1951. Contract awarded May 7, 1951 to Tom Lillebo, Low bidder.

Widening and paving the Salem (Lana Avenue-Academy Street) Section of the Pacific Highway. Bids received April 13, 1951, contract awarded May 4, 1951 to Warren Northwest, Inc. low bidder.

Grading and paving the Florence Section of the Oregon Coast Highway, Lane County. Bids received April 13, 1951. Contract awarded May 9, 1951, to Rex C. Ayers Construction Co., low bidder.

Widening Columbia Slough Bridge on US99E, Multnomah County. Bids received April 13, 1951. Contract awarded May 9, 1951, to General Construction Col, low bidder.

The Commission confirmed the awards unanimously.

Consideration was given by the Commission to the following requests for extensions of time in which to complete highway contracts:

1. Hamilton & Thoms, Contract No. 3272, for construction of a bridge over the Coast Fork of the Willamette River on the Willamette Highway, Lane County requested an extension of time of 125 days from November 30, 1950 to April 4, 1951, within which to complete this job. They alleged that inclement weather which prevented operations of their painting crew was the reason they did not complete the work within the specified time limit. The Engineer advised that this job was completed, except for the painting of the structural steel, within the time limit specified but, because of adverse weather conditions, he directed the contractor to postpone the painting work until conditions were favorable in the spring. He recommended in view of the circumstances that the extension of time as requested by granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation. (See FOOTNOTE.)

2. Lindstrom Bros. Inc., Contract No. 3356 for construction of a bridge over the Necanicum River on 12th Avenue in the City of Seaside, requested an additional extension of time of 6 days from March 31 to April 6, 1951, within which to complete this job. They alleged that adverse weather conditions prevented completion of the project within the previously extended time limit. The Engineer advised that the structure was opened to traffic before the expiration of the first extension of time granted by the Commission and that the only work remaining to be done was certain surface finish work on the structure. The public, he said, has not been inconvenienced by the delay, neither has the State incurred any extra expense for engineering supervision because of the overrun of time limit. He recommended, in view of the circumstances that the extension of time as requested be granted without penalty. The Commission approved the recommendation. (See FOOTNOTE).

FOOTNOTE: The action taken by the State Highway Commission upon the extensions of time within which to complete highway contracts listed above, was based upon the recommendations of the State Highway Engineer and his reports, which considered but did not necessarily adopt either or any of the reasons given by the contractors in their requests for such extensions of time.

The Engineer reported that Contracts No. 3274, 3346, 3347, 3414, 3416, 3434, 3452, 327Z, and 3356 for construction of State Highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote, accepted said contracts by the adoption of the attached resolution relative thereto marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission had under discussion a letter from County Judge, John H. Sheldrake, Hood River County, concerning the closing of a portion of the old Columbia River Highway between Hood River and The Dalles, particularly the section which extends westerly from the Hood River-Wasco County line to a junction with the Koberg Beach Road. Judge Sheldrake advises that no one lives along this section and that the only dwelling located there is owned by a Mr. Lee Jackson, whose property is not valuable. He suggests abandonment of this section and the placing of a gate at the Koberg Road junction so as to prohibit public use of the road, and use only by State and County forces as an access road to rock quarries located thereon.

The Engineer advised that the section of road referred to by Judge Sheldrake is about 2 miles long; also, that the Jackson property mentioned by Judge Sheldrake has been appraised by the Right of Way Department, which has determined that its value is about $8,500. He pointed out that the cost to maintain the old road will within a short time far exceed such sum and he recommended, in view thereof, the purchase of the Jackson property by the State, and abandonment of the two-mile section between Koberg Road and the Wasco County line, on condition that Hood River County will take over and maintain that portion of the Old Columbia River Highway which extends westerly from Koberg Road to a junction with the Mount Hood Highway. The Engineer pointed out that directly connected with this matter is the disposal of a portion of the old highway between Mosier and The Dalles in Wasco County. The Wasco County Court, he said, has indicated a willingness to assume jurisdiction over the section which extends from The Dalles to Rowena, a distance of about 10 miles, but the Court feels that the State should maintain the portion westerly from Rowena as a park road since the State owns considerable acreage on Rowena Heights which is being used for State park purposes. He gave as his feeling that no better arrangement can be made and he recommended, in view thereof, retention by the State of the old highway between Mosier and the foot of Rowena loops as a park and scenic road provided Wasco County will take over and maintain as a county road that portion which extends from Rowena to The Dalles. As a result of discussion, the Commission unanimously approved the Engineer's recommendation with respect to the Hood River portion of the old highway and authorized negotiations for purchase of the Jackson property for $8,500 if it cannot be purchased for a lesser sum. The Commission took no action on the Engineer's recommendation with respect to the Wasco County's portion of the old highway.

The Commission had under discussion a request from members of the press who attend meetings of the Commission that they be given copies of the agenda in advance of the meetings to enable them to familiarize themselves with the matters that are coming up for discussion. The Commission unanimously approved the request subject to the condition that matters contained in the agenda shall be given no publicity whatsoever until they have been acted upon by the Commission while in session.

The Engineer requested authority to file with the U. S. Army Engineers an application for permission to construct a bridge over the Clatskanie River on the Lower Columbia River Highway at Clatskanie, and for permission to construct a bridge over the Willamette River on the West Portland-Hubbard Highway at Wilsonville. He explained that both of these structures are contemplated for construction in the early future and that it is necessary that permits be obtained from the War Department before the work can proceed. As a result of discussion, the Commission unanimously authorized the Engineer to file applications with the U. S. Army Engineers for both permits.

The Engineer reported that as a result of changes affected in the motor laws and in the motor transport code by the 1951 Legislature, it is necessary for the Public Utilities Commissioner to reprint his Schedule "B" Log Hauling Permit, which is used by his office in authorizing operators to transport logs, poles or piling on the public roads of this state. According to the provisions of the motor transport code, he said, the Public Utilities Commissioner is required to include in his permits recommendations from the State Highway Commission. However, under the new law, he no longer is required to include recommendations from counties or cities where the operations are not on streets that are not designated highway routes. In order to facilitate the administration of the requirements and, in order to secure more effective enforcement of the rules and regulations, it is proposed to reprint Schedule "B" and to reprint the Manditory Regulation which will be issued to each operator along with the Schedule "B" permit. He presented for the Commission's consideration a copy of each form containing the proposed revisions, and he requested approval of the same. (Copies of the forms are attached hereto marked EXHIBIT "M" and "N", and by this reference are made a part hereof with like effect as though extended in full herein.) The Commission unanimously approved the forms as revised.

The Engineer brought up for discussion a proposed revision of the fee charged for repairing road surfaces that have been disturbed in connection with pipe line installations, etc. under permit issued by the State Highway Department. He advised that in 1943 the Commission adopted a policy of charging the actual cost of repair work done by the State Highway crews, which charge was based on the then prevailing prices of labor, materials, supplies, etc. Present day prices of these items, he said, are about 65% higher than in 1943 and he suggested that the fee charged permitees should be raised accordingly. He presented new schedules as follows and recommended adoption of the same by the Commission:

SCHEDULE NO. 1

(Applicable to P. C. concrete, A. C. concrete, bitminous macadam & oiled surfacings.)

Length of Cut	Flat Charge (Any Width 2' or less)	Additional Charge (For each foot, or fractional foot, or width in excess of 2 feet)
Less than 25'	$25.00	$ 6.00
Between 25' and 35'	33.50	10.00
Between 35' and 45'	40.00	13.00
Between 45' and 55'	50.00	16.00

(Charge for greater lengths to be in proportion)

SCHEDULE NO. 2

(Applicable to unoiled rock and gravel surfacings)

Length of Cut	Flat Charge (Any Width 2' or less)	Additional Charge (For each foot, or fractional foot, of width in excess of 2 feet)
Less than 25'	$12.50	$ 2.50
Between 25' and 35'	16.50	5.00
Between 35' and 45'	21.00	6.00
Between 45' and 55'	25.00	8.00

SCHEDULE NO. 3

(Applicable to installations made by driving, jacking or tunneling and without cutting and surfacing.)

Flat charge of $5.00 - Any length

FOOTNOTE: (The above schedules do not include the authorized blanket increase of $5.00 to be charged for each permit to cover administration expense)

The Commission unanimously approved the new schedules as recommended.

The Engineer asked the Commission to authorize annual step increases in salary for all Highway Department employees that are paid on a monthly basis and whose merit ratings are average or better, pursuant to the State Civil Service rules and regulations. He said that as of July 1, 1951, 443 employees will be eligible for such step increases and that the total estimated cost for this purpose during the current year, 1951, is $36,606, provision for which was included in the budget. The Commission unanimously approved the increases as requested.

The Engineer requested authority to increase from $3.00 to $4.00 per day the amount allowed employees as expenses while engaged on work assignments away from their established headquarters. He explained that considerable difficulty has been experienced this year in getting personnel to leave their established headquarters on short assignments because they are not reimbursed sufficiently to pay their expenses. He also said that review of the retail food index in Portland, as published by the U. S. Department of Labor, shows that living costs have increased 64.7% since March 1946, and that the Bureau of Public Roads grants a per diem allowance to all survey and engineer crews on similar assignments equal to the actual costs incurred with a limit of $5.00 maximum daily, the average being $4.50 per day. He suggested in view of the circumstances approval of a 33 1/3% increase from $3.00 per day to $4.00 per day, subject to certain conditions as set out in his written report to the Commission on this subject dated May 7, 1951. It was the feeling of the Commission

that the per diem increase as recommended by the Engineer is not enough. Accordingly, the Commission voted unanimously to allow an increase to $4.50 per day and instructed the Engineer to recommend such an increase to the Budget Director, it being understood that if approval cannot be secured for the payment of $4.50 per day, then the employees concerned are to be allowed $4.00 per day.

The Commission discussed a letter from Mr V. W. McCormack, in behalf of the Pendleton Round-up Association, requesting the use of a strip of State-owned property situate west of the "round-up" grounds and lying between the highway and the Union Pacific Railroad tracks, during the progress of the Pendleton Round-Up, for the parking of automobiles belonging to Indians and round-up contestants. The Engineer stated that he knows of no good reason why the Commission should not grant this request if entrances and exits to the property are satisfactorily arranged and maintained by the Association and provided the Association agrees to replant the area with grass seed at the proper time in the fall, and will otherwise clean up the premises and leave it in good condition He recommended approval of the request. The Commission approved the recommendation.

The Commission discussed a name for the new highway building in Salem for use on stationery and in the Oregon Blue Book. As a result of the discussion, the Commission voted unanimously to name this building "State Highway Building", and so ordered.

The Commission discussed a project proposed by Mr. Ralph Watson, Public Relations Consultant, for publicising the State of Oregon through the medium of local newspapers. Mr. Watson, who was present, explained details. He particularly pointed out that the plan includes the furnishing of pictures showing bridge and highway projects in the process of construction, and interesting and outstanding scenic views contiguous to the highway system of the State. He said also that he has contacted the editors of all the papers throughout the State, most of whom are heartily in favor of the project. He pointed out that in order to carry on the function, it would be necessary to purchase mats to send to the newspapers illustrative of the material covered in his stories, which he estimated will cost about $500, according to a quotation received from the State printer. He requested instructions whether or not to proceed with the project. After careful consideration of the matter, the Commission unanimously approved the project as a trial proposition.

A letter was presented from the Albany Timber Carnival Association thanking the Commission for permitting use of Waverly Lake and Waverly Lake Park again this year in connection with its Timber Carnival, and requesting permission to operate motors on boats as may be required during construction prior to the event, during the clean-up process following it, and for water skiing and other water pageant sports during the carnival. The Engineer recalled that the Commission previously adopted a policy against allowing boats equipped with motors to operate on any lake under its supervision; however, he said in this particular instance he could see no particular objection in view of the fact that the Commission has already authorized use of the lake for the carnival. He recommended approval of the request. The Commission approved the recommendation.

The Engineer reported that due to changed conditions, he has ordered the lifting of the reduced load limits which have been in effect for some time past on the following State highways:

Highways Listed in Resolution of February 26, 1951

Name of Highway and No.		County	Section of Highway	Date Lifted
Weston-Elgin	330	Union	Road to Summerville (M. P. 37.94) to Jct. Wallowa Lake Hwy. (M. P. 41.39)	Apr. 16
Warner	431	Lake	Jct. Fremont Hwy. (M. P. 0.00) to Drakes Creek (M. P. 21.35)	Apr. 26

Highways Listed in Resolution of April 13, 1951

Medical Springs	340	Union	Catherine Creek (M. P. 9.57) to Baker County Line (M. P. 22.90)	Apr. 18
Diamond Valley	441	Harney	Crane (M. P. 0.00) to Jct. Rome-Princeton Hwy. (M. P. 11.15)	Apr. 30
Rome-Princeton	442	Harney & Malheur	Entire Length	Apr. 30
Nehalem Secdy.	102	Columbia	Bridge No. 3140 over Nehalem River 2½ miles north of Mist to 10 tons (20,000 lbs.)	Apr. 19

He asked the Commission to confirm his action. The Commission unanimously approved the lifting of such reduced load limits by adoption of the attached resolutions marked EXHIBITS "F-1" and "F-2", relative thereto, which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Engineer requested authority to purchase equipment which is estimated to cost $178,500 as detailed in his letter to the Commission dated May 14, 1951, also to purchase additional photographic equipment costing $345.92 as detailed in a separate letter to the Commission dated May 14, 1951; also to purchase office engineering equipment, consisting of cabinets, cases, drafting tables, etc. as listed in his letter to the Commission dated May 16, 1951, which is estimated to cost $3,605. The Commission unanimously approved the purchase of the equipment, as requested.

The Commission discussed a resolution from Deschutes County Pomona Grange, Bend, Oregon, requesting the reversal of the stop signs now in place on the old Bend-Redmond Highway (State Secondary Highway No. 376) at its intersection with Deschutes-Tumalo Market Road (State Secondary Highway No. 374) so as to permit traffic from the Deschutes-Tumalo Secondary Highway to enter this intersection without stopping as is now required. The Engineer advised that the situation at this point has been investigated by the Traffic Engineer, who advises that the volume of traffic that enters the Redmond-Bend Highway from the Deschutes-Tumalo road is only slightly in excess of that which enters the intersection from the other highway, so there is no particular need of a stop sign on either road. However, inasmuch as it is the policy of the Highway Commission to designate all highways, both primary and secondary, as stop highways, it is his recommendation that no change whatsoever be made in the present signing and that the traffic entering the intersection from the Deschutes-Tumalo Highway be required to stop as in the past. The Commission approved the recommendation.

A petition was presented from residents of the Trail community, Jackson County, requesting designation of a reduced speed zone on the Crater Lake Highway through the Town of Trail. The Engineer stated that an investigation by the Traffic Engineer indicates that it will be desirable to hold traffic speeds down to 30 miles per hour on the Crater Lake Highway from a point 0.14 mile south of its junction with the Tiller-Trail Highway to a point 0.06 mile north of this junction, also in view of the number of fixed-object collisions on the Trail Creek Bridge, which is a narrow structure, that this bridge be posted for one-way traffic for trucks only. In view of these findings, he recommended approval by the Commission of such reduced speed zone and the posting of the Trail Creek Bridge for one-way traffic for trucks. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Secretary presented a letter from the Hon. Carl C. Hill, County Judge Douglas County, in behalf of the residents of Camas Valley, requesting establishment of a 25-mile per hour speed limit on the Coos Bay-Roseburg Highway for a distance of about one-fourth mile on each side of Camas Valley Store. Judge Hill pointed out that the highway is straight for a considerable distance at this point and the tendency of traffic is to travel at an excessive rate of speed. The Engineer advised that this matter has been investigated by the Traffic Engineer whose report on the subject indicates that there is warrant for establishment of a 40-mile per hour speed zone from a point about 0.24 mile west of Camas Valley Store to a point 0.26 mile east of that store and who recommends approval of such designation. He stated his concurrance in the recommendation. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto marked EXHIBIT "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer brought up for discussion the disposal of a portion of the Enterprise-Lewiston Highway, which no longer is needed for State Highway purposes in view of the reconstruction of this highway on new alignment. He exhibited a map of the portion affected and recommended appropriate action by the Commission. The Commission approved the abandonment of such portion of this highway unanimously by adoption of the attached resolution relative thereto, marked EXHIBIT "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also recommended the abandonment of certain portions of the Summit-Hug Point Section of the Oregon Coast Highway, which no longer are of value for State highway purposes since the highway has been rebuilt on new alignment. He presented a map showing the portions affected and recommended approval by the Commission. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "J", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Also upon the recommendation of the Engineer, the Commission considered abandonment of portions of the East Unit of the Antelope-Clarno Section of the Shaniko-Fossil Secondary Highway No. 291 when the improvement of this section, which has been authorized, is completed. The Engineer exhibited a map showing portions of the old road that no longer will be of value for State Highway purposes when the improvement is completed. He recommended abandonment of the portions disclosed thereon. He also presented an agreement with Wasco County covering the matter and recommended approval of the same. As a result of discussion, the Commission unanimously approved the agreement as recommended. (The agreement was signed by the Commission on the following day.)

The Commission had under discussion the setting of a date for its next regular meeting to be held in July, and decided to hold such meeting in Portland on Monday and Tuesday, July 16 and 17, 1951. The Secretary was instructed to make the usual arrangements for use of the Green Room in the Imperial Hotel. The Commission also discussed a date for its meeting in August, but deferred same until later.

The Chief Counsel brought to the Commission's attention a request from the State Budget Director that the Highway Commission construct a building in Oregon City for use by the State Unemployment Compensation Commission. He estimated the cost of the building at $20,000 and advised that the rentals accruing would realize 10% on the investment. The Commission decided unanimously not to assume this responsibility since it wishes to avoid going into competition with private business.

The Commission discussed and upon recommendation of the Right of Way Engineer approved the releasing of an easement heretofore acquired from the Paine Estate on the Santiam River-Albany Section of US99E in Linn County, inasmuch as the State has no further use for the property. (The release was signed by the Commission on the following day.)

The Right of Way Engineer requested authority to pay to the Sunnyslope Ditch Co. of North Powder, Oregon, the sum of $750 for construction and installation or a diversion box on the Ladd Canyon Section of the Old Oregon Trail. He explained that through an oversight no provision was made in the right of way settlement for the diversion box and after the construction work on the highway was started the company insisted that it be installed at State expense. The Commission unanimously approved the expenditure.

Consideration was given by the Commission to a request from the County Court of Jefferson County that it be granted the privilege of bidding on two road construction projects in Jefferson County. The Engineer recommended against such procedure for a number of reasons, the principal ones being that no statute can be found that permits counties to bid on highway construction, and there is a question whether or not the Bureau of Public Roads will approve handling work in that manner. The Commission denied the request.

The Engineer requested approval of an increase of $180,000 in the project authorization for reconstruction of the Willamette Highway around Meridian Dam, Lane County, in order to provide a higher type pavement than was originally contemplated. He recalled the Commission's agreement with the Federal Government in 1941 wherein it was agreed that the State would pay the Federal Government the cost of reconstructing the highway to a modern standard in its present position which was estimated at that time at $930,000. The actual construction cost of the new road on a higher elevation, he said, is in excess of $4,000,000, and the surface provided for in the original arrangement was Type B-3, bituminous macadam. This type of surfacing, he added, while superior to that on the existing road, is not considered satisfactory for highways subject to heavy truck hauling, such as this one will be, and to provide a suitable pavement consisting of asphaltic concrete will cost an additional $180,000. He requested approval of such additional amount, which added to the current allotment of $320,000, makes a total authorization of $500,000. The Commission approved such increase unanimously.

A letter was presented from Orin L. King, City Manager, Eugene, advising that the city is receiving petitions for the construction of sidewalks on the north side of Franklin Boulevard (US99) between Walnut Street and Hilyard Street and, in order that the work may be done in a manner to control entrances to driveways for commercial establishments, concrete curbs and gutters should also be installed. Mr. King suggests that the Highway Department participate in the project to the extent of constructing concrete curbs and gutters. The Engineer advised that the drainage

and general appearance along this section of the highway are not good. He pointed out that the section is a portion of the old highway which was not improved when the 4-lane highway was built so further improvement is necessary and desirable for a complete improvement. He estimated that it will cost about $25,000 to widen the pavement from its present 20' width to 32' and to construct curbs, and he recommended approval of the expenditure as a State construction project. The Commission approved the recommendation and so ordered.

A letter was presented from Mr. Armand Larive, Superintendent, Hermiston Public Schools, in which he calls to the attention of the Commission what he alleges are two serious hazards on the Hermiston Secondary Highway between Buck's Corner, near the State pheasant farm, and Hermiston. One of the alleged hazards is an underpass of the Union Pacific Railroad tracks, which Mr. Larive declares is extremely dangerous because of its narrowness. The other is an irrigation structure which protrudes out into the highway near the Harold Rankin farm. As justification for remedial measures, he mentions the heavy volume of traffic on this highway due to developments at Hinkle and Ordinance. The Engineer advised that the underpass referred to by Mr. Larive is narrow but cannot be improved except by complete reconstruction, and when that is done the highway should be realigned. He said that this is a major project on a secondary highway and cannot be done now, but should be considered by the Commission in a future construction program. As to the irrigation structure, the Engineer advised that to eliminate this hazard will require only a nominal expenditure of about $300 and that he has instructed the District Maintenance Superintendent to take care of it as soon as the irrigation season is over this fall. The Commission approved the expenditure of $300 for remedying the irrigation structure hazard but denied, for the present, the request for the improvement at the underpass.

The Engineer brought up for discussion a request from the City of Portland for the cooperative improvement of the intersection at N. E 33d Avenue and Sandy Boulevard in order to eliminate left-turn movements from Sandy Boulevard onto 33d Avenue. He recalled a previous report on this subject in November 1950, action on which the Commission deferred pending study. The City of Portland, he said, has renewed its request for this improvement because it considers it very important to eliminate the extreme congestion and hazard that now exists at this place. He stated that he is in agreement with the City's contention that this is the worst intersection on Sandy Boulevard at the present time, and he recommended approval of a cooperative project with the City to improve it. He estimated the cost of the total improvement at $36,500, which, he said, will be paid 50% by the city and 50% by the State. As a result of careful consideration of this matter, the Commission approved the undertaking as a joint project with the City on the basis of the Engineer's recommendation.

The Commission discussed a letter from the Mt. Hood Pow-Wowers, Mrs. J. Elene Lofgren, Secretary, requesting that remedial measures be taken to relieve a serious traffic slow-down on the Mt. Hood Highway between Sandy and its junction with the Warm Springs Highway, caused by log hauling and oil trucks. The Secretary was instructed to inform Mrs. Lofgren that the Commission is cognizant of the traffic situation at this point but is not in a position financially at the present time to make the necessary corrections due to the high cost of the work involved, but that the Commission will keep the project in mind for future consideration.

The Commission had under discussion the Engineer's report on a location survey for the Pacific Highway (US99) between a point approximately one mile north of Winchester and a place known as Shady Point, about three miles south of Roseburg. The Engineer advised that the survey is completed and ready for adoption by the Commission. He presented a map showing the location and explained details. The Commission deferred action on the matter pending personal inspection on its trip in June.

The Commission discussed briefly with the Engineer matters that are to be presented by delegations on the following day.

1. Bend City Planning Commission re future highway routes through Bend in relation to future planning: The Engineer advised that this is a big problem and will need considerable study. The Commission took no action.

2. Sheridan Chamber of Commerce re improvement of a 2.3-mile section of the Salmon River Highway easterly from the east city limits of Sheridan: This project is being considered in the construction program for bond money.

3. Fossil Community Club re improvement of Butte Creek-Summit Pass Section of the John Day Highway. The Engineer advised that this project is low in priority although there are some narrow places that should be improved. No action taken.

4. Dufur Chamber of Commerce re designation of The Dalles-California Highway as a Federal highway route south from The Dalles: The Commission took no action in this matter.

5. Lane County Court re traffic survey in Eugene, Springfield and vicinity: The Engineer recalled that the Commission previously authorized the survey provided agreement can be reached with cooperating parties concerning costs.

6. County Judge C. W. Craddock, Harney County, re improvement of a county road extending northerly from the town of Crane to a junction with the Central Oregon Highway at Buchanan; also re Central Oregon Highway and Folly Farm Road: The Engineer explained that the Crane-Buchanan road is an entirely new project. The Commission took no action.

7. J. S. Burris et al, re improvement of Wasco-Heppner State Secondary Highway, particularly the west end thereof. The Commission took no action.

8. Portland City Council re sewer construction on 82d Avenue: The Engineer advised that the Commission previously authorized an expenditure of $50,000 of State Highway funds to assist in financing this project; however, it is now estimated that the project is to cost $230,000 and the city is asking the State to contribute an additional sum because the adjacent property owners object to larger assessments against their property. The Commission decided not to contribute additional funds for this work.

9. Delegation from Roseburg remonstrating against a proposed relocation of the Pacific Highway near the hospital in Roseburg: The Engineer advised it would not be possible to change the location.

The Engineer requested authority for the Right of Way Department to negotiate acquisition of a cinder pit on the Ladd Canyon Section of the Old Oregon Trail Union County, which pit is controlled by E. G. Bickmore, Assistant Division Engineer at LaGrande. The Commission approved the request unanimously.

The Engineer brought up for discussion the question of acquiring right of way from Mr. Lofts in connection with the improvement of the Columbia River Highway through the City of Hood River. He recalled that the highway location was changed to avoid Mr. Lofts' land, which no longer is needed. He recommended against purchase of the property. The Commission approved the recommendation.

A letter was presented from Mr. William E. Healy, Assistant Secretary of State, inquiring as to the possibilities of securing space in the new Highway Building in Salem for temporary use by the State Department of Veterans Affairs. Mr. Healy advises that the Veterans Department will need 7,000 square feet of space for a year or more in connection with its activities. The Secretary was instructed to inform Mr. Healy that the Commission is not in a position presently to commit any unallocated space in this building because there are possibilities that the entire building will be needed for highway purposes.

The Commission discussed a letter from Allen's Press Clipping Bureau, Portland, soliciting resumption of service rendered by that Bureau in the past. The Commission decided that it is not in need of such service at the present time and instructed the Secretary to so inform the Bureau.

The Chief Counsel brought up for discussion the question of permitting advertising signs to extend beyond the curb line on city streets that are State Highway routes. He particularly mentioned such signs that extend over the widened portions of the Pacific Highway East north of the railroad underpass in Salem. The signs, he said, are too low and are unsafe, but the State has no authority to control them, although the city council could if it wanted to. He was instructed by the Commission to ask the city council to remedy this situation.

The Chief Counsel also brought to the Commission's attention a complaint from the City Attorney at Grants Pass, Mr. W. W. Balderree, concerning undue noise caused by diesel freight trucks passing through Grants Pass. He suggested as a remedy that such traffic could be routed on another street. He was instructed to inform Mr. Balderree that the Commission will give the matter serious consideration if the request comes from the City Council.

The Commission discussed a request from the Coos Bay Timber Operators to lease a small tract of State-owned land in the City of North Bend for a period of 10 years. The Right of Way Engineer advised that the property consists of five lots for the use of which the company will pay $85 per year plus taxes that may be assessed in excess of $25 per year; also, that the lease will contain a 6-months' cancellation clause. He recommended approval of the request. The Commission approved the recommendation unanimously. (Lease agreement covering the matter was signed by the Commission on the following day.)

The Commission also discussed an agreement with the Oretown Cheese Association covering a building encroachment on the right of way of the Oregon Coast Highway at Oretown, Tillamook County. The Right of Way Engineer advised that this encroachment has existed for a number of years, but it was not until recently that the Association would admit it. The proposed agreement, he said, permits the Association to maintain its building on the Highway property but prohibits the parking of vehicles on the northerly 30' of the east front of the building, and allows the State to maintain "NO PARKING" signs on this area. He recommended approval of the agreement. The Commission approved the recommendation. (The agreement was signed on the following day.)

The Engineer reported that the City of Cove has satisfied the legal requirements with respect to the expenditure of state tax street funds accruing to the city during the first six months' period of 1949, and that the plans of the project to be financed by such funds have been examined and found satisfactory. He also advised that the cities of Granite, Prairie City and Richland have satisfied the legal requirements with respect to the expenditure of state tax street funds accruing to them during the first 6-months' period of 1950, and that the plans for the projects to be financed by such funds have been assigned and found satisfactory. He also advised that the following cities and towns have satisfied the legal requirements with respect to the expenditure of state tax street funds that accrued to them during the second 6-months' period of 1950 and that the plans of the projects to be financed by such funds have been examined and found satisfactory:

Adams, Bay City, Canyonville, Cornelius, Cove, Culver, Dundee, Eastside, Elkton, Gaston, Gearhart, Haines, Helix, Hubbard, Imbler, Ione, Jordan Valley, Lexington, Lonerock, Manzanita, Monroe, Paisley, Phoenix, Port Orford, Prairie City, Prescott, Riddle, Sublimity, Taft, Troutdale, Tualatin, Turner, Waterloo, Yamhill, and Yoncalla.

He recommended approval of the plans by the Commission in all three instances. The Commission approved the recommendation unanimously by adoption of the attached resolutions relative thereto, marked EXHIBITS "K-1", "K-2", and "K-3", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Engineer reported completion of preliminary surveys for a one-way street system on US30 through the City of The Dalles. He presented a map showing the proposed plan and advised that the over-all cost to put it into effect is estimated at $165,000, of which amount approximately $84,000 is for construction, $56,000 is for right of way and $25,000 is for traffic signals. The City of The Dalles he said, has indicated its willingness to cooperate on this project to the extent of paying 50% of the cost of right of way and traffic signals, amounting to approximately $40,500; however, the city does not have cash on hand but agrees to pay $10,000 in July of this year, and $10,000 annually thereafter until the obligation is satisfied. The Commission deferred its decision in this matter pending receipt of an official request from the City Council for the improvement, including a definite statement as to what cooperation the City is willing to give. The Engineer was instructed to so inform the city council.

The meeting adjourned at 5:00 p.m. to reconvene the following morning at 9:00 a.m. in the same room.

Portland, Oregon
May 25, 1951

The meeting of the State Highway Commission reconvened at 9:00 a.m in the Green Room of the Imperial Hotel. The following were present and participated:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
Milo K McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2d Asst. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Fred A. Miller, Assistant Counsel
Forrest Cooper, Right of Way Engineer
C. H. Armstrong, Parks Superintendent
M. H. Hawke, Chief Auditor
H. B. Glaisyer, Secretary

Bids as follows for highway construction were opened and read aloud by the Secretary pursuant to previously published notice, at the conclusion of which Chairman Chandler announced that the awards of contracts would be made at 3:00 p. m.

MT. HOOD HIGHWAY IN CLACKAMAS COUNTY
TIMBERLINE JUNCTION SAND STORAGE SHED

Schrader Construction Co., Portland	$ 15,689.00
Erick Enquist, Troutdale	17,186.00
C. M Merrill, Newport	17,484.00
Stockton & Son, Gresham	19,691.40

Westates Electric Construction Co., Salem	13,998.00
Huenergard Electric Co., Portland	14,975.00

Hon. Lloyd Rea, County Judge, Baker County, came before the Commission regarding construction of the Baker-Salisbury Section of the Baker-Unity Highway. He was informed by Chairman Chandler that plans and specifications are now being prepared for this improvement and that, according to the present schedule, the project will be advertised for bids to be received at the July meeting of the Commission.

W. O. Cuthbertson, City Manager, Bend, and Marion E. Cady, Manager of Bend Chamber of Commerce, appeared before the Commission in behalf of the Bend Civic Planning Commission concerning future highway routes through the City of Bend in relation to future planning. Mr. Cuthbertson was the principal spokesman. He requested information concerning the plans of the Commission for the future development of highways in Bend, what changes are contemplated, etc. He also asked that the Engineer be given authority to make a detailed study of the situation. Chairman Chandler advised that the thinking of engineers today is to by-pass cities so as to avoid city traffic congestion. The situation in Bend, he said, has been discussed somewhat by the Commission but no definite plan has been arranged, and cannot be arranged until an engineering study has been made and, if the City Council will make a formal request for such study, the Commission very likely will grant it. Mr. Cuthbertson then brough t up for discussion the problem of vertical clearance on the Central Oregon Highway underpass of the Oregon Trunk Railroad in Bend. He was informed by Chairman Chandler that this matter is properly a part of the other and will be studied along with it, if the survey is authorized.

The following persons representing the Sheridan Chamber of Commerce were present regarding improvement of the 2.3-mile section of the Salmon River Highway easterly from the east city limits of Sheridan: L. R. Sackett, Director, Chamber of Commerce; Senator Eugene E. Marsh, City Attorney, McMinnville; Dean Holmes, President, Chamber of Commerce, B. C. Swails, Director Chamber of Commerce. The group was headed by Mr. Sackett and the principal speaker was Senator Marsh. Senator Marsh stated that they are anxious for the improvement of this section of highway because it is a connecting link between two sections already completed. He declared it to be one of the oldest highways in the state, one of the heaviest traveled sections, and that its improvement is justified in order to reduce accidents. The pavement, he said, is beyond

repair by patching, and, if a new pavement were constructed, it would provide a modern highway between Sheridan and McMinnville. He added that the present highway constitues a bottleneck situation, and its improvement should be given priority over other projects. Chairman Chandler advised that the Commission has provided the sum of $300,000 in its over-all program for improvement of this highway between Sheridan and Deer Creek, but, he said, it will be some time, perhaps two years, before the project can go forward. The matter was discussed at some length during which figures concerning traffic volume and class of traffic were brought out, and, as a result thereof, the Commission agreed to give the matter serious study and ascertain if it is possible to rearrange the program to advance the improvement.

A delegation from Fossil was present and asked the Commission to improve the John Day Highway between Fossill and Spray, particularly the Butte Creek-Summit Section thereof which they asked the Commission to regrade and straighten. The group was headed by Mr. Robert Misener, representing the Fossil Community Club and included R. W. Potter, representing Pomona Grange, S. J. Howard, County Judge; Wheeler County; and J. P. Steiwer, Secretary-Manager of the Comunity Club. Mr. Misener read aloud letters from several transportation companies and farmers of the district urgently requesting the improvement, and also a section below Spray, which, they declared, is dangerous to travel and where accidents frequently occur because of the narrowness of the roadbed. Mr. Potter stated that he represents 400 farmers who use this highway and who are particularly anxious to have it improved. Judge Howard gave as his belief that the people of this district are entitled to the improvement of the Butte Creek-Summit Section. Chairman Chandler advised that studies have been made to modernize the highway between Fossil and Dayville, and it has been determined that such modernization work will cost about $4,200,000, which sum, he said, the Commission does not have available; however, the Commission is going to try to find some money to eliminate some of the worst spots which is about all of the encouragement the Commission can give at the present time.

The following persons composed a delegation from Dufur, which urged the Commission to change the routing of Federal Aid Highway Route 97 from Sherman Highway to The Dalles-California Highway north from the point where these two highways connect south of Maupin: C. K. Hill, representing the Dufur Chamber of Commerce; and Carl Elliott, representing the Maupin Lions Club. Mr. Hill read aloud a resolution adopted by the Dufur Chamber of Commerce at its meeting of May 14, 1951 on this subject. He also presented petitions signed by numerous residents and property owners of Wasco County, urging the change in routes, it being their feeling that the logical routing of US97 is through The Dalles, where a new bridge is now under construction across the Columbia River Chairman Chandler explained the requirements for US highway route designations and, as a result of the discussion which followed, the Engineer was instructed to take up the matter with the proper authorities Mr. Elliott also requested a rerouting of The Dalles-California Highway between Dufur and The Dalles to eliminate

what he termed eight crooked miles. He suggested as an alternate proposition reconstruction of the highway on an entirely new alignment, which, he said, will shorten the distance between Dufur and The Dalles about six miles. The present highway, he added is the cause of much complaint by tourists and truck traffic. The Commission took the matter under advisement.

The Commission discussed the salaries of the State Highway Engineer and the Secretary. It was the feeling of the Commission that the Engineer is entitled to a salary of $12,000 per annum, starting May 1, 1951. As to the Secretary, the Commission declared its feeling that the position of Secretary is comparable to the position of Division Engineer and, accordingly, the Secretary should receive the same salary as is paid Division Engineers. In the discussion, it was pointed out that presently Division Engineers are receiving $620.00 per month, where there is now before the Civil Service Commission and the State Budget Director a request for an increase for engineering personnel, which, if approved, will result in a monthly salary of $672.00 for Division Engineers. The Engineer stated that, even if such increase is not granted, very likely a salary of $650.00 a month will be approved. In view of this information, the Commission decided to set the Secretary's salary as of May 1, 1951 at $620.00 per month and $650.00 per month from the first of July. Motion was made by Commissioner Reynolds that the Engineer's salary be $12,000.00 per annum starting May 1, 1951, and that the salary of the Secretary, starting May 1, 1951, shall be $620.00 per month and on July 1, 1951, $650.00 per month, with the understanding that the Secretary shall receive $672.00 starting July 1, 1951 if such rate of pay is approved by the Civil Service Commission and the State Budget Director for division engineers. Commissioner McIver seconded the motion, whereupon Chairman Chandler declared the motion carried by the unanimous vote of the Commission.

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. in the same room, the same persons being present and participating.

Chairman Chandler brought up the matter of publicly dedicating the new Highway building in Salem when it is occupied. The Commission decided to conduct the ceremonies when the new office furniture, which has been ordered, has been installed, which, it was thought, would be about June 1, 1951.

The Commission discussed a request from the City of Gold Beach for the placement of a dust palliative to allay dust on some of the city streets. The city also asked for the maintenance of the oiled streets around the Court House square, which was constructed by the State as a joint project a couple of years ago. The Commission referred the matter to the Engineer for investigation and report.

The County Court of Lane County, represented by County Judge C. T. Bayly, County Commissioners Lee Raish and Bob Maclay, came before the Commission regarding a proposed traffic survey in the Eugene -Springfield area. They were accompanied by Mr. Howard Merriam, Chairman of

the Roads and Highways Committee of the Eugene Chamber of Commerce. Judge Bayly, who headed the group, urged the Commission to authorize such a survey. Chairman Chandler advised that the Commission has had this matter under discussion and is willing to conduct such a survey, which is estimated to cost from $25,000 to $30,000, as a joint project among the cities and the county, provided agreement can be reached as to the distribution of costs. The State Highway Department, he said, is willing to contribute $5,000 maximum for this purpose. The group indicated approval of such arrangement.

County Judge C. W. Craddock, Harney County, was present and inquired as to the present status of the realignment project that is proposed for the Sage Hen Hill Section of the Central Oregon Highway. He urged the placement of a light coating of oil on this section if the Commission cannot see its way clear to authorize a major project. He was informed that the Commission does not have funds to improve the section at this time, and that the county will have to be satisfied with ordinary maintenance for the time being. Judge Craddock then asked as to the completion of the Folly Farms Section of the Rome-Princeton Secondary Highway. He was informed that the Commission has made no change as yet in the programming of this project, and there is a question if the work can be done this year Judge Craddock then inquired as to the possibilities of placing the Crane-Buchanan County Road on the State Secondary System. This road, he said, carries heavy traffic through Crane from the Drewsy district and, in his estimation, qualifies as a state secondary highway. He gave as his understanding that a former highway commission, many years ago, agreed to place this road on the Secondary Highway System when conditions warrant, and he expressed that such time has been reached. He was informed that this is an entirely new project to the present Highway Commission and that this Commission does not feel that it would be proper to place the road on the State system now.

In this connection the Commission discussed a request from the County Court of Umatilla County for oiling the Mission County Road (Federal Aid Secondary Highway) south from the town of Mission a distance of 5.67 miles; also for an extension of this highway north from the town of Mission a distance of 2.75 miles to a connection with the Oregon-Washington Highway. The Engineer estimated the cost to oil the Mission south project at $130,000 and the cost to construct the Mission north project, including the bridge, at $146,000. He recommended consideration of the Mission south project for a construction program when funds become available, and that the Mission north project be denied until improvement of the present Federal Aid Secondary system is further advanced. He exhibited a map showing the Federal Aid Secondary system of Umatilla County, 50% of which, he said, is improved. Chairman Chandler gave as his feeling that the Commission should add no more roads to the Secondary Highway system until improvement of the present roads in such system is further advanced. Commissioner Reynolds and McIver indicated concurrence therein, whereupon the Engineer was instructed to render a complete report on the status of Federal Aid Secondary highway projects included in the fifteen-year program. Final decision with respect to the request of the Umatilla County Court was deferred by the Commission pending rendition of such report.

The following persons composed a delegation from Sherman and Gilliam Counties, which appeared before the Commission in the interests of the Cottonwood Grade Section of the Wasco-Heppner State Secondary Highway: J. S. Burris, Lawrence Kenny, E. E. Shell, all of Moro; George Drinkard, Jr., Wasco; R. W. Potter, Condon, representing Pomona Grange; and George Kaseberg, The Dalles. Mr. Burris was principal spokesman. He declared that the surfacing on the East Cottonwood Canyon Section consists of round river gravel that is almost impassable and he urged the Commission to cover this with a suitable layer of crushed material. He alleged that the Commission promised to do that in 1950, but has not fulfilled the obligation as yet. He also asked the Commission to change the routing of this highway westerly from the top of Cottonwood grade along a new route that will shorten, considerably, the distance to the Sherman Highway junction. The Commission agreed to inspect the project some time when it is in that vicinity. The other members of the group endorsed the remarks of Mr. Burris. Mr. Kaseberg expressed pleasure that the Commission has authorized the improvement of the section easterly from the Cottonwood bridge by placement of a crushed rock surface thereon. He inquired whether or not the improvement includes an oiled surface. He was informed that the present allocation makes no provision for oiling work. Mr. Kaseberg alleged that the Commission at its meeting in April agreed to consider the oiling of this section. He was informed by the Chairman that such a statement, if made, would be followed through. The Engineer was thereupon instructed to report to the Commission at the next meeting. Mr. Drinkard urged the realignment of the westerly end of this highway so as to make a more direct connection with the Sherman Highway by way of Wasco rather than by Moro. The Commission instructed the Engineer to report on this subject at its next meeting. This concluded the conference.

The Portland City Council, represented by Mayor Dorothy McCullough Lee, and Councilmen W. A. Bowes, Ormond R. Bean, J. E. Bennett, and Fred L. Peterson, was present regarding storm and sanitary sewer construction on 82d Avenue, route of the Cascade Secondary Highway 160. Mayor Lee stated the problem briefly and called upon City Commissioner Bowes to explain details. Commissioner Bowes recited the history of the project pointing out that, pursuant to agreement reached with the State Highway Department in August, 1949, through an exchange of letters, the Highway Commission authorized a contribution of $50,000 of State Highway funds to assist in financing a storm sewer on this street, which, at that time was estimated to cost about $122,753, it being understood that the city would pay the difference. Actually, he said, the entire project has cost $224,962, of which about $124,588 represents the cost of the storm sewer portion. Mayor Lee advised that the problem confronting the City is to find some way to finance the improvement without causing too great a burden on the owners of the properties that lie within the city limits of Portland. She pointed out that the city boundary line at this location coincides with the center line of 82d Avenue, so it is not possible for the city to assess costs against the property on the east side of the street, thus placing the burden entirely on the property owners on the west side of the street. The situation is not fair, she said, because the property owners on

the east side of the street are being relieved of payment of any sum for benefits that they receive and the property owners on the west side of the street within the city are being assessed double cost, which means in many instances that their property will be confiscated for payment of the assessments which are far greater than the value of the properties. She asked the Highway Commission to authorize an additional contribution of State Highway funds, so as to avoid such a situation.

Chairman Chandler gave as his recollection of the matter that the Highway Commission originally authorized a contribution of $30,000 of highway money to assist in financing the storm sewer which would be of benefit to the highway. However, later on, the Commission, at the City's request, agreed to contribute $50,000 to the cause, it being understood that such contribution was to be the maximum amount the State would pay. The feeling of the Commission now, he said, is in accord with that understanding. He expressed regrets that the people affected must suffer because of the high assessments, but, he added, that is the city's problem and had the Commission known when the matter first came up how much the project was to cost and how much the State was going to be asked to contribute, the Commission would not have joined in the undertaking.

There followed a general discussion with Mayor Lee, Commissioners Bowes and Bennett each taking part. They strongly urged the Commission to reconsider its decision. Chairman Chandler concluded the conference by stating that the Commission will carefully review the records of the project and will discuss it thoroughly among themselves before making a final decision, however, he added, the Council must not hold out much hope that the Commission will increase the State's contribution.

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3:00 p.m., Chairman Chandler announced the Commission's decision with respect to each project as follows, the Commission's action being by unanimous vote:

"Construction of sand storage shed at Timberline Junction, Mount Hood Highway, Clackamas County. The Commission received 4 bids for this work, all of which were rejected as being too high.

"Grading and surfacing the Riverton Section of the Oregon Coast Highway in Coos County. The Coos Bay Dredging Co., Coos Bay, submitted the low bid for this work at $18,886.80. There were three higher bids. The contract has been awarded to the Coos Bay Dredging Co. at its bid price.

"Surfacing the Combs Flat (Prineville-Eagle Rock) Section of the Paulina Secondary Highway, Crook County. 9 bids were submitted for this work, the low one being that of J. N. Conley, Portland, at $89,860. The Commission accepts the bid and has awarded the contract to Mr. Conley at his bid price.

"Paving the Burns-Buchanan Section of the Central Oregon Highway, Harney County. 7 bids were submitted for this work, the low one being that of Warren Northwest, Inc., Portland, at $401.925. The Commission has awarded the contract to Warren Northwest, Inc. at its bid price.

"Reoiling on six state highways in the vicinity of Grants pass, Medford, Ashland, Selma, Trail and Prospect in Jackson and Josephine Counties. J. C. Compton Co., McMinnville, submitted the low bid for this work at $45,654.50. The only other bid was that of Babler Bros., Inc., Portland, at $47,794.50. The Commission has awarded the contract to the low bidder, J. C. Compton Co. at its bid price.

"Grading and paving the Rogue River (Depot and Main Streets) Section of city streets in the town of Rogue River, Jackson County. The Commission received no bids for this work and has ordered the project advertised.

"Construction of guardrail on the Santiam Highway at the Narrows, near Sweet Home in Linn County. 3 bids were submitted for this work, the low one being that of J. C. Denton & Sons, Beaverton, at $11,232. The contract has been awarded to J. C. Denton & Sons at their bid price.

"Construction of overnight camp in facilities in Silver Creek State Park, Marion County. Salem Sand and Gravel Co., Salem, submitted the low bid for this work at $40,357.50. There were two higher bids. The Commission has awarded the contract to the low bidder, Salem Sand & Gravel Co. at its bid price.

"Construction of a latrine, septic tank and disposal field at Champoeg State Park, Marion County, Leland J. Plank, Woodburn, was the low bidder for this work at $3,795. There were 2 higher bids. The contract has been awarded to the low bidder, Leland J. Plank at his bid price.

"Construction of a latrine in Benson State Park near Multnomah Falls, Multnomah County. Only one bid was received by the Commission for this work, which was that of J. Bacaloff Co., Portland, at $6,616. The bid has been rejected as being too high.

"Grading and paving the Bridgeton Road-Gertz Road and Columbia Slough-Columbia Boulevard Sections of the Pacific Highway East (N. E. Union Avenue) near Portland, Multnomah County. R. A. Heintz Construction Co., Portland, submitted the low bid for this work at $383,883 using treated and untreated piling. Its bid, based on the use of treated piles only, was $387,227. They submitted no bid based on the use of untreated and cast-in-piling.

There were three higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, R. A. Heintz Construction Co. at its bid price, using treated and untreated piling, when certain conditions have been satisfied.

"Pavement construction on Ellendale Avenue in the City of Dallas, Polk County. The low bid for this work was submitted by Porter W. Yett, Portland, at $10,700. There were two higher bids. The Commission has awarded the contract to Mr. Yett at his bid price.

"Grading and paving on Main Street in the city of Island City and on the Island City-Lone Tree Section of the Island City-South County Road, Union County. Durbin Bros., Eugene, submitted the low bid for this work at $149,442. There were three higher bids. The Commission has awarded the contract to the low bidder, Durbin Bros., at their bid price.

"Construction of a Maintenance Employees' House at Flora Junction, Wallowa County. The Commission received only one bid for this work, being that of Bechtel Bros, Elgin, at $12,470. The Commission considers this bid satisfactory and has awarded the contract to Bechtel Bros. at their bid price.

"Grading and surfacing the East Unit, Antelope-Clarno Section of the Shaniko-Fossil State Secondary Highway in Wasco County. F. L. Somers, Klamath Falls, was the low bidder for this work at $214.953. There were 9 higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, F. L. Somers' at his bid price when certain conditions have been satisfied.

"Furnish and install a lighting system in Sunset Tunnel on the Sunset Highway in Washington County. W R. Grasle Co., Portland, was the low bidder for this work at $11,795. There were 5 higher bids. The contract has been awarded to W. R. Grasle Co. at its bid price.

A delegation from Roseburg, representing the Doctors' Association of that city, appeared before the Commission and protested the location proposed for rerouting the Pacific Highway through the City of Roseburg. The group was headed by Mr. D. L. Dimmick, Attorney for the group and Director of the Hospital Association, and included Drs. J. W. McAlvin, J. M. Boyles and J. L. Haskin, manager Veterans Hospital, Roseburg. Mr. Dimmick asked the Commission to reconsider its decision with respect to the proposed highway location and to place the highway in a location further removed from their hospital, where highway noises would not be injurious to hospital patients. He recited the history of the hospital project

dating back to 1948, pointing out that it is a community project which cost in excess of $500,000, much of the money being raised from pledges of local people and the balance being Federal monies. He also said that they acquired this particular site for the hospital because they felt it was in a residential area, where it would be free from highway noises, and that they paid $29,000 for it rather than to accept another site which they were offered free of charge north of the city. Mr. Dimmick further advised that the hospital was open for patients in February of this year, and is operating at 100% of capacity without financial loss, but, he protested, if the highway were located as now planned, people will not patronize it because of the noises and, in that event, the project would be a losing proposition. Mr. Dimmick also mentioned that prior to the selection of the present site for the hospital, the local office of the State Highway Department was consulted and information received to the effect that the State Highway Department has no plans for a highway to be located there, but was considering routes along Stevens and Pine Streets. In view of this information, he said, they went ahead with their plans and constructed on the site. He suggested that it would be helpful were the Highway located at least 100 feet east of the present proposed location and suggested that the proposed clover-leaf traffic separation structure be located farther south than is now planned. Mr. Dimmick submitted the following statistics: Since the opening of the hospital in February, there have been 132 operations, 152 babies born and 900 patients admitted. He urged the Commission to seriously consider a revision of its plans and advised that he could furnish additional facts and petitions if the Commission wanted them. He also urged the Commission to inspect the location on the ground before making its final decision, and he gave as his feeling that the adoption of the route as planned would be morally and legally wrong. Mr. Dimmick presented a written brief in support of his oral argument.

Dr. Haskin stated that the highway location in such close proximity to the hospital will handicap operations and will be injurious to patients. He also mentioned that the highway and the clover-leaf structure would take about 32 acres of the hospital grounds, including the recreational area. He added that the highway so close to the recreational area will necessitate removing their playground to a much less desirable location. He also pointed out that the highway will isolate about 17 acres of their land to which they would have no access.

Dr. Boyles mentioned that the Douglas County Old Folks Home is located a short distance north of the hospital and, according to the plan, the highway will be only about 75 feet or 100 feet from this place. He pointed out that there are now sixty-eight aged patients in the home, who could be adversely affected by highway noises. He gave as his feeling that the highway could be located about 4 blocks east of the proposed location and by so doing, the necessity for three bridges and two crossings of the railroad would be eliminated. Chairman Chandler thanked the delegation for its presentation and assured the group that the Commission certainly does not want to spoil the hospital set up. He also said that the Commission plans to make an inspection trip some time in June and will personally investigate conditions along the proposed highway location at that time, before making its final decision.

The Chief Counsel brought up for discussion a condemnation case that is about to be tried in Douglas County, involving acquisition of right of way from a Mr. T. E. Davis for a proposed improvement of the Umpqua Highway near Scottsburg. It appears that the State presently is taking only a portion of Mr. Davis' land, but at some time in the future when the improvement is extended, additional property from Mr. Davis will be required. It also appears that certain buildings are located on the property that will be needed at that time and that Mr. Davis alleges that he is having difficulty in renting the buildings because he does not know when the State intends to continue the improvement and take the property on which the buildings are situate. The Chief Counsel advised that Mr. Davis is going to use such information in the coming trial and he requested instructions as to what answer he should give if the question arises in Court. He was instructed to say that the State will not need the additional property for at least 5 years.

The Engineer brought up for discussion the advisability of replacing with new type mercury vapor luminaire units the existing sodium vapor lights in Bonneville tunnel on the Columbia River Highway. The mercury vapor units, he said, have proven greatly superior to the old type of lights and, in his estimation, it will be of great advantage to make such replacement. He estimated the cost involved at $10,000 and recommended approval of the change. The Commission approved the recommendation unanimously.

The Engineer presented for the Commission's consideration an over-all traffic signal plan suggested by the City of Eugene to modernize the signal system in this city. He estimated the cost to provide such signal system at $49,400, of which amount, he said, the State's share would be approximately $17,000. He also said that the work the city wishes to do this year is to modernize the present corner signals at Willamette Street and Olive Street intersections with 6th Street and 7th Street, which is estimated to cost $12,000, and of which amount the State's share would be $6,000. Signals presently installed, he said, are of the corner type, which are not as satisfactory as the modern overhead type, and, at some time in the future, the change should be made, although he did not believe that the time is propitious because the present signals are fairly satisfactory and there is such a demand for new installations at critical intersections where no signals now exist. He recommended that the City of Eugene be informed that the State is not in a position at this time to cooperate in this work. The Commission approved the recommendation.

The Engineer brought up for discussion the matter of occupying the new Highway Building in Salem prior to actual completion of certain minor finishing work. He said that the building will be ready for occupancy about June 1, except for such minor work, which consists of installation of some hardware that the contractor has not yet received, the cleaning up of the premises, and certain finishing work, all of which can be done later without interference. The question arose whether or not occupancy of the building would be considered by the contractor as acceptance of the work in general.

As a result of the discussion, the Commission authorized occupancy of the building about June 1 on the condition that a written statement is received from the contractor to the effect that such occupancy will not be considered by him as acceptance of the building by the State, and that he will waive any claim for additional compensation due to inconvenience or interference with his operations occasioned by the moving-in activities and the use and occupancy of the building or parts thereof prior to actual completion of the work.

The Engineer requested authority to purchase a multilith duplicating machine with accessories for use by the Office Engineer; estimated cost $4,800. He also requested authority for expenditure of about $600 for purchase of two drafting tables and one filing cabinet for the State Parks Superintendent. The Commission approved both requests.

The Commission discussed a request from the Secretary of State that George Hester, Administrative Assistant, be authorized to attend a meeting of the Association of Motor Vehicle Administrators in Reno, Nevada, on June 6, 1951, to present a paper on the Oregon Weight-Mile Tax Law. The Engineer stated that the Assistant Secretary of State, Mr. Healy, planned to present this paper, but, because of illness, will not be able to do so, and the suggestion has been made that Mr. Hester substitute for him. The Commission unanimously approved Mr. Hester's attendance at the meeting on the condition that the Secretary of State will pay his expenses.

The Commission considered and approved the provisions of a permit from the U. S. Department of Interior, Office of Indian Affairs, for a stockpile site on the Bly Mountain-Beatty Section of the Klamath Falls-Lakeview Highway in Klamath County. (The agreement was signed by the Commission later in the session.)

Assistant Counsel, Mr. Enfield, brought up for discussion the condemnation action against Mrs. Helen Loving concerning acquisition of right of way for the Sunset Highway. He recalled that the Commission at its meeting in February authorized condemnation proceedings by adoption of an appropriate resolution. However, it now appears that the description of the property as contained in the resolution was in error. He asked the Commission to adopt a new resolution containing an amended description with no change whatsoever in the amount of the offer. The Commission approved the request unanimously by adoption of the attached resolution relative thereto, marked EXHIBIT "L-4", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Parks Superintendent requested authority for an expenditure of approximately $2,500 to conduct traffic counts in State parks in order to determine the approximate number of cars and people that patronize the parks. The Commission approved the request unanimously on the condition that the traffic counts shall be conducted by the Traffic Engineering Department.

The Engineer presented a revised plan for connections to T. H. Banfield Expressway, Portland, at N. E. 12th Avenue and at the Steel Bridge. He pointed out that the original plan provided for construction of a one-way roadway for east bound travel from the Steel Bridge to the expressway, and the routing of west bound traffic along N. E. Third Avenue to Holliday Avenue, thence to the bridge; whereas, the revised plan provides for a more direct connection for west bound travel more closely paralleling the east bound traffic lane. He also pointed out that the revised plan for the connection at N E. 12th Avenue provides for the construction of a roadway along the north side of the expressway from NE 19th Avenue to NE 11th Avenue, for west bound traffic that is destined for points south via the 12th Avenue viaduct, and provides for the construction of a roadway partially on the north side of the expressway and partially on the south side for traffic entering the expressway via the 12th Avenue viaduct. He exhibited a map showing the proposed plan for both connections and pointed out that certain structures are required in connection therewith. He gave as his considered opinion that the proposed changes will provide for the handling of the traffic that enters and leaves the expressway at these points in a manner infinitely better than the original plan, however, he said, the cost to construct the revised plan will be considerably more than the cost to construct the original plan. He recommended approval of the revised plan and that the Right of Way Department be authorized to negotiate necessary right of way from Lloyd Corporation, which owns the property. The matter was discussed by the Commission at considerable length and, as a result thereof, the Commission unanimously approved the revised plan and the securing of options for the right of way at both locations with the understanding that neither connection on the revised plan shall be constructed until some time in the future when emergency conditions require.

The Commission had under discussion items appearing on the Secretary's Summary of Unfinished Business, dated April 13, 1951. as follows:

1. Matters to be presented to the 1951 Legislative Assembly: The Commission ordered this item deleted from the list in view of the fact that the Legislature has adjourned.

2. Request of Baker County Chamber of Commerce for improvement of the Haines-Anthony Lake State Secondary Highway. This item was ordered deleted from the list in view of the fact that the Commission previously at this meeting authorized the Engineer to advertise for bids for the furnishing of about 500 cubic yards of surfacing material per mile for this road.

3. Collection of the amount of bid bond furnished by State Construction Co. in connection with its proposal to construct the Marion Street bridge piers in Salem: The Commission previously during this session instructed the Chief Counsel to try this case in court as a test of the value of the proposal bond The item is to be retained in the list.

4. Proposed addition to Wallowa Lake State Park in order to provide an area for overnight camping: This item was previously discussed at this meeting when negotiations for an option were authorized. The item is to be retained in the list.

5. Request of the City of Nyssa for construction of full width pavement and curbs on US20 within the city: The Engineer estimated the cost of the widening work, about 3,000 feet in length, at approximately $35,000, and recommended approval of the project for immediate undertaking. The Commission approved the recommendation.

6. Proposed park site in Ladd Canyon, Union County: The Commission ordered this item retained on the list of unfinished business pending inspection of the site by Commissioner Reynolds, State Parks Superintendent and the Engineer.

7. Truck-hauling of logs during hours of darkness: This item was previously disposed of at this meeting. The Commission ordered it deleted from the list.

8. Proposed change in the form of real estate options: The Commission ordered this item retained on the list for future consideration.

9. Request for the elimination of the rough condition on the Central Oregon Highway between Juntura and Harper. The Engineer advised that he inspected this section in company with Commission Reynolds, and, in their opinion, neither side of the pavement is unreasonably rough, but he will have the worst spots smoothed up by a pavement patching crew this summer. The Commission ordered the item deleted from the list.

10. Development of park area at McNary Dam: This matter was disposed of earlier in the session when the Commission approved options presented by the Right of Way Engineer.

11. Adoption of a Federal Aid Secondary Highway program for 1952, 1953 and 1954: This item was partially disposed of by the Commission earlier in the session. The Engineer advised that he would endeavor to present to the Commission at its meeting in July tentative five-year secondary program. The item is to be retained on the list.

12. Request of the Union County Court for improvement of the Valley Section of the Alicel-Lower Cove. Road, Union County: The Engineer advised that he inspected this project in company with Commissioner Reynolds and, as instructed by the Commission at its last meeting, he is now preparing an economic report on the highway situation in this district.

13. Proposed improvement of US99 at Portland Stockyards: The Engineer advised that, pursuant to instructions from the Commission, he has made certain investigations in regard to construction of a parking area for the Stockyards in exchange for a right of way that they will

donate for a proposed highway improvement. He said that the survey indicates that 8000 yards of embankment material will be required to fill in an area equal in size and at the same elevation as the property that is needed for right of way. He estimated the cost of the embankment, together with the necessary surfacing, at $12,250. To fill in all of the proposed Stockyard's parking area, he said, containing about 19 acres, would require about 225,000 cubic yards of embankment material, which, he estimated, will cost about $168,750 if the material is hauled in, and about $90,000 if materials are used from dredging operations in connection with work on adjoining property. He gave as his opinion that negotiations should be conducted with the Portland Stockyards for right of way required on a land value basis plus cost of filling, and, when and if the highway is improved, then arrangements can be made for a joint undertaking for construction of the highway fill and the parking area if that seems desirable. The Commission took the matter under advisement, and ordered the item retained on the list of unfinished business.

14. Request of Ken-Nard Timber Co. to purchase timber standing on State-owned property near Yaquina Bay: The Parks Superintendent recalled that this transaction involves an exchange of a wood lot that the Commission owns near the highway south of Newport, for property owned by a Mr. Leonard, adjoining Cape Lookout Park in Lincoln County. The Commission decided unanimously not to dispose of the wood lot and to acquire the tract near Cape Lookout on a separate basis. The Parks Superintendent was authorized to negotiate the purchase of the Leonard tract.

15. Sale of timber on a quarry site located on the South Santiam Highway near Waterloo, Linn County: The Commission decided not to sell this timber, and ordered the item deleted from the list.

16. Request of Andrew Stambuck to acquire a portion of the old right of way of the Pacific Highway at Turkey Hill, Douglas County: The Engineer advised that discussions of this matter are continuing with Mr. George Neuner, Jr., who is Mr. Stambuck's attorney, and that he expects to be able to render his report on the subject at the July meeting of the Commission.

17. Removal of sand from the ocean beach: In the discussion of this matter, it was pointed out that the Legislature passed a law placing control of the ocean beach sand and gravel in the State Land Board. In view, thereof, the Commission ordered the item deleted from the list.

18. Proposed transfer of funds to finance construction of a maintenance headquarters building in Huntington: The Engineer advised that in company with Commissioner Reynolds, he inspected the Huntington site, and it is recommended that the Commission authorize the erection of a building thereon, which is estimated to cost about $15,000. The Commission approved the recommendation.

19. Request of Depoe Bay Chamber of Commerce for construction of footpaths on both sides of the Oregon Coast Highway in the northern part of Depoe Bay. The Commission decided not to construct the footpaths, and ordered the item deleted from the list of unfinished business.

20. Request of McMinnville Chamber of Commerce for elimination of hazardous conditions on US99W near Whiteson, Yamhill County: The Engineer advised that his report on this subject will be rendered as soon as surveys that are now under way are completed. The Commission ordered this item retained in the list.

21. Request for improvement of the Woodburn-Sandy Secondary Highway between Springwater and Estacada to facilitate log hauling: The Commission ordered this item deleted from the list.

22. Request of Rudie Wilhelm Warehouse Company and Portland General Electric Co. for permission to transport over State Highways loads weighing in excess of the statutory weight limitations: The Engineer advised that a conference has been held with the Rudie Welhelm Warehouse Co. and arrangements have been made to issue the company permits if the highways and bridges over which the hauling is to be carried on will sustain the loads without hazard. A similar conference, he said, will be arranged with the Portland General Electric Co. The Commission ordered the item deleted from the list.

23. Request of Elmer Bankus that property near Brookings, which he deeded to the State in connection with a right of way transaction, be deeded back to him: The Commission decided to retain the property and so ordered.

24. Proposed acquisition of wayside strips along the Sunset Highway in the vicinity of Sunset Camp: It was recalled that this matter arose out of a condemnation action against Ray A. Thorensen involving an amount of $15,000, and that action on it was deferred pending inspection of the premises by Commissioner Reynolds. It appears that Commissioner Reynolds subsequently made such inspection, and it was decided not to acquire the property. The Commission confirmed the decision and ordered the item deleted from the list.

25. Employment of boys from the Woodburn Boys' School in State parks: The Parks Superintendent advised there are no new developments. The item was ordered deleted from the list.

26. Tax problem involving Interstate Bridge between Rainier, Oregon and Longview, Washington: The Engineer advised that discussions with the Columbia County Court to determine a suitable county road to be improved under the compromise arrangement are still in progress. The Commission decided unanimously to proceed with the contracting of a county road project suitable to the County Court, and to contribute a maximum sum of $15,000 toward the cost of construction.

27. Question of revising recommendations to the Public Utilities Commissioner covering the truck-hauling of logs over State highways: This matter was disposed of earlier in the session, and the Commission ordered the item deleted from the list.

28. Request for the improvement of the Cottonwood Canyon Section of the Wasco-Heppner State Secondary Highway: The Commission ordered this item deleted from the list of unfinished business. It will be considered as an entirely new item should it again arise.

29. Request of the State Board of Forestry for establishment of three roadside picnic areas along the Sunset Highway as living memorials to certain persons who were prominent in state forestry matters: The Commission decided unanimously against the establishment of such areas, and ordered the item deleted from the list.

30. Question of maintaining signs at each end of reconstruction projects, notifying the public that the work under way is being done by the State Highway Department for their convenience: The Engineer presented wording for the signs as prepared by the Director of the Travel Information Department. Action thereon was deferred pending suggestions by Commissioner McIver.

31. Question of the authority of cities to route state highway traffic over city streets: It was recalled that the Chief Counsel in a letter dated March 7, 1951, gave as his opinion that authority to select and designate the street or streets over which to route state highway traffic is exclusively vested in the State Highway Commission. The Commission ordered the item deleted from the list.

32. Proposed ferry terminal in Astoria: This matter was disposed of by the Commission earlier in the session when it was decided not to construct the new terminal at this time.

33. Proposed improvement of McKenzie Highway through the City of Springfield, using either North "A" Street or South "A" Street for one-way traffic: The Commission ordered this item retained on the list of unfinished business.

34. Request for improvement of the John Day Highway between Fossil and Spray: The Commission instructed the Engineer to ascertain the location of places where improvement is most needed and to report same to the Commission with an estimate of the cost to do the work.

35. Request of the City of Stayton for an allocation of special state tax street monies, and for information regarding the future route of the North Santiam Highway through Stayton: The Commission previously at this session, authorized an expenditure of $1,000 for the improvement of Fourth Street, Stayton; the Engineer advised that he is not prepared as yet to recommend any route for the North Santiam Highway through this place. The Commission ordered the item deleted from the list.

36. Controversy with Nancy M. Finke regarding purchase of right of way at the intersection of Union Avenue and Columbia Boulevard, Portland: This matter was disposed of by the Commission earlier in the session, at which time the Right of Way Engineer was authorized to offer Mrs. Finke $3,000 as settlement in full.

37. Controversy with Arthur C. Lofts regarding proposed location of US30 in the City of Hood River: The Engineer recalled that the Commission at the previous meeting approved realignment of the highway so that none of Mr. Loft's property would be needed. The Commission decided against payment of any sum to Mr. Lofts either for property or as damages.

38. Request of County Commissioner J. C. Minson, Crook County, for elimination of excessive curvature on Ochoco Highway near the Crook-Deschutes County line: This matter was disposed of by the Commission earlier in the session.

39. Request of John Silvertooth for elimination of a sharp point on the Antelope-Clarno Section near Pine Creek, Wasco County: The Engineer advised that the investigations ordered by the Commission regarding this matter are being made, and that appropriate action will be taken.

The Commission discussed, approved and signed agreements, etc, as follows:

Agreement with Arthur E. Hendrickson covering construction and operation of a roadway across Joaquin Miller State Park

"Indenture of Access" with Marin J. Fager et ux re access to Ladd Canyon Section of Old Oregon Trail

Agreement with Secretary of State covering maintenance of new Highway Office Building

Petition re vacation of Greenwood Avenue in the Town of Reedsport

Agreement with Portland General Electric Co. covering reestablishment of power line necessitated by construction of Marion Street Bridge, Salem,

Agreement with U. S. Bureau of Public Roads covering maintenance of North Santiam Highway

Agreement with Union Pacific Railroad Company covering Columbia River Highway crossing of railroad company's tracks at Oregon Trunk Railroad junction.

Agreement with Wasco County covering abandonment of portions of the east unit of the Antelope-Clarno Section of Shaniko-Fossil Secondary Highway

Release of easement acquired from Paine Estate on Santiam River-Albany Section of US99E

Agreement with City of Tillamook providing for financing of improvement on Miller Avenue between 6th Street and 10th Street as a special state tax street fund project. (Authorized August 21, 1950) (This agreement not to be signed unless contract awarded.)

Bargain and sale deed conveying unto Raymond G. Gumpert and wife 2.12 acres of land on the McKenzie-Bend Highway, Deschutes County. Right of way consideration. (Authorized April 12, 1951).

Lease covering land in North Bend to Coos Bay Timber Operators for a 10-year period

Agreement with Oretown Cheese Association, Tillamook Co., covering encroachment of building on US101 at Oretown

Permit from Klamath Indian Tribal Council for stockpile site on land lying within the SE¼ Sec. 2, T. 37S., R. 11 E., W.M., Bly Mountain-Beatty Section of the Klamath Falls-Lakeview Highway. Consideration $25.00 expires May 31, 1956.

Letter from California-Pacific Utilities Company granting license to attach a flashing beacon to one of their poles at the main intersection of the State Highway in Island City, Oregon. NOA

Agreement with Glens Falls Indemnity Company protecting State against claim of U. S. Government in connection with Denton Contracts.

Project Agreements:

Viento Park-Wygant Park Sec., Columbia River Hwy.
Broadway Br.-Steel Br., Pacific Hwy. West
Snake River Bridge (Weiser) Weiser Spur

Agreement for expenditure of approximately $75,000.00 State Highway funds for stabilization of 4-mile unit of Marks Creek Section of Ochoco Highway. (8j)

Bargain and sale deed conveying to Rex Ellis and wife a parcel of land situate in Cooks addition to the city of McMinnville, Yamhill County.

There being no further business, the meeting adjourned at 4:30 p.m.

EXHIBITS "A" THROUGH "N"

Minutes of

May 24 and 25, 1951

EXHIBIT "A"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other materials sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

UNIT #3 - T. H. BANFIELD EXPRESSWAY

14886 - Ogilvie, Roy S. and Dora M. (Johnson)
Right of Way
Option expires October 22, 1951

6,800 sq. ft. at $0.12 per sq. ft.	$ 816.00	
1 story, 5-room house with basement. 782 sq. ft.	6,647.00	
Amount to be paid owner - chrg to Right of Way		$ 7,463.00

Takes all -

(cont.)

EXHIBIT "A" (cont.)

UNIT #4 - T. H. BANFIELD EXPRESSWAY (cont.)

14843 - Lawpaugh, C. J. and Lulu (Johnson)
Right of Way
Option expires October 8, 1951

20,000 sq. ft. at $0.15 per sq. ft.	$ 3,000.00	
1½-story house, with garage	7,340.00	
60 feet of driveway	160.00	
Amount to be paid owner - chrg to Right of Way		$10,500.00

Takes all -

14852 - Stefan, August and Amelia (Johnson)
Right of Way
Option expires June 4, 1951

10,000 sq. ft. at $0.15	$ 1,500.00	
Allowance - 1½-story, 7-room house and garage	10,143.00	
		$11,643.00
Less salvage value of buildings		-2,500.00
Amount to be paid owner - chrg to Right of Way		$ 9,143.00

Grantor to have possession of property until August 31, 1951

Takes all -

14840 - Geppert, Fred F. (Johnson)
Right of Way
Option expires November 6, 1951

5,000 sq. ft. at $0.25 per sq. ft.	$ 1,250.00	
Warehouse building - 3,520 sq. ft. at $2.75	9,680.00	
Amount to be paid owner - chrg to Right of Way		$10,930.00

Takes all -

(cont.)

UNIT #4 - T. H. BANFIELD EXPRESSWAY (cont.)

14853 - Domenicb, John and Anna (Johnson)
Right of Way
Option expires June 29, 1951

5000 sq. ft. at $0.18 per sq. ft.	$ 900.00	
Allowance - Grape arbor, shrubs, garden, and lawn	300.00	
1½-story, 7-room house with basement	7,056.00	
Total consideration		$ 8,256.00
Less salvage value of house and shed		-1,756.00
Amount to be paid owner - chrg to Right of Way		$ 6,500.00

THINGS TO BE DONE BY THE STATE:

State to pay last half of 51-52 taxes.	Estimated cost $50.00

Takes all -

14868 - Grove, Glen and Charlotte H. (Johnson)
Right of Way
Option expires September 30, 1951

6,834 sq. ft. at $0.30 per sq. ft.	$ 2,050.20	
2-story store and apartment building	21,600.00	
Allowance - for furnishings in 5 apartments	200.00	
Amount to be paid owner - chrg to Right of Way		$23,850.20

Takes all -

EXHIBIT "B"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner of the parcel of land along and adjacent to the Old Oregon Trail, described as follows, to-wit:

> A parcel of land lying in the NE¼ of Section 9, and the NW¼ of Section 10, Township 2 North, Range 32 East, W. M., Umatilla County, Oregon, said parcel of land being described as follows:
>
> All that land bounded on the south by the northerly right of way line of the Union Pacific Railroad; bounded on the north by a line parallel to and 50 feet southerly from the center line of the Old Oregon Trail Highway; bounded on the west by a line perpendicular to the northerly right of way line of said railroad and 20 feet easterly, measured along said railroad right of way, from the intersection of said northerly right of way line and the easterly line of SW 20th Street in the City of Pendleton, Oregon; and bounded on the east by a line perpendicular to said northerly right of way line and 375 feet easterly measured along said railroad right of way, from the intersection of said right of way line and easterly line of SW 20th Street, containing 28,200 square feet (0.65 A), more or less.

WHEREAS, after consideration, the Commission hereby finds and declares that the said property is no longer needed, required or useful for highway purposes.

AND WHEREAS, the said property has been appraised by competent and experienced appraisers and the reasonable market value thereof found and estimated to be the sum of $21,500.00, and the Commission is desirous of selling and disposing of said property at a price not less than the appraised amount, upon the basis of two commercial accesses, of not more than thirty feet in width, to the Old Oregon Trail, the exact location of which to be approved by State Highway Engineer and the purchaser.

NOW, THEREFORE, BE IT RESOLVED that the Secretary of the Commission, be and he hereby is, authorized and instructed to advertise the said property for sale, in accordance with the terms and provisions of Chapter 437, Oregon Laws 1949.

Sealed bids for the sale of the said property shall be received by the said Secretary in the office of the Commission in Salem, Oregon, at 2:00 PM, on the 5th day of July, and shall be opened in the presence of the Commission's Chief Counsel or his authorized representative.

The results and tabulations of the bids received shall be reported to the Commission at its next succeeding regular or special meeting.

The published notice for the receiving of bids shall fix a minimum price of $21,500.00 for which the property shall be sold and shall further provide that the sale shall be made for cash.

May 24, 1951

EXHIBIT "C"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, the number of transactions which involve the creation of indebtedness and claims of various kinds and character growing out of and arising in connection with the location, relocation, construction reconstruction improvement, maintenance, and repair of highways and the acquisition of real properties has grown to such proportions that the time of the Commissioners consumed in signing the various vouchers encroaches seriously on time which should be left free to the Commissioners for the consideration of matters and business the disposition of which can not be delegated to others, since such matters and business are committed by law to the discretionary power of the Commissioners alone; and

WHEREAS, by the enactment of Chapter 156, Oregon Laws 1951, the legislature has authorized the Commission to designate its Secretary, or some other officer or deputy, to approve voucher claims in connection with which the indebtedness or expense set forth in the voucher has previously been authorized and approved by the Commission; and

WHEREAS, H. B. Glaisyer is the duly appointed, qualified and acting Secretary to the Commission, and in such capacity is under official bond; and

WHEREAS, it is the judgment of the Commission that said H. B. Glaisyer, as Secretary to the Commission, is qualified to act for the Commission in the signing of vouchers where the claims and indebtedness represented thereby have been authorized and approved by the Commission;

NOW, THEREFORE, BE IT AND IT HEREBY IS ORDERED AND RESOLVED by this Commission as follows:

1. That, for the purpose of facilitating and promoting the business of the Commission, H. B. Glaisyer hereby is designated and authorized to approve and sign voucher claims on behalf of the Commission, but such authority may be exercised by said Secretary only with respect to voucher claims covering indebtedness or expense previously authorized and approved by the Commission, which authorization and approval must be a matter of record in the Commission's records.

2. That said designated official shall make monthly reports to the Commission, in which monthly reports there shall be listed the voucher claims signed by said designated official during the preceding month and there shall be disclosed, also, in said report such other information or data as the Commission may require.

(cont.)

EXHIBIT "C" (cont.)

3. This appointment or designation may be revoked at the pleasure of the Commission.

4. The signing of said vouchers shall be in the following form:

"Oregon State Highway Commission

By _____
Secretary, acting under the
provisions of Chapter 156,
Oregon Laws 1951"

5. A copy of this resolution, certified to by H. B. Glaisyer, Secretary to the Commission, as a true and correct copy of the original of the same, shall be delivered to the Secretary of State. In paragraph 4 of said certified copy, the Secretary shall subscribe his name, and all claims, vouchers or other papers which are signed by the Secretary pursuant to the provisions and authority of this resolution, shall be signed in the manner in which said signature is placed in said paragraph 4.

6. This resolution and order shall be entered in the minutes and records of the Commission as of the twenty-fourth day of May, 1951, and immediately thereafter the authority hereby vested in said Secretary shall become effective.

EXHIBIT "D-1"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, it is deemed advisable by the Commission that there be prescribed and adopted a fixed procedure and instruction with respect to the acquisition of real properties needed for right of way purposes; and

WHEREAS, it is considered by the Commission appropriate to relate the time of taking options covering real properties needed for right of way and other highway purposes to the time when a survey is submitted by the Engineer and accepted, approved and adopted by the Commission;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED by this Commission, all members being present and affirmatively voting, as follows:

1. That whenever the survey for the route of a new highway or the relocation of an existing highway, or section thereof, is submitted by the Engineer and such survey is approved and adopted by the Commission, such acceptance and adoption shall constitute and be an authorization and instruction by the Commission to the Legal and Right of Way Departments to proceed at once to take options on all real properties needed for such project and submit said options to the Highway Commission for acceptance or rejection.

2. The Engineer is hereby instructed, immediately upon the approval and adoption of a survey for a new highway or for the relocation of an existing highway, or section of an existing highway, to prepare all necessary maps, profiles and descriptions covering all real properties needed for such project and deliver the same to the Right of Way and Legal Departments.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-fourth day of May, 1951.

May 24, 1951

EXHIBIT "D-2"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, it has been brought to the attention of the Commission that in some instances options have been taken on real properties needed for right of way and other highway purposes, and in other instances options are now being taken on real properties needed for right of way and other highway purposes, in connection with both of which situations it appears that formal authorization for such takings has not been recorded in the Commission's minutes or records;

AND, WHEREAS, notwithstanding the fact that formal authorization for such acquisitions has not been made a part of the Commission's written records, the taking of such options have the informal approval of the Commission;

AND, WHEREAS, for the purpose of supplementing such informal record and action, it is the purpose of the Commission at this time to ratify all options so taken;

THEREFORE, Be It And It Hereby Is Resolved by the Commission, all Members being present and voting affirmatively, as follows:

1. That it hereby is declared that all real properties needed for right of way or other highway purposes in connection with the construction, reconstruction or other improvement of the highway projects listed on the attached three sheets, which sheets for identification purposes are marked A, B and C and dated May 16, 1951, are hereby declared necessary for said projects and options heretofore taken and approved covering any of said real property hereby approved.

2. It is further resolved that the informal action of the Commission and authorization for said acquisitions hereby is ratified;

3. That this resolution be entered in the minutes and records of the Commission as of May 24, 1951, and shall be deemed effective as of the date or dates of any options taken with respect to any real properties acquired in connection with any of the projects listed on said attached pages, A, B and C.

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance;

Contract No. 3274 with George E. Corliss, for grading and oil mat surfacing on the Scott Canyon Section of the Scott Canyon County Road in Sherman County, completed May 10, 1951.

Contract No. 3346 with J. C. Compton Co., for grading and paving on the Cave Junction-California State Line Section of the Redwood Highway in Josephine County, completed November 1, 1950. Acceptance has been held pending removal of contractor's equipment and cleanup of plant site.

Contract No. 3347 with Grover C. Pomeroy and C. R. Badger, for furnishing crushed material in stockpiles on the Hampton-Gap Ranch Section of the Central Oregon Highway in Lake, Harney and Deschutes Counties, completed December 23, 1950. Acceptance has been held pending removal of contractor's equipment and cleanup of plant site.

Contract No. 3414 with Rich & Sons Nursery, for constructing guard rail on the Reedsport-Scottsburg Section of the Umpqua Highway in Douglas County, completed April 1, 1951.

Contract No. 3416 with F. C. Scott Construction Co., for embankment construction on the West Salem Section of the Salem-Dallas Highway in Polk County, completed November 30, 1950. Acceptance has been held pending cleanup.

Contract No. 3434 with Rush Construction Co., for furnishing crushed material in stockpiles on the Lime-Payette Junction Section of the Old Oregon Trail Highway in Malheur and Baker Counties, completed April 13, 1951.

Contract No. 3452 with Babler Bros., Inc. for grader work and oil mat surfacing on the Prineville Section of the Crooked River Highway in Crook County, completed April 28, 1951.

Contract No. 3272 with Hamilton & Thoms for constructing the Coast Fork Willamette River bridge on the Willamette Highway in Lane County, completed April 4, 1951.

(cont.)

EXHIBIT "E" (cont.)

Contract No. 3356 with Lindstrom Brothers, Inc., for constructing the 12th Avenue bridge in the City of Seaside in Clatsop County, completed April 6, 1951.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "F-1"

Minutes of May 24 and 25, 1951

RESOLUTION LIFTING REDUCED LOAD LIMITS ON VARIOUS STATE HWYS.

WHEREAS, on the 26th day of February, 1951, and on the 13th day of April, 1951, the Commission passed and adopted resolutions reducing the maximum load limits on various state highways and sections of state highways; and

WHEREAS, subsequent to the passage of said resolutions, conditions have changed so that it no longer is necessary or desirable, and the Commission hereby finds that it no longer is necessary or desirable to maintain the reduced load limits set out in said resolutions.

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit as set forth in the said resolutions of February 26th and April 13, 1951, on various state highways or sections thereof, to-wit:

HIGHWAYS LISTED IN RESOLUTION OF FEBRUARY 26, 1951

Name of Hwy. and No.		County	Section of Highway	Date Lifted 1951
Weston-Elgin	330	Union	Road to Summerville (M. P. 37.94) to Jct. Wallowa Lake Hwy. (M. P. 41.39)	Apr. 16
Warner	431	Lake	Jct. Fremont Hwy. (M. P. 0.00) to Drakes Creek (M. P. 21.35)	Apr. 26

HIGHWAYS LISTED IN RESOLUTION OF APRIL 13, 1951

Medical Springs	340	Union	Catherine Creek (M. P. 9.57) to Baker Co. Line (M. P. 22.90)	Apr. 18
Diamond Valley	441	Harney	Crane (M. P. 0.00) to Jct. Rome-Princeton Hwy. (M. P. 11.15)	Apr. 30
Rome-Princeton	442	Harney & Malheur	Entire Length	Apr. 30

be and the same hereby is rescinded and cancelled as of the respective dates shown above and the maximum load limit permissible on such highways subsequent to such dates shall be the maximum load provided by law.

(cont.)

EXHIBIT "F-1" (cont.)

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highways or sections of highways are located, and a like copy to the Superintendent of the Department of State Police for his information.

Dated this 24th day of May, 1951.

H. B. Glaisyer, Secretary

EXHIBIT "F-2"

Minutes of May 24 and 25, 1951

RESOLUTION LIFTING REDUCED LOAD LIMIT ON NEHALEM RIVER BRIDGE

WHEREAS, on the 13th day of April, 1951, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution, effective March 30, 1951, reducing the maximum load limit on a certain state highway bridge, to-wit:

NEHALEM SECONDARY HIGHWAY NO. 102

M. P. 42.40	Bridge No. 3140 over Nehalem River 2 1/2 miles north of Mist	10 tons (20,000 lbs.)

and

WHEREAS, subsequent to the passage of said resolution conditions have changed so that it no longer is necessary or desirable, and the Commission hereby finds that it no longer is necessary or desirable to maintain the reduced load limit set out in said resolution on the said state highway bridge;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the said bridge be and the same is hereby rescinded and cancelled as of April 19, 1951, and the maximum load limit permissible on the said bridge structure hereafter shall be the maximum load limit provided by law; and

IT IS FURTHER ORDERED that a certified copy of this resolution be furnished to the county clerk of the county in which said highway bridge is located, and that a certified copy of the resolution be furnished to the Superintendent of the Department of State Police for his information.

Dated this 24th day of May, 1951.

OREGON STATE HIGHWAY COMMISSION
By: Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
M. K. McIver, Commissioner

R. H. Baldock
State Highway Engineer

ATTEST:
H. B. Glaisyer
Secretary

May 24, 1951

EXHIBIT "G"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made on the Crater Lake Highway in the vicinity of Trail, and more particularly and completely discribed and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation, the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are greater than is reasonable and safe under conditions found to exist upon or with respect to the section of highway hereinafter set forth and more particularly described and defined hereinafter, and that the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed shall be as specifically set forth hereinafter; and

WHEREAS, based also upon said engineering and traffic investigation, the Commission has determined that, due to the narrowness of the bridge over Trail Creek located at Mile Post 23.82 on said highway section, it is unsafe for trucks to pass each other while on said structure, either while moving in the same direction or in opposite directions.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which any vehicle may be driven upon said section of said state highway shall not exceed the rate of speed set forth immediately following:

Name of highway: Crater Lake

Highway number: 22 Route number: Oregon 62

EXHIBIT "G" (cont.)

Location of Termini		Established Speed
M. P. 23.70 (0.14 mi. south of jct. with Ore. Hwy. 227)	to M. P. 23.90 (0.06 mi. north of jct. with Ore. Hwy. 227)	30 mi. per hour

BE IT FURTHER ORDERED that no truck shall pass another truck while moving over the said Trail Creek Bridge and said bridge structure shall be maintained and posted for one-way traffic for trucks only.

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places and in sufficient number, adequate signs giving notice of the particular applicable speed on said state highway, and additional signs calling public attention to the one-way restriction for truck traffic on the Trail Creek Bridge.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to the section of highway specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

BE IT FURTHER ORDERED that this resolution be entered in the minutes and records of the State Highway Commission as of the 24th day of May, 1951.

EXHIBIT "H"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Coos Bay-Roseburg

Highway number: 35 Route number Oregon 42

Location of Termini		Established Speed
M. P 44. 20 (0. 24 mile west of Camas Valley Store)	M. P. 44. 70 (0. 26 mile east of Camas Valley Store)	40 mi. per hour

(cont.)

May 24, 1951

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

BE IT FURTHER ORDERED that this resolution be entered in the minutes and records of the State Highway Commission as of the 24th day of May, 1951.

EXHIBIT "I"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Enterprise-Lewiston Highway No. 11 known as the South Unit, U. S. Forest Section in Wallowa County, the Southerly terminus of which is at Highway Engineer's Station 0+00 of the relocated line and the northerly terminus of which is at Highway Engineer's Station 212+11 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundary of the new location, which eliminated sections or units will no longer be needed for highway purposes; and

WHEREAS, the contract for the construction of this relocated section of the Enterprise-Lewiston Highway was completed on September 15, 1950, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the several sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way, which by reason of the relocation of said highway is no longer within the boundaries of the new right of way, which for the purpose of this resolution is identified as Unit "A" and is shown colored in brown on map attached hereto and marked "Exhibit A", and is more particularly described as follows:

Unit "A"

Beginning at State Highway Engineer's Station 16+70 of the relocated Enterprise-Lewiston Highway in the Northeast quarter of the Northwest quarter of Section 36, Township 2 North, Range 44 East, W. M.; thence Northerly via the former route of the Enterprise-Lewiston Highway to the beginning of the Starvation Creek road in the Northeast quarter of the Southwest quarter of Section 25, Township 2 North, Range 44 East, W. M.

(cont.)

shall be and hereby is abandoned as a part of said highway, and hereafter all right, title and interest which the State has in said right of way shall be permitted to revert to the owners of the abutting land.

2. That the portions of the old right of way, which by reason of the relocation of said highway are no longer within the boundaries of the new right of way, which for the purpose of this resolution are identified as Units "C", "D", "E", "F" and "G" and are shown colored in brown on map attached hereto and marked "Exhibit A", ** and are more particularly described as follows:

Unit "C"

Beginning at State Highway Engineer's Station 62+13 of the relocated Enterprise-Lewiston Highway in the Southwest quarter of the Northwest quarter of Section 25, Township 2 North, Range 44 East, W. M.; thence northerly along the former route of the Enterprise-Lewiston Highway to the south line of the Northwest quarter of the Northwest quarter of Section 25, Township 2 North, Range 44 East, W.M.

Unit "D"

Beginning at State Highway Engineer's Station 99+50 of the relocated Enterprise-Lewiston Highway in the Northwest quarter of the Southwest quarter of Section 24, Township 2 North, Range 44 East WM.; thence northerly along the former route of the Enterprise-Lewiston Highway to State Highway Engineer's Station 102+70 of the relocated Enterprise-Lewiston Highway in the Northwest quarter of the Southwest quarter of Section 24, Township 2 North, Range 44 East, W.M.

Unit "E"

Beginning at the State Highway Engineer's Station 115+30 of the relocated Enterprise-Lewiston Highway in the Southeast quarter of the Northeast quarter of Section 23, Township 2 North, Range 44 East, W.M.; thence northerly along the former route of the

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being filed under File No 232 under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "I" (cont.)

Enterprise-Lewiston Highway to State Highway Engineer's Station 120+75 of the relocated Enterprise-Lewiston Highway in the Southeast quarter of the Northeast quarter of Section 23, Township 2 North, Range 44 East, W. M.

Unit "F"

Beginning at State Highway Engineer's Station 121+55 of the relocated Enterprise-Lewiston Highway in the Southeast quarter of the Northeast quarter of Section 23, Township 2 North, Range 44 East, W. M.; thence northerly along the former route of the Enterprise-Lewiston Highway to State Highway Engineer's Station 147+60 of the relocated Enterprise-Lewiston Highway in the Southeast quarter of the Southeast quarter of Section 14, Township 2 North, Range 44 East, W. M.

Unit "G"

Beginning opposite State Highway Engineer's Station 161+90 of the relocated Enterprise-Lewiston Highway in the Northeast quarter of the Southeast quarter of Section 14, Township 2 North, Range 44 East, W. M.; thence northerly via the former route of the Enterprise-Lewiston Highway to State Highway Engineer's Station 180+90 of the relocated Enterprise-Lewiston Highway in the Southeast quarter of the Northeast quarter of Section 14, Township 2 North, Range 44 East, W. M.

shall be abandoned as parts of said highway and hereafter shall be under the jurisdiction and control of the County Court of Wallowa County and may be vacated or kept by the County for such public use as the County may determine.

3. That the portion of the old right of way, which by reason of the relocation of said highway is no longer within the boundaries of the new right of way, which for the purpose of this resolution is identified as Unit "B" and is shown colored in orange on map attached hereto and marked "Exhibit A", and is more particularly described as follows:

Unit "B"

Beginning at the beginning point of the Starvation Creek road in the Northeast quarter of the Southwest quarter of Section 25, Township 2 North, Range 44, East, W. M.; thence northerly via the former route of the Enterprise-Lewiston Highway to State Highway Engineer's Station 60+15 of the relocated Enterprise-Lewiston Highway in the Southwest quarter of the Northwest quarter of Section 25, Township 2 North, Range 44 East, W. M.

(cont.)

shall be and hereby is retained for public use and shall be under the jurisdiction and control of the United States Forest Service as a connection to the Starvation Creek road and shall be maintained by the United States Forest Service until returned to the jurisdiction and control of the State Highway Commission, in accordance with the agreement between the State Highway Commission and the United States Forest Service dated February 27, 1951.

4. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

5. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

6. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Wallowa County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto and marked "Exhibit A".

EXHIBIT "J"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Oregon Coast Highway known as the Summit-Hug Point Section in Clatsop County, the northerly terminus of which is at highway engineer's station 165+00 of the reconstructed line and the southerly terminus of which is at highway engineer's station 488+64.7 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, the State Highway Commission and Clatsop County entered into an agreement dated the 22nd day of July, 1946, in respect to the areas or sections of the right of way affected by the said relocation; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the construction of the section of the Oregon Coast Highway, State Highway No. 9, which section begins at engineer's station 97+47.61 on the new route and extends through engineer's station 210+00, is now completed; therefore, the sections of the old road herein defined and described as Units A, B, C, D, E, F, G and H shall no longer be part or parts of the route of the Oregon Coast Highway, State Highway No. 9, but shall be and hereby are eliminated therefrom.

2. That the portions of the old right of way which by reason of the relocation of the said highway are no longer within the boundaries of the right of way, which parts or units, for the purposes of this relocation, are itemized as Units A, B, C, D, E, F, G and H, and shown in brown on the print attached hereto marked "Exhibit A" and by this reference incorporated herewith, and are more particularly described as follows:

(cont.)

FOOTNOTE: **

EXHIBIT "J" (cont.)

Unit "A"

Beginning at engineer's station 100+60 of the relocated Oregon Coast Highway in Section 9, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon, thence southerly via the former route of the Oregon Coast Highway to engineer's station 110+00 in Section 16, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon.

Unit "B"

Beginning at engineer's station 113+00 of the relocated Oregon Coast Highway in Section 16, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon, thence Southerly via the former route of the Oregon Coast Highway to engineer's station 116+30 of the relocated Oregon Coast Highway in Section 16, Township 5 North, range 10 West, W. M., Clatsop County, Oregon.

Unit "C"

Beginning at engineer's station 120+30 of the relocated Oregon Coast Highway in Section 16, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon, thence Southerly via the former route of the Oregon Coast Highway to engineer's station 130+60 of the relocated Oregon Coast Highway in Section 16, Township 5 North, range 10 West, W. M., Clatsop County, Oregon.

Unit "D"

Beginning at engineer's station 133+10 of the relocated Oregon Coast Highway in Section 16, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon, thence southerly via the former route of the Oregon Coast Highway to engineer's station 138+00 in Section 16, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon.

Unit "E"

Beginning at engineer's station 140+30 of the relocated Oregon Coast Highway in Section 17, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon, thence southerly via the former route of the Oregon Coast Highway to engineer's station 153+00 in Section 17, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon.

EXHIBIT "J" (cont.)

Unit "F"

Beginning at engineer's station 165+00 of the relocated Oregon Coast Highway in Section 17, Township 5 North, Range 10 West, W.M., Clatsop County, Oregon, thence southerly via the former route of the Oregon Coast Highway to engineer's station 185+40 in Section 20, Township 5 North, Range 10 West, W.M., Clatsop County, Oregon.

Unit "G"

Beginning at engineer's station 191+20 of the relocated Oregon Coast Highway in Section 20, Township 5 North, Range 10 West, W.M., Clatsop County, Oregon, thence southerly via the former route of the Oregon Coast Highway to engineer's station 195+00 in Section 20, Township 5 North, Range 10 West, W.M., Clatsop County, Oregon.

Unit "H"

Beginning at engineer's station 196+00 of the relocated Oregon Coast Highway in Section 20, Township 5 North, Range 10 West, W.M., Clatsop County, Oregon, thence southerly via the former route of the Oregon Coast Highway to engineer's station 208+30 in Section 20, Township 5 North, Range 10 West, W.M., Clatsop County, Oregon.

shall hereafter be maintained by Clatsop County as county roads for the benefit and service of persons living thereon and communities served thereby. The Commission hereby surrenders all jurisdiction thereof and hereby consents that jurisdiction over said roads may be assumed and exercised by the county court of Clatsop County and said road shall hereafter be maintained by Clatsop County for public travel.

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway and other public purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

(cont.)

4. The boundaries of all real properties acquired for right of way and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission as of the 24th day of May, 1951, and the Secretary hereby is directed to mail to the County Clerk of Clatsop County a duly certified copy thereof, and shall file with the Clerk of Clatsop County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover.

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

Form cc-43

EXHIBIT "K-3" (cont.)

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 24th day of May, 19 51.

EXHIBIT "L-1"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any right or interest therein, deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation, or by exercise of the power of eminent domain, fee title to or by any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the T. H. Banfield Expressway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation by motor vehicles promoted, highway travel in general safeguarded, and public welfare promoted it is the judgment of the Commission that the real property hereinafter described is necessary and that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members thereof being present and voting affirmatively, as follows:

EXHIBIT "L-1" (cont.)

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the T. H. Banfield Expressway, for the purpose of establishing, constructing and maintaining a throughway, the following-described parcels of real property, to-wit:

Parcel No. 1
Owner: Harrison W. Jensen
File No. 16777

A parcel of land lying in Lot 6, Block 1, Parkrose Heights, Section 27, Township 1 North, Range 2 East, W. M., Multnomah County, Oregon; the said parcel being that portion of said Lot 6 lying between the southerly right of way line of the O. W. R. & N. Co. and a line parallel to and 70 feet southerly of the center line of the T. H Banfield Expressway, as said highway has been located, which center line is described as follows:

Beginning at Engineer's center line Station 372+71.28, said Station being 1723.55 feet South 86° 22' 41" East of the northwest corner of said Section 27; thence on a spiral curve to the right (the long chord of which bears South 83° 23' 42" East 399.84 feet) a distance of 400.00 feet to Engineer's Station 376+71.28, the southerly line of said parcel crossing the west and east lines of said Lot 6 approximately opposite Station 373+08 and Station 374+09, respectively, said parcel being further described as follows:

Beginning at the northwest corner of said Lot 6; thence easterly 101.25 feet along the northerly line of said lot to the northeast corner thereof; thence south 102.41 feet, more or less, along the east line of said lot; thence westerly to the west line of said lot along a line parallel to and 70 feet southerly of the above-described center line; thence north 104.88 feet more or less, along the west line of said lot to the point of beginning.

The parcel of land to which this description applies contains 0.236 acre

Parcel No. 2
Owner: Clay C. Miller
File No. 16952

A parcel of land lying in the Jacob Zimmerman D. L. C., Section 28, Township 1 North, Range 3 East, W. M., Multnomah County, Oregon, and being a portion of that property conveyed

by that deed to Clay C. Miller and Ruth M. Miller, husband and wife, recorded in Book 568, Page 71, of Multnomah County Records of Deeds; the said parcel being that portion of said property included in a strip of land variable in width, being 100 feet wide on the northerly side and extending to the railroad right of way on the southerly side of the center line of the T. H. Banfield Expressway as said highway has been located, which center line is described as follows:

Beginning at Engineer's center line Station 637+39.11, said Station being 630.69 feet south and 3732.95 feet west of the east quarter corner of said Section 28; thence on a 2291.83 foot radius curve to the left (the long chord of which bears North 82° 43' 10" East 998.89 feet to Engineer's Station 647+38.00, the northerly line of said strip of land crosses the west and east lines of said property approximately opposite Station 637+82 and Station 645+57, respectively.

The parcel of land to which this description applies contains 2.99 acres.

Parcel No. 3
Owner: William F. Loser
File No. 16104

A parcel of land lying in the E. R. Scott D. L. C., also in Section 28, Township 1 North, Range 3 East, W. M., Multnomah County, Oregon, and being a portion of that property conveyed by that deed to William F. Loser, recorded in Book 1033, Page 12, of Multnomah County Records of Deeds; the said parcel being that portion of said property included in a strip of land variable in width, being 100 feet wide on the northerly side and extending to the railroad right of way on the southerly side of the center line of the T. H. Banfield Expressway as said highway has been located, which center line is described as follows:

Beginning at Engineer's center line Station 652+38.00, said Station being 302.38 feet south and 2293.19 feet west of the east quarter corner of said Section 28; thence North 63° 59' East 548.48 feet; thence on a spiral curve to the right (the long chord of which bears North 66° 24' 48" East 540 feet to Engineer's Station 663+26.48; the northerly line of said strip of land crosses the west and east lines of said property approximately opposite Station 654+97 and Station 659+55, respectively.

The parcel of land to which this description applies contains 3.96 acres.

(cont.)

2. That the Commission does hereby find and declare that there is needed and required and is being appropriated for right of way of the T. H Banfield Expressway for the purpose of establishing, constructing and maintaining a throughway, and for right of way of a connecting or approach road to be constructed and maintained between the said T. H. Banfield Expressway and the existing Columbia River Highway, a parcel of real property located in Multnomah County, Oregon, and described as follows. to-wit

Owner: Lizzie Luscher
File No. 17037

A parcel of land lying in the East half ($E\frac{1}{2}$) of the East half ($E\frac{1}{2}$) of Section 28, Township 1 North, Range 3 East, W. M., Multnomah County, Oregon; the said parcel being described as follows

Beginning at the northwest corner of that tract of land conveyed to the State of Oregon, by and through its State Highway Commission, by deed recorded in Book 1362, Page 399, of Multnomah County Deed Records; said point being approximately 238 feet west and 428 feet north of the east quarter corner of said Section 28; thence south along the west line of said State property 162 feet more or less to the northerly line of the right of way of the O. W. R and N. Co; thence southwesterly along said northerly line approximately 890 feet to the east line of that tract conveyed to Wayne E. McGill by deed recorded in Book 562, Page 340, of Multnomah County Deed Records; thence along the boundaries of said McGill tract as follows; North 156. 5 feet; west 154 feet and north 435 feet more or less to a point which is 46. 89 feet southerly from the intersection of the easterly line of said McGill tract with the southerly line of the Columbia River Highway; thence; leaving said McGill boundary, South 75° 01' East 225. 28 feet; thence South 78° 56' 58" East 314. 76 feet, thence South 86° 33' 22" East 216. 75 feet; thence North 83° 11' East 200 feet more or less to the point of beginning.

The parcel of land to which this description applies contains 7. 50 acres.

3. The Commission does hereby find and declare that there is needed and required and is being appropriated for right of way for an approach or connecting road to be constructed and maintained between the T H. Banfield Expressway and the existing Columbia River Highway a parcel of real property located in Multnomah County, Oregon described as follows, to-wit

EXHIBIT "L-1" (cont.)

Owner: William F. Loser
File No. 16104

A parcel of land lying in the E. R. Scott D. L. C., also in Section 28, Township 1 North, Range 3 East, W. M., Multnomah County, Oregon, and being a portion of the following-described property; that tract of land which was conveyed by that certain deed to William F. Loser, recorded in Book 1033, Page 12 of Multnomah County Record of Deeds; the said parcel being described as follows:

Beginning at the northwest corner of said property; said point being the intersection of the southerly line of the Columbia River Highway (Sandy Road) with a line parallel to and 825.0 feet easterly from the west line of the E. R. Scott D. L. C.; thence south along the west line of said property 43.93 feet; thence South 60° 26' East 445.5 feet to the east line of said property; thence north along said east line 158.74 feet to the southerly line of the Columbia River Highway; thence westerly along the southerly line of the Columbia River Highway to the point of beginning.

The parcel of land to which this description applies contains 0.93 acre.

4. That in addition to acquisition of fee simple title to the parcels of real property described in paragraphs 1 and 2 hereof, it is necessary that there be acquired or extinguished such interests or rights, if any there be, by which rights of access or any rights in the nature of rights of access may accrue by reason of the adjacency of the T. H. Banfield Expressway, when constructed upon the said parcels of real property described in paragraphs 1 and 2 hereof, to the remaining abutting lands of the larger tracts, of which said larger tracts the said parcels of real property described in paragraphs 1 and 2 hereof are parts, and that all access, ingress, egress and regress to, from and between the said parcels of real property described in paragraphs 1 and 2 hereof, including any highway to be constructed thereon, and said remaining abutting properties be prohibited.

5. That the highway facilities for which the aforesaid parcels of real property are required and are being taken have been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

6. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcels of property as to the compensation to be paid for the taking, including the damages, if any, and, in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suits or actions as may be necessary to acquire title to the said parcels of real property.

7. That upon the trial of any suit or action instituted to acquire the said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

8. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fourth day of May, 1951.

EXHIBIT "L-2"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in the Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Pacific Highway East is a highway under the jurisdiction and Control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen, construct, and improve the Salem-Hayesville School Section of the Pacific Highway East within the city limits of the City of Salem, Oregon, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take any and all rights of access from property abutting a highway; and

WHEREAS, the Pacific Highway East is a major highway of the State, and as such carries large volumes of traffic, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, construction, improvement and maintenance of the Salem-Hayesville Section of the Pacific Highway East three parcels of real property located in Marion County, Oregon, and described as follows, to-wit:

(cont.)

EXHIBIT "L-2" (cont.)

File No. R 13870
Owner: Elling Halvorson

Parcel No. 1:

A parcel of land lying in the Northwest quarter ($NW\frac{1}{4}$) of Section 13, Township 7 South, Range 3 West, W. M., Marion County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Elling Halvorson, et al., recorded in Book 392, Page 639 of Marion County Record of Deeds; the said parcel being all that portion of the foregoing-described property included in a strip of land 40 feet in width on the easterly side of the center line of the Pacific Highway East as said highway has been located over and across or adjacent to said property; the location of said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 21+84.06 to Station 22+39.04, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 21+84.06 opposite and 40 feet distant from which point the easterly line of the said strip of land intersects the southerly line of said property; said point being 303 feet south and 835 feet east of the northwest corner of Section 13, Township 7 South, Range 3 West, W. M.; thence North 33° 56' East a distance of 54.98 feet to Station 22+39.04 opposite and 40 feet distant from which Station the Easterly line of said strip of land intersects the Northerly line of said property.

The parcel of land to which this description applies contains 2,199 square feet, of which 1,649 square feet lie within the existing right of way, title to which hereby is acknowledged to be in the public, and 550 square feet lie outside of the existing right of way.

ALSO: A maximum slope easement of 7 feet easterly of the above-described strip.

EXHIBIT "L-2" (cont.)

Parcel No. 2:

A parcel of land lying in the Northwest quarter ($NW\frac{1}{4}$) of Section 13, Township 7 South, Range 3 West, W. M., Marion County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Elling Halvorson, et al., recorded in Book 368, Page 417, and in Book 368, Page 421 of Marion County Record of Deeds; the said parcel being all that portion of the foregoing-described property included in a strip of land 40 feet in width, on the easterly side of the center line of the Pacific Highway East as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 22+39.04 to Station 23+98.90, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 22+39.04 opposite and 40 feet distant from which point the easterly line of the said strip of land intersects the southerly line of said property; said point being 258 feet south and 866 feet east of the northwest corner of Section 13, Township 7 South, Range 3 West, W. M.; thence North 33° 56' East a distance of 159.86 feet to Station 23+98.90 opposite and 40 feet distant from which Station the easterly line of said strip of land intersects the northerly line of said property.

The parcel of land to which this description applies contains 6,394 square feet, of which 4,796 square feet lie within the existing right of way, title to which hereby is acknowledged to be in the public, and 1,598 square feet lie outside of the existing right of way.

ALSO: A maximum slope easement of 7 feet easterly of the above-described strip.

Parcel No. 3:

A parcel of land lying in the Northwest quarter ($NW\frac{1}{4}$) of Section 13, Township 7 South, Range 3 West, W.M., Marion County, Oregon, and being a portion of the following-described property: That tract of land which was conveyed by that certain deed to Elling Halvorson, et al., recorded in Book

318, Page 349 of Marion County Record of Deeds; the said parcel being all that portion of the foregoing-described property included in a strip of land 40 feet in width on the easterly side of the center line of the Pacific Highway East as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 23+98.90 to Station 25+20.90 which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 23+98.90 opposite and 40 feet distant from which point the easterly line of the said strip of land intersects the southerly line of said property; said point being 125 feet south and 955 feet east of the northwest corner of Section 13, Township 7 South, Range 3 West, W. M.; thence North 33° 56' East a distance of 122 feet to Station 25+20.90 opposite and 40 feet distant from which Station the easterly line of said strip of land intersects the northerly line of said property.

The parcel of land to which this description applies contains 4,880 square feet, of which 3,869 square feet lie within the existing right of way, title to which hereby is acknowledged to be in the public, and 1,011 square feet lie outside of the existing right of way.

ALSO: A maximum slope easement of 2 feet easterly of the above-described strip.

2. That in addition to acquisition of fee simple title to the aforesaid-described parcels of real property, it is necessary that there be acquired all easements and rights of access and all rights of ingress, egress, and regress to, from and between the remaining land of the larger tracts, of which the above-described parcels of real property are parts, and the above-described parcels of real property and any highway now or hereafter constructed thereon, and that all access to the aforesaid-described parcels of real property and the Pacific Highway East, now or hereafter constructed thereon, from said remaining land of said larger tracts, and all approaches or access from said highway to said remaining land, be prohibited; except that there shall be reserved unto the owners of said remaining land rights of access for four approaches from said remaining land to the Pacific Highway East, as follows.

EXHIBIT "L-2" (cont.)

a. A right of access for an approach not to exceed twenty-five feet in width on the east side of the Pacific Highway East opposite Highway Engineer's Station 24+40.

b. A right of access for an approach not to exceed twenty-five feet in width on the east side of the Pacific Highway East opposite Highway Engineer's Station 24+80.

c. A right of access for an approach not to exceed twenty-five feet in width on the east side of the Pacific Highway East opposite Highway Engineer's Station 23+10.

d. A right of access for an approach not to exceed twenty-five feet in width on the east side of the Pacific Highway East opposite Highway Engineer's Station 22+45.

3. That the highway facility for which the aforesaid-described real property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

5. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief County, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fourth day of May, 1951.

EXHIBIT "L-3"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, or donation, or by the exercise of the power of eminent domain, real property, or any right or interest therein, deemed by the State Highway Commission necessary for the preservation of scenic places and other objects of attraction or scenic value adjacent to or along, or in close proximity to, state highways, or which may be conveniently reached from or by a public highway, and the Highway Commission is also authorized and empowered to acquire land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds, or resorts, forest or timbered areas, or other places of attraction and scenic value which, in the judgment of the Commission, are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road users; and

WHEREAS, the Sunset Bay State Park is a park under the jurisdiction and control of the State Highway Commission; and

WHEREAS, the State Highway Commission plans and proposes to enlarge, develop and maintain the Sunset Bay State Park for public park and recreational purposes, and for the convenience of the public and general welfare and pleasure of the motoring public using the Cape Arago Highway, and for such purposes and in connection therewith the real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows.

1. The Commission does hereby find and declare that there is needed and required for public park and recreational purposes for use in connection with the enlargement, development and maintenance of the Sunset Bay State Park four parcels of real property located in Coos County, Oregon, and described as follows, to-wit:

(cont.)

EXHIBIT "L-3" (cont.)

Parcel No. 1
Owner: Ralph Barker
File No. 16736

A parcel of land lying in Government Lot 2 of Section 9, Township 26 South, Range 14 West, W. M., Coos County, Oregon, and being the following-described property: That tract of land which was conveyed by that certain deed to Ralph Barker, recorded in Book 152, Page 545 of Coos County Record of Deeds; the said parcel being described as follows:

That part of Government Lot 2 lying south of the Cape Arago Highway in Section 9, Township 26 South, Range 14 West; beginning at the southeast corner of the said Government Lot 2; thence north 300 feet along the east line of Government Lot 2, thence west 100 feet, more or less, to the easterly right of way of said highway; thence south and west along the said right of way to the section line between Sections 8 and 9, Township 26 South, Range 14 West; thence south 140 feet, more or less, along said section line to the quarter section corner; thence east along the quarter section line to the place of beginning, containing 5.75 acres.

Parcel No. 2
Owner: D. H. Harding
File No. 16735

A parcel of land lying in the Northeast quarter ($NE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 9, Township 26 South, Range 14 West, W. M., Coos County, Oregon, and being the following-described property: That tract of land which was conveyed by that certain deed to D. H. Harding and George M. Dutch, recorded in Book 173, Page 391 of Coos County Record of Deeds; the said parcel being described as follows:

Beginning at the southeast corner of Block 6, Plat of Sunset View, said point being in the Northeast quarter ($NE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 9, Township 26 South, Range 14 West, W. M., thence South 85° 14' 30" West 250 feet along the southerly line of said Block 6 to the southwest corner thereof, said point being on the easterly boundary of the Cape Arago Secondary highway and on a curve of 477.5 foot radius, the tangent of which at said point bears South 4° 45' 30" East; thence along the said curve to the left, along

(cont.)

the highway boundary through a central angle of 13° 39' 30" for a distance of 106.68 feet; thence South 18° 25' East 118.26 feet along said highway boundary; thence North 54° 35' East 127.77 feet; thence North 45° 44' East 75.92 feet; thence North 16° 10' East 114.70 feet to the point of beginning, containing 0.82 acre, more or less.

That there be reserved to the owners, their heirs and assigns, the right to maintain that portion of the residence building now partially located upon the above-described property upon its existing location during the natural life of said building, and that this reserved right shall automatically cease and terminate whenever the said building shall no longer be suitable for use or when the said building is substantially altered or reconstructed or replaced.

Parcel No. 3
Owner: George W. Landrith
File No. 16734

A parcel of land lying in the Northwest quarter ($NW\frac{1}{4}$) of Section 9, Township 26 South, Range 14 West, W.M., Coos County, Oregon; the said parcel being a strip of land 130 feet in width, lying on the easterly side of the center line of the Cape Arago Highway No. 240 as said highway has been constructed over and across or adjacent to the said Northwest quarter ($NW\frac{1}{4}$), which center line is described as follows:

Beginning at a point which is Engineer's center line Station 153+25.3 opposite and 130 feet distant from which point the easterly line of the said strip of land intersects the southerly line of that property conveyed to D. H. Harding and Geo. M. Dutch by deed recorded in Book 173, Page 391, of Coos County Record of Deeds, which southerly property line is the northerly line of the parcel herein conveyed; said point of beginning being 678.82 feet south and 1233.48 feet west of the North quarter corner of said Section 9; thence South 19° 05' East 35.7 feet; thence on a 409.29 foot radius curve right (the long chord of which bears South 0° 53' 30" West 279.62 feet) a distance of 285.4 feet; thence South 20° 52' West 193.6 feet; thence on a 260.45 foot radius curve right (the long chord of which bears South 58° 30' 30" West 318.12 feet) a distance of 342.2 feet; thence North 83° 51' West 4.5 feet; thence on a 260.45 foot radius curve left (the long chord of which bears South 61° 21' West 297.38 feet) a distance of 316.4 feet; thence South 26° 33' West 131.3 feet to Station 166+34.4

equals 165+07.1; thence on a 143.25 foot radius curve left (the long chord of which bears South 27° 40' 30" East 232.42 feet) a distance of 271.1 feet; thence South 81° 54' East 206.1 feet; thence on a 286.5 foot radius curve right (the long chord of which bears South 66° 39' East 150.71 feet) a distance of 152.5 feet to Station 171+36.8, at which Station the southerly end of said strip of land lies at right angles to said center line.

The parcel of land to which this description applies contains 4.28 acres, more or less, outside of the existing right of way.

Parcel No. 4
Owner: George W. Landrith
File No. 16734

A parcel of land lying in the South half ($S\frac{1}{2}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 9, Township 26 South, Range 14 West, W.M., Coos County, Oregon, and being more particularly described as follows:

Beginning at a point on the west line of the Southeast quarter ($SE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 9, Township 26 South, Range 14 West, said point being 156.2 feet north and 1315.8 feet east of the west quarter corner of said Section; thence North 1° 03' West 123 feet; thence west 100 feet to a point on the easterly right of way line of the Charleston-Cape Arago Highway, said point being opposite and 30 feet distant from Engineer's center line Station 174+94.3; thence northerly along a 316.48 foot radius curve left (the long chord of which bears North 15° 39' West 369.8 feet) a distance of 394.9 feet to a point which is opposite and 30 feet distant from Engineer's center line Station 171+36.8; thence North 38° 36' East 100.0 feet; thence North 67° 37' East 565.07 feet; thence east 690.0 feet; thence South 1° 25' East 450.0 feet; thence South 75° 21' West 491.9 feet to the northerly line of a certain private road; thence North 79° 53' 30" West 58.63 feet; thence South 89° 15' West 160.0 feet; thence South 80° 10' West 120.0 feet; thence South 55° 05' West 100.0 feet; thence South 25° 05' West 146.0 feet; thence South 66° 25' West 96.0 feet; thence North 43° 44' West 58.18 feet to the place of beginning, containing 15.39 acres.

2. That the park and recreational facilities for which the aforesaid property is required and is being taken has been planned and will be developed and maintained in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fourth day of May, 1951.

EXHIBIT "L-4"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the State Highway Commission necessary for highway purposes; and

WHEREAS, the Sunset Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of a federal highway system; and

WHEREAS, for the purpose of providing a highway which will more adequately serve the traveling public, the Highway Commission plans and proposes to widen and improve the Sylvan Section of the Sunset Highway, and to construct and maintain approach or connecting roads between the said highway and S. W. Scholls Ferry Road, Multnomah County Road No. 1202, S. W. Hewitt Blvd., Multnomah County Road No. 405, and S. W. Humphrey Blvd., Multnomah County Road No. 1263, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members thereof being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the widening, construction, improvement, and maintenance of the Sylvan Section of the Sunset Highway and the construction and maintenance of approach or connecting roads between said highway and S. W. Scholls Ferry Road, Multnomah County Road No. 1202, S. W. Hewitt Blvd., Multnomah County Road No. 405, and S. W. Humphrey Blvd., Multnomah County Road No. 1263, a parcel of real property located in Multnomah County, Oregon, described as follows, to-wit:

(cont.)

EXHIBIT "L-4" (cont.)

A tract of land lying in the West half ($W\frac{1}{2}$) of Section 6, Township 1 South, Range 1 East, W. M., Multnomah County, Oregon, being more particularly described as follows:

Beginning at a point 14.96 chains north and 4.5 chains west of the quarter corner between Sections 6 and 7, and running thence west 6.97 chains; thence north 400 feet to the south line of Canyon Road; thence easterly along said south line of Canyon Road 6.97 chains to a point north of the beginning point; and thence south 400 feet, more or less, to the point of beginning.

The parcel of land to which this description applies contains 4.0 acres of land, of which 0.648 acre lies within the existing rights of way of Multnomah County Road No. 1138 (Canyon Road) and Multnomah County Road No. 979 (Skyline Boulevard), title to which hereby is alleged to be in the public, and 3.352 acres lie outside of said rights of way.

The foregoing-described property is referred to in the records of the Multnomah County Assessor as Tax Lots 45 and 48 of Section 6, Township 1 South, Range 1 East, W. M.

2. That the highway facilities for which the aforesaid property is required and is being taken have been planned, designed, located, and will be constructed in a manner which, in the opinion of the Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owner and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owner.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fourth day of May, 1951.

EXHIBIT "L-5"

Minutes of May 24 and 25, 1951

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated, and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, or donation, or by the exercise of the power of eminent domain, real property, or any right or interest therein, deemed by the State Highway Commission necessary for the preservation of scenic places and other objects of attraction or scenic value adjacent to or along, or in close proximity to, state highways, or which may be conveniently reached from or by a public highway, and the Highway Commission is also authorized and empowered to acquire land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds, or resorts, forest or timbered areas, or other places of attraction and scenic value which, in the judgment of the Commission, are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road users; and

WHEREAS, the Samuel H. Boardman State Park has been established by and is under the jurisdiction and control of the State Highway Commission; and

WHEREAS, the State Highway Commission plans and proposes to enlarge, develop and maintain the Samuel H. Boardman State Park for public park and recreational purposes, and for the convenience of the public and general welfare and pleasure of the motoring public using the Oregon Coast Highway, and for such purposes and in connection therewith the real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Commission does hereby find and declare that there is needed for public park and recreational purposes for use in connection with the enlargement, development and maintenance of the Samuel H. Boardman State Park two parcels of real property located in Curry County, Oregon, and described as follows, to-wit:

(cont.)

EXHIBIT "L-5" (cont.)

Minutes of May 24 and 25, 1951

RESOLUTION

Owner: Harvey D. Crook
File No. 14748

Parcel No. 1:

A parcel of land lying in Section 32, Township 38 South, Range 14 West, W. M., Curry County, Oregon the said parcel being described as follows:

Beginning at a point which is 1401.7 feet east and 410 feet south of the west quarter corner of said Section 32; thence South 0° 43' West 1105 feet; thence South 89° 17' East 150 feet; thence South 0° 43' West 1200 feet to the south line of said Section 32; thence East 250 feet; thence North 0° 43' East 1462 feet to the southerly right of way line of the Oregon Coast Highway; thence westerly and northerly along said right of way line to a point South 89° 17' East 200 feet from the point of beginning; thence North 89° 17' West 200 feet to the point of beginning, containing 13.53 acres.

Except there is reserved to the grantor the right of way over an existing roadway 25 feet in width. The center line of said roadway crosses the west line of the above-described parcel approximately 1,000 feet southerly of the beginning point of said parcel and runs thence easterly and northerly to the southerly line of the Oregon Coast Highway at a point approximately 60 feet westerly of the point where the east line of said parcel meets and bears westerly along said highway line.

Parcel No. 2:

A parcel of land being Lots 3, 4, and 5 of Section 5, Township 39 South, Range 14 West, W. M., Curry County, Oregon. Also, that part of Lot 2 of said Section 5 described as follows.

Beginning at the northwest corner of said Lot 2; thence south to the southwest corner of said Lot 2; thence east to a point midway between the southwest and southeast corners of said Lot 2; thence northwesterly on a straight line to the place of beginning, containing 82.87 acres.

EXHIBIT "L-5" (cont.)

Minutes of May 24 and 25, 1951

RESOLUTION

2. That the park and recreational facilities for which the aforesaid property is required and is being taken has been planned and will be developed and maintained in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or, in his absence, the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the twenty-fourth day of May, 1951.

EXHIBIT "M"

SCHEDULE "B"

AF-.....

No. .....

Class .....

..... of .....

Authorizing the transportation of logs, poles or piling from point of origin to mill, retail yard or shippingpoint, over any and all Oregon State Highways, subject to recommendations of the State Highway Commission to the Public Utilities Commissioner governing the transportation of logs, poles, and piling, which recommendations have been adopted as regulations by the Public Utilities Commissioner pursuant to Sections 115-509 and 115-513, O. C. L. A., and acts amendatory thereto, and are attached hereto and made a part hereof.

SIZE AND WEIGHT: On all highways loads are limited as to weight and dimensions allowed by statute. An additional permit must be obtained from the State Highway Commission for loads exceeding statutory weight or dimensions. The posting of a state highway or structure by the State Highway Commission to reduced limits of weight, dimensions or speed shall be deemed to that extent as modification of this permit as well as the statutory limit.

Transportation of logs, poles, or piling over any county roads or city streets (not on a state highway) requires a permit issued by the County authorities on county roads and City authorities on city streets.

ADDITIONAL AUTHORITY:

and one copy of the attached regulations, Form MP-970, which are a part of this permit/

The weight certificate issued by the Commissioner, stating therein the light and the combined weight of each vehicle, must be carried with the vehicle at all times.

Superseding Schedule "B" No. .....

Dated at Salem, Oregon, this .....day of ....., 19....

By order of the Commissioner.

AF _____

_____ (Name) of _____ (Address)

THE FOLLOWING MANDATORY REGULATIONS GOVERNING THE TRANSPORTATION OF LOGS, POLES, OR PILING BY MOTOR TRUCK AS PRESCRIBED BY THE STATE HIGHWAY COMMISSION OF OREGON EFFECTIVE AUGUST 2, 1951 ARE SUPPLEMENTAL TO AND SUPERSEDE ALL PREVIOUS REGULATIONS AND ARE HEREBY MADE A PART OF THE PERMIT ABOVE REFERRED TO.

These special regulations are in addition and supplemental to the requirements of the Oregon Motor Vehicle laws and Oregon Motor Transportation Code; also, the Logging Safety Code of the Oregon State Industrial Accident Commission.

The term "logs" as used herein shall be construed to include logs, poles or piling.

RESTRICTED HIGHWAYS:

The transportation of logs, poles or piling over the following highways is strictly prohibited unless authority to use such highways is specifically granted under special permit by the State Highway Commission.

Columbia River Highway between Cascade Locks and The Dalles;
Crown Point Secondary Highway (Old Columbia River Highway) between Troutdale and junction with Columbia River Highway near Dodson;
Little Nestucca Secondary Highway between Little Nestucca River at Mile Post 5.20 and Dolph;
Woodburn-Estacada Highway between Carver Road Junction (M. P. 32.14) and Estacada;
Mt. Hood Highway between Wapanitia Highway Junction and Cooper Spur;
Alsea-Deadwood Secondary Highway between Alpha School (M. P. 10.5) and Preacher Creek Road (M. P. 19.96);
Pacific Highway West between Monmouth and Airlie-Suver Road, new route only;
Oregon Coast Highway between Warrenton Junction (M. P. 8.56) and junction with Old Highway (M. P. 6.52), new route only;

(cont.)

Crater Lake Highway between Crater Lake Park boundary and Fort Klamath,
Territorial Secondary Highway between M. P. 41. 34, near RR grade crossing, and Pacific Highway Junction near Anlauf;
West Diamond Lake Highway between Grater Lake Highway Junction and junction with Crater Lake-North Highway;
East Diamond Lake Highway between Crater Lake-North Highway and Junction with The Dalles-California Highway;
McKenzie-Bend Highway between Tumalo and junction with The Dalles-California Highway near Bend.

REDUCED SPEED ZONES:

No truck engaged in the transportation of logs, poles, and/or piling shall be driven through any of the following described zones at a rate of speed in excess of that specified for such zone:

(1) Little Nestucca Highway across Little Nestucca River Bridge at M. P. 1. 3 - 15 Miles Per Hour.
(2) Siletz Highway from end of oiled road at M. P. 5. 52 to the town of Siletz - 20 Miles Per Hour.
(3) Tiller Trail Highway from M. P. 40. 3 (Dead Horse Canyon) to M. P. 41. 44 - 15 Miles Per Hour.
(4) Elkton-Sutherlin Highway from Umpqua Highway Junction to Pacific Highway Junction - 25 Miles Per Hour EXCEPT from Summit of Marvin Hill to junction with Coles Valley Road - 15 Miles Per Hour.
(5) Alsea-Deadwood Highway from Alpha School to junction with Siuslaw Highway - 15 Miles Per Hour.

ONE-WAY TRAFFIC ZONES:

The following sections of State Highways or bridge structures are limited to one-way traffic for all trucks engaged in transportation of logs, poles, and/or piling, whether loaded or empty, and no truck engaged in such operation shall enter upon any of said sections or structures until said section or structure is free from all other vehicular traffic;

(1) Ochoco Highway - Bridge Creek Bridge at M. P. 67. 79, approximately 4 miles west of Mitchell;
(2) Pacific Highway West-Long Tom River Bridge at Monroe;
(3) Salmon River Highway-Willamina River Bridge at Willamina;
(4) Nehalem Highway-Bridges over Nehalem River at M. P. 's 30. 65, 33. 65, 37. 17, 39. 20, 42. 36, 56. 42, and 58. 32;
(5) Woodburn-Estacada Highway-Molalla River Bridge at M. P. 15. 45
(6) Clackamas Highway-Eagle Creek Bridge at M. P. 38. 67 (North bound trucks to stop before entering structure);
(7) Edyville-Blodgett Highway-S. P. R. R. Undercrossing at M. P. 5. 62 near summit;

(cont.)

(8) Kings Valley Highway - Ritner Creek Bridge at M. P. 17.69;
(9) Territorial Highway-Coyote Creek Bridge at M. P. 26.24;
(10) Albany-Lyons Highway-Crabtree Creek Bridge at M. P. 6.36;
(11) Elkton-Sutherlin Highway-Calapooya River Bridge at M. P. 24.00;
(12) Mehama-Mill City Highway-North Santiam River Bridge at M. P. 0.19 near Mehama;
(13) Sumpter Valley Highway - One-Way Traffic Zone between M. P. 5.71 and M. P. 5.81 (0.17 mile easterly from California Gulch). Flagman shall be maintained at either end of this 0.10-mile section, shall be visible to each other, and not allow a logging truck to enter this zone unless the zone is free and clear of all other traffic.

SPECIAL REGULATIONS:

A. DISPOSAL AND REPORTING OF LOST LOGS OR LOG LOADS

If any log be dropped from any load during its transportation over any of the highways of this state it shall be the duty of the person, firm, or corporation hauling said logs immediately to remove the same from the traveled portion of the roadway, and within a period of not more than 10 days to remove the same from the right of way at his or its own expense. If the hauler of the owner of the logs fails to so remove the logs within the specified time, the owner shall be deemed to have waived any claim to ownership of the logs.

The repeated dumping or loss of logs upon the highway right of way, or the neglect or refusal of any log hauler to remove any log or logs so unloaded or lost in transit shall be considered as an indication of laxity in conforming to loading requirements and shall be cause for the immediate suspension or cancellation of the permit under which said log hauler is operating.

If any log or logs be dropped or lost upon the highway it shall be the duty of the log hauler to report said fact to the Highway Commission within 48 hours thereafter. Said report shall state, among other things:

1. The time the log or logs were lost.
2. The exact location.
3. The number of logs on the truck at the time of the accident.
4. The length of the respective logs.
5. The number of board feet contained on the load.
6. The speed of the truck at the time of the accident.
7. If on a curve, a full description of the curve and surrounding country.
8. What portion of the equipment broke, if any, prior to the loss of said logs.

(cont.)

9. The type and age of equipment, both truck and trailer and the number and size of chains or fastenings used.
10. The date of the last checkup or inspection of the equipment involved.
11. Time logs were removed from highway.

The neglect or refusal of any log hauler to render the above report within the time specified may be considered cause for the immediate suspension or cancellation of the permit under which said log hauler is operating.

The filing of a report as required by these special regulations shall not be construed as relieving the driver of any vehicle from filing an accident report as required by Section 115-316, O. C. L. A., and acts amendatory thereto.

B. METHOD OF LOADING

1. The bunks or bolsters of any truck or trailer shall be either straigh or concave upward. Bunks with the ends lower than their centers will not be pe mitted. Sufficient frame clearance shall be maintained to prevent "bunk binding The ends of the bunks or bolsters shall be provided with chock blocks which can be securely locked in position; and when the vehicle is loaded and chock blocks are in position, each block shall have a height of not less than eight inches above the top of the bunk. Chock blocks shall not extend beyond the end of the bunk. Open V-type blocks shall be one inch or more from the end of the bunk and shall not be turned over. Bunk chains or cables must meet the requirements of Section B. 6 hereof.

2. The method of loading shall be such that the outer logs in any upper tier or layer above the bunk logs will be securely "saddled" with their centers inside of the centers of the outer logs of the next lower tier or layer so that the load is stable without the aid of ties or binders. Ties or binders shall be considered as precautionary measures to insure stability of the load while the vehicle is rounding curves or upon superelevated or sloping surfaces. Loads shall be well balanced on the truck and trailer center plates. Not more than one-third of the weight of any log shall extend to the rear of the last point of support.

3. Loads consisting of seven (7) logs or more than seven logs shall be tied with not less than three (3) binders, two of which shall be placed near the bunks and the third approximately midway between the bunks.

Loads consisting of six (6) or less than six logs shall be tied with not less than two (2) binders placed near the bunks; provided that, in the case of one-log loads, one binder securely fastened to the bunk of the trailer shall be sufficient.

(cont.)

Any binder used at the bunk shall be wrapped around at least the two sides and top of the load and shall be securely fastened to the bunk. Any binder not placed at the bunk shall entirely surround the load.

The bottom logs of all loads must rest securely on both the front and the rear bunks. On all loads consisting of three or more logs, if any of the top logs are too short to be bound by both binders near the bunks, or one binder near the bunk and the center binder, the end of each such log not so bound shall be secured by an additional binder, placed entirely around the load.

Binders shall be so arranged that they may be released from the side of the vehicle away from the dump in unloading, but no loose end of any binder shall be permitted to swing free from the load or vehicle. All such loose ends shall be securely fastened to the load or vehicle so as to prevent their swinging free or striking any person, vehicle or object, on or adjacent to the roadway while the vehicle is in operation. For this purpose one end of the binder shall be equipped with a suitable clamp or fastening device.

4. In the case of short logs transported on solo trucks and loaded lengthwise, the following method of loading may be substituted in lieu of that set forth in paragraphs2 and 3 above: The logs may be loaded between rigid standards attached to the bed of the truck at the bottom and tied across above the load with cable or chain ties. There shall be a standard on each side of the load within two feet of each end of the logs, and a sufficient number of standards shall be provided so that they are spaced not more than eight feet apart on each side of the load. The standards shall be rigidly connected to the bed of the truck or shall be placed in tight-fitting sockets at least twelve inches in depth. They shall be of such size and dimension that when supported at each end a load of 15,000 pounds applied at the center shall not cause failure.

5. In the case of short logs loaded crosswise the following method of loading shall be used if the truck or trailer is not provided with solid ends of a height sufficient to prevent any log in the load from rolling off: Not less than two chock blocks shall be used at each open end of the vehicle and the load shall be held with at least two binders for each row of logs. The binders shall be firmly attached to the ends of the truck or trailer. Rigid standards or stakes may be used in lieu of chock blocks but each such stake shall be either rigidly connected to the bed of the truck or trailer or shall be placed in a tight-fitting socket at least twelve inches in depth.

6. All chains, cables, binders or fasteners, used for any purpose as required by these regulations shall have a minimum breaking strength of not less than 15,000 pounds. If chains are used as binders, they shall be made of welded links and at least one link in every five (5) feet of chain shall be stamped with the manufacturer's mark or symbol guaranteeing that the minimum breaking strength of the chain is not less than 15,000 pounds. No chain

(cont.)

shall be used that does not contain at least one link so stamped. The use of molles or cold shuts in such chains will not be permitted. Cut, cracked, excessively worn or otherwise defective links shall be removed and the chain repaired immediately. Tighteners shall be fitted with hooks which hook over the chain links and shall be used in that manner. If cables are used as binders, they shall consist of one-half inch wire rope. The use of frayed or stranded wire rope will not be permitted. All binders and fastenings thereof shall be inspected frequently and any necessary repairs indicated by such inspection shall be made immediately.

7. All bunk blocks, loose ends of binders, or other equipment shall not be permitted to swing free from loaded or unloaded vehicles.

8. Logs with large limbs, knots, bark slabs or other hazardous projections shall not be transported.

C. GENERAL REGULATIONS

1. Braking equipment shall be maintained in good condition. Hose lines and couplings thereof of vehicles equipped with air brakes shall be immediately repaired or replaced when found defective. Sufficient slack shall be maintained in air brake hose lines to prevent uncoupling when the trailer reach is extended. A brake test shall be made before the start of any trip.

2. Trailer couplings shall be securely locked or the pin shall be keyed. Wooden reaches shall be of good, straight-grained material.

3. Trailers loaded on trucks shall be securely fastened to the truck in such manner that they will not fall, roll or slide off while in transit.

4. All axles on logging trucks and trailers shall be equipped with springs.

5. "The truck hauling logs, poles and/or piling over or across any state highway on Saturday afternoons, between May 23rd and Sept. 8th, Sundays, New Year's Day, Memorial Day, Independence Day, Labor Day, Armistice Day, Thanksgiving Day, Christmas Day and during the period from 8 p.m., Pacific standard time, on any other day to 4 a.m., Pacific standard time, of the day following is prohibited. Hauling equipment operating between 4 a m. and 8 p.m. of any day shall be equipped with and during the hours of darkness shall display lighted lamps and other illuminating devices conforming with all statutory requirements; provided further, that if the overall length of the equipment and load exceeds 50 feet, there shall, in addition, be displayed on each side of the load at the approximate center, amber side marker lamps."

(cont.)

6. No approach to any state highway from a private logging road, entrances and exits both included, may be constructed until a written permit has been obtained from the Oregon State Highway Commission (Chapter 308, Oregon Laws, 1949 as amended). Standard-type warning signs bearing the wording "Look Out for Log Trucks" shall be maintained on the right hand shoulder of the highway at points approximately 500 feet in each direction from the private logging road junction as highway traffic safeguards. The signs are to be furnished by the permittee and installed by him in locations satisfactory to the State Highway Engineer, or his duly-authorized representative. Such signs may be purchased from the State Highway Department, Salem, Oregon, at actual cost.

7. Mud and debris must be removed from the wheels of log-hauling equipment before entering any state highway.

8. All trucks carrying logs must come to a complete stop before crossing any railroad track at grade, unless the crossing has been exempted by a proper order of the Public Utilities Commissioner, (Chap. 107, Oregon Laws, 1949).

9. Operators of all logging trucks shall consent to the inspection and weighing of their loads on state-owned scales or loadometers whenever so requested by "weigh-masters" in the employ of the State Highway Commission, if the scales are not more than five miles distant.

The refusal of any operator to allow his truck to be inspected or weighed shall be considered sufficient cause for the immediate suspension or cancellation of the permit under which he is operating.

10. A truck loaded with logs shall not follow another similarly-loaded truck closer than 500 feet except when overtaking and passing another and no truck carrying a load of logs shall pass another similarly-loaded truck on an ascending grade. A passing maneuver shall not be attempted at any point unless there is a clear vision of the road ahead for at least one-half mile.

11. The speed of any logging truck, either with or without load shall not exceed 15 miles per hour on narrow bridges and/or sharp curves, and shall not exceed 35 miles per hour on other curves.

12. Permittee shall be held responsible and liable for any and all injury or damage to any highway or to any highway structure, occasioned by the transportation of logs over said roads, and he hereby agrees to reimburse the State Highway Commission for the cost or expense of repairing any such injury or damage, such reimbursement to be made within ten days after being billed for the same by the State Highway Commission.

(cont.)

EXHIBIT "N" (cont.)

13. The actual transportation of logs over state highways shall be construed as acceptance by permittee of the provisions of this permit.

14. The violation of any of the regulations hereinabove set forth shall be considered sufficient cause for the immediate suspension or cancellation of the permit under which the equipment involved is being operated.

15. That these regulations are issued subject to the conditions and penalties provided for in Section 115-533, O. C. L. A.

ALL OTHER TERMS AND CONDITIONS OF THE PERMIT TO WHICH THIS AMENDMENT IS ATTACHED, TO REMAIN IN FULL FORCE AND EFFECT.

Dated at Salem, Oregon, this _____ day of _____, 19_____

Public Utilities Commissioner

INSPECTION TRIP

June 18 to June 22, 1951

During the week commencing Monday, June 18, 1951 and ending Friday, June 22, 1951, the members of the State Highway Commission made a personal inspection of projects on the Oregon Coast Highway and on the Pacific Highway, that are being considered for construction with monies derived from the sale of bonds as authorized by the 1951 Legislature. Also inspected on this trip were construction and survey projects now under way, projects previously approved for undertaking but not yet contracted, and State parks. The following persons made up the Commission group:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
Milo K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, Asst. State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Commission Secretary
C. H. Armstrong, Parks Superintendent
Ralph Watson, Public Relations Consultant
Forrest Cooper, Right of Way Engineer
F. D. Eason, Division Engineer, Salem
K. D. Lytle, Division Engineer, Roseburg
Ray Conway, Manager, Oregon State Motorist Assoc.
Larry Smythe, reporter, Oregon Journal

Astoria, Oregon

June 18, 1951

Following a motor trip from Portland to Astoria over the Lower Columbia River Highway, during which a number of proposed projects were inspected, the members of the Highway Commission group were luncheon guests of the Astoria Chamber of Commerce at the Astoria Hotel. At the conclusion of the luncheon a short business session was held, with Mr. Clarence E. Short, President of the Chamber of Commerce, presiding. Mr. Short asked the Commission to modernize the Lower Columbia River Highway between Rainier and Astoria. He said that such improvement is deserved from the standpoint of tourist travel, increased population, traffic congestion and Naval activities at Tongue Point. Others speaking in behalf of the local group were: Capt. E. C. McFall, Commander of Tongue Point, who stated that the improvement is needed because the Navy depends now on the successful operation of US30, and will depend on this highway more so

in the future in connection with its activities. The Lower Columbia River Highway, he said, is essential and vital to the Department of the Navy in that logistical support must come over that thoroughfare. He advised that he also speaks for Vice Admiral D. E. Barbey, Seattle, Commander of the Thirteenth Naval District; Capt. R. H. Legg, Commander of the Naval Reserve Fleet, Astoria, who stated that the Thirteenth Naval District now depends upon rail and truck transportation to obtain its logistic supplies from Seattle, and, particularly does it depend upon truck transportation because the supplies can be received much speedier through that means of transportation than by rail. He added that it is imperative that they use truck service, which is routed over the Longview Bridge and US30 Capt. Thorne, representing the U. S. Maritime Commission, stated that all ports on the Pacific are now in use and must be tied together by modern highway facilities, which daily are becoming more and more important since railroad facilities have proved unsatisfactory; W. Arthur Steele, former mayor of Clatskanie, spoke for the improvement of this highway section from the safety standpoint, pointing out that accidents frequently occur on the present highway because it is too crooked and too narrow. Mayor Peter S. Coscovich, Astoria, arrived late, extended a brief welcome to the Commission and its party. Hon. Guy Boyington, County Judge of Clatsop County, expressed confidence in the judgment of the Highway Commission in the expenditure of funds under its control; he also urged the improvement of the Lower Columbia River Highway and construction of a new ferry terminal in Astoria, as has been proposed heretofore. He also spoke for reduced ferry charges, declaring that the public is entitled to a "charge off" on bridge construction, and that a fifty cent minimum fee to transport an automobile across the river would be satisfactory. Judge Boyington took the opportunity to express his views with respect to the fees that are charged truckers for use of the highways of this state. He gave as his feeling that the Commission should not sell bonds for highway construction, as has been authorized by the 1951 Legislature, until commercial users of our highways, particularly freighters, pay their just shares for such use and withdraw their objections to the new law. Senator J. Manley Wilson, Warrenton, advised that he supported the new highway bond law and that he would like to see some of the money derived from the sale of the bonds spent for the improvement of the Lower Columbia River Highway. He endorsed the sentiments expressed by Judge Boyington regarding truck operators. Senator R. D. "Bob" Holmes, Gearhart, gave as his belief that the State Highway Commission should be free to spend highway funds, at least for the next ten years, as it deems best, although he expressed the hope that some of the bond money would be allocated for construction of the Lower Columbia River Highway. Dr. Orville Eaton, State Representative and former mayor of Astoria, endorsed the remarks of the other speakers. Representative Jos. M. Dyer, Astoria, urged improvement of the Lower Columbia River Highway as a safer, better route to travel between Portland and Astoria during the winter time.

Members of the State Highway Commission and the State Highway Engineer were introduced and spoke briefly. Chairman Chandler advised that the purpose of the Commission's trip is to inspect projects that are being considered by the Commission for the construction program for monies derived from the sale of bonds. The Commission, he said, is not in a position today to make any promises or commitments for any project, but, in the over-all picture, the people of the Lower Columbia River district will be treated fairly, and the Commission will do for them the best that it can with the funds available. In conclusion, Chairman Chandler advised that from the information the Commission gathers on this trip, it expects to be able to determine improvements that are most needed and where the expenditure of the funds will be in the best public interests.

The meeting adjourned at 1:00 p. m., following which the Commission motored to Seaside, inspecting projects en route.

Seaside, Oregon

June 18, 1951

The State Highway Commission met informally with a delegation from Seaside at 2:00 p. m. in the Seaside Hotel. Local persons present included E. B. "Mark" Hanna, Chairman, Seaside Chamber of Commerce Road Committee; Lester U. Raw, Mayor of Seaside; Deane Ruth and John A. Royce, City Councilmen; Radford R. Shawcross, City Manager; George Gray, representing the Gray Logging Co., Glenn Corey, representing the Pacific Power and Light Co., William R. Manion, representing the Governor's Regional Safety Committee; Gene Legg, John Phillips and Paul Scoggins Mr. Hanna headed the group. He read aloud a copy of a letter, the original of which, he said, has been forwarded to the Highway Commission's office in Salem, and in which the following improvements are requested. (1) improvement of the Astoria-Seaside Section of US101, (2) construction of a logging truck by-pass for US101 through Seaside so as to relieve traffic congestion on Main Street which is particularly bad during the summer months. Mr. Hanna stressed the construction of the truck by-pass, declaring it very urgent and necessary from the safety standpoint. He said that the by-pass has the endorsement of all the organizations of Seaside and vicinity, including the City Council, Chamber of Commerce, Governor's Safety Council and members of the logging industry. He further declared that it is their first priority project. Mr Hanna mentioned that the people of Warrenton want a highway connection paralleling the railroad across Young's Bay to Smith's Point.

The Engineer offered the information that the by-pass referred to by Mr. Hanna is the route heretofore proposed along Roosevelt Drive and an extension thereof. Chairman Chandler inquired if the Highway Commission should relocate the highway along the proposed by-pass route, will the

City take over and maintain the present route when the new highway is built. Mr. Hanna replied in the affirmative. Chairman Chandler then explained the purpose of the Commission's trip, particularly pointing out that the Commission is seeking information for its proposed long range construction program. He assured the group that the Commission, in its discussion of this subject, will give due consideration to the projects mentioned at this gathering.

The meeting adjourned at 2:30 p. m., following which the Commission motored to Tillamook.

Tillamook, Oregon
4:00 P. M.
June 18, 1951

The State Highway Commission met with a group of citizens in the City Council chambers of the City Hall, all members being present. Local citizens present were H. C. Elliott, Mayor; Fred H. Guyton, F. J. Becker, Thomas H. Bailey, Harold E. Wade, and G. W. Rosenberg, members of the City Council; M. W. Slankard, City Manager; Otto Effenberger, County Judge, Tillamook County; C. Metcalf, Manager, Tillamook Chamber of Commerce; Vern H. Tinnerstet, Manager, Oregon Coast Association; John Aschim; E. Anderson, and Warren McMinimee, Attorney. Mayor Elliott headed the group. He inquired as to the plans of the Highway Commission for construction of a new entrance for the Wilson River Highway into Tillamook. He was informed that presently the Commission has no plans for this improvement, although surveys have been made, but a question has arisen concerning establishment of a one-way traffic plan. Mayor Elliott mentioned that one of the city streets, which is being considered in the one-way traffic set up, is in bad condition, and the city will be compelled to improve it with city funds unless the State improves it as a highway route. The Commission referred the matter to the Engineer for study and report. Judge Effenberger inquired as to the plans of the Commission for construction of the Wilson River Highway connection between Glenwood and North Plains, and was informed that the Commission has this project under study. Judge Effenberger then inquired as to the Commission's plans for development of Cape Lookout State Park. He was informed by the State Parks Superintendent that the Commission's budget contains an item for this park and he now is negotiating for the acquisition of a tract owned by Mr. Leonard. Chairman Chandler advised that the Commission has adopted a new policy with respect to parks, and now is going to spend money for developing them so people can enjoy them, rather than acquire new tracts. Mr. Tinnerstet inquired if the Commission has any plans for construction of the proposed improvement of the Oregon Coast Highway at Kilchis River. He was informed that the Commission has this project in mind and is giving it serious thought. The meeting adjourned at 4 30 p. m., following which the Commission motored to Oceanlake for an overnight stop.

Oceanlake, Oregon

June 18, 1951

Members of the State Highway Commission met in special session at 8:45 p. m. in the "B" Room of the Dorchester House. Present were:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
Milo K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
C. H. Armstrong, State Parks Superintendent
H. B. Glaisyer, Commission Secretary

Matters of routine nature, as follows, were discussed by the Commission:

Proposed improvement of McKenzie Highway in the City of Springfield: Chairman Chandler brought this matter up for discussion, particularly the city's latest proposal for the securing of credits to offset certain items in the city's agreement with the State. Assistant Highway Engineer, Mr. W. C. Williams, explained the proposal, credits, etc., and mentioned one item of $30,000 for sewer construction. He said that, insofar as dollars and cents are concerned, with the exception of this $30,000 sewer item, the proposal is satisfactory. He pointed out that the city states that it must have the Highway Commission's decision with respect to this matter by July 1, 1951, otherwise the improvement will have to take the North "A" Street route. In this connection, Mr. Williams stated that the Southern Pacific Company is strongly opposed to the South "A" Street route because it alleges its property is needed for operation, and indications are that the railroad company will fight the case if it goes to condemnation; further, that if the company loses the condemnation suit, it will probably demand unlimited time for closure of the highway for train movements, probably from twenty to thirty minutes. He added that, insofar as finances are concerned, the city's proposition is satisfactory from the engineering standpoint. The Chief Counsel questioned the authority of the city to conduct the condemnation case. He further advised that, if the case goes to court, it must be proved that the railroad company does not need its property for operation. As to the $30,000.00 item, the Chief Counsel advised that, if the drainage facility is an essential part of the improvement, then, as he understands it, the city will hypothecate city funds (funds that the city will obtain from sewer assessments) to pay this expense. In this connection, Chairman Chandler advised that the city has voted a $4\frac{1}{2}$ mill levy for five years to pay for the sewer on South "A" Street. He suggested that the city be informed that the State Highway Commission

is agreeable to the adoption of the South "A" Street route if the city will clarify the right of way matter with the Southern Pacific Company, the Highway Commission being unwilling to proceed on such route if it has to quarrel with the railroad company As a result of discussion, the Commission voted unanimously to proceed with the construction of the South "A" Street route on the condition that the City of Springfield will clarify right of way matters with the Southern Pacific Company; otherwise, the Commission will adopt the North "A" Street route.

Chairman Chandler also brought up for discussion requests from a number of counties for additions to the Federal Aid Secondary Highway system. He pointed out that certain counties to date have received no benefits from the Federal secondary funds and he gave as his feeling that the Commission should complete improvement of the roads that are included in the present system before enlarging it. He mentioned that the Engineer at the previous meeting was instructed to prepare a complete report on this subject and to furnish a map showing the improved and unimproved mileage on the present system so as to give the Commission a complete picture of the situation. The Engineer advised that the report is being prepared and will be rendered to the Commission at its July meeting.

Chairman Chandler also inquired as to what has been done concerning the securing of approval by the State Budget Director of the per diem allowance of $4.50 for men who are obliged to be away from headquarters temporarily on special assignments. The Engineer advised that the State Budget Director is now in the East, but he will contact him as soon as he returns. He also said that during the absence of the Budget Director, those in charge of his office will not take the responsibility to approve the $4.50 allowance, but will, and have, authorized the payment of $4.00 per day, which the men are now receiving.

Chairman Chandler inquired whether or not the City of Salem has fulfilled, or is fulfilling, its obligations as set forth in its agreement with the State regarding highway improvements in Salem. The Engineer was instructed to render a complete report on the subject at the July meeting of the Commission. The Chief Counsel brought into the discussion the matter of fireproofing the Taylor Building in North Salem. He advised that, pursuant to instructions of the Commission at the previous meeting, he contacted Mayor Al W. Loucks, who has agreed to waive the city's requirement with respect to fireproofing the building if no precedent will will be established thereby. However, he has not as yet received the mayor's final decision in regard to the subject. The Chief Counsel also mentioned that he has discussed with the City Attorney the question whether or not the bridge improvement on Marion Street is considered a change in grade of the city street, and the City Attorney stated that it would depend upon whether or not the city's agreement with the Commission in that regard agrees with the city charter, however, he has not yet heard from him. The Commission ordered a full report on this subject for its July meeting.

The Engineer brought up for discussion the financing of traffic signals. He advised that the 1951 budget, which was approved by the Commission in principle, contains an item of $55,000 for traffic signals within cities and, in accordance with the Commission's policy, the cities will be required to contribute one half of the costs involved. He mentioned the need to purchase pedestals for the signals, for which no provision was made in the budget, and he requested authority to transfer to such account 50% ($27,500) of the amount set up for the signals. Chairman Chandler gave as his feeling that additional signals are required, and he favored a larger appropriation for such purpose. The Engineer advised that 25 signals have already been ordered for stockpiling purposes and, if 25 more were authorized, it would satisfy the requirements for this year. As a result of the discussion, the Commission approved the Engineer's request for the transfer of $27,500 from the traffic signal account to the pedestal account, and, in addition thereto, authorized an expenditure of $50,000 for additional signals. The Engineer was instructed to report at the next meeting if more signals are required.

The Right of Way Engineer presented options obtained for right of way acquisitions, etc. These were carefully considered by the Commission and, as a result thereof, the Commission authorized the closing of the options at the prices mentioned therein. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Right of Way Engineer requested authority to reopen negotiations with Seufert Bros. for right of way needed for an improvement of the Columbia River Highway at its junction with the road leading to the new bridge over the Columbia River east of The Dalles. He recalled that three owners are involved and, when this matter was first discussed, the Commission decided to defer the negotiations for the right of way until after the first of July because it was thought that the Army Engineers would acquire all of the Seufert property, but it now develops that Congress did not provide the funds, so, if the Commission is to take advantage of the offer of Wasco County to rebuild the highway at this location, if the State will acquire the right of way, then negotiations for the right of way must be resumed at once. It was recalled that the county plans to spend approximately $70,000 for this improvement, and that the best estimate for right of way is $30,000 to $35,000. The Commission unanimously authorized the continuance of the negotiations with Seufert Bros.

County Judge Thomas Skelton, Lincoln County, and Messrs. K. Kiesow and Ernst Willer, Directors of US20 Association, were present and discussed with the Commission the matter of constructing latrines at Depoe Bay. Chairman Chandler advised that the Commission considers such matter a local problem, beyond its jurisdiction. He explained that the Commission constructs such structures in its State parks, but does not

provide them in towns. He said if the Commission should approve the request of the people of Depoe Bay, it would have to treat other places in the same manner, which would soon run into a lot of money. He further stated that the Commission feels that it would be improper to spend highway funds for such purposes in such localities. Judge Skelton asked the Commission to expedite the proposed improvement of the Toledo-Corvallis Section of the Corvallis-Newport Highway. He was informed by Chairman Chandler that this project definitely is coming up soon.

The Right of Way Engineer brought to the Commission's attention a request from Mr. and Mrs. Daniel G. Emrich for a change in the access point heretofore granted them on the Sunset Highway between North Plains and Gardner Ranch. He said that the change is for the convenience of the property owners and has been approved by the Assistant Highway Engineer and the Division Engineer. He recommended approval by the Commission. The Commission approved the recommendation unanimously. (An "Indenture of Access" was signed later in the session.)

The Right of Way Engineer also requested approval of a change in access on the Greenleaf Bridge Section of the Siuslaw Highway, which is necessary in order to conform with certain details of the right of way option obtained from Mr. Virgil A. Parker. He said that the access point was erroneously described in the deed of conveyance, which had been made a matter of record, and the change is recommended in order to protect the grantors. The Commission approved the change unanimously. (An "Indenture of Access" was signed later in the session).

The Commission had under discussion an offer from the US Civil Aeronautics Administration to transfer to the State certain Government-owned property located on land which the Government is leasing from the State at Bridal Veil.

The Engineer advised that the property referred to consists of a steel tower, cable, wire and poles, which can be used to advantage by the State Highway Department. He further stated that the Civil Aeronautics Administration wants the State to take over this property in lieu of restoring the premises to its original condition. He recommended acceptance of the offer. The Commission approved the recommendation unanimously. (An agreement covering the matter was signed by the Commission later in the session.)

The Engineer reported a conversation with Mr. Raymond P. Botch, City Manager of Pendleton, regarding an editorial which recently appeared in the Pendleton East Oregonian concerning the Commission's plan to sell a small tract of land situate along the southwest side of US30, approximately between S. W. 17th Street and Umatilla River. It appears that the Commission is being criticized for its decision to dispose of property in the manner planned. The Engineer recalled that the Commission previously decided to sell the property to the highest bidder therefor, at a price not less than $21,500.

and that the advertisement is now being published in conformity with the legal requirements, bids to be received in Salem on July 5, 1951. The Commission decided unanimously not to change its position in regard to this matter.

The Chief Counsel reported that he has reached settlements in the following condemnation cases:

(1) State vs. Burrows, concerning property in Coos County, settlement reached $3,000.

(2) State vs. Leiser, concerning property in West Salem, settlement reached $800.

The Commission approved both settlements unanimously.

The Chief Counsel requested instructions regarding the proposed sale of highway bonds. He particularly mentioned an inquiry from Mr. John W. Shuler, Special Counsel retained in this matter, as to how the Commission desires the bonds to be matured, on a callable or uncallable basis. The Commission decided unanimously to sell the bonds on a definite maturity basis.

The Chief Counsel brought up for discussion matters pertaining to the Commission's case against the State Construction Co. for failure to accept the contract awarded the company for construction of piers for the Marion Street bridge in Salem. He said that question has been raised as to whether or not the Commission has legally awarded the contract because notifiction of the award was not given the contractor until some time after the bids were opened, and there is a possibility that the State's case may be injured thereby. The Commission decided unanimously, not withstanding this feature, to proceed with the case in court, in order to determine the value of the proposal bond.

The Commission had under discussion salary increases for engineering employees and right of way agents as heretofore recommended by the Engineer and the Chief Counsel, and approved such salary increases unanimously. The Commission thereupon signed two letters directed to the Oregon State Civil Service Commission recommending approval of the increases, one of the letters being dated June 14, 1951, setting forth arguments in behalf of increases for engineering employees, and the other dated June 18, 1951, giving reasons why the salaries of the right of way agents should be increased. (For details, see copies of both letters in General Files.)

The Chief Counsel reported that he has received a request from the Attorney General, Mr. George Neuner, that Fred Miller be appointed Assistant Counsel for the State Highway Commission. He recommended approval of the request. After due consideration, the Commission approved

the recommendation. Motion was made by Commissioner Reynolds that Clifton W. Enfield be designated First Assistant Counsel and that Fred Miller be designated Second Assistant Counsel. The motion was duly seconded by Commissioner McIver and carried by the unanimous vote of the Commission.

The Engineer reported on the request from the City of Gold Beach for certain oiling and maintenance work on some of its city streets. He advised that the request has been investigated by Mr. W. W. Stiffler, Assistant Highway Engineer, who states that the city really wants a dust palliative applied to certain streets and maintenance patching on the streets which recently were oiled by the State under contract. The investigation also revealed, he said, that the streets on which the city wants oil applied do not have sufficient base to support an oiled surface, which information was conveyed to the City Council with the result that the city has deferred its request for such oiling. As to the maintenance patching work, he said that inspection reveals that the recently oiled section around the court house is not in need of patching at the present time. He recommended, when such maintenance work becomes necessary, that it be performed with State forces provided the city will agree to pay the costs with city funds. The Commission approved the recommendation.

The Engineer reported the results of receiving bids in Salem on May 28, 1951 for the purchase of scrap materials stored at the highway shops in Salem, Coquille, Klamath Falls and LaGrande. He presented a tabulation showing the high bid received for each item and recommended acceptance of the same by the Commission. The Commission approved the recommendation unanimously. (For details, see tabulation of high bids in Commission files.)

The Engineer reported briefly on a request from citizens of Yachats for the rerouting of the Oregon Coast Highway through this town. He said that the route suggested by the citizens, known as the Hill Route, is entirely unsatisfactory and that the best one would cross the Yachats River some distance west of the present bridge. He further advised that a formal report on the subject will be rendered to the Commission at its next meeting. The Commission took no action, pending the report, but decided to discuss the matter on the following day with Mr. M. E. Sherwood, owner of "Sherwood Lodge", situate on the south bank of the Yachats River, who is particularly concerned.

A communication was presented by Mr. Don Lane, Manager, Jackson County Chamber of Commerce, suggesting, as an accomodation to fishermen, that roadways be constructed from bridge ends to fishing streams so as to permit access to the streams for the launching of boats. The Commission denied the request because of the expense involved, and the impractibility of constructing such roadways.

The Engineer requested authority to construct a temporary equipment storage shed at Elkton on the Umpqua Highway, Douglas County, to replace rented quarters that were recently destroyed by fire. He estimated the cost of the building at $2,500, and suggested the transfer of such sum from the amount budgeted for construction of a truck bay at the Chemult maintenance station. The Commission unanimously approved the expenditure.

The Engineer reported that in conformity with authority previously granted him by the Commission, he has awarded contracts for highway construction projects as follows, the conditions of the awards having been satisfied:

Construction of Metolius-Culver and North Unit, Culver-Juniper Butte Sections on the Metolius-Culver and Culver-Juniper Butte County roads near the towns of Metolius and Culver, Jefferson County. Bids received May 24, 1951, contract awarded June 12, 1951 to F. L. Somers, low bidder.

Grading and paving Tillamook (Miller Avenue) Project in the City of Tillamook, Tillamook County. Bids received May 24, 1951, contract awarded May 31, 1951 to C. H. Grimstad and T. Vanderveldt, low bidder.

Grading, paving and construction of two bridges on the Bunker Hill-Delmar Section of the Oregon Coast Highway, Coos County. Bids received April 12, 1951, contract awarded May 25, 1951, to Porter W. Yett, low bidder.

Construction of the Hood River-Mosier Section of the Columbia River Highway in Hood River and Wasco Counties. Bids received April 12, 1951, contract awarded June 7, 1951, to General Construction Co., low bidder.

Grading and paving Bridgeton Road-Gertz Road and Columbia Slough-Columbia Boulevard Sections of the Pacific Highway East. Bids received May 25, 1951, contract awarded June 13, 1951, to R. A. Heintz Construction Co., low bidder.

East Unit, Antelope-Clarno Section of Shaniko-Fossil Secondary Highway, Wasco County. Bids received May 25, 1951, contract awarded June 13, 1951, to F. L. Somers, low bidder.

The Commission unanimously confirmed the awards as reported.

The Commission had under discussion a request from City Electric Inc., Salem, for an extension of time of 90 days from May 31, 1951 to August 31, 1951, within which to complete their Contract No. 3435 for installation of traffic signals on the Pacific Highway East in Salem. The company alleges their failure to complete the project within the specified time limit was due to delays in the delivery of necessary materials. The Engineer advised that the reason given by the contractor for overruning the specified time limit is correct; that he is conducting his work as rapidly as he can under prevailing conditions, and that the delay has been through no fault of the contractor. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation unanimously.

The action taken by the State Highway Commission upon the request of City Electric Inc. for an extension of time within which to complete its above-mentioned contract, was based upon the recommendation of the State Highway Engineer and his report, which considered but did not necessarily adopt the reason given by the contractor for failure to complete the project within the specified time limit.

The Engineer reported that Contracts No. 3312, 3344, 3419, 3426, 3455 and 3458 for construction of State Highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by adoption of the attached resolution relative thereto marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a request from Mrs. Kathryn Moore, Wolf Creek, Oregon, presented by her attorney, Mr. Raymond C. Coulter, Grants Pass, for additional access on the Pacific Highway from her business establishment at Wolf Creek. The Engineer recalled that this matter has been before the Commission on several occasions in the past few years, and that, in every instance, the Commission has denied Mrs. Moore any more access to the highway than was provided for in the option obtained from her in connection with the right of way settlement. To grant an additional approach to the highway now, he said, would be contrary to the established policy of the Commission in retaining access rights once purchased, and he recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed, and upon recommendation of the Engineer, approved a request of Mr. Jack Harber, Estacada, that he be granted permission to conduct truck-hauling operations across a State highway quarry site situate approximately one mile south of the town of Jefferson, Marion County. (Agreement covering the matter was signed by the Commission later.)

The Commission also discussed, and, upon recommendation of the Right of Way Engineer, approved the renewal of a lease agreement with Carl O. Nelson and wife covering a maintenance headquarters at Milo, on the Tiller-Trail Highway in Douglas County. (An agreement was signed later.)

The Commission discussed a proposed agreement with Clatsop County providing for disposal of portions of the Lower Columbia River Highway (old route) in Clatsop County, which have been rendered useless for State highway purposes by reason of alignment revisions. The Engineer exhibited a map showing the portions referred to and recommended approval of the agreement. The Commission approved the recommendation. (The agreement was signed by the Commission later.)

Consideration was given by the Commission to the disposal of a portion of the Klamath Falls-Lakeview Highway (old route) between Quartz Mountain and Drews Valley, Lake County, where the highway has been realigned. The Engineer exhibited a map showing the portions affected and recommended retention of certain sections, and abandonment of other sections in favor of Lake County, which arrangement, he said, is pursuant to agreement hereto reached with the county court. The Commission approved the recommendation unanimously by adoption of the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from the Bureau of Public Roads pointing out that since Oregon Federal Aid Secondary Route No. 234 has been extended over Oregon Forest Highway Route 16 (Tiller-Trail), it becomes necessary, in compliance with the revised rules and regulations for administering forest highways, to change the classification of this route from Class 3 to Class 2. The Bureau asks the Commission to join with the Bureau of Public Roads and the US Forest Service in recommending such classification change to the Chief, Forest Service and Commissioner, Bureau of Public Roads, Washington, D. C. The Commission unanimously approved the request and thereupon signed the following letter in regard thereto.

"Chief, Forest Service
Commissioner, Bureau of Public Roads
Washington, D. C.

"Gentlemen:

"The Forest Highway System selected and submitted by the Oregon State Highway Commission, pursuant to the Rules and Regulations for administering Forest Roads and Trails under the provisions of the Federal Highway Act was approved by the Department in accordance with the recommendations of the Bureau of Public Roads and the Forest Service under date of March 19, 1924 and certain revisions were approved by subsequent letters.

(cont.)

"Inasmuch as the Rules and Regulations for Administering Forest Highways (Revised), approved by the Secretary of Agriculture and the Secretary of Commerce, and published in the Federal Register of March 22, 1950, stipulate that approved Forest Highways on the Federal-aid secondary system shall be classified as Class 2 Forest Highway routes and since Oregon Federal Aid Secondary Route 234 has recently been extended over Oregon Forest Highway Route 16, it is now recommended that the approved Forest Highway System for the State of Oregon be revised to change this route from a Class 3 route to a Class 2 route, as follows:

'Route No.	Name	Termini	Length	Class
16	Tiller Trail	Tiller to Trail	26.3	2

"This revision will bring official Oregon Forest Highway mileage to the following totals:

MILEAGES

"Class 1	Class 2	Class 3	TOTAL
716.8	376.9	288.1	1381.8

"No other changes in the system are contemplated at this time.

Yours very truly,

W. H. LYNCH,
Division Engineer

RECOMMENDED FOR APPROVAL

/s/ W. C. Williams
ASSISTANT STATE HIGHWAY ENGINEER"

June 18, 1951

The Commission discussed and approved an agreement with Mr. Henry Zorn, covering his lease of a portion of Champoeg State Park for agricultural purposes. In the discussion of the matter, it was pointed out that the lease agreement covers the period from January 1, 1951 to December 31, 1954, and that the consideration is $225 per year plus such taxes as may be assessed against the property. (The agreement was signed later.)

The Commission also discussed, approved, and later in the session signed two letter agreements with the Oregon-Washington Railroad and Navigation Co. and the Union Pacific Railroad Company, whereby the St ate is permitted entry on railroad property at Shogren overcrossing east of Mosier, Hood River County, for the purpose of permitting subsurface explorations needed in connection with a proposed highway improvement at this location.

The Engineer reported that, due to changed conditions, it no longer is necessary to retain the restricted load limitations on the Weston-Elgin State Secondary Highway No. 330 from its junction with the Oregon-Washington Highway at Weston to its junction with the county road which leads to Summerville, and, accordingly, he authorized the lifting of the restriction on Saturday, June 2, 1951. He asked the Commission to confirm his action. The Commission by unanimous vote approved the Engineer's action in this matter by adoption of the attached resolution in regard thereto marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer brought up for discussion the matter of reclassifying certain highways from their present classification as Group II highways to a Group I status. The highways involved are (1) Lower Columbia River Highway between Rainier and Astoria, (2) Oregon Coast Highway between Port Orford and Pistol River, (3) Williams State Secondary Highway from its junction with the Redwood Highway to the South Side County Road about a half mile south of the town of Murphy, and (4) the Alsea Highway from its junction with US101 at Waldport to the junction with Fisher County Road. The Engineer explained that these highways have been carefully examined with trial and test runs, and it has been determined that a combination of equipment of truck tractor and full trailer, having an over-all length of 60 feet, can safely negotiate them, or sections thereof, without hazard to other traffic and without any encroachment upon the opposite traffic lane. He recalled that the Commission by its resolution adopted on August 2, 1949, granted him authority to reclassify highways after an engineering examination has been conducted, and he recommended that the Commission approve his action in reclassifying the above mentioned highways from the Group II status to Group I status. The Commission approved such reclassification by unanimous vote.

The Right of Way Engineer brought up for discussion a proposed agreement with Mr. and Mrs. Joseph C. Kaphammer, Troutdale, to settle a damage claim that they have presented against the State. It appears that Mr. and Mrs. Kaphammer executed and delivered to the State a certain real estate option dated October 10, 1947, whereby the owners agreed to sell to the State certain real property consisting of 1.01 acres of land, which was needed as right of way for the Troutdale Section of the Columbia River Highway (new route). It also appears that the option contained provision for the State to carry a certain creek beneath the new highway in such a manner that the owners would have the same amount of water upon their remaining property as before the highway was constructed. It also appears that the State did provide for carrying the creek beneath the highway by means of siphon pipes, but the owners allege that the pipes have retarded the flow of the water and have caused damage to their remaining property, but they are willing to waive and release the State from all claims and demands for damages if the State will exchange certain properties with them. The Right of Way Engineer exhibited a map showing the properties involved, and explained details. As a result of the discussion that followed, the Commission unanimously approved the settlement. (Agreement covering the matter was signed later)

A letter was presented from the Coos Bay - North Bend Water Board stating its desire to purchase a small parcel of Highway Department land situate at the intersection of Newmark Street and Highway 101 in the City of North Bend. The Right of Way Engineer exhibited a map showing the location of the property which is described as the westerly 30 feet of Lots 1 and 2, Block 29, Platt "B" in the City of North Bend, and he advised that the Water Board is willing to pay $235 for this property, with complete restriction of access with the Oregon Coast Highway. He recommended that the property be sold to the Water Board at such figure. The Commission approved the recommendation unanimously.

The Commission discussed and ordered filed a letter from the Recreational and Natural Resources Committee of Portland Chamber of Commerce commending the Commission on its plans to expand wayside picnic areas along State highways.

The Commission also discussed and ordered filed a resolution from the Newberg Chamber of Commerce in which the Chamber goes on record in favor of increasing State highway allocations to cities and counties.

The Commission discussed, and upon the recommendation of the Engineer and the Chief Counsel, approved an agreement with the City of Portland covering construction and illumination of channelizing islands, and installation of traffic-controlled signals, along the Pacific Highway East (S.E. McLoughlin Boulevard) from Ross Island Bridge to the south city limits of Portland. (The agreement was signed by the Commission later.)

The Commission discussed briefly matters pertaining to the proposed bridge over the Coquille River near Bandon, Coos County, commonly known as the Bullard's Bridge. In the discussion, the Engineer advised that the bridge was originally estimated to cost about $600,000, 50% of which was to be paid by Coos County; however, the present day estimate is $690,000 and the county's share, considering it is to pay 50% of the construction costs now is $345,000. The Commission took no action.

The Commission considered the appointment of someone to act as Secretary during the absence from the State of the Commission's Secretary, Mr. H. B. Glaisyer, during the period June 24, 1951 to July 7, 1951. As a result of the discussion, the Secretary's assistant, Mr. Floyd A. Query, was appointed "Acting Secretary" for such period. The attached resolution relative thereto, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote upon motion by Commissioner Reynolds, duly seconded by Commissioner McIver.

Consideration was given by the Commission to setting a date for its regular meeting in August, but action thereon was deferred until later.

The meeting adjourned at 11:00 p.m.

June 18, 1951

Coos Bay, Oregon
June 19, 1951

The members of the State Highway Commission and its group were luncheon guests of the Coos Bay Chamber of Commerce and Coos Bay Rotary Club at 12:00 Noon, in the Pirates Den of the Tioga Hotel. Following the luncheon, the assemblage was called to order by Dr. Raymond C. McKeown, president of the Coos Bay Chamber of Commerce, who extended a welcome to the highway group. The members of the Commission were then introduced and each responded briefly, Chairman Chandler explaining the purpose of the Commission's trip and introducing the members of the Commission party. The meeting adjourned at 1:00 p.m., following which the Commission motored to Gold Beach for an over-night stop at Sunset Inn.

Gold Beach, Oregon
June 19, 1951

The Highway Commission group were dinner guests of the Gold Beach Chamber of Commerce, at 7:00 p.m., in the dining room of the Sunset Inn. Following the dinner, a brief business session was held with Mr. Orville Gensmer, President of the Chamber of Commerce, presiding. Among the local people present were Mr. C. H. Young, Banker; Dr. W. A. Cartwright, Mayor; Mr. Bill Moore; Alice Costello, Secretary of the Chamber of Commerce; Mr. Elmer Parker, President, Brookings Chamber of Commerce, and Mrs. Parker. Mr. Gensmer welcomed the Commission group in behalf of the Chamber of Commerce, and Dr. Cartwright extended a welcome in behalf of the city. Mr. Young expressed appreciation for completed improvements on the Oregon Coast Highway, and for those which now are under way in Curry County. He asked the Commission to authorize additional improvements. Chairman Chandler responded by explaining the purpose of the Commission's trip. He also advised that, in distributing the highway funds, the Commission must look at the picture from a state-wide standpoint and cannot show favoritism to any particular section, so that, in the final analysis, each section of the State will receive its share of the revenues. He mentioned a proposed improvement of the Oregon Coast Highway between Patterson Bridge and Giesel Monument, concerning which, he said, the Commission is now pondering over the question whether to build an entirely new road or to improve the present one, considering that the highway carries such a heavy volume of traffic. Mr. Young suggested that an entirely new road up the coast will provide a much better facility. Mr. Moore mentioned that a bad condition exists on the present route between Patterson Bridge and Giesel Monument where washouts occur and he suggested that something should be done soon to protect the present highway, otherwise it will be destroyed by another bad winter and in that event Gold Beach will become isolated.

Mr. suggested improvement of US101 over Linville Hill as the most desirable project. Mr. and Mrs. Parker spoke briefly for the people of Brookings. The meeting adjourned at 9:45 p.m.

Brookings, Oregon
June 20, 1951

The Highway Commission met with representatives of the Brookings Chamber of Commerce in Chetco Inn, at 10:00 a.m. Coffee was served, following which Mr. Elmer Parker, President of the Brookings Chamber of Commerce introduced the members of the Commission, who responded with a few brief remarks. Commissioner Reynolds explained the purpose of the Commission's trip. The meeting adjourned at 10:30 a.m., following which the Commission motored to Grants Pass.

Grants Pass, Oregon
June 20, 1951

Following luncheon in the Redwood Hotel dining room, the Commission at 2:40 p.m. conferred with a group of Grants Pass business men representing the local Chamber of Commerce. Local persons present were Messrs. Howard Michael, President, Chamber of Commerce; Hon. Morris Milbank, Mayor; Raymond Lathrop, County Judge; John Parker, City Manager; Chas. McLean, representing Highway Committee Chamber of Commerce; Fred Pierson, representing Redwood Highway Association; and Mr. John Dillard, Cave Junction. Mr. Michael presided. Members of the highway group were introduced. Mr. Michaels explained that they have no particular project in mind, but their meeting with the Highway Commission is simply to get acquainted and to obtain, if possible, an over-all picture of the highway program. The members of the Commission responded, Chairman Chandler stating the purpose of the trip. The meeting adjourned at 3:00 p.m , following which the Commission motored to Ashland for an over-night stop.

Medford, Oregon
June 20, 1951

The Commission and its group were dinner guests of the Jackson County Chamber of Commerce at the Rogue Valley Country Club, Medford, at 7:30 p.m. This gathering was purely social.

Roseburg, Oregon
June 21, 1951

The Commission and its group were guests of the Roseburg Chamber of Commerce for luncheon at Carls Haven, at 12:00 noon. The following were present:

Ben R. Chandler, Chairman
Chas. H. Reynolds, Commissioner
Milo K. McIver, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, Asst. State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary,

and the remaining members of the party. Following luncheon, a short business session was held. Mayor Albert G. Flegel of Roseburg, presiding. Mayor Flegel extended a welcome to the highway group and advised the only thing they wish to discuss with the Commission is the proposed relocation of the Pacific Highway through Roseburg. He mentioned that the City Council had previously approved a location through the westerly part of their city, but criticism developed because of the proximity of the proposed location to their Community Hospital, and it is their hope that the differences can be ironed out satisfactorily. He called upon Mr. George Neuner, Jr., Attorney, to present the ideas of the Roseburg Chamber of Commerce. Mr. Neuner read aloud a resolution that was adopted by the Board of Directors of the Roseburg Chamber of Commerce at a meeting on June 20, 1951. He particularly pointed out six suggestions as follows, which they believe the Highway Commission should adopt to alleviate the objections offered by the Community Hospital representatives:

1. The alignment should be moved easterly from its present proposed location as far as practicable;

2. Any interchange of traffic at Harvard Avenue should be eliminated;

3. The traffic interchange should be installed to the south of Military Avenue;

4. Measures for sound isolation and air conditioning of the Hospital should be devised;

5. The traffic interchange for proposed Clover Leaf as moved to the south, should be so designed so as to accommodate the future construction of a new bridge across the South Umpqua River to accommodate traffic into the heart of the present business section of Roseburg;

6. The Commission should study the overall problem occasioned by the proximity of the highway to the Hospital and make such suggestions, changes and propose such devices as will alleviate the problems to the Douglas Community Hospital.

He presented the Commission a copy of the resolution. (For details of the resolution, see copy in General Files).

Mr. D. R. Dimmick headed the group representing the Community Hospital. He referred to the memorandum previously submitted to the Commission in behalf of the hospital group and advised that, if the plan offered by the Chamber of Commerce in its resolution, does not prove feasible, then they would like the Commission to consider an alternate plan providing (1) for utilization of the present hospital for highway purposes and construction of a new hospital on a different location, (2) rerouting the highway on a location that would not interfere with the Community Hospital. He asked the Commission to send its engineers to Roseburg to work out a solution of the problem. Dr. J. L. Haskin, head of the Veterans Hospital in Roseburg, spoke in support of Mr. Dimmick's remarks. He pointed out that the proposed highway comes within one hundred yards of the hospital grounds and will necessitate relinquishment of their recreational field, which was provided largely by local contributions. Mayor Flegel mentioned that the city wants the highway constructed as close to downtown Roseburg as possible. Chairman Chandler responded by stating that the Commission will weigh seriously all factors and will endeavor to arrive at a solution of the problem that is satisfactory to all concerned. The meeting adjourned at 1:30 p.m., following which the Commission motored to Eugene for an over-night stop, inspecting projects en route.

Eugene, Oregon
June 21, 1951

The Highway Commission and the members of its group were dinner guests of the Eugene Chamber of Commerce in the Eugene Hotel. The meeting which followed was purely social, with no formalities.

The Commission concluded its trip on Friday, June 22, 1951. Leaving Eugene, the Commission motored to Corvallis, Albany, Salem, thence to Portland by Wilsonville cut-off. A number of highway projects were inspected enroute. There were no formal gatherings on this date.

The following papers were signed by the Commission during the progress of the trip:

Agreement with City of Portland covering the construction and illumination of channelizing islands and installation of traffic control signals along Pacific Hwy. E. (S.E. McLoughlin Blvd.) from Ross Island Bridge to south city limits.

Letter Bureau of Public Roads re changing classification of Tiller-Trail Hwy, from Class 3 to Class 2.

"Indenture of Access" granted Virgil A. Parker to correct the access points on the Greenleaf Bridge Section, Siuslaw Hwy. to conform with details of the option.

"Indenture of Access" granted Ernest Zurcher covering change in access point on North Plains-Gardner Ranch Section, Washington County.

Agreement with Clatsop County providing for abandonment of a portion of Columbia River Highway, rendered useless for highway purposes by reason of alignment revisions.

Permit Agreement granting Jack Harbert permission to conduct truck-hauling operations across State property, approximately one mile south of Jefferson, Oregon.

Lease Agreement with Carl O. Nelson and wife covering Milo maintenance headquarters on the Tiller-Trail Highway, Douglas County.

Letter from Union Pacific permitting entries on railroad property at Shogren overcrossing, east of Mosier for drilling purposes.

Agreement with Henry Zorn covering use of portion of Champoeg State Park for farm purposes.

Agreement with Joseph C. Kaphammer and wife to eliminate damage claim on Kaphammer property at Troutdale.

Agreement with U. S. Civil Aeronautics Adm. to transfer to State certain Government-owned property located on land which the Government is leasing from State at Bridal Veil, in lieu of restoring the premises to original condition.

Memorandum of First Modification on Oregon Forest Highway Project 27-A4, B5, Ochoco.

Agreement with Lyda Brothers covering the use of an area along the Wilson River Highway in Tillamook County for transportation of timber.

Agreement with City of Stayton covering the proposed $250,000 city allotment project on 4th street in city.

Easement for Channel Improvement, Row River, Lane County, with Corps of Engineers.

EXHIBITS "A" THROUGH "E"

INSPECTION TRIP

June 18 - 22, 1951

EXHIBIT "A"

Minutes of June 18, 1951

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other materials sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

UNIT # 4 - T. H. BANFIELD EXPRESSWAY

14858 - Ertz, Harry E. and Mildred G. (Johnson)
Right of Way
Option expires November 6, 1951

4,500 sq. ft. at $0.25 per sq. ft. $ 1,125.00

Amount to be paid owner - chrg to Right of Way $ 1,125.00

Takes All -

(cont.)

EXHIBIT "A" (cont.)

UNIT #5 T. H. BANFIELD EXPRESSWAY

17680 - Graymer, Peter J. & Marie V. (Johnson)
Right of Way
Option expires November 21, 1951

Approximately 3.75 acres at $900.00 per acre.	$ 3,375.00	
House - 822 sq. ft. at $5.00 per sq. ft.	4,110.00	
Garage, bunkhouse & shed	1,032.00	
Barn & chickenhouse. 663 sq. ft.	1,326.00	
Allowance - outdoor fireplace, lawn, shrubs, berries, orchard, drive, paved walk & arbor	657.00	
Amount to be paid owner - chrg to Right of Way		$ 10,500.00

State to assume 1951-52 and subsequent taxes on property.

Takes all -

CASCADE LOCKS-VIENTO SECTION - COLUMBIA RIVER HIGHWAY

15167-A-Morgan, Monroe L. and Breta A. (Mayhew)
Right of Way (Slide Area)
Option expires July 24, 1951

36.52 acres	$ 6,926.00	
Approximately 676 sq. ft. new frame house, electric floor furnace, hardwood floors, picture window, attached garage and fireplace.	7,436.00	
Motel cabins - 5 quarters attached to each other, with garage.	13,750.00	
Allowance - water system, pipe, oil shed, restroom facilities, plans for outfitting 4 more tourist cabins.	488.00	
Amount to be paid owner - chrg to Right of Way		$ 28,600.00

Takes all -

Approved by Ben R. Chandler - May 31-1951
